GOOD LAYING HOUSE IS WAY TO GET MORE EGGS

Whether pullets lay well enough to show a good profit during the fall and winter months often depends on their housing. The additional cost of good housing is a minor item compared with the feed cost and labor involved in caring for the flock, observes W. R. Whitfield, extension poultry man at Iowa State College.

One-half dozen more eggs per hen each year will pay for the cost of a good house, with interest on the money invested. Now while housing materials are at a low ebb, is the time to investigate what is needed to make improvements in the laying house or to build a new house. Then when materials are available, mistakes in construction can be avoided

Many poultry houses being used are a liability instead of an asset. The poultryman would be ahead, so far as profits are concerned, if such houses were empty, Whitfield declares. A 2 to 3-day subzero period in a poorly constructed house could cause the birds to take in the loss of 2 to 3 dozen eggs during the winter.

Houses with a fairly good foundation and roof structure, however, could be remodeled by insulation and proper installation of ventilators. Cost would be slight and much would be achieved in improved performance of the flock.

We'll bet that time and again Hitler wishes he had that old paint job back again.

TEMPORARY SILOS SAVE MUCH GOOD FEED

May Be Built Of Slat Fencing, Heavy Building Paper, Or As A Trench

For the Iowa farmer who has soft corn this fall, temporary silos offer an excellent means for saving and storing the entire corn plant for feed.

C. H. Van Vlack, extension agricultural engineer at Iowa State College, says trench silos or silos made of snow fence or corn bundles will serve satisfactorily if care is used in constructing and filling them.

Trench silos should be located in heavy soil, free from sand and rock, and preferably on high ground. An ideal place is in a side hill or knoll located near the feedlot. One end of the trench should be lower to facilitate feeding and removal of silage and to provide good drainage. Trench silos should be fenced off to prevent livestock from trampling in and around them

Pack Carefully

Silos made of snow fence or corn cribbing and lined with heavy, reinforced building paper may be used where soil conditions do not permit a trench to be dug or where there is not a suitable location for a trench In filling such silos, the silage should be packed carefully, to distribute the weight evenly so as to prevent the silo from leaning and falling over. Slat cribbing, snow fence or heavy welted lawn fences are the best materials to use for silos of this type. After the silo site has been located, it should be leveled by grading

In silos where corn bundles are used for walls, the diameter can be fairly large The silage from such a silo should be fed rather rapidly

Extension Circular 202 available from the Agricultural Extension Services, Ames, Iowa, contains additional information on building and use of temporary silos.

2,277 LOST LIVES IN RAIL-ACCIDENTS IN 6 MONTHS

Washinngton, —The interstate commerce commission announced Tuesday that 2,277 persons, including passengers, employes and trespassers, lost their lives in railroad accidents in the first 6 months of 1944, a decline of 72 compared with the same period last year.

The number injured during the same period totaled 28,970, an increase of 113.

The number of train accidents involving more than $150 damage to railway property rose from 8,209 in the 1943 period to 8,219 in 1944.

The number of passengers killed during the first half of the year was 42, an increase of one over 1943. The number injured was 1,973, a decrease of 456. The heaviest number of fatalities occured among employes —520; trespassers —716, and persons involved in grade crossings and other types of accidents—991.

Eight travelers who were not on trains were killed during the first half of the year, the same as in 1943, and the number injured fell from 567 in 1943 to 527 in 1944.

CRICKET THERMOMETER

(Earl Hall In Globe Gazette)

I think you'll have fun trying out this formula for determining the temperature on any night when the crickets are out in chours:

1. Take out your watch.
2. Time the cricket chirps for a 14 second period.
3. Add the number of chirps in that time to the figure 40.
4. This total will always give you the present temperature within 2 degrees—and more often right on the nose.

LATEST IN PANTS

Kansas City, Kans. — When Mrs. Thomas Granberry went to take a pair of her husband's trousers off the clothesline in the back yard of their home here recently, she found that a wren had built a nest in one of the trouser's pockets. The sympathetic housewife not only left the new nest in the pocket, but cut the legs off the trousers so that cats might not climb up and catch the birds. At last reports Granberry had admitted that he had lost the trousers, but he had 4 wren's eggs in the pocket.

500 GERMAN SUBS HAVE BEEN SUNK

Washington, —A joint report by President Roosevelt and Prime Minister Winston Churchill disclosed Wednesday night that more than 500 German submarines have been sunk by allied forces since the war began.

Polls Show Mexicans Prefer Spanish People

Mexico has its own public opinion poll, closely resembling the Gallup Poll in the United States. And its latest sampling of what typical cross-sections of the population are thinking would indicate that most Mexicans prefer Spanish, French and Italian immigration to any other non-American immigration after the war.

The two weeks' survey, limited to this city, was conducted by the Instituto Cientifico de la Opinion Publica under the supervision of Dr. Laszlo Radvany, former director of the University in Exile of Paris. Of 2,237 residents polled on the type of European or Asiatic immigration which would benefit the country most after the war, about 35 per cent favored Spaniards and 33 per cent voted for the French. England and other American republics were not included in the survey.

Other results gave 13 per cent of the votes to Italian immigrants; 4.5 per cent to the Chinese and about 3 per cent to the Russians. Less than 2 per cent of those polled favored postwar German immigration and less than 1 per cent indicated a willingness to see Japanese set foot in Mexico in the future.

Wood Coated With Wax Will Check Warping

When the front door swells, the bureau drawers stick, the dining table warps, and the ironing board bulges, blame the weather, say wood experts. Wood, especially unfinished wood, absorbs moisture from the air in warm, humid weather and swells. While the wood is swollen, not much can be done except to ease tight places by rubbing with wax. But later when heat has dried out the house and brought the wood back to normal size, coat the underside of tables and other unfinished wood surfaces with varnish or wax to prevent the wood from taking in so much moisture again.

The bulged board that adds to home ironing difficulties is a problem to many homemakers. Ironing boards are usually unfinished, and kept in damp laundries or kitchens. In ironing, steam from damp clothes is driven down into the wood. Wood experts advise buying a thoroughly seasoned board at least an inch and a half thick, because thick wood warps less than thin, and giving it several all-over coats of good spar varnish. Cleats of hard wood nailed to the underside of the board help to hold it flat. Keep the board in a dry place.

A MEAN TRICK

"I don't know what we're going to do," exclaimed a Topeka woman. "Our washerwoman took two of our best towels when she quit." "Which one's were they," asked her husband.

"One was marked Hotel Broadview and the other Y.M.C.A."

NO EXPERT ADVISE

Secretary Morgenthau rejoices that the management of the proposed international bank and the international stabilization fund is to be kept out of the hands of bankers who probably might know what to do with our money placed at their disposal. Poultry raisers preferred?

We can print anything. Call at the Times Office.

START WORKING AREAS NOW, THAT HAVE WEEDS

Iowa farmers contemplating control of large areas of noxious weeds in 1945 should take every advantage during the rest of this year to weaken the weed pests, suggests E. P. Sylwester, extension plant pathologist at Iowa State College.

Research has shown that much food stored in the underground roots of perennial weeds is manufactured in the leaves after the weed has finished bloming. Accordingly, any method which prevents food storage at this time will weaken the plants.

Tillage operations must be thorough to be effective, Sylwester declares. Weed-infested areas should be plowed as soon as possible after this year's small grain crop has been removed. The area should be surface-cultivated or spring tooth harrowed whenever new weed growth appears. Such cultivations should continue until after frost this year and be resumed next spring and continued until June 1.

Next June a smother crop, such as soybeans, sorghum, sudan grass or millet, should be planted on the area. After this crop is harvested, the plowing and cultivating program should be repeated.

It usually takes from 3 to 4 years to kill the worst noxious weeds However, no crop is lost in the meantime.

A heavy stand of alfalfa is the best follow-up crop to use n land after the smother crop program has been completed, Sylwester declares. Alfalfa in itself is a good smother crop and prevent weeds from getting reestablished.

Noxious perennial weeds which may be controlled by several successive seasons of smother crops include: Quack grass, perennial sow thistle, Canada thistle, horse nettle, bindweed, leafy spurge, perennial peppergrass and Russian knapweed.

The best way to make a lot of enemies is to lend money indiscriminately to your friends

THANK YOU!

We wish to extend our deepest gratitude to the Klemme Fire Department for their sincere efforts in trying to extinguish the fire of August 8th.

1tp Mr and Mrs. Irving Haupt.

WEEKLY NEWS ANALYSIS

Motorized Columns Spearhead U. S. Advance Across Brittany; Current Budget Tops 98 Billion

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

France—With comrades covering their advance with gunfire, U. S. infantrymen sprint down village street in Normandy to new positions.

EUROPE:
Drive On

Smashing through weak, disorganized German resistance, U. S. forces bursting out of Normandy plowed into Brittany, with powerful motorized columns driving on the big seaport of Brest and the Nazi submarine base of St. Nazaire.

While Lieut. Gen. Omar Bradley's U. S. forces put the foe to rout in the west, British troops smashed forward in the central and eastern sector of the front against stronger German resistance, with the enemy seeking to retard the advance with continual armored counterattacks. With prisoners streaming to the Allied rear, the bag was over 100,000 since D-day.

Disembarkation point for doughboys during World War I and second largest port in France, Brest, along with Cherbourg, would give the Allies important terminals for the convenient supply of their armies after repair of the Nazis' extensive demolitions to facilities.

The once proud Polish capital of Warsaw became a flaming battleground for the second time during the war as Russian forces battered through its eastern environs on the central sector of the eastern front.

On the northern end of the front, the Reds strove to seal an estimated 300,000 German troops cut off in the Baltic states from other Nazi units sorely pressed around East Prussia by Russian forces under command of 36-year-old Gen. Ivan Cherniakhovsky.

Gen. Cherniakhovsky

With the Russians only about 125 miles from central Germany on the southern end of the front, the Nazis were putting up a stand behind the Vistula river, while Hungarian and Rumanian troops guarded the mountainous gateways to the Balkans.

In northern Italy, Allied forces girded for a full scale assault upon the enemy's vaunted "Gothic Line," with their advance on the new fortification system hewn in the mountainous terrain slowed by the foe's stubborn stand before the art center of Florence.

DIPLOMACY:
Swing to Allies

With the Allies battering in German defenses throughout Europe, neutral Turkey, with one eye closely cocked on the impending peace table, took another step toward the United Nations ranks by breaking off political and economic relations with the Nazis.

Meanwhile, little Finland moved to reassert her independence with Marshal Baron von Mannerheim assuming the presidency from Risto Ryti, who had bound the country to a finish fight against Russia by Germany's side. With the Nazis reported to be pulling troops out of Finland, there was talk of peace negotiations with Moscow, with the Reds demanding restoration of the 1940 border.

With Allied victories in Europe consolidating their position in the Near East, Turkey sought to gain their favor by breaking with Germany, but not before it had obtained promises of military assistance in the event that the Nazis should attack the country.

PRODUCTION:
Boost Needed

Because of an upward revision in the requirements of heavy artillery and ammunition, transport equipment, aerial bombs and communications equipment, U. S. armament production must be speeded up by 24 per cent by October, Lieut. Gen. Brehon Somervell of the army service forces declared.

Revealing that manpower shortages were the principal deterrents to increased production, General Somervell said that contributing factors to the tight situation were absenteeism, a search for peacetime jobs and the unpleasantness and lower pay for work in such critical heavy industries as forgings and castings.

As Allied lines lengthened and the pace of battle stepped up requiring longer columns of transport and more and more munitions, the need for trucks, shells, bullets, etc., will continue to rise, General Somervell said, demanding stepped-up output.

U. S. BUDGET:
Near 100 Billion

Figuring on Germany's defeat before next summer but a longer war against Japan, Budget Director Harold D. Smith estimated U. S. expenditures of 98½ billion dollars during the fiscal year endng next June 30.

Of the total of 98½ billion dollars, about 89 billion will be for the war, Smith said, with possible increases in the event that the European conflict is prolonged, requiring a greater output of munitions.

With receipts estimated at 45½ billion dollars, there will be a deficit of over 52½ billion, Smith predicted, with the national debt rising to over 250 billion dollars.

PACIFIC:
Deadly Enemy

Pocketed by closing American pincers on all of the South Pacific fronts, Japanese soldiers were desperately fighting to the last, with U. S. troops literally advancing over their dead bodies.

Following the heavy enemy loss on Saipan, no less than 7,893 enemy dead were counted in the fighting on Guam, with Japanese units still resisting, while 5,000 fell on Tinian, with scattered bands directing sniper fire from caves and dugouts.

To the south along the northern New Guinea coast where a succession of U. S. landings between enemy forces cut them off from one another, fierce Japanese efforts to hack their way out of the steel trap were countered by heavy American resistance.

DRAFT:
Tighten Inductions

Although selective service reaffirmed its present policy of concentrating on the induction of men under 26, Draft Director Lewis B. Hershey prodded local boards into calling all men over that age not engaged in an essential occupation.

At the same time, Director Hershey instructed authorities to clean up the reclassification of all men over 26 in essential industry from 1-A, only leaving non-deferables in that group.

Originally, selective service's policy of concentrating on induction of men under 26 permitted postponement of the drafting of all men over 26 regardless of the status of their occupation.

HIGHLIGHTS . . . *in the week's news*

GIVE 'EM AIR: Firemen are credited with saving the lives of thousands of fish—pickerel, black bass, catfish and other varieties—that were slowly suffocating in the North Farms reservoir near Wallingford, Conn. The firemen pumped part of the water from the pond and then sprayed it back, thereby aerating it. This job took two days. Only 10 per cent of the fish have died.

EGGS: Production of eggs will be considerably lower in the second half of the year than in the first, the department of agriculture estimates. Civilian supplies will not be affected, it was added, because of the record stocks in storage. Chickens will become less plentiful in the months ahead, the department went on, and turkeys will be scarce because of military demands.

STRIKE:
Philly Tied Up

Production of radar, heavy artillery, bombs and other ordnance was seriously hampered in Philadelphia when transportation lines running to the surrounding war plants were paralyzed by a strike of 6,000 bus, trolley and subway operators over the hiring of Negro drivers.

Adding to the transportation tie-up, which was only partially relieved by OPA's increase in gas rations to permit use of automobiles, were scores of clashes between whites and negroes, flaring throughout the whole city and accompanied by extensive damage to property and looting.

Although the army took over operation of the lines upon President Roosevelt's orders to carry workers to their vital jobs, drivers persisted in striking unless the company discontinued its newly established practice of hiring negroes.

ROBOTS:
Damage Reported

Over 4,500 persons killed; 14,000 seriously injured and many more only slightly hurt; 17,000 houses totally destroyed and 800,000 damaged to varying degrees—that was the toll taken by the Germans' robot bombs during a seven week period, Prime Minister Churchill said.

Churchill revealed the extent of the robot damage during a speech in which he declared that the shape of military events throughout the whole perimeter of Hitler's Fortress Europe indicated a possible early victory, with continuing American successes in the Pacific also raising hopes for a shortened war against Japan.

Although admitting the severe damage from the robots, Churchill said that the shower of buzz-bombs would not crack British morale, adding: "There is no question of diverting our strength from the extreme prosecution of the war or allowing this particular infliction to weaken in any way our energetic support of our Allies."

ANIMAL KINGDOM

Tootsie, a six-year-old terrier owned by Rose Smith of Chicago, befriended Petunia, a stray cat, a year ago.

So when Petunia was too weak to nurse her kittens after bearing them recently, Tootsie nursed them for her, allowing the feline to share in the feeding when she bore puppies herself.

Animal authorities say that it is unusual for a cat to permit a dog to nurse her kittens while she is around.

* * *

In Dedham, Mass., a 64-year-old attorney, Woodbury Rand, left $100,000 for the care of his pet tomcat, Buster, constant companion of the millionaire lawyer during his last illness.

Not only did Rand leave $60,000 to the cat and $40,000 to a housekeeper for its care, but he also provided that his radio, sweaters, blankets, three electric fans and favorite chair should be used if they would contribute to Buster's comfort.

Because of their "contemptuous attitude and cruelty" toward the cat, Rand cancelled $20,000 in bequests to nine cousins.

BIG BROTHERS:
Business Epic

More than 40 years ago, two of the Fisher boys from Norwalk, Ohio, came up to Detroit, Mich., to take a job with the Wilson Body company. Several years later, they started up a business of their own, bringing their four younger brothers in with them as they grew up.

Building their business on the belief that people preferred closed auto bodies, the six Fisher brothers developed the famous body company bearing their name, over which General Motors corporation took control in 1919. Sticking with the company, they helped make "Body by Fisher" a byword in the auto trade, until last week when the last four brothers remaining with the firm resigned from active service.

Wealthy in their own right with numerous investments in which a seventh brother is interested, the Fishers may again reenter the manufacturing field independently, it was rumored.

BABY SERUM

A method of immunizing infants against diphtheria and whooping cough by a single injection of serum has been developed by three doctors connected with the Evanston, Ill., health department. The physicians mixed diphtheria toxoid and pertussis (whooping cough) vaccine and injected 649 infants over a five-year period with a high degree of success. Doses were given at three-week intervals and one week intervals. The longer period gave more satisfactory results.

DREW PEARSON

Washington, D. C.

ADMIRAL KING SLAPS

Insiders now admit that friction between Secretary of the Navy Forrestal and Chief of Naval Operations Admiral Ernie King is just as bad as it was between King and the late Frank Knox—or worse.

Knox and Admiral King rubbed each other raw. King used to go over the head of the secretary of the navy, even overruled him regarding the navy's new gray summer uniform, which Knox—and most navy men—opposed.

When Forrestal became secretary of the navy, it was hoped that relations would be harmonious. Last week, however, Admiral King publicly gave his chief an adroit slapdown.

Forrestal, Admiral King and fighting Admiral Halsey were holding a joint press conference. The secretary of the navy was asked if he had any comment on the fall of the Tojo cabinet. He replied that navy personnel, including himself, were not supposed to comment on politics.

Whereupon Admiral King interrupted and, almost as if the secretary of the navy were a little boy, corrected him.

"I will comment on that," he announced, despite Forrestal's statement that political matters were not for comment by navy personnel. "Obviously, the cabinet would not have fallen unless there was dissatisfaction on the part of military leaders with the conduct of the war. The Japanese can be expected to continue to wage war with all the powers they possess."

Secretary Forrestal took the admiral's remarks — interpreted by those present as an indirect slapdown—without saying a word.

* * *

VETERAN STRUGGLE

One of the most important behind-the-scenes struggles for postwar power is now being waged between the American Legion and the Veterans of Foreign Wars.

Actually, the Veterans of Foreign Wars are in a better position than the Legion to get a head start on recruiting veterans of World War II. The VFW charter from congress permits recruiting men before they are discharged, while the Legion must wait until a man leaves the service before recruiting him.

Fact is the VFW has picked up more than 400,000 new members since Pearl Harbor, while the Legion's gains have been relatively paltry. At the start of the war, the Legion had more than one million members, the VFW only a quarter million. But today the VFW magazine has the largest overseas circulation of any non-governmental publication, is now read by 300,000 men monthly. As a result, VFW is picking up members at the rate of 5,000 a week, while Legion officials fret, plan their own recruiting drive later.

One reason for VFW success has been a policy of tacitly bucking the American Legion on key policy matters. VFW helped paint the Legion as "anti-labor," then turned around and attempted to arrange a deal whereby all CIO and AFL members in the service would join the VFW instead of the Legion when they left the service. More than two million union men are in the service.

However, labor has not fallen for the bait. Instead, trade-union chapters of the American Legion are being rapidly built up to help combat any anti-union feelings of returning servicemen.

The Veterans of Foreign Wars also made "hay" with a speech delivered by national Legion Commander Warren Atherton in the South Pacific area recently. Atherton debunked the idea that men in the front lines fighting the Japs want furloughs home. The VFW immediately took advantage of this statement, set up a terrific howl for overseas furloughs, soon found membership applications pouring in.

* * *

SITUATION IN GERMANY

Uncensored military and political dispatches reaching the diplomatic corps reveal that the German army is defeated and that fat Hermann Goering, father of the Luftwaffe, may soon rise as the German "man on horseback" to try to make peace with the Allies.

This dramatic turn of events catches Franklin Roosevelt plotting Pacific strategy while the biggest break of the war is coming 5,000 miles away in Europe. Whether Roosevelt does anything more about it or not, however, you can write it down that Hitler and company are through. It's just a question of how much Germany can salvage before the last shot is fired.

* * *

MERRY-GO-ROUND

¶ The Berlin radio beamed to America tried a new propaganda trick the other night. An announcer, introducing a newscaster, said, "The views of this commentator do not necessarily reflect the views of this station."

¶ Army air corps officials say that Jacquelin Cochran, head of the Wasps, barges into their offices, pounds on their desks, says, "I used to work in a factory, I know what the little people want," then delivers ultimatums about her lady fliers.

Walter Winchell

(WNU Service)

They Tried—and Failed

(By John Edgar Hoover, Director Federal Bureau of Investigation, United States Department of Justice.)

Nazis in America have been taking a drubbing like the Nazis facing the Yanks in Normandy, the British at Caen, and the Russians in their victorious sweep through Poland.

The much-vaunted methodical planning and scheming of the Nazis have contributed to their own downfall. They tried, but failed, to swing their Fifth Column into action in America. It suffered setbacks before Pearl Harbor, but its back was broken once we were freed of peacetime restraints.

Since Pearl Harbor, over 15,750 suspected Fifth Columnists have been arrested. The more dangerous were interned, others paroled, and others released when it was certain they would do no harm.

The German High Command admitted the ineffectiveness of their Fifth Column when they dispatched the eight saboteurs to America by submarine two years ago. We have learned that other saboteurs were trained to take their places. But so far they have not put in their appearance.

The Nazi rats must not be underestimated. Try cornering a rat and see how he bares his teeth and strikes back. We can expect the same from the Germans until the last vestige of Naziism is crushed by our Armed Forces.

America has a perfect score in combatting the experts in doom and destruction. No act of enemy-directed sabotage has yet occurred in the United States.

I am sorry to say that even native-born Americans have tried; I am happy to say that they, too, have failed. One 23-year-old worker in an aircraft plant cut 21 wires in two bombers just to see how the FBI handled a sabotage investigation. He found out.

The "Blunder Bund," which once scoffed at American faith in human nature, was set back when its chief espionage ring was penetrated by the FBI. We built a radio station with their funds, gave them misleading information, sold them fictitious plans, and at the concluson of the case turned over a profit of $17,000 to the U. S. Treasury to buy bullets to shoot back at the "super race."

Gerhard Wilhelm Kunze, convicted leader of the German-American Bund, fled to Mexico. He was tripped up when the alert Mexican military authorities became suspicious after he stacked a 25-foot fishing boat with 200 pounds of food, 450 liters of drinking water, and 50 packages of cigarettes.

Ernst Fritz Lehmitz was caught as the result of some of his newsy letters designed to conceal reports in secret writing on convoy movements. He wrote that his dog was sick, he was busy with a victory garden and as an air raid warden. These jig-saw bits of information were pieced together and after some additional hard work he and his associate, Erwin Harry De Spretter, were arrested.

Before Pearl Harbor, the Nazi Embassy in Washington had detailed plans to foment strikes and incite domestic strife.

An important Nazi official in this country was discarded by his fiancee when she learned of his scheming against the United States. Another Nazi official offered to pay $500 for documentary proof of the canard and lie that Benjamin Franklin was anti-Semitic. The Germans built up a dollar balance of over $21,000,000 by selling Rueckwanderer marks in this country prior to the war to be redeemed in Germany. Practically all the German consulates in the United States were active in promoting the German-American Bund.

Nazi brazenness reached its height when Baron von Spiegel, the German Consul in New Orleans, boasted that the United States would be repaid when the Reich completed its conquest in Europe. A Midwest consular attache was greatly embarrassed when he was caught making pictures in a factory area.

The Nazi spy, Heinz August Luning, arrested and executed in Cuba, kept canaries in his room to conceal the noise of his short wave radio transmitter.

Heavily populated prisoner of war camps in the United States hold thousands of frustrated Germans. Occasionally, some try to get away. Sometimes they succeed — for a time. But no prisoner has yet been able to get back to Germany, and their periods of freedom generally are limited to a few hours.

SNAPPY FACTS ABOUT RUBBER

Millions of dollars will be saved by American purchasers of rubber items in post-war days because of the availability of synthetic and the influence its cost will have on the price of natural rubber. Rubber authorities anticipate that hereafter synthetic rubber prices will serve as a ceiling over charges for the plantation product.

Special rubber pipe lines have been developed which troops can string across rivers, ravines or gullies in battle areas to deliver fuel to motor equipment. The "pipes" yield to the force of concussion, but never break.

arcoal Gas Is a Fair Gasoline Substitute, sts Show; Could Be Used in Farm Machines

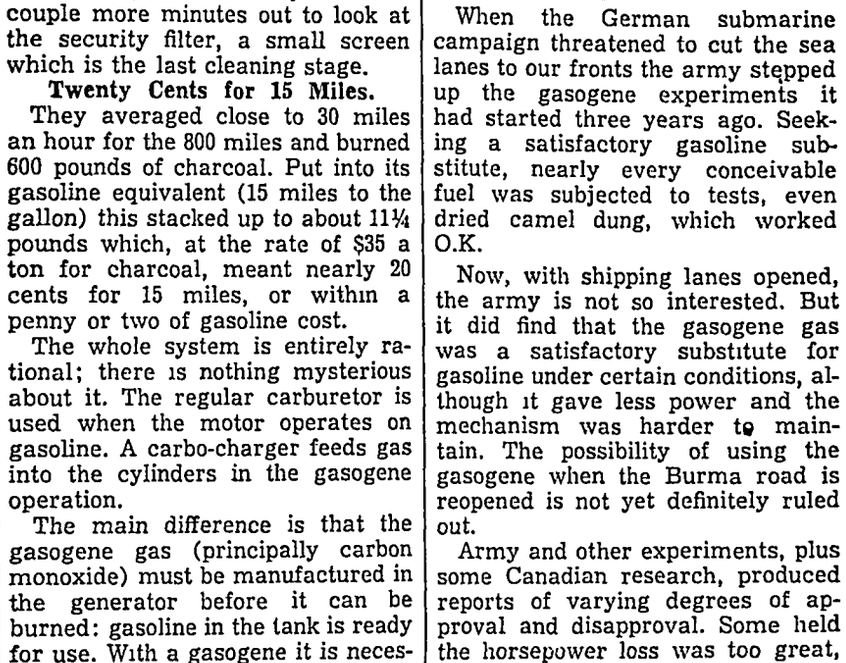
antages, Defects ealed by 800-Mile l Journey in Car

present scarcity of gaso- as turned attention to pos- ubstitutes. One of the most cal is the gas generated charcoal or wood by a high rature burner. These de- which are common in e, are rare in the United , and if the wartime strin- in motor fuel had not de- d, they would probably remained curiosities. If ne becomes expensive and e in the postwar years, ver, the gas generators will bly come into use, at least me purposes, such as sta- y engines and farm ma- ry.

charcoal burned in the 'gen- can be made from any kind d or dried plant fiber, such ssed out sugar cane. Here is e future market for farm ts that are now wastes. All nowever, depends on the ade- of our petroleum reserves. oline is once again plentiful heap, there is little likelihood e gas generator will be wide- ployed, for at its present it does not give as satisfac- ervice as gasoline does.

nvestigate the possibilities of gas generators on their de- cars, as well as to obtain ial for an informative article, week magazine had one of its station wagons fitted with a ator, and driven on an 800 test trip. The journey began alamazoo, Mich., where the oal burning gas-producer, commercially as the "Gaso- was attached at the manufac- 's plant, and ended in New city. The route traversed the heny mountains, where steep s forced the car to give its possible performance. Milton Slyck, associate editor, super- the experiment.

the June morning when the was to start, Mr. Van Slyck d 170 pounds of charcoal into opper of the gasogene. He then d the motor of the car with ine Next he stepped around to ear, opened the small fire door, it the burner with a twist of . The suction of the motor the flame right in and in a seconds the fire was nearly hot. In one minute fifteen sec- after he poured the charcoal rolled out of the shop down the ay. Within a couple of min- they turned off the gasoline letely. In about eight minutes, ld, the gasogene was delivering ll power, which is about 65 per of that obtained from gasoline. s did not mean that the station could go only 65 per cent of speed it would be capable of gasoline. In speed tests, given to work up momentum (about times that ordinarily needed asoline), it reached 70 miles an for a brief run. There was no n pickup. On the hills the lack orsepower showed up more, al- gh they encountered none that d not be made in low. As a of thumb a hill on which a line engine would balk a little gh required second speed with gasogene; one that made a line car use second, required



The gasogene generates gas (principally carbon monoxide) by burning charcoal at high temperatures. The hopper holds 170 pounds. It is best to refuel it every 50 to 75 miles.

miles). Curiosity appeal was high. Motorists seeing the device as they approached from the rear would pull up and sometimes tail them for miles. In towns small crowds gathered to look and ask questions.

Though the fuel hopper holds 170 pounds, it was found best to refuel every 50 to 75 miles. Fresh fuel is put in through the hatch on top of the generator, a dusty, dirty, two-to three-minute job. Usually at the same time, Mr. Van Slyck took a couple more minutes out to look at the security filter, a small screen which is the last cleaning stage.

Twenty Cents for 15 Miles.

They averaged close to 30 miles an hour for the 800 miles and burned 600 pounds of charcoal. Put into its gasoline equivalent (15 miles to the gallon) this stacked up to about 11¼ pounds which, at the rate of $35 a ton for charcoal, meant nearly 20 cents for 15 miles, or within a penny or two of gasoline cost.

The whole system is entirely rational; there is nothing mysterious about it. The regular carburetor is used when the motor operates on gasoline. A carbo-charger feeds gas into the cylinders in the gasogene operation.

The main difference is that the gasogene gas (principally carbon monoxide) must be manufactured in the generator before it can be burned: gasoline in the tank is ready for use. With a gasogene it is necessary to keep the engine turning over a little faster than usual in order to manufacture gas. If the engine is run too slowly on a hill, where power is needed, the fire may die down, reducing speed.

The fire requires relighting only after long intervals of parking. After only two or three hours of disuse the motor will start on gasogene direct. After three or four hours it is necessary to use a little gasoline in the motor to get the draft going through the firebox and build up a good fire.

The gasogene used less than 2 quarts of gasoline for 800 miles, better than 1,600 miles to the gallon.

What It Costs.

The cost of the gasogene attachment varies: For this experimental unit was about $700; on trucks with a simpler installation job the cost would be perhaps $100 lower. In South America they are somewhat less. Mass production naturally would bring economies. At present gasogenes are not made in this country for unrestricted civilian use, though no priorities for the purchaser would be required if a manufacturer were able to get clearance on materials from the War Production board and on manpower from the War Manpower commission.

More than 1,000,000 passenger cars and trucks throughout the world use various forms of gas generators. Recently reports have come that the oil-famished Nazis are operating war machines, including training tanks on gasogenes. In this country the army and other government branches (Bureau of standards, Forest service of the department of agriculture, Tennessee Valley authority) have made or still are conducting exhaustive tests.

When the German submarine campaign threatened to cut the sea lanes to our fronts the army stepped up the gasogene experiments it had started three years ago. Seeking a satisfactory gasoline substitute, nearly every conceivable fuel was subjected to tests, even dried camel dung, which worked O.K.

Now, with shipping lanes opened, the army is not so interested. But it did find that the gasogene gas was a satisfactory substitute for gasoline under certain conditions, although it gave less power and the mechanism was harder to maintain. The possibility of using the gasogene when the Burma road is reopened is not yet definitely ruled out.

Army and other experiments, plus some Canadian research, produced reports of varying degrees of approval and disapproval. Some held the horsepower loss was too great, gasogenes were too dirty, and so on.

Numerous in Sweden.

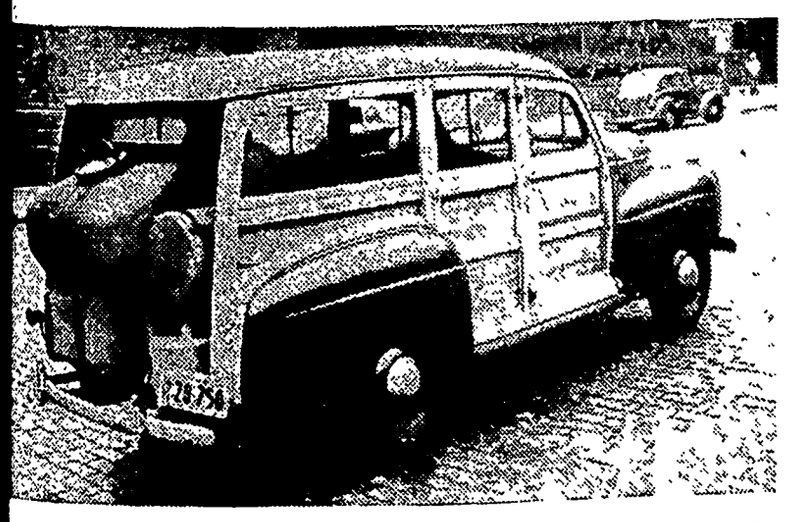
Under the wartime gas shortage there are several thousand gasogenes now operating on wood, especially in countries such as Sweden where lumber is plentiful. Undoubtedly most will go back to gasoline after the war. Wood does not give as good a performance as charcoal; it is dirtier in its gas content and therefore more apt to foul an engine. Since coke or hard coal operate satisfactorily, in hard-coal regions where fuel is cheap, coal-burning gasogene trucks might be feasible. A group of farmers, too, might band together to make charcoal for use on their machinery and trucks. All in all, any widespread postwar use in the United States is unlikely and what there is probably will be local and mainly in agriculture, industry, and business—not private driving.

Gasogene's proponents point out that the history of the use of substitutes is replete with stories of improvements and lower costs, such as in synthetic nitrates, rubbers and fibers. For this reason they anticipate further improvements. But because of the gasogene's limitations, the oil companies, though highly interested in watching experiments, do not expect any serious competition.

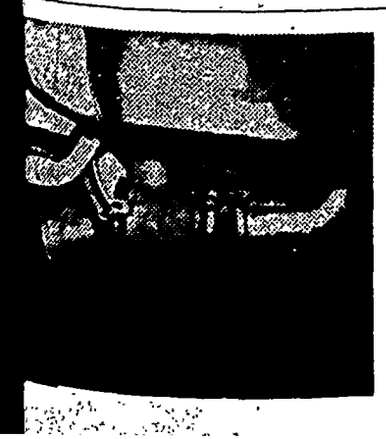
The results thus far in these tests confirm that the gasogene is a satisfactory substitute for gasoline where the standard fuel is unavailable or where transportation or other factors make its price prohibitive. The relationship between the cost of gasoline and the cost of the substitute fuel is the main factor which will control the gasogene's future. For instance, gasoline at 25 to 50 cents a gallon in remote sections of South America could make it feasible to use charcoal, which is plentiful and cheap, as it is a home product sold everywhere for cooking. In the United States gasogenes may be used in the lumber industry. With plenty of waste lumber—especially in the far north where transportation makes gasoline costs high, it might be feasible to turn waste into charcoal (a simple process requiring two or three days) or even burn the wood as it is.

Shaking Down the Ashes.

e cross-country run was made out mishap. One night a truck r air-braked his big van to a and tore over with a fire exuisher when they paused at the side to shake down the ashes; was done twice in the 800



This is the small station wagon equipped with a gasogene that e the 800 mile experimental run from Kalamazoo, Mich., to New city. The trip was a rigorous test for the efficiency of gas fuel, for route led over the steep grades of the Allegheny mountains.



The gasogene outfit requires some attention that machines operating on gasoline do not, since the gasogene burns charcoal or other solid fuel. It is necessary to shake out the ashes perhaps once a week.

Then there are two filters that must be taken out and cleaned periodically. One is the radical-finned filter, (right). This was serviced once on the trip. The other is the security filter, (left). It was thought best to look at this every time they filled the charcoal hopper.

Stripes in Versatile Mood Come To Enliven Midsummer Scene

By CHERIE NICHOLAS

HERE IT is well-nigh midseason, that time betwixt and between when fall clothes look too advanced and summer clothes somehow do not seem to be quite in tune with the shifting scene. What to do?

Here's where fashion steps right to the front with a wardrobe rejuvenator that animates the style picture like magic. Told in a single word, it's stripes! It's a wonderful way-of-their-own that striped fabrics have of "stealing the show" when it comes to striking effects. They have a refreshing sprightliness about them that looks just right, in season and out of season. The big news about stripes is that they bid fair to hold their popularity and importance in the mode right through the coming fall and winter season.

You may expect to see stripes wherever you go during the months ahead, for not only do fashions for immediate wear exploit them in simple casual frocks, skirts and blouses, but stripes are playing a stellar role in way of luxury blouses and versatile accessories that will dramatize gala costumes, such as milady will be wearing during the forthcoming social season.

There's certainly high - fashion news in stripes, but if perchance you happen to be one who "has to be shown" the group illustration will bring you proof positive of their importance on the current style program. That attractive little frock to the left, which makes sophisticated simplicity its theme is a "darling" one-piece, made of white crepe striped in the newly featured wine shade, a color you will hear more about when the fall season sets in. With its clean-looking stripes and the cool look and the feel of its modish lowcut, squared and banded neck, this dainty practical frock is just "it" for immediate wear. A self belt ties in a bow over the full length fly front, closing with another bow at the front of the neck.

The cool-looking green and white two-piece frock centered above in the group achieves a striped effect in green and white for the skirt. The matching green crepe jacket, fastened only at the waist, is embroidered with a white scroll motif.

For immediate wear clinging, cooling striped jersey is considered a fabric ideal. See this beloved jersey made up in a stunning dress, posed in the foreground to the left. Be assured that there's high style news told in this distinctively smart jersey spectator sports dress, which comes from Chicago Fashion Industries. The fact that both broad and narrow stripes contrasting navy and white are used in the styling of this gown adds greatly to its interest. The high round neck, the unique contrast of the yokelike treatment and the brief sleeves, achieve a most intriguing effect.

Advance style collections stress important-looking restaurant suits and regal dinner gowns that tell the news of luxury-striped materials such as handsome rayon satin done in striking color contrast, used for bodice tops and the very new peplum blouses, worn either with street-length skirts or long slim formal types. The new deluxe stripes that occur in satins and crepes boldly contrast black with white or black with shocking pink or with aqua, blue or lime and many equally lovely color duets. There are also some exquisite stripes done in white and pastel colorings. The vogue for stripes has inspired the striking evening gown shown in the oval inset. Here you see a bodice top of aqua and black regency striped rayon satin with skirt of mossy rayon crepe, the smoothly fitted midrib section accented with a cummerbund of jet black rayon satin.

Released by Western Newspaper Union.

Batiste Dance Frock

Bewitching and beautiful is this prettily feminine party frock. It has that quaint loveliness about it which finest sheer batiste lavished with ribbons and lace always gives. This idea of sheerest lingerie cotton as fine as looms can possibly produce, for blouse or bodice tops to long sheer black evening skirts, is responsible for some of the most delectable party dresses brought out this year. Here the eyelet embroidered blouse reveals a perfect portrait shoulder line. The full black souffle skirt swishes fascinatingly when dancing.

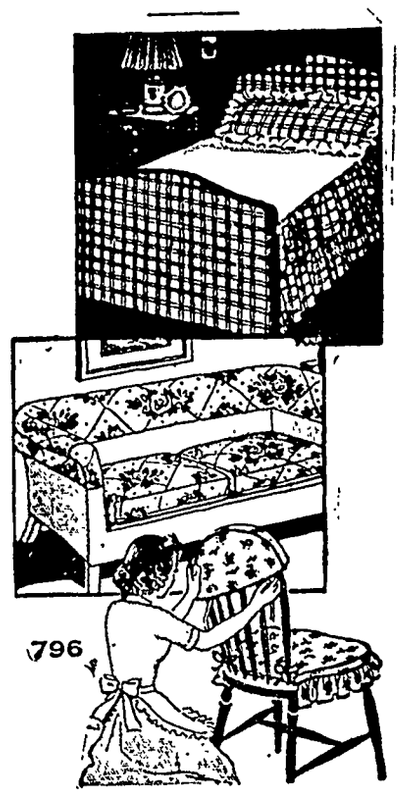
'Weskit Dress' Makes Its Debut This Fall

A new type of dress is making its debut this fall, known in fashion parlance as the "weskit" dress. Which is to say that a weskit effect takes the place of the usual blouse. These trig little outfits top a narrow skirt with a neat fitting vest-like blouse that buttons up the front with pointed effect at the front hemline. This type is especially smart in fancy check or stripe wool and is especially goodlooking made up with contrast sleeves. There is opportunity given in this weskit-and-skirt fashion for endless color contrasts. The weskit top may be of check, the skirt of monotone matched to the sleeves. The weskit, if sleeveless, buttons over a dainty lingerie blouse to advantage, the sheer crisp sleeves giving refreshing accent to the suit. There is no doubt but what the weskit dress will prove one of the big fashion successes of the fall season and for that matter it is ideal for present wear.

Peplum Dickey Transforms A Simple Frock in a Jiffy

If you ask at the neckwear counter to see a new-style peplum dickey, you will be shown lovely lacy types designed to wear over one's dress, belted in at the waistline just above a pert peplum flare of lace and net or any white sheer that is prettily lace-trimmed. The career girl will love this peplum novelty for after office hours, when she can fasten the dickey in place in a jiffy. These dickeys have a way of transforming the simplest frock into a dressy afternoon gown.

Practical Slip Cover Ideas for Your Use



SLIP covers for bed ends—for the backs and arms of chairs and sofas—for table tops and chairs! Other practical slip cover ideas are in these directions.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

The Lewis Mau family have moved into the apartment above the Lewis Radio Shop where they will reside until they move to a farm north and east of Klemme. The Mau family moved to town as the house on the Haupt farm where they live burned to the ground last week.

Walter Lemke of near Ventura, was in Klemme on business Friday morning. Walter is in the turkey business with Victor Meyer on a farm about a mile west of St. John's Church. They are raising 12,000 turkeys this year. Walter says they will begin marketing the hens soon after September 1st.

Another typical beauty from our far-flung war fronts is the vivacious Girl from Australia. Watch for her in the new "Global Glamour" series of paintings by the well-known artist, Henry Clive. Reproduced in full color on the front page of The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Seaman Cecil Katter recently completed his boot training at the Great Lakes Naval Training Station and came home last week to spend his furlough visiting with his parents, Mr. and Mrs. Ben Katter, northwest of Klemme, and with his wife here, the former Miss Irene Becker. He will return to the Great Lakes station where he will receive advanced training in the signal corps.

There was a bit of moving going on this week. Mr. and Mrs. A. L. Kingery moved into the Wm. Johnson house, vacated by Mr. and Mrs. Ira Overholt. Mr. and Mrs. Overholt will move into their own house as soon as the Chambers house is completed. The Overholts are living at the Methodist Parsonage during the absence of the Harveys. Mr. and Mrs. Chambers are living in the Overholt house but will move as soon as their own house is finished.

Mr. and Mrs. Conrad Quandt and their granddaughter, Gracka Maria Gerardi, left Monday for Two Harbors, Minnesota, where they will live in their cabin on the north shore of Lake Superior until after the first heavy frost, or until the hay-fever season is well over, as Mr. Quandt is a victim of that disease and goes north each year to find relief. Mrs. Ernest Gerardi, assisted by Mrs. Tony Ahrenkeil, and Miss Arlene Schmidt are taking care of the cafe while Mr. and Mrs. Quandt are up North.

LEAVES OF SOME SHRUBS, ROSES TURNING YELLOW

Chlorosis, which causes leaves to lose their green color and turn yellow, is developing on shrubs and roses, some fruit trees and walnut trees. L. C. Grove, extension horticulturist at Iowa State College indicates excessive rains may have helped to bring the condition on. He adds that the disease, which is phsiological, may be due to alkali spots in the soil, poor drainage, or some mineral deficiency which could be corrected through fertilizing.

He also suggests that a soil test might be helpful in preventing similar trouble another year. The disease may be due to a lack of nitrates, iron or other minor element in the soil. Under such conditions, Grove states, it is not adviseable to apply lime, as it might only aggravate the situation.

KLEMME PEOPLE VISITED WITH ZABILKAS AT OKOBOJI

Several Klemme families spent Sunday visiting with Rev. and Mrs. Wm. Zabilka at Lake Okoboji, where they had a cottage.

A picnic dinner and supper was enjoyed by the group.

Those present besides the Zabilkas were Mr. and Mrs. C. A. Larsen and Junior; Dr. and Mrs. D. P. Anderson and Neva Ann; Mr. and Mrs. E. J. Arnold; Mr. and Mrs. Edwin Josten and Marcele, and Muriel Phillips.

FUNERAL SERVICES HELD FOR PASTOR AT ACKLEY, IOWA

Rev. E. Seybold, pastor of the Evangelical and Reformed Church at Ackley, Iowa, died last Friday.

Funeral services for Rev. Seybold were held at Ackley Tuesday.

Those from Klemme who attended included Rev. and Mrs. Calvin Grosshuesch and Mr. and Mrs. Ed. Becker.

MRS. ORA HANSON GIVEN DIVORCE, ALSO CUSTODY

Grace Hanson was given a divorce in district court Monday from Ora Hanson on grounds of cruel and inhuman treatment.

Custody of 2 minor children, Dorothy Alice, 14, and Arthur Erick, 12, was given to Mrs. Hanson and costs of the action were taxed to the defendant.

The matter of alimony was left to the jurisdiction of the court.

The couple were married at Clarion Nov. 17, 1928.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Mrs. P. M. Wilson was ill and confined to her bed the past week.

Rev. Harold Knight of Goodell was a business caller in Klemme Friday.

Charlie Nelson of Sioux City was visiting at the Matt Smith home on Thursday.

Mr. and Mrs. Herb Marshall and Irene were Mason City visitors on Saturday.

Anna Nelson of Des Moines, was a visitor Thursday at the Ole Sandberg home in Goodell.

Rev. Calvin Grosshuesch and family were dinner guests Sunday at the Walter Rosendahl home.

Mrs. Katherine Howell and Miss Mavis Nuehring began work at the Thada Store last week as clerks.

Mr. and Mrs. Bert Mathews of Clear Lake, were dinner guests at the John Day home, Sunday.

Mr. and Mrs. Tom Nelson of Garner were dinner guests Sunday at the Emil Beier home.

Mr. and Mrs. Ed. Jacobs and Mr. and Mrs. Art Kudje were Des Moines visitors Tuesday.

Mr. and Mrs. Rob Roths and son Dean, were Mason City visitors on Thursday afternoon.

Marlene Roths visited last week at the Melvin Buseman home near Goodell.

Mrs. W. L. Sherwood of Goodell visited Thursday and Friday with her daughter, Mrs. Clell LaFavre.

Mr. and Mrs. Wm. Lacey and children and Betty Ann Kramer spent Sunday at Clear Lake.

Marie Neuberger visited Sunday and Monday with Mariana and Marlene Blumer.

Mrs. Dwight Helps and children and Mrs. Paul Kramer were Mason City visitors Thursday afternoon.

Ruth Smith visited at Goodell last week from Tuesday until Thursday with her grandmother, Mrs. Mary Ahrenkeil.

Mr. and Mrs. Clarence Bachman and children, Darlene and Roger, visited at the Walter Blumer home Sunday night.

Mr. and Mrs. A. G. Lade and daughter, Gwenn, of Garner, were dinner guests at the Quentin Stille home Friday.

Miss Grace Anna Harms returned to her home at Alexander after spending two weeks visiting at the Stenus Harms home.

Pvt. Allen Barz of Madson, Wis., spent the week end in Klemme visiting with his mother, Mrs. Clara Barz.

Miss Glenna Gruetzmacher returned Saturday from a two weeks vacation spent in Minnesota with some lades from Des Moines.

Kay, son of Mr. and Mrs. Gerald Burke, visited last week with his grandparents, Mr. and Mrs. Jay T. Griggs at Ventura.

Clair West and family returned to Des Moines Sunday after spending a two weeks vacation visiting at the Sumner Trumbell home.

Mr. and Mrs. Melvin Neuberger and son, Allan, went to Osage Sunday to attend a family gathering and picnic dinner.

Mr. and Mrs. Virgil Cook, Mrs. Herricks, Phillip Cook and Delbert Bachman spent Sunday afternoon at Clear Lake.

Coobs are attending the American Legion Auxiliary Convention this week Thursday and Friday at Cedar Rapids.

Miss Novella Bredbenner will teach in a Des Moines school this coming year and will leave for the city the latter part of August.

Stenus Harms and daughter, Miss Maggie and sons Herman and Stenus Jr. were at Mason City on business, Monday.

The Fifty-Fifty Class of the Methodist Church met at the Harvey home Sunday evening and enjoyed a picnic supper at the fireplace in the yard.

Elaine, daughter of Mr. and Mrs. Melvin Neuberger, had her tonsils removed at the Hampton hospital last Thursday. She was able to return home Friday and is making a good recovery.

Norman Lau, A. M. 2-c and Mrs. Lau returned to Alameda, Cal. last Thursday after spending a furlough visiting at the parental Aug. Lau home in Liberty township.

Mrs. W. D. Tyler and daughter of Mason City, and Mrs. John Carothers of Garner, were dinner guests last Wednesday at the Quentin Stille home.

Mrs. Gretchen Schlawin has purchased one of the three houses in the east part of Klemme, owned by Dr. D. P. Anderson and tenanted by Lydia Bock.

Mrs. Herman Paul took her grandchildren back to their home at Des Moines, Thursday, and spent the day visiting with her daughter, Mrs. Eddie Epps.

Mr. and Mrs. John Lard, Joyce and Johnny of Eldora, were guests at the F. E. Finders home Saturday and Sunday. Mr. Lard is a brother of Mrs. Finders.

Mrs. Dorance Day and Gary were visiting with the former's mother, Mrs. Petersen at Clear Lake, Thursday.

Iowa has experienced some real hot weather the past week, beginning Thursday and continuing thru Sunday with the thermometers up well toward the 100 degree mark.

The Work Circle of the Klemme Methodist Church will meet at the Church Thursday, August 17th. Members are asked to come and sew on a quilt.

Mrs Matt Smith and daughter, Ruth spent Saturday near Fertile visiting with Mrs. Don Christiance and children. Phyllis Christiance left Monday for a visit with relatives in Colorado.

There will be no services at the Klemme or Liberty Methodist Churches for the next two Sundays as the pastor, Rev. Harvey is on his annual vacation.

Mr. and Mrs. Frank Barnes, Eurena and their granddaughter, Ila Waters, of Lovilla, spent last week in Goodell visiting with their son-in-law and daughter, Rev. and Mrs. Harold R. Knight.

Miss Mary Riley of St. Louis, Mo., finance of S-Sgt. Clive Ruka, now in India, and son of Mr. and Mrs. Earl Ruka, came last Wednesday and visited until Sunday at the Ruka home.

L. H. Suckow, Seaman 1st Class arrived home Saturday from service in the Canal Zone to spend a furlough visiting with his wife at Forest City and with relatives in this community.

Miss Glenna Gruetzmacher will leave the latter part of the month for Des Moines where she will resume her teaching. Her mother, Mrs. Frank Gruetzmacher will remain in Klemme for some time.

Walter Lau, who has been employed by Wes Schuldt to help with construction work this summer, left Saturday morning for Rochester, Minnesota, to visit over the week end, returning to Klemme Monday.

Lt Earl Reitz returned home last Wednesday from Italy and is visiting at the Mrs. Mary Church home while on leave. He has completed 51 missions over Europe as a bombadier. After his leave here he will go to a field in Texas.

Mr. and Mrs. Harvey Barz and Mrs. Martin Barz and daughter visited over the week end with Seaman Ronald Barz and family at St. Paul. Monday Seaman Barz was assigned to the University of Minnesota to enroll in an electrical course.

Rev. and Mrs. H. E. Harvey and children, Elwood and La Nelle, accompanied by Dr. Bassett of Sioux City, left Monday morning for Swanton, Maryland, where they will attend the Golden Wedding Anniversary celebration of Mr. and Mrs. H. A. Schmidt, parents of Mrs. Harvey.

PINEAPPLES $16 TO $21 EACH IN LONDON

London, —Londoners had apples Tuesday for the bank holiday—at a cost of $21 each. Watermelons were apiece, grapes about $5 a pound peaches 80 cents to $1.50 e

Notice To Our Customers

A new order has been put into effect to control the sale and distribution of lumber In any one quarter, we are not permitted to sell more than a TOTAL of 5,000 to 8,00 feet fairly among ALL our town customers and consquently we will have to restrict it sale to small quantites and only for the most essential uses.

FARMERS

Farmers can buy up to 300 feet from us in any one quarter without going through the County War Board, by filling out Form FL-200. If a farmer wishes to buy more than 300 feet in any one quarter, he must fill out FL-200 and file it with the County War Board. If a farmer's application (FL-200) for more than 300 feet is approved, the Board will give him a Farmer's Lumber Certificate and a rating of AA-2 or AA-3 When the farmer presents this certificate to us, we can sell him the lumber. However the Board will not give the farmer a certificate if the lumber is to be used for certain purposes and under the 300-foot provision we cannot sell you lumber for certain purposes The board is authorized to issue you a Farmers Lumber Certificate ONLY if the lumber is to be used for:

1. Construction of farm buildings (excluding farm houses) damaged or destroyed by fire, tornado, earthquakes, acts of war, or the like, if the cost of the building or restoring is less than $5,000 where immediate, reconstruction is determined by the State AAA Committee to be essential to the agricultural program.

2. Construction necessary to prevent threatened loss of farm products, where immediate construction is determined by the State AAA Committee to be essential to the agricultural program.

3. The rebuilding or restoring of a farmhouse damaged or destroyed after July 1, 1943, by fire, flood, tornado, earthquake, act of war, or the like, if the cost of rebuilding or restoring is less than $5,000. This authority may not be used, Where widespread damage occurs Where widespread damage takes place, the Red Cross is authorized to issue certified rated orders in order to secure the lumber required for reconstruction.

4. The construction of farm labor buildings required for housing seasonal labor which come within the $1,000 limitation of Conservation Order L-41.

5. Maintenance and repair of farm buildings (excluding farm houses).

6. Maintenance and repair of farm implements.

7. Other essential uses contributing to food production.

Since the Board will not issue a Farmers Lumber Certificate for the following uses, the only way we can sell a farmer lumber for these purposes is from the 5,000 to 8,000 feet we are permitted to sell with out ratings higher than AA-5 MRO, or WPB ratings.

Construction or remodeling of farm houses which come within the $2,000 limitation of Conservation Order L41.
Maintenance and repair of farm houses.
Maintenance and repair of "off-farm" building.
New wooden fences.
"Off-farm" construction.

Please understand that we did not write this order and we are not responsible for these restrictions. We hope we will have enough lumber to take care of your must essential needs, but if we do not, it is because of the restrictions placed upon us by a government agency.

W. HENRY GALBRETH NOW EDITOR OF MAGAZINE

W. Henry Galbreth, former superintendent of the Klemme schools and who hase been the assistant editor of "Midland Schools," official magazine of the Iowa State Teachers Association, has been elevated to Editor of the publication.

Miss Agnes Samuelson is the Consulting Editor of the publication.

"Midland Schools" has been expanded and greatly improved since Mr Galbreth took over the task of publishing the magazine 3 years ago.

ONE AND ONE-QUARTER MILLION FISH RESCUED IN JULY

Almost a million and a quarter game fish were rescued from drying pools during the past month Unusual flood waters during spring and early summer have resulted in large numbers of game fish being stranded State fisheries crews and conservation officers with local volunteers have undertaken the task of returning as many as possible to permanent fishing waters Rescue operations are expected to reach a peak during the last two weeks of August and the first two weeks of September. Individuals knowing of pools containing game fish are requested to notify their local conservation officers or this newspape..

During July more than 541,469 hatchery-raised fish were stocked in the inland waters, and 66,051 pounds of rough fish were removed during the same period.

MISS ELSIE WARD HONORED AT PARTY LAST WEEK

Last Wednesday afternoon Mrs Maurice Murray entertained several young ladies at her home east of Klemme in honor of Miss Elsie Ward, who is home from the University of Iowa on a vacation.

Court whist was played at three tables with Mrs. Raymond Wille winning high score and Mrs. Lester Neuberger, low score. Miss Ward was presented with a guest gift by the hostess who served a two-course lunch late in the afternoon.

DISPLAYS COLLECTION OF OVER 400 KNIVES

Ferdinand Lemke of near Meservey recently displayed his national collection of knives to the Junior department of the U. B. Sunday school at Goodell.

Mr. Lemke has over 400 knives of all kinds which he has gathered from all parts of the United States. Before the war Mr. Lemke traveled extensively.

Rising right out of Honolulu's residentaial section are two extinct volcano craters—Diamond Head and Punch Bowl.

JUNE RAPP BRIDE OF PVT. D. REINIG

A pretty wedding took place at the St. Boniface Catholic church at Garner Monday morning August 14, at 8 o'clock with Father M. J Manternach in charge, when Miss June Rapp, daughter of Mr. and Mrs John Rapp, of Klemme, became the bride of Pvt. Donald Jacob Reinig, son of Mrs. Pauline Reinig of Garner. Attendants of the couple were the bride's sister, Miss Shirley Rapp of Klemme, and Lt Lester Reinig, of Lubbock, Texas, who is serving in the air corps at that place

The bride looked very charming in a pink silk, floor-length gown covered with net She wore a short veil caught with blue flowers and carried a bouquet of gladiolus and other mixed flowers. Her only jewelry was a locket, a gift of the bridegroom. Her bridesmaid was attired in a blue silk floor-length gown covered with net and wore a short veil caught with pink flowers. She also carried a bouquet of gladiolus and mixed flowers.

The bridegroom and his attendant both wore their army uniforms.

The bride had previously been employed in Des Moines, and at the present time has employment in Britt. The bridegroom, previous to entering into service almost a year ago, had employment in Garner.

A candlelight wedding breakfast was served at the Schoenemann Cafe in Garner to the bridal party and immediate relatives. The wedding cake was baked and decorated by the bridegroom's mother. A reception was held for the newly weds at the Klemme Hall Monday evening with a large crowd in attendance.

The bridegroom left Wednesday for Fort Des Moines, where he is stationed, and the bride will continue with her work in Britt.

—Britt News-Tribune.

ITS A BINGO PARTY

KLEMME CIVIC CLUB TO MEET THURSDAY EVE

Thursday night of this week is going to be FUN NIGHT at the Civic Club meeting to be held at the Community Hall beginning at 8:00 oclock. Most of the business session will be "thrown out of the window" and the evening devoted to playing Bingo and eating.

The entertainment committee is promising a big night with plenty of bingo gifts, topped off with a $25 War Bond!

The eats committee says "No oysters!" but all the hot dogs, pickles and coffee you can stow away.

All business men and their helpers are invited to attend. You'll be sorry if you don't come!

Thursday night, this week.

EIGHTY DAY DUCK SEASON FOR IOWA

LONGER SEASON ON DUCKS PLEASES IOWA HUNTERS

The recently announced open season on migratory waterfowl pleases most Iowa hunters, and this year has been set by federal regulation for 80 days, 10 days longer than the 1943 season. Iowa was again placed in the Northern Zone.

The season opens at one-half hour before sunrise each day beginning September 20 and closes at sunset each day through December 8.

The daily bag limit on ducks remains at 10. However, in addition, five more mallards, widgeons, or pintails, or any combination of these three ducks may be taken. This regulation in actuality allows duck hunters to take 15 mallards, widgeons, or pintails daily and permits a possession limit of 30 of these ducks.

Under the present regulations black ducks are not considered mallards, and only one wood duck may be had in the daily limit or in possession.

The Canada goose limit is two, with a possession limit of four. The daily bag limit on snow and blue geese is four, which may be taken in addition to two Canadas or the white-fronted geese.

BUT STATISTICS SAY THAT MARRIAGES DECLINE?

Washington — The downward trend in the marriage rate, which began in 1943, continued in the first half of 1944.

The census bureau reported Tuesday that 260,679 marriage licenses were issued in cities of 100,000 or more in the first 6 months of 1944 compared with 278,494 in the same period last year, a decline of 6.4 per cent.

The bureau predicted a declining marriage rate until men are discharged from the armed forces in considerable numbers.

BOARDS WILL MEET

The Boards of Supervisors of Hancock, Winnebago and Worth counties will hold a joint meeting on drainage matters at the court house in Forest City on August 25 at 2:00 p. m. Repairs are to be made in the joint district.

LIBERTY TOWNSHIP FARMER BUILDING NEW SILO

Wm. Legge is having a new brick silo erected on his farm northwest of Klemme in Liberty township.

Mr. Legge's new silo will be 14 by 40 feet when completed.

During the next 10 or 12 months the navy will require 3,500,000 new padlocks, according to war production board figures.

FIFTY-FOUR WERE EXAMINED AT T. B. CLINIC

One of the most successful clinics ever to be conducted under the direction of the Iowa State Department of Health, the Iowa Tuberculosis Association and the Hancock County Medical Society, was held at the Memorial Hall in Britt recently when 54 people were X-rayed. Mrs. Ray Baker of Britt, chairman, and Miss Ruth Van Alstine, public health nurse, were in charge.

The women were assisted by Elizabeth Wyss of Ft. Dodge, advisory health nurse for the district, Leta Seaman, R. N., and Mrs. Barker, R. N., of Webster City.

HANCOCK COUNTY FAMILY LIVING PROGRAM

Miss Dee Maier, extension supervisor from Iowa State College, spent August 16 with Miss Hazel Grimes and Mrs. Harold Oxley, County Chairman of the Womens' Committee.

Plans for the County Family Living Program for the new year were completed.

Three over-all phases of study will be presented on a county-wide basis during the winter. In addition to this, two topics of interest to special groups will be given.

The over-all topics are:

Sewing Machine Clinic

which will include cleaning, adjustment and care of sewing machines.

Variety In Winter Meals

This will include various ways of preparing and using home canned, stored, dried and frozen foods and combining them into attractive, nutritious meals.

The third phase will be Stain Removal and Mending of Clothing.

The two special interest groups will be "Make-Overs for Children" and "First Aid."

4-H GIRLS CLUB NOTES

The Concord Chum 4-H Club with their leader, Mrs. W. F. Dorow spent three days camping at Clear Lake.

The Liberty Busy Bees Club plans to camp at Clear Lake on August 24, 25, 26 and 27.

Local 4-H Achievement Shows have been held by many of the clubs. The Avery Sunbeams Club held theirs on the evening of Aug. 15 at the Henry Busse home, with 73 persons present. Awards were presented to each girl with a perfect club attendance for one year or more. Mildred Busse has not missed a meeting for five years.

The Liberty Busy Bees met on the afternoon of August 17 at the home of Mrs. Aaron Stromer. There were twenty-seven members, mothers and friends present. Marjorie Greiman and Lola Gast gave their demonstration on stain removal.

HANCOCK COUNTY WILL BE REPRESENTED

Hancock County will be represented at the Mid-Summer Meeting of Farm Bureau leaders and officials at Des Moines on August 25 and 26, it was announced today by President V. A. Cook of Klemme.

Representatives from this county will include V. A Cook, President; O. N. Johnston, Vice President, of Garner; Chas. F. Jackson, Organization Director and Insurance Agent of Garner; and Paul Henderson, County Organization Director of Garner.

Mr. Cook will represent the Hancock County Farm Bureau as voting delegate at the state meeting.

President V. A. Cook said that several matters of importance concerning the general Farm Bureau program of the state will be given consideration at the Des Moines meeting.

It is expected that discussions of a proposed life insurance company for the Farm Bureau, organization work for 1945, and inflation and price control programs will feature the meeting, said President Cook.

FAMILY PICNIC HELD AT BAYSIDE

MRS. ELLA KNOKE HONORED BY RELATIVES

A picnic honoring Mrs. Ella Knoke and children of Elkader, Iowa, was held Sunday at Bayside Park, Clear Lake. Those attending were:

Mr. and Mrs. Art Knoke and family; Mr. and Mrs. John Kaduce, Jr.; Mr. and Mrs. Fred Nuehring and Charlotte; Mr. and Mrs. Earl Nuehring and son; Mr. and Mrs. Owen Nuehring and family

Mr. and Mrs. Clifford Montgomery and Carole; Mr. and Mrs. Clarence Bachman and family; Phillip Cook; Iva Beirs; Mr. and Mrs. Warren Beir and Fonda Mae, all of the Klemme community.

Mr. and Mrs. Clair Blakewell and daughter of Goodell; Mr. and Mrs. Otto Nuehring and son, and Mabel and Evelyn Smith of Mason City; and Mr. and Mrs. Sam Hammond and family of Garner; Lloyd Beir, Eva and Fritz Velau.

CECIL BRIDGES FAMILY HONORED AT PICNIC HERE

Stille Families Held Gathering At The Klemme Park Sunday

The Stille family held a picnic in the Klemme Park Sunday for Mr. and Mrs Cecil Bridges and two sons of Sturgeon Bay, Wisconsin, who were visiting in the community.

Besides the Cecil Bridges family those present were:

Mrs. Clara Stille; Quentin Stille and family; Elmer Schaefer and family; Mr. and Mrs. Virgil Stille, all of this community.

Kermit Stille and family, Thornton; Arthur Carlson and family of Clear Lake; George Stille and family of Goodell.

LULA WILKINS, GOODELL, IS RECOMMENDED FOR P. O.

The president has sent to the senate for confirmation the names for postmasterships in north Iowa towns. Listed among the names is that of Lula M. Wilkins, Goodell, who is now postmistress there.

AVERY 4-H GIRLS HELD MEETING AT BUSSE HOME

The Avery 4-H girls held their Local Achievement Show at the home of Mildred Busse on Tuesday evening A large crowd attended and a fine program was given.

Lunch, consisting of sandwiches, pickles, cake and coffee, was served. Mr Henderson, county agent, and Miss Grimes leader for the 4-H Girls, were guests.

CPL. JOHN D. CLEMENTS is in the ordnance division of the army at some point overseas. He left the United States Sept. 20, 1943 and was stationed in England. His wife and 4½ months old son whom he has never seen live in Klemme. His mother lives at Estherville. He was employed as a tractor mechanic at the Northern Lumber Company's Implement Store before entering the service Sept. 1, 1942. He received his training at Camp Perry, Ohio.

ODDS AND ENDS—Marlene Dietrich ught a coral necklace for Maria Montez n she returned from Italy, the gift of Pierre Aumont. . . . Top role in the ake of "Of Human Bondage" goes to l Heinreid; Eleanor Parker gets the e Davis role, opposite him. . . . Diana , billed as a star in Paramount's "Out This World," rates the dressing room Paulette Goddard's on Star Row. . . . Tracy has been signed by RKO for lead in "Betrayal From the East," his picture since his discharge from the , in which he served as a captain. . . . Ameche is reported to be forming his independent producing company.

WHY, DOCTOR!

A Chicago doctor, the new president of the American Medical association, says the vitamin is being overdone. The people of America couldn't be sick enough to need all the vitamin pills that are being made and sold every year, he declares.

—*—

The doctor doesn't belittle some very swell work being done by vitamins A, B, C (and so on down the alphabet), but he says it is time to halt excessive claims. We are with the medico. Too many claims are being made that vitamins will do everything up to and including the reconditioning of a hair sofa, the elimination of birdshot wounds and the lifting of fallen arches.

—*—

"Try a bottle of this remarkable pale ale tonight," says the radio voice, "and get these important vitamins that will cure general debility, cross-eyes, low blood pressure, measles and cigarette breath."

—*—

"Do you sometimes feel a little below par?" says another air-wave pleader. "Are there moments when you are not the life of any gathering? Rush out now and buy a loaf of McSwiffey's bread, so full of vitamins that you will never again know what it is to feel off form."

—*—

You no sooner swallow that one than an announcer shouts: "Begin wolfing these remarkable gumdrops today. Full of vitamins A, B, C, D and E; they will put you in such shape that you will never know a day's illness!"

—*—

Then to top it off comes one of those jingles:

Would you be a fine American—
A credit to the land?
Buy Superdooper Nuttybars,
And chew to beat the band!

* * *

It's being overdone to a point where thousands of Americans who really need vitamins get sore at the very mention of them.

—*—

Elmer Twitchell thinks there is a fortune in it for the maker of any American product who will go on the air with the simple statement to the unpitied audience:

"I offer you this product with no claim whatever except that it is the best I know how to produce. I'm not quite sure myself just what health-giving properties are in it. All I want the public to know is that whatever vitamins may be involved are entirely accidental."

—*—

But Mr. Twitchell may be biased. He fell badly for a brand of animal crackers sold to him on the representation that it had a vitamin that would eliminate buckteeth, cure a charley horse and add 20 yards to his drive.

* * *

MRS. DEWEY'S VIEWPOINT

"Mrs. Dewey said she would not make speeches, talk on the radio or write for the newspapers."—(News item.)

I will not write a column,
Nor talk by radio;
I'll make no lecture tours,
Or round the nation go;
If I get in the White House
I'll stick to plain brass tacks;
Let Thomas run the country—
And just let me RELAX!

No syndicate can touch me,
I'll show no writing style
With men like Westbrook Pegler
And Simms and Ernie Pyle;
I'll not record my doings—
I'll merely be a wife;
Let Thomas have the spotlight,
I crave the peaceful life.

I wil. not give indorsements
For beds or books and such;
I'll have no platform manner,
Nor literary touch;
I'll have no railroad schedules;
No bugles will I sound;
If I get to the White House
I think I'll stick around.

I feel it must be pleasant
To occupy the place,
And do a little sitting
And set no dizzy pace;
Let Thomas get the headlines,
Red, black or green or pink;
The White House must be lovely
When one would sit and think.

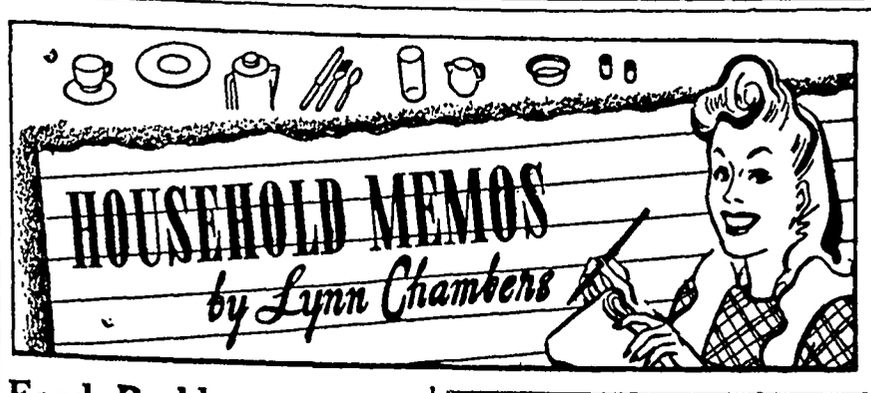
To keep it nice and cozy—
To see the cooking's right—
To be around when Tommy
Is lonesome is my delight;
I'll soothe him when he's fretful,
And cheer him when he's gruff;
Just staying in the White House,
Gosh, CANNOT be so tough!

* * *

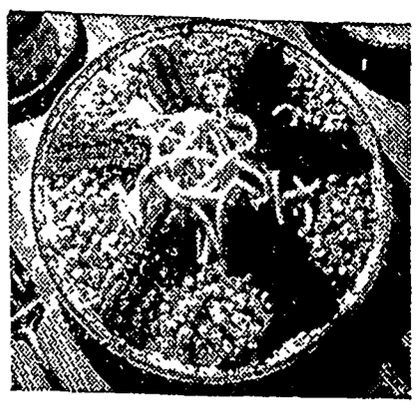
Dr. Charles Kettering announces that he developed a rocket plane 25 years ago, as did Lawrence Sperry; and that since the Nazis decided to resort to this type of thing, we are certain to produce something bigger and better. Can't you imagine the howl the Nazis will put up about brutal and uncivilized tactics when this happens?

* * *

There are certain serious shortages in Germany, the largest of which are in convincing explanations and alibis.



Food Problems Can Be Solved By Careful Cooking



Vegetable platters offer light summer eating possibilities. Arrange them in a pretty pattern with green beans or asparagus making a pattern with macaroni in the center and spaces filled in with corn kernels.

There's nothing like good food well prepared. It's a pleasure both to the cook who prepared it and also to the one fortunate enough to eat it.

Proper preparation is a matter of following rules carefully. That's why we have recipes carefully tested and with accurate directions given. Formerly, good cooks put in a lump of butter, a handful of flour, etc., but no one else could cook like they did. Now we have recipes so that everyone can be a good cook as long as he follows directions.

Vegetables, to be perfection itself, must be cooked to doneness with just a bit of crispiness left in them. Pies must have a crust with flakiness that will melt in your mouth, with creamy smooth fillings or luscious juicy berry fillings.

Cakes are at their best with fluffy, fine grain texture, well flavored icings or frosting. Ice creams and sherbets should be frozen so that they are creamy and contain no ice particles.

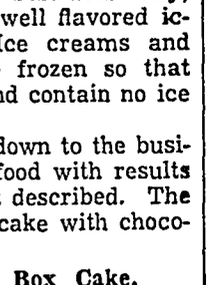
And now, to get down to the business of preparing food with results such as I have just described. The first is an ice box cake with chocolate filling:

Chocolate Ice Box Cake.
(Serves 6)

4 squares unsweetened chocolate
½ cup sugar
Dash of salt
¼ cup hot water
4 egg yolks
1 teaspoon vanilla
4 egg whites, stiffly beaten
1 cup cream, or evaporated milk
2 dozen lady fingers

Melt chocolate in top of double boiler. Add sugar, salt and water, stirring until sugar is dissolved and mixture blended. Remove from boiling water; add egg yolks, one at a time, beating thoroughly. Place over boiling water and cook 2 minutes or until thickened, stirring constantly. Add vanilla and fold in egg whites. Chill. Fold in cream.

Line bottom and sides of a mold with lady fingers or strips of sponge cake. Turn chocolate mixture into mold and place remaining lady fingers on top. Chill 12 to 24 hours in refrigerator. If desired, add ½ cup walnut meats to chocolate mixture before turning into mold. Unmold.



There's a short-cut method to making finer, lighter cakes. If you want a real treat in making cakes, try the new method. Be sure ingredients have stood at room temperature for 2 hours or more so that shortening is soft and pliable:

Maraschino Cherry Cake.

Sift together in a bowl:
2½ cups cake flour
3, 3¼ or 4 teaspoons baking powder
½ teaspoon salt
1½ cups sugar
Add:
½ cup shortening
¼ cup maraschino cherry juice
16 maraschino cherries, cut into eighths
½ cup milk

Mix with electric mixer or by hand with spoon for 2 minutes, by the clock. Scrape bowl frequently.

Add:

4 egg whites

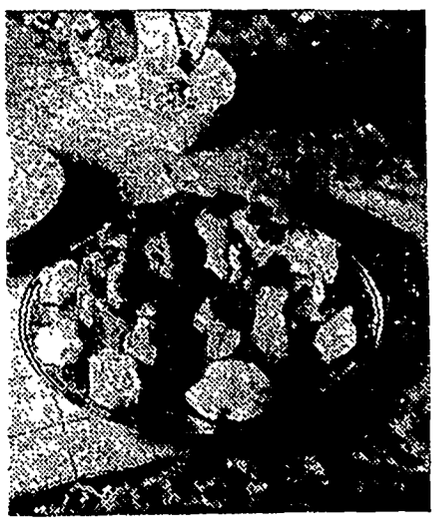
Continue beating for 2 minutes, scraping bowl frequently. Fold in ½ cup chopped nuts, if desired. Pour into 2 well-greased and floured 8-inch cake pans. Bake about 30 minutes in a moderate (350-degree) oven. When cool, ice with boiled or seven minutes icing.

The peach crop looks plentiful and luscious and it seems like part of it should go into those light, fruity pies:

Peach Pie.

2 cups sliced peaches
1 tablespoon lemon juice
¼ cup sugar
3 tablespoons cornstarch
2 teaspoons butter
Dash of salt
¼ teaspoon almond extract
1 9-inch baked pastry shell

Sprinkle peaches with lemon juice and sugar. Cook slowly to extract juice. Mix juice with cornstarch and blend. Cook over low heat until thickened, stirring constantly. Remove from fire. Add butter, salt and almond extract. Add peaches. Pour into pastry shell. Chill. Garnish with cream or piped meringue if desired.



Chocolate Ice Box cake can go back on menus again for these summer meals with light main course. Use either lady fingers or strips of sponge cake for the base of the cake.

Veal is a simple and economical meat, but elegant if properly prepared in this chilled loaf style:

Jellied Veal Loaf.

1 veal knuckle
1 pound veal shoulder
1 onion
2 eggs
9 pimiento olives
1 tablespoon salt
1 tablespoon Worcestershire sauce

Have the veal knuckle sawed in 3 or 4 places. Simmer the knuckle, veal, onion and seasonings in water, cover until veal is tender, about 2 hours. Chop veal fine. Garnish the bottom of the loaf pan with sliced hard-cooked eggs and sliced pimiento. Add chopped veal. Strain the broth and cook until reduced to 1 cupful. Pour over meat, add salt and worcestershire sauce. Press meat firmly into pan. Chill. Unmold and serve with preserved fruit and cole slaw in lettuce cups.

A sauce to go with fish or vegetables is Hollandaise. Here is a quickly made recipe:

Hollandaise Sauce.

4 eggs
½ cup melted butter
¼ teaspoon salt
⅛ teaspoon paprika
¾ cup boiling water
2 tablespoons lemon juice

Stir egg yolks, adding melted butter gradually. Season with salt and paprika. Add boiling water, stirring constantly. Place in double boiler and cook until thickened. Remove from fire. Add lemon juice and serve immediately.

To Hollandaise sauce to serve over fish, add one of the following:

½ cup chopped pimiento olives
½ cup capers
½ cup chopped tart pickles

If you wish additional instruction for canning fruit or berries, write to Miss Lynn Chambers, 210 South Desplaines Street, Chicago 6, Illinois. Please enclose stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says

Point Stretchers: For the vegetable course, combine two leftovers such as lima beans and corn; tomatoes and eggplant; peas and small onions; cauliflower with peas.

Stuffings stretch meats: prune and apple stuffing for roast duckling or veal; celery stuffing for lamb roll; oatmeal stuffing for pinwheel beef roll; and apple stuffing for roast pork or slices of ham.

Potatoes can stretch hamburgers or hash. Or, use leftover mashed or riced potatoes in stretching these meats.

Vegetables can stretch scrambled eggs. Try carrots, celery and onion.

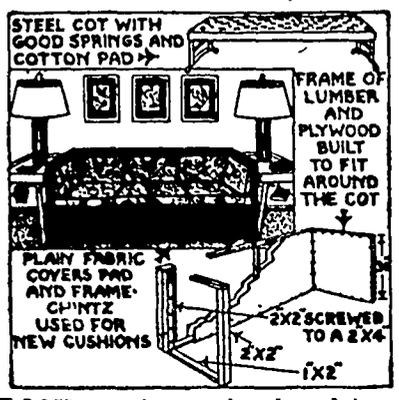
This Attractive Couch Is Built Around An Old Cot; Has Reversible Cushions



STEEL COT WITH GOOD SPRINGS AND COTTON PAD
FRAME OF LUMBER AND PLYWOOD BUILT TO FIT AROUND THE COT
PLAIN FABRIC COVERS PAD AND FRAME. CHINTZ USED FOR NEW CUSHIONS
2X2 SCREWED TO A 2X4
2X2
1X2

YOU can buy a bond and have this sofa too, and that is about as near to having your cake and eating it as anything I know of. It is built around an old cot but it is smart and substantial and has a back and ends and soft reversible cushions.

The frame is the trick. The rest is the simplest sort of slipcovering job with loose cushions made to fit. The sketch shows exactly how the frame is made though you may have to substitute other materials according to what is available. Any sort of wallboard or composition board or even a damaged piece of plywood will do to nail over the lumber framework.

* * *

NOTE—This sofa idea is from BOOK 9 which Mrs. Spears has prepared for readers. This 32-page booklet also gives full details for transforming many other old pieces of furniture and step-by-step directions for repairing sagging springs are illustrated. Copy of BOOK 9 will be mailed for 15 cents. Address:

ATHLETE'S FOOT NEWS

"80.6% of sufferers showed CLINICAL IMPROVEMENT after only 10-day treatment with SORETONE

Foster D. Snell, Inc., well-known consulting chemists, have just completed a test with a group of men and women suffering from Athlete's Foot. These people were told to use Soretone. At the end of only a ten-day test period, their feet were examined by a physician. We quote from the report:

"After the use of Soretone according to the directions on the label for a period of only ten days, 80.6% of the cases showed clinical improvement of an infection which is most stubborn to control."

Improvements were shown in the symptoms of Athlete's Foot—the itching, burning, redness, etc. The report says:

"In our opinion Soretone is of very definite benefit in the treatment of this disease, which is commonly known as 'Athlete's Foot'."

So if Athlete's Foot troubles you, don't temporize! Get SORETONE! McKesson & Robbins, Inc., Bridgeport, Connecticut.

Flying high enough in the upper stratosphere can make a man's blood boil--literally—although he would never live long enough to recount the experience, according to John G Bergdoll of York Corporation's research staff and one of the developers of the modern stratosphere test chambers for pilots At 67,000 feet without protection, atmospheric pressure is so low that blood would begin to bubble in the veins at ordinary body temperature. Ordinary gasoline incidently would freeze solid.

The 3 most common causes of residential fires, according to fire preventative authorities, are rubbish, defective chimneys and combustible roofs Because many serious conflagrations have resulted from fires spreading from roof to roof, many cities now require that roofs be covered with fire retardent materials.

An official of the fire control, U. S Forest Service, predicted recently that advanced types of helicopters developed during the war will modernize fire-fighting methods Helicopters can land in small openings in the forest, on small lakes or mountain peaks where it would be impossible for an airplane to land, and men and equipment can be brought within striking distance of the fire.

One thousand different chemicals are used in making a tank and more than 2,000 in building up a battleship.

BOARD PROCEEDINGS

Garner, Iowa, Aug. 14, 1944

The Hancock county, Iowa, board of supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

D. 1944

On motion and second the Board adjourned to August 28, A. D. 1944

F. J. SCHOUN, Chairman

Attest: F. C. MISSAL, Auditor

HANCOCK COUNY BOARD PROCEEDINGS

5TH ADJOURNED JUNE MEETING

Garner, Iowa, August 8, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read.

On motion and second Mrs. John Riggles of Kanawha is hereby granted a cash allowance of $10.00 per month effective at once and at the end of each month until further notice.

In the matter of a petition of John H. Lauen et al for the establishment of a new drainage district in Avery township said petition is hereby referred to Wm. Henschen, who is hereby appointed Engineer to make an investigation and report as to the feasibility of such establishment and the probable cost thereof.

In the matter of the construction of Hancock County Drainage District No. 137. Charles Anderson, Contractor, having requested an extension of time to October 1 1944, to complete his contract, and Wm Henschen, Construction Engineer, having recommended that said extension of time be granted to Charles A. Anderson, Contractor, to complete construction on D. D No. 137, Hancock County, Iowa, a sub district of D D. 1 and 2.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, acting for and in behalf of Drainage District No. 137, a sub-district of Hancock County Drainage District No. 1 and 2, that Charles Anderson, Contractor, be and he is hereby granted an extension of 60 days to October 1, 1944, to complete his contract for the construction of D. D. No. 137.

The foregoing resolution was offered and read by Supervisor Eckels, who moved its adoption, seconded by Supervisor Chambers, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels, and John Chambers, aye. Nays, none.

In the matter of the hearing on the establishment of a road petitioned for by Albert Chizek et al between sections 16 and 21, Garfield Township, Hancock County Iowa,

This being the date heretofore set for a continuation of a hearing thereon, the hour having arrived and the report of the Garfield Township school board being on file said hearing is hereby continued to August 14 1944, at 10 o'clock A. M C. A. Frisbee, Ralph Newton and Wallace A. Carr are hereby appointed a committee to appraise and assess damages on claims for damage filed in connection with the proposed establishment of the highway hereinbefore mentioned Said commissioners to file their report on or before 10 o'clock A. M., on August 14 1944. Supervisor Schoun is hereby appointed a committee to investigate and cause repairs to be made in D. D. No. 7, D D No. 116. and D. D. No. 13 Main.

Supervisor Eckels is hereby appointed a committee to investigate and cause repairs to be made in D. D 31-36.

On motion and second F. J. Schoun is hereby authorized to execute an agreement with John S. Geibel for care and keep at the Hancock County Home, in behalf of Hancock County, Iowa, and said agreement is hereby approved.

WHEREAS, Wm. Henschen, Engineer has to report that the Lowe Construction Co. of Cedar Rapids, Iowa, have completed their contract for the cleanout of the main open ditch and lateral No. 1 of Drainage District No. 14, Hancock County, Iowa, to his entire satisfaction and

WHEREAS there is due a final payment on said contract in the sum of $1824.67.

BE IT THEREFORE RESOLVED by the Board of Supervsiors acting for and in behalf of D. D. No. 14, that the report of the Engineer be and the same is hereby tentatively approved and final hearing on same will be had at the Courthouse in Garner at 10 o'clock A. M., on the 11th day of September, A. D., 1944.

The foregoing resolution was offered and read by Supervisor Chambers who moved its adoption, was seconded by Supervisor Eckels whereupon the chairman placed the motion of its adoption and on roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, aye. Nays none. Whereupon the chairman declared the resolution duly adopted.

On motion and second the amended report of Engineer Wm. Henschen on the cleanout of the main open ditch and lateral No. 9 of D. D. No. 9 petitioned for by John P. Christians et al is tentatively approved and further hearing thereon will be held at 10:30 A. M., on the 28th day of August A. D., 1944.

This being the 3rd day of August, A. D 1944, a date heretofore set for a letting on the grading of certain Hancock County Roads the hour of said letting having arrived, the proof of publication being on file and the Board being fully advised Said letting was held as scheduled. The chairman of the Board of Supervisors proceeded to open all bids on file and after duly considering all bids on file, the bid of Harry Rehm was found to be the lowest and best bid therefor.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, that a contract be and the same is hereby awarded to Harry Rehm for the grading of certain Hancock County Roads his being the lowest and best bid therefor Chairman F. J. Schoun is hereby authorized to execute a contract with Harry Rehm in behalf of Hancock County, Iowa

Be it remembered that on this, the 3rd day of August, 1944, the county supervisors of Hancock County, Iowa, met in session for the purpose of a hearing upon the budget estimate as filed with this board There was present a quorum as required by law. Thereupon the board investigated and found that the notice of the time and place of hearing had, according to law and as directed by the board, been published on the 19th day of July, 1944, in four official newspapers of Hancock County, Iowa, Britt News Tribune, Britt; The Klemme Times Klemme; The Kanawha Reporter, Kanawha and the Garner Leader & Signal, Garner official newspapers, published in said county, and the affidavit of publication thereof was on file with the County Auditor Thereafter and on said day the estimate was taken up and considered and taxpayers heard for and against said estimte as follows: No objections filed and no one appeared at the hearing.

FUNDS	1 EXPENDITURES For Year For Year 1942—	2 For Year 1943—	3 Proposed Ex. Estimated 1945	4 Est. Unencumb. Bal. Jan. 1, 1945.	5 Est Income Other Than Taxation 1945	6 Amt. Necessary to be raised by taxation 1945

On motion and second the board adjourned to 9 o'clock A. M., on Monday, August 14, A D., 1944

F J. Schoun, Chairman.

Attest. Fred C. Missal, County Auditor.

Fall plowing on rolling land should be done on the contour to prevent soil erosion during the winter. Fall-seeded winter wheat or rye will provide winter cover and help to prevent erosion, furnish early spring pasture, and can be plowed under to furnish green manure next spring.

If 4½ million tons of commercial fertilizer are purchased by and delivered to farmers in the last half of 1944, there can be a record production of the amount produced and used From January to June there is a limitation in how much fertilizer the plants can turn out.

On July 1 the nation had 28 percent less corn in storage, both on and off farms, than a year ago, the Bureau of Agricultural Economics reports. Oat stocks were down 20 percent below last year, wheat 49 percent, barley 37 percent and rye 34 percent.

Vitamins A, B, and D are found in leafy green alfalfa. In absence of these vitamins in the winter ration of pregnant sows and young pigs, there may be trouble with unthriftiness, rickets, pneumonia, pigs born dead or too weak to survive and failure in lactation.

It's a good policy to change pullets to laying mash 2 or 3 weeks before they start laying, poultrymen say.

Only Minnesota surpassed Iowa in butter production during 1943.

KLEMME LOCALS

Pvt. Leslie De Merritt and family went to Thornton last Thursday for several days visit with his parents. Pvt. De Merritt will leave this week Thursday for Atlanta, Georgia, after enjoying a ten days furlough at home.

Sharon, daughter of Mr. and Mrs. Henry Ward, who reside on their farm 1½ miles south of Klemme, had her tonsils removed at a Mason City hospital Saturday. She was able to return home Sunday and is making a fine recovery.

Mr. and Mrs. Awald Jahnke and children of Mason City came Saturday afternoon and spent Sunday at the parental Ben Mullin home southwest of Klemme. Awald is employed by the Northern Lumber Company at Mason City.

There were 263,393, civilian federal employees in Washington, D. C., in March 1944.

BETTER IOWA GARDENS

Celery ordinarily is not a dependable vegetable to grow in Iowa gardens. A rich soil, high in organic matter, together with cool weather and an abundance of moisture are prerequisite to successful production of celery. Growers of celery need to supply water if results are to be realized. Many gardeners have been more successful growing celery in coldframes or hotbeds where the moisture can be regulated better than in the open garden.

* * *

Late varieties, such as Giant Pascal, are not adapted for Iowa under normal conditions. Early varieties, such as Golden Self-Blanching, are more satisfactory. Bolting or premature seeding of celery usually is brought on by a prolonged cold spell after the plants were set out.

* * *

Blanching is a matter of concern to many gardeners. Nutrition experts claim that blanched celery is not as nutritious as the green stalks. It's unwise to draw soil up around celery plants to cause them to blanch as this may cause rotting of the plants. Instead, stand boards on edge on either side of the celery row Or saw a 30-inch roll of roofing in two, unroll and place upright on either side of the plants as with the boards Stakes may be used to hold the sides upright.

Some gardeners who want only a few stalks at a time for home use will place a 4-inch drain tile over several plants. Each plant may be wrapped with heavy paper or cardboard but this usually takes too much time It takes about 2 weeks to blanch celery well after the light is excluded.

* * *

With the approach of severe weather, soil may be banked up on either side of celery plants, allowing only the leaves to be exposed The leaves may be protected from hard frosts by covering with straw or other materials. Celery can be kept until the holidays if handled correctly.

* * *

Most gardeners will prefer to lift their celery in order to have their gardens fall plowed Plants should be lifted with soil attached to the roots, then stored in tubs or boxes in a cold basement or cave. Because it is necessary to keep the soil moist, water should be run in at the foot of the plants. Celery tops should be kept dry to avoid rot. If preferred, celery may be placed on the storage floor. Set the plants in moist sand or soil.

* * *

The last plantings of lettuce kale, spinach and radishes should be completed in southern Iowa at once.

Supplies of red clover seed have declined each year since 1940, according to H B Cheney, agronomist at Iowa State College The total supply of red clover seed in 1944 was 10 percent below that of 1943

The U. S. Army's great new bomber, the Boeing Superfortress (B-29), has probably the most elaborate aircraft radio installation in the world. Max Karant reports in "Flying" that a Superfortress pilot found his landing gear stuck one day over Preque Isle, Maine, and received radio instructions on how to free the jammed gear from Boeing's engineering department in Wichita, Kansas., while he circled over the field in Maine.

Fung Hwang is one of the four symbolical animals supposed to preside over the destiny of China.

Press Comment

"We content ourselves in the assurance the Republicans have nominated for the presidency in this great crisis a man of high character, of demonstrated ability and of full understanding of the responsibility of his candidacy. John Bricker will be a good and useful running mate to Governor Dewey . . . The Republicans did a creditable job in Chicago. If they do as well in the campaign they will win the support of many independents who frequently cast the deciding ballots." — Cleveland, Ohio, Plain-Dealer.

* * *

"Governor Dewey's rousing speech of acceptance last night must have sent every delegate away from the Convention with head high. The Republican nominee only touched on the issues which he will cover in the campaign, but he touched on them with so sure a hand, so directly and searchingly that an assurance was provided of a real fighting campaign. Those who heard Governor Dewey last night heard a man with great gifts rise to the new level that opportunity and responsibility offered him."—New York Sun.

* * *

"It is a strong ticket. The Governor of New York and the Governor of Ohio, standing upon a sturdy platform, form an admirable team for the great task of freeing the American people from the bureaucratic bogs of the New Deal."—Phil., Pa., Inquirer.

WER'E MUDDLING ALONG

While our American boys are giving the enemy a brave and brilliant fight on every battle front around the world, here at home we are continuing to make a most miserable and deplorable failure of winning the war. Bureaucratic government is surely making a foul mess of things at present and many are hoping, as a local business man remarked this week, that "the country will soon be given back to the people."—Milton (Ore.) Eagle.

Around Iowa

End Of Chase

The alligator that escaped from his cage at Ames earlier this month was shot and killed in Skunk River only a few blocks from the L. C. Bourne home where it made its escape. Two Iowa College Navy trainees, preparing to go swimming, saw the animal and tried to capture it alive with ropes and wire, without success. It weighed over 100 pounds and was about 28 years old, and owned by Bourne for 8 years.

Torpedoed

Two couples in a row boat in Clear Lake experienced the novelty of having their craft split completely in two midships by a speed boat recently. The pilot's view was cut off by a sailboat until he was directly upon the smaller boat. The couples, Mr. and Mrs. E. W. Witt and Mr. and Mrs. Walter Beine all of Charles City, were rescued by Bill Witke who was piloting another speed boat near by

Everybody Saw It

One of the most widely printed pictures of the Normandy campaign shows Corporal Melvin White, of Harlan, Iowa, driver of a jeep for news and photo men at the front. Here we have Mel and another GI Joe, each seated either side of a pretty girl atop a culvert, studying a book entitled "French." In writing back home about having his own picture taken by the news photographers, Mel wondered if it got into the public prints.

Passport From France

Mrs. Flossie M. Kintz of Colfax, former munitions packer at the Des Moines Ordnance Plant, has gotten back her billfold containing her work identification papers which she lost, but it came back from France, where Corp. William E. O-Connor of a bomber squadron found the folder among munitions. He sent it to the Ordnance plant which returned it to Mrs. Kintz.

Vacation On Horseback

Two Grand River township farm boys from Adair county recently returned from a 350-mile trip to Nebraska on horseback. Glen Gilbert and James Ruby averaged 35 miles a day on the trip. Ruby rode a 4-year old colt that had been broken for riding only three weeks before the start of the trip; Glen rode an older horse. They even rode through the Omaha business district.

Good Mantle-Piece

A six-point antler of an elk was uncovered from three feet of earth in a ditch on the Bert Conrad farm northeast of Greenfield recently by Mr. Conrad. No one has been found who can explain how the elk's antler happened to be buried so far from natural habitat.

On The Night Shift

Mrs. Cronk of Eldora is past 70 years of age and has raised a family of 11 children, but she can still do a big day's work. She is on the night shift of the Grundy Center Hemp plant. Besides working a full shift, she drives back and forth daily from her home in Eldora. She is considered one of the best of the 130 workers at the plant.

Picked Good Town

Workmen putting in a new Northwestern road station platform at Goldfied found a full kit of burglar implements underneath the old platform. A loaded revolver two bottles of nitro-glycerine, fuses and caps were included in the items found.

NOTICE OF THE APPOINTMENT OF ADMINISTRATOR WITH WILL ANNEXED

STATE OF IOWA, Hancock County, ss. No 2773

NOTICE IS HEREBY GIVEN, that the undersigned has been duly appointed and qualified as Administrator with Will Annexed of the estate of Henry Lewis, Deceased, late of Hancock County. All persons indebted to said estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned for allowance, and file in the office of the Clerk of the District Court.

C. G. WATERMAN, Administrator With Will Annexed.
B. C. BERGE, Attorney.

Dated August 8, 1944.
W. ELMER RAW, Clerk District Court.

Our Men In The Service

CAPT. EARL SCHAEFFER NOW IN FRANCE

The Times received a card from Mrs. Earl chaefer, now in Des Moines, stating that her husband, Capt. Earl Schaeffer is now serving in France In her card written on August 17th, Mrs. Schaeffer further says: "Today is our 9th anniversary. Last year at this time Earl was in England; the year before in Iceland; next year I hope he's back here."

PFC. CHARLES BOCK NOW IN FLORIDA CAMP

Phillip Bock received a letter the first of this week from his son, Pfc Charles Bock, stating that he had been transferred from California to Camp Gordon Johnston, Florida Pfc Bock is in a Casualty unit awaiting to be assigned to another camp and further training.

His new address follows:
Pfc. Charles Bock,
Rec Detach, No. 1, S. C. U. 4466,
Camp Gordon Johnston, Florida

It is said that ballots from soldiers are coming into California too soon Some of them were mailed before the Democratic National Convention which leads one commentator to remark the voter couldn't know yet who would be the Democratic candidate. Haw! Haw!

CHEAP AT THE PRICE

Five minutes of silence may be obtained by dropping a nickel in an improved type juke box. Incidentally, this is an all-time low for hush money.

Brazil, an important source of semi-precious stones and industrial diamonds, has established a school to train its own diamond cutters and polishers for the industry, which now employs 3,000 people in that country alone.

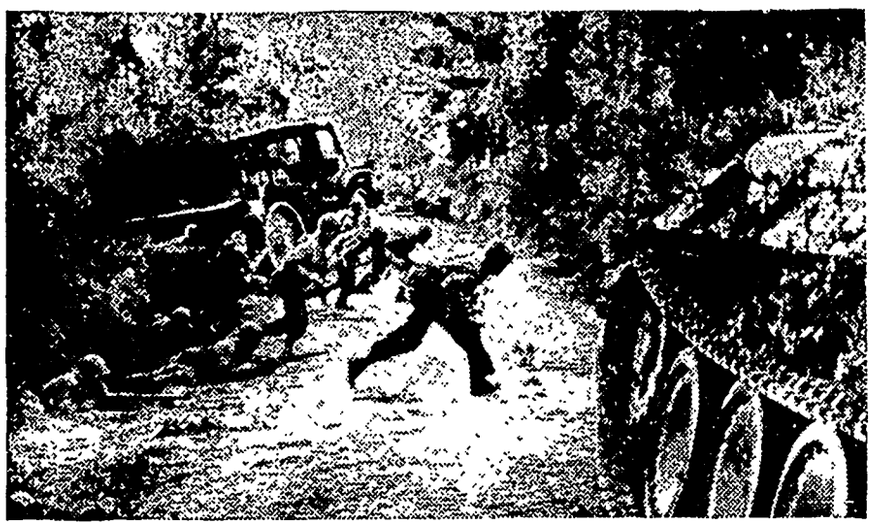
WEEKLY NEWS ANALYSIS

Nazi Crisis Heightens as Allies Break East-West Defense Fronts; U.S. Tightens Net on New Guinea

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



Normandy—Having extinguished fire which destroyed ammunition truck at left, Doughboys resume charge under fire near St. Lo.

EUROPE:
Yank Break-Through

With the harassed Germans holding down British gains on the eastern end of the Normandy beachhead, U. S. troops unloosed a powerful assault on the western sector to break through the Nazis' first-line defenses and force an enemy withdrawal along a 40-mile front.

With heavy bombers preparing the ground for the big offensive with an earth-shaking attack that buried many of the German soldiers and showered dirt over their guns, U. S. armored forces then rode into battle to exploit the breach in the defenses. As the enemy pulled out, U. S. fighters and fighter-bombers swooped low to shoot up the retreating columns.

On the eastern end of the front, Nazi Marshal Rommel threw in a succession of counter-attacks to curtail the British advance south of Caen, with fighting see-sawing as one side would go into action when the force of the other's initial assault had been worn off.

As Lt. Gen. Lesley J. McNair, 61, watched the ground forces he had built up in action in Normandy, he was killed by enemy fire.

Renowned for having reorganized the old "square" division of 20,000 men into the modern "triangular" unit of 15,000, and one of the leaders in the development of powerful, mobile anti-tank guns to combat the armored battlewagons, General McNair had received Gen. George Marshall's praise as the "brains of the army."

A soldier for 41 years and veteran of the Mexican campaign and World War I, General McNair was commander of U. S. ground forces before being sent abroad recently on a secret assignment. While observing the North African fighting in 1943, he was wounded by shell fragments.

Near Warsaw

Capital of old Poland and deep inside the Germans' defense lines, the ancient city of Warsaw reverberated to Russian guns as the Reds pressed their offensive on the central sector of the 800-mile eastern front.

While the Russian spearheads pointed almost halfway across old Poland, Allied troops drew up in Italy for a grand assault upon the enemy's "Gothic Line," first of his defenses guarding the northern plains. Taking advantage of the mountainous terrain on the approaches to their new fortification system, the Germans resisted stubbornly in heavy delaying action.

As German lines stiffened on the northern end of the eastern front, and Hungarian troops slowed up the Russ drive in the Carpathian foothills in the south, the full weight of the Reds' advance was thrown into the central sector, where the open plains gave the Nazis no natural cover.

DROUTH:
Partly Broken

Although varying rainfall broke an extended drouth in the Ohio and middle Mississippi river valleys to help bumper plantings along, the eastern coastal sector from New England to Maryland suffered from continuing dry weather.

With corn tasseling and new ears appearing; soybeans starting to fill, and pastures drying, the wet weather arrived in the Midwest at a critical time.

Although the rainfall pushed the corn along in Kansas, an important part of the estimated 207,918,000 bushel wheat crop was threatened with ruin by moisture as it lay in the field because of a lateness in harvesting and shortage of facilities for moving the grain to market.

PACIFIC:
Japs Wilt

Bringing all of their superior firepower into play, U. S. forces in the far Pacific continued to tighten their foothold on Japan's inner ring of defenses around the Marianas islands, while farther to the south in New Guinea desperate enemy detachments tried futilely to crack the iron ring General MacArthur has been fastening about them.

As big U. S. naval guns tore into enemy emplacements inland to supplement heavy artillery fire, U. S. troops bore down on Tinian island in the Marianas, while other American units broke up frantic Jap counter-attacks to consolidate their hold on Guam, one of the first U. S. possessions to fall to the enemy after Pearl Harbor.

By establishing beachheads all along the northern New Guinea coast, General MacArthur succeeded in trapping thousands of Japanese troops in between, and many of these were attempting to upset the American lines before the steel noose could be drawn around them tighter.

U. S. LAND:
Disposal Program

Government decision to auction off 8,000,000 acres of surplus farm land originally required for war purposes, has created a mild tempest in Washington, D. C., with the Farmers' Union insisting on the Farm Security administration's handling of the disposal as part of its tenant-purchasing program.

Under plans of Surplus Property Administrator William L. Clayton, the Reconstruction Finance corporation is to supervise the program, with appraisals submitted by local experts; sales made as promptly as possible without disrupting the market; former owners given opportunity to repurchase sites, and tracts broken up into individual units.

Spearheading the Farmers' Union opposition, President James G. Patton declared that Clayton's plan would lead to dominance of the program by the National Association of Real Estate Boards, with control over permanent resources by big interests.

Of the $59,004,006 worth of surplus property disposed of up to mid-July, no real estate was included. Aircraft and aircraft equipment made up the bulk of the sales, the RFC reported.

CIO:
Political Power

Sidney Hillman

Prepared to raise up to $3,000,000 for the forthcoming elections, and planning to organize neighborhood political groups with the assistance of union members, the CIO's Political Action committee looms as a powerful, influencing factor in the 1944 campaigns.

Headed by Russian-born Sidney Hillman, chieftain of the Amalgamated Clothing Workers Union, the CIO's Political Action committee calls for: All-out aid to returned servicemen; full employment after the war at fair wages; good housing; medical care and schooling for all; equality of opportunity, and an adequate social security system.

First objective of the committee is to register every eligible voter for the fall elections, and it reportedly has spent a substantial part of $300,000 in this work, with another $400,000 available for immediate use.

"Love thy neighbor—and organize him!" says the committee.

GOOD NEIGHBOR:
Not So Good

Charging the present Argentine government with offering friendly support to Axis establishments and scotching the solidarity of western-hemispheric opposition to the enemy, the U. S. government reasserted its non-recognition of the new regime.

Indulging in no diplomatic double-talk, the government, through Secretary of State Cordell Hull, branded Argentina as a "deserter to the Allied cause," then went on to charge that the new regime assisted Axis subcontractors to bid on work utilizing American material, and also allowed distribution of imported newsprint to Axis papers attacking the United Nations' cause.

TIRES:
Less Heavies

Because of the army's increased demands, and a shortage of manpower in manufacturing plants, civilian allocations of heavy and small truck and bus tires for August were sharply reduced, while the quota for passenger use remained unchanged.

Although the War Production board recognized that the present grave truck and bus tire situation may result in a curtailment of essential transportation, it revealed that the army refused to consent to a diversion of its earmarked stocks to civilians.

In tendering his resignation as Rubber Director, Bradley Dewey declared that U. S. plants were now producing synthetic rubber at a rate of 836,000 tons yearly, and that future manufacturing costs may eventually be cut to 12 cents a pound.

U. S. SENATE:
New Faces

When the next congress convenes, Senators Ellison "Cotton Ed" Smith (S. C.) and Hattie Caraway (Ark.) will not be among the members.

Senators Caraway and Smith

Dean of the senate with 36 years of service and famed for his championship of the farmers, "Cotton Ed" was defeated for renomination for a seventh term by Gov. Olin D. Johnston, former textile worker. Besides his ardent support of agriculture, Smith also was known for his opposition to tariffs, his upholding of states' rights and his advocacy of "white supremacy" in the South.

Only woman member of the senate, Mrs. Caraway was fourth in the Democratic primary in Arkansas, where Representative Fulbright's failure to win a majority of the votes necessitated a run-off between him and Governor Adkins.

ON THE HOME FRONT

To prevent the diversion of material into higher priced clothing, the War Production board ordered manufacturers to channel about 50,000,000 yards of cotton fabric into cheap and moderate clothing during each quarter of the year.

* * *

At the same time, the WPB considered a further reduction in the release of refrigerators since 55,000 remain out of an original stockpile of 700,000 when production was stopped in 1942, and the present supply would be exhausted by the end of this year.

* * *

With milk production in seasonal decline and the demand for exportable dairy products rising, the War Food administration ended the July ice cream holiday by again limiting manufacturers to 65 per cent of the milk they normally used and 22 per cent of their milk solids content.

PRODUCTION:
Army Sets Pace

With the war department declaring monthly war production goals were not being met, and output of materials was $400,000,000 behind schedule during the present quarter, the army service forces set the pace for increased delivery by putting both its military and civilian personnel on a 54-hour week in all establishments with unfinished work.

There was no indication of how many of the army's 1,250,000 employees in arsenals and depots would go on the extended week with the civilian personnel paid time and a half for all work over 40 hours, but the order was expected to affect 50,000 persons at all headquarters of the service forces.

Army plants operating on three shifts were exempted from the order. Where compliance would result in a surplus of labor, workers would be transferred to other jobs.

MYSTERY STORY

Publishers report a nationwide demand for mysteries—detective fiction and horror and ghost tales. Average sale of a mystery book has risen from 3,500 to 8,500. Stories by widely known authors are selling up to 20,000 copies each.

Psychologists believe the mystery books come into greatest favor during times of strain and crisis because "they provide the purest kind of escape-mechanism." They enable the reader to forget the war for a little while.

NAZI PEACE FEELERS

Reports that the German generals revolted against Hitler only after peace negotiations with Russia failed, have caused Washington diplomatic sources to reveal that, on two previous occasions, German peace feelers were extended to Russia.

In fact, there was a very deep fear in U. S. army-navy circles that Russia might be tempted by these earlier offers, especially during the days when no second front had been started and when Stalin was bitter against the Allies for not starting it.

Nazi peace offer number 1 was made several months after Stalingrad, during the early winter of 1943. The peace proposal was made by the Japanese ambassador in Moscow, who, being neutral, was in a position to lay the matter before Foreign Commissar Molotoff. Just what was in the Nazi olive branch is not definitely known, though Hitler was reported ready to give back to the Russians all of their pre-1939 territory except the Ukraine.

Molotoff is reported to have torn up the offer and thrown it into the waste-basket.

Nazi peace offer number 2 was made in the summer of 1943 in a villa on the outskirts of Stockholm. It was made by Hans Thomsen, German ambassador to Sweden and former charge d'affaires in Washington. Thomsen, who speaks perfect English, was born of a Norwegian father, and married a Hungarian who was openly bitter against Hitler and constantly damned him at Washington dinner parties. Washington hostesses never knew whether Frau Thomsen really hated Hitler or was putting on an act to show that there could be freedom of expression among Germans.

At any rate, Hitler later gave her husband a position of great trust as his own personal interpreter, then sent him to Sweden, where Thomsen handled the peace discussion with the Russians.

The Stockholm olive branch also was rebuffed by the Russians, though they didn't hesitate to let the Allies know that something like this was being talked about—even intimated that, if the second front wasn't opened before long, the next olive branch might be more acceptable.

Churchill never took any stock in these intimations, claimed the Russians were bluffing and would never make a separate peace with the Nazis. His thesis was that Stalin would be thrown out of Russia if he did. This was one reason why Churchill kept pulling back from starting a second front.

Roosevelt, however, felt that (1) it was only fair to the Russians to carry out what we had promised them and the world as early as 1942; that (2) a second front was the one way to keep Germany busy on two fronts and end the war in a hurry.

DESTRUCTION OF THE ROBOT

Authentic London reports are not too encouraging regarding destruction of the robot bomb. Greatest success has been in knocking it out in the air with fighter planes. However, it takes a robot just 3½ minutes to cross the channel, so the fighters have to work with terrific speed. (Total time from the bomb's launching until the time it hits London is estimated at 10 minutes.)

If they knock the bomb down over London, it explodes with just as much damage as if they had let it alone, so there is only one place to go after it—over the channel.

Once a robot escapes the fighters and passes over London, anti-aircraft fire is stopped and the only thing to do is to let the bomb take its course and explode wherever it hits.

Furthermore, it is not easy to knock down a robot over the channel. Gunfire must strike its nose in order to explode it. A cannon ball in the body of the robot plane, however, will usually knock it out. Some intrepid fighters have flown up very close—the robot cannot fire back—and tipped up its wing with the wing of the fighter.

NOTE — The Germans recently have perfected a clock which goes off inside the robot about ten minutes after it leaves France, or about the time it is over London. This clock turns the robot's tail rudder so that it makes an eerie, graceful curve as if someone were inside piloting it, or as if it were radio-controlled. This sudden turn is calculated by the Germans to send it in a different direction from that in which the British are preparing to receive it.

* * *

ROBOT BOMBS IN LONDON

The uncensored diplomatic pouch from London reports that the proportion of Americans being killed by Hitler's robot bombs is greater than the proportion of British. This is because Americans in London haven't learned to adjust themselves to living in a city where death lurks at every corner.

Because Americans aren't trained in watching for means of protection in the street, they lose that split second's time necessary to get out of the way of flying glass and bricks.

Walter Winchell

(WNU Service)

Anecdota Presidentia:

Although the White House is the last place in the world (except Grant's Tomb) you'd expect to find a gag-man, some of our Presidents have fashioned bon mottos that would have earned them berths on leading radio comedians' payrolls.

Calvin Coolidge, generally accepted as the tightest-lipped of the Chief Executives, has several nifties to his credit. A Washington correspondent questioned him about his reaction to Rupert Hughes' biography debunking many of the legends about George Washington. Coolidge gazed out the window and then muttered nasally: "I notice the Washington Monument is still standing."

In a discussion on the proper use of a word, Grover Cleveland was surprised to hear a Senator refer to his source as "Daniel Webster's dictionary" . . . "But my dear Senator," said Cleveland, "Noah made the dictionary" . . . "Don't be silly," replied the Senator, giving him a scornful look. "Noah built the ark."

'IT CAN'T BE DONE'

When Wilson was faced with severe opposition on his League of Nations proposals, the objection, "It can't be done," was familiar to his ears. At such times he would relate this story: A man was telling his son a bedtime story about an alligator. It was creeping up behind a turtle, with its mouth wide open. Finally it was within reach but just as its great jaws were snapping shut, the turtle made a spring, ran up a tree and escaped. "Why, dad," said the boy, "how can a turtle spring and climb a tree?"

"Great Scott," replied the father, "he had to!"

A Congressional committee was meeting with President Wilson, and, as you can well imagine, many of the good Representatives were shaking the walls with their loud, but unrational oratory. The Prez listened patiently for a while, and then related this story: "I am reminded of the old Colored man down in Virginia who was riding a mule, and who was caught in a violent thunderstorm while passing through a dense forest. Although he trembled at the horrifying peals of thunder, he was thankful for the occasional flashes of lightning which enabled him to see his way. At last he prayed: 'O Lawd, if it's jes' the same to you, I'd rather hev a little less noise an' a little more light!' "

Theodore Roosevelt had this legend on his White House desk: "The value of a smile—costs nothing—but creates much. It is rest to the weary—daylight to the discouraged—sunshine to the sad—and nature's best antidote for trouble! Yes—it cannot be bought, begged, borrowed or stolen—for it is something that is no earthly good to anybody—until it is given away."

A large Republican meeting was attended by a small boy offering for sale four puppies, so young their eyes were still unopened. "Get your McKinley pups!" he shouted, and enjoyed a brisk sale. Two weeks later, the Democrats had a meeting in the same town, and the little boy was again seen hawking an armful of pups. "Get your Bryan pups!" he yelled this time.

"See here," said an onlooker, "didn't I see you selling 'McKinley pups' here a few weeks ago?"

"Yessir," replied the lad meekly, "but these are different—they've got their eyes open!"

Of course we can't prove it, but George Washington is alleged to have become wearied with an official investigation which paraded a score of experts through his chambers. "It is my opinion," he is quoted, "that calling many witnesses to prove one fact is like adding a large quantity of water to a small quantity of brandy—it makes it weak."

At Teheran, Stalin drove home a point with a yarn that FDR is said to be chuckling over still. "The neighbor of an Arab sheik," related the Premier, "asked for the loan of a rope. 'I cannot lend it,' said the sheik, 'I need it to tie up my milk with.' . . . 'But surely,' replied the other, 'you do not tie up your milk with a rope?'

" 'Brother,' said the sheik, 'when you do not want to do a thing, one reason is as good as another.' "

FDRoosevelt, commenting on the promise of aid recently sworn by a small pro-Allied nation, told a newspaper man that it reminded him of the story of the Barbados Island and the last war. The Barbados, with a standing army of twelve men, was taking bows because it had "stood ready." It was later learned that the island had indeed "stood ready." In the early days of the war, it was disclosed, a cablegram was dispatched to military leaders of the Allied command. "Success," it read. "Barbados is behind you!"

Let's Face Fa

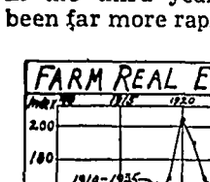
Disaster Faces Farme
If Boom in Land Valu
Continues to Skyrock

By BARROW LYON
WNU Staff Correspondent

WASHINGTON, D. C.—

One glance at the current index of farm real estate val dicates that a boom in land va well started, which, if not ch by the most vigorous legislati likely to develop into a co that will have a disastrous upon farming for many ye come.

The average value of farm per acre for the nation as a has been at the ra about 1 pe a month sin latter part o At the mo the move has slowed slightly—bu is a seasona dition, and inflationary are checke celeration c expected i fall and winter, when farmer erally do most of their land chasing. They have time t around and bargain then.

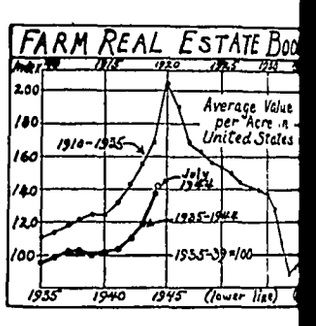


Barrow Lyons

Only the very young farm today cannot remember wha place in the farm land boom last war, and the two years followed that war. It took five then for the national index o values to climb from a level in 1915 (the average for 19 equals 100) to the 205 level in Those figures are March 1 ave for the nation in the years tioned. That was a climb per cent.

Started in 1942

This time the inflationary ment did not start until 194 began from a somewhat lower of values, as the chart accom ing this article shows, and fo first two years the rise fol closely the pattern of 1916 and But beginning last winter, th in the third year of increas been far more rapid than in the



year of the previous boom. first three years of the World boom the rise was 26 per cen the first three years of the pr boom the rise has been 34 per

If the upward climb continu til next March at the same the rise for the first four ye the present movement will be than 50 per cent, compared w per cent in the first four years previous boom. That would that inflation of farm land is sneaking up on us much than last time, and threatens very much further, for the w still in progress, inflationary are much greater than 25 years and we already are beginning lax price rise restraints.

Let me quote from the bulle the subject issued by the USD reau of agricultural economi March, this year. It says:

"In the principal agricu areas the value-stimulating are increasing in strength, whi value-curbing influences are ening. The predominant force erating in the farm real estate ket stem from conditions of farm - commodity prices, r farm income levels and growin cumulations of funds availabl land purchase."

The analysis points out tha mand deposits of country ban 20 leading agricultural state creased 30 per cent during 194 by January, 1944, had trebled 1939. This condition continu grow, as farm income from m ing this year compares well the all-time record of last There is a bumper wheat cr excellent prices, and other promise high cash yields.

Increase in Transfers

The most alarming feature o movement is the increase i number of transfers for specul purposes. Reselling after only periods of ownership is increa especially in the Pacific and Central regions. In the latter of last year, almost three-fourt the tracts resold were held fo than a year, and over two-fift less than six months.

Despite earnest pleas made t this boom through purchase o bonds, instead of land, the promise of effective action appear has been the bill intro by Sen. Guy M. Gillette of which would impose a 90 per tax on profits made from the of farm land held less tha years.

Some responsible officials that if the full vigor of the boom is publicized, it will greater speculation, with r stimulation of the boom—and er disaster when values coll

mmittees for Economic Development lan to Maintain Employment After War

actual operation in one of the small cities, as described by Mr. Hermann C. Wehmann, CED's regional manager for the Ninth Federal Reserve district, embracing the Northwest.

In helping to organize a town, Mr. Wehmann said, CED representatives contact some representative member of the community, who then assembles other active citizens to discuss the program. Expenses are negligible, since the local chamber of commerce, etc., furnish the headquarters, and financial outlay is limited to stationery and postage stamps.

To get an idea of the possible postwar conditions in the community, various surveys are conducted, Mr. Weymann continued, with local industries canvassed as to the number of employees they expect they will be able to hire, and residents polled as to the different kinds of merchandise they plan to purchase. Businessmen then figure on how many people they will need to service the demand. Surveys also establish plans for postwar public works to take up any employment slack.

To provide a solid basis for the business community to figure on, residents polled also are asked to reveal whether they intend to purchase goods out of current income, installment credit, savings or bank deposits, or war bonds.

Through banks, building and loan associations, postal savings and war bond sales, financial assets of the community are tabulated, to determine the extent to which postwar activities might be supported.

Albert Lea, Minn., Survey.

Typical of the consumer surveys upon which businessmen can project their potential needs, Mr. Wehmann said, was the one conducted in the town of Albert Lea with its population of 12,200, in Freeborn county with over 31,000 people, in Minnesota.

The survey showed that residents of the town expected to buy 1,156 automobiles at $1,217,268, and farmers of the county 1,140 cars at $1,105,800.

People in the town hoped to buy 442 new houses at an average cost of $4,068, while farmers looked forward to the construction of 150 homes at $3,150 each.

Repairs averaging $514 were planned for 714 houses in Albert Lea, while similar work averaging $900 was anticipated on 540 farm homes in the county. In addition, farmers indicated they would build 360 barns at an average cost of $1,473, and 360 silos at an average price of $539.

Farmers also expected to purchase 780 tractors averaging $926 each; 810 prefabricated small buildings averaging $566, and 810 electric services averaging $325.

With businessmen thus able to figure upon their possible employment needs, and with surveys of local industries determining their future operating prospects, communities can partly visualize their postwar condition.

New Industries Encouraged.

Towns that may be faced with a surplus of employables can be encouraged to explore the possibility of developing a new industry after consultation with economic experts at their state universities. In cases where such development may be desirable, consideration may be given to some industry which might be based upon a local agricultural crop.

After extensive field work, Mr. Wehmann has set up a chart of the employment prospects of towns which have undertaken communal planning within his region, and as evidence of the value of the survey, consultations with Governor Thye of Minnesota have resulted in the state's consideration to locate public works projects within those areas where labor surpluses may develop.

In organizing communal planning the country over, the CED does not hold that such preparation will be a sure-fire cure for the employment and business problems that will develop upon military and industrial demobilization after the war.

The CED does not overlook the importance of industry quickly reconverting to civilian production to absorb the mass of employables, nor does it ignore the fact that any solid stability can be expected unless agriculture is assured an adequate market at a fair price.

On the question of reconversion, CED stands for the swift settlement of cancelled war contracts to provide industry with funds with which to finance the switch back to civilian goods. At the end of the war, CED figures that about 10 billion dollars of claims will be entered against the government, of which probably 2 billion dollars will be subject to dispute.

Government Surplus Sales.

Besides reconversion, CED also advocates the orderly disposal of surplus war material, so as not to repeat the mistakes that followed marketing of such goods after the last conflict, with the subsequent disturbance of normal channels of production and distribution. In this respect, the government already has established an agency for handling surplus goods, with emphasis placed upon a maximum return for any material.

In a recent address, Paul G. Hoffman, chairman of the board of trustees of CED, declared:

"Private business cannot by any means do the entire job of providing postwar employment. But it is aware of its obligation to make its maximum contribution to that end. With labor and agriculture, it hopes to see reestablished after this war a free and growing American economy . . .

"What is America's postwar goal for civilian employment? The Committee for Economic Development places that figure at from 53 to 56 million jobs. That is 7 to 10 million more than in 1940, the banner year in all our prewar history . . .

"It is clear that private business—in which I include agriculture and the professions—must provide employment for the overwhelming proportion of those Americans who after this war will be seeking jobs. No governmental employment yet planned—let alone blueprinted—can take up more than a fraction of the unemployment slack that would exist if private employment were not able to go full steam ahead when the war ends . . .

Opportunity for Profit.

"Meanwhile, the Committee for Economic Development is committed to these beliefs:

"The American economy after this war must be predominantly one of private enterprise, in which the opportunity for a fair profit will encourage businessmen to expand present operations and to undertake new ventures.

"The American economy after this war must be an expanding econ-

The president of the bank in Rutherford, N. J., gives pertinent financial data to a college girl interviewer. The figures on savings and demand deposits, war bond sales, personal loans and sales on credit, help the Committee for Economic Development in forecasting the purchasing power that will be available to buy goods when peace returns.

omy in which more wealth will be created and consumed year after year, and in which the American standard of living will steadily rise.

"The American economy after this war must be such as to give every encouragement to the small businessman, for small business, and particularly new enterprise, promotes competition and flexibility in our economy, and thus furnishes protection against monopolistic practices which maintain prices and restrict production . . ."

Three leaders of the national Committee for Economic Development study the map showing location of 1,933 CED committees in all 48 states. Left to right, C. Scott Fletcher, director of CED field development division; Paul G. Hoffman, president of Studebaker corporation and chairman of the board of trustees of CED; and William Benton, vice chairman.

The Committee is aiming at postwar production levels 30 to 45 per cent greater than in 1940.

Speaking of Sports
By Bob McShane

Released by Western Newspaper Union.

IT REMAINED for Arne Andersson, Swedish schoolteacher, to prove to the world that talk of a four-minute mile was more than wishful thinking.

In the greatest mile race of all time, Andersson toured the distance in 4:01.6. Running against the famed Gunder Hagg, Andersson came the closest to achieving the goal of some 70 years. He has definitely proved his superiority over Hagg, and has removed any doubt that there is anyone in his class. And it should be noted that Hagg knocked off the mile in 4:02, better than any previously recorded time before their duel.

1943 Record

Andersson's 4:01.6 mile was the latest development in the running of the event that has become a monopoly for him and Hagg. They have broken the record four times in the past two years, shaving nearly five seconds from the 4:06.4 chalked up by Sidney Wooderson of England in 1937.

Arne Andersson

In 1943 Andersson established a world record of 4:02.6. At 28, the flying Swede cut a full second from that mark. For the first three quarters of his race with Hagg, Arne actually was eight-tenths of a second ahead of the four-minute pace. He ran the first quarter in 56.8 for the fastest lap ever made in a mile race. When he reached the half-mile mark, with 60.5 for the quarter, he was hitting pretty much the pace of a good middle-distance man. He made the third quarter in 62.9 and the last in 61.4.

In running 4:02.6 last year Andersson ran his quarters in 58.5, 62.5, 61.8 and 59.8. Comparison of the two races shows that he was 1.7 faster on the first quarter than last summer and two full seconds on the second lap. This gave him a total advantage of 3.9 seconds for the half. He began to lag and ran the third quarter 1.9 slower and then lost 2.4 in the final. It is obvious that he has improved over the first half mile. But he will have to develop a stronger finish to clock the four-minute mile.

Francis Powers, Chicago sports writer, points out that Col. Arnold Strode Jackson, English Olympic champion in 1912, calculated that the four-minute mile will be reached only if a runner can pace himself to 58, 62, 61 and 59 seconds. That is a punishing schedule. It demands a terrific start, a breathing spell during the second quarter with a gradual pickup during the third and speed enough for a slamming finish.

A Comparison

Andersson bettered Jackson's standard for the first quarter and was 2.7 ahead of time at the half. He fell 1.1 back of schedule on the third, but was still eight-tenths of a second to the good for the three-quarters. The final lap was his undoing—he went 2.4 off the Jackson pace.

Andersson indicated earlier in the season that he would have come to the United States but for previous running commitments in Sweden. Hagg, too, has announced that he will return to the United States at "the earliest possible convenience."

Their appearance here would furnish grand entertainment, but the competition we could provide during the summer would make an early trip to this country rather futile.

It would be better if the two Swedes would come for our winter season. They could meet America's milers when they were in top form. It is also doubtful if Andersson and Hagg, during the warm months, could approach the time they made in their homeland, where they can run late in the evening when it is cool and there is no bothersome humidity.

Lesson for August 20

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE PROPHET IN THE LIFE OF ISRAEL

LESSON TEXT—I Samuel 3:19-21; 7:3-12.
GOLDEN TEXT—He that hath my word, let him speak my word faithfully.—Jeremiah 23:28.

Remarkably up-to-date is the helpful guidance found in this lesson. When our nation finds itself facing those other nations which would destroy our Christian faith, and we know that we need the key both to a true victory and a satisfactory peace, the message of this scripture comes with fine helpfulness.

The prophet Samuel (who was also priest and judge) served God in ruling his people at a time when they were under the hard heel of the Philistines. The way out of oppression was revealed in God's Word, which brought revival and deliverance—which was not forgotten in the day of triumph.

I. God's Word Declared (3:19-21).

While a prophet had the ministry of foretelling, his chief work was forth-telling. He told of the future, but his larger ministry was to declare the message of God. As Samuel did this in faithful devotion to the Lord, there was the immediate blessing of God which established the prophet throughout the whole land.

Those who are timid about "limiting" their ministry (imagine that!) to the Bible should learn of Samuel that it is the only really effective message. God will not "let you down" if you teach and preach His Word. He let none of Samuel's "words fall to the ground" (v. 19) and He will not desert us as we give forth His truth.

Note that the Lord Himself came to strengthen and encourage Samuel (v. 21). He is just as gracious to His servants today. He comes to them in that blessed strengthening fellowship which stirs their hearts and fires them anew with holy determination.

II. Man's Heart Revived (7:3-6).

The response of the people to Samuel's message was whole hearted. They were sick of their sin and idolatry. They proved the reality of their repentance by putting away their heathen gods.

Such repentance and appropriate action is a prerequisite to spiritual revival. God cannot give us His blessing if we hold on to our sin and idolatry.

Note how the revival expressed itself. They gathered together and prayed (vv. 5, 6). Spiritual life thrives on the gathering together of God's people. The crisis in Israel was met by a convocation of the people. We need to revive the great soul-stirring religious gatherings of a generation ago. Go yourself, and encourage others to go. Let the fire of God burn, and let those who meet scatter far and wide as brands which will light new fires.

"I will pray," said Samuel. He was a great intercessor (I. Sam. 15:11, Ps. 99:6; Jer. 15:1). Revival starts in the faithful intercession of a burdened heart. Should we not ask ourselves, "Have I really prayed for revival in my church, my city, and my country?"

III. A Nation Delivered (7:7-11).

"Cry unto God . . . he will save us," was the word of Samuel. They cried, and He did! "The Lord thundered with a great thunder," and discomfited the enemies of Israel.

In these days of warfare we might well cry out, "Lord, do it again," thunder upon our enemies and defeat them in such a way that they and we shall see that it was the hand of God and not of men! (See Ps. 20:7.)

That is one thing for which we might well pray, for "behold, the Lord's hand is not shortened, that it cannot save; neither his ear heavy, that it cannot hear" (Isa. 59:1).

Seeing Israel at prayer, the enemy took advantage of them and attacked. In the previous battle at this very spot (see last Sunday's lesson) Israel had been defeated because they had fought with the weapons of man. Now, with God's weapons of prayer and faith, they had glorious victory.

IV. God's Mercy Remembered (7:12).

Samuel raised a stone of remembrance, to remind Israel in the years to come that the Lord had been their help. A defeated, disheartened, sinful people had turned to God in repentance and faith, and God had given them victory. They must never forget His mercy.

One of the great concerns of thinking men in our day is the fear that victory may come to us before we are spiritually and morally ready to receive it. If it does, we shall see a mad rush into excesses of all kinds, a bold glorying in our own ability and power, and even greater forgetfulness of God.

What America needs now is a deep going spiritual revival which will both prepare us for a God-given victory, and for the peace which is to follow.

Elephant, Even When Mad, Doesn't Forget Gratitude

Even when mad, elephants sometimes remember those who have shown favor to them. "An elephant never forgets."

At Goa, India, a child was saved by a mad elephant, which ran about the market place killing every man he came across. He saw lying on the ground the child of a woman who had given him frequent presents of fruit and vegetables. He stopped, picked up the child tenderly with his trunk, and set it upon the counter of a shop.

Gas on Stomach
Relieved in 5 minutes or double money back
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

SNAPPY FACTS ABOUT RUBBER

The reason for the great demand for tires and other rubber products for military motor equipment is evident when it is realized that today's infantry divisions require 3,500 ordnance vehicles of 160 different varieties. The same size outfit in World War I was equipped with 4,400 horses and 153 ordnance motor vehicles.

Because of the poor condition of tires and other parts, 43 per cent more cars had breakdowns and had to be towed from the tunnels beneath New York's Hudson River in 1943 than in any peacetime year, although traffic was 28 per cent lower than in 1941.

MUELLER RESIGNS AS MANAGER

HAS ACCEPTED POSITION WITH BEATRICE CREAMERIES

Will Begin New Work At The Des Moines Plant September 10

Paul Mueller, who has been employed at the Klemme Creamery for the past twenty-two years and who has been manager of the plant for the last twelve years, has resigned to accept a position with the Beatrice Creameries at their plant in Des Moines, one of the largest in the mid-west.

Mrs. Mueller and son, Herb, will remain in Klemme for the school year as Herb is a senior and will complete his schooling here.

During the time Mr. Mueller has resided in Klemme he has been active in community affairs. He has served as a member of the fire department since 1923; was a member of the town council in 1933-1934; and has been a member of the Klemme Civic Club since its organization several years ago.

During his managership of the local creamery, he has modernized the equipment, a new refrigerating plant was installed and an addition built to the plant.

Mr. Mueller's new work at the Beatrice Creamery will be entirely in the churning department of the plant.

Board Hires New Manager

The board of directors met at the secretary's office Monday night to consider applications for the position as buttermaker and manager of the Klemme Creamery.

As a result of the meeting they procured the services of Russell Medim, of Whittemore, an experienced creamery man. Mr. Medim is married and has a small boy in his family. Mr. Medim will begin his work here on September 15th.

At present Mr. Medim is buttermaker and manager at Whittemore. He attained this position about three years ago when the man who was manager entered the service. He has since been discharged and is returning to his former position at Whittemore.

BIRTHDAY PARTY FOR MARYL JUDY JORGENSON HELD

Thursday, August 24th, was the first birthday anniversary of Maryl Judy, daughter of Capt. and Mrs. Ray A. Jorgenson, Jr. and granddaughter of Mr. and Mrs. R. A. Jorgenson.

To celebrate Judy's first birthday anniversary, her grandmother invited a number of people to enjoy a picnic supper in the Jorgenson yard Those present were Mr. and Mrs. John Day; Mrs. Dorance Day and Gary of Los Angeles; Mr. and Mrs. A. L. Kingery; Mr. and Mrs. C. G. Waterman, as well as Judy's mother and grandparents.

Grandma Jorgenson had baked a cake for the occasion and Mrs. John Day had decorated it and on top of it was one candle.

Judy received a number of nice gifts from her friends.

SCHOOL BAND WILL REHEARSE

SUCHER, DIRECTOR, CALLS PRACTICE FOR TUESDAY

The first band rehearsal of the Klemme School Band will be held on Tuesday evening, September 5, at 7:00 p m. The band director, R. C Sucher, asks that all band members be present.

Mr Sucher will be in the school gymnasium from 4:30 until 6:00 p. m Tuesday and wishes to interview beginning students. All prospective band members, whether they have instruments or not, are asked to see him some time during those hours.

The Board of Education feels fortunate to have secured the services of an experienced band man. Mr. Sucher has other bands at Hanlontown, and Fertile. It will be necessary to have one evening band practice. Tentative plans are for Tuesday evening rehearsals, and one rehearsal on Thursday afternoon.

HANCOCK COUNTY BOYS INDUCTED AT FT. SNELLING

The following Hancock County boys were inducted into the Armed forces at Fort Snelling, Minn., August 17th:

Robert D. Nolda, Crystal Lake; Warren K. Stevenson, Britt; Arnold B. Kuller, Britt; Donald Liska, Garner; Armond G. Schneider, of Garner and Howard C. Boller of Goodell.

Daryl D. Lamoreaux was transferred to the Hancock county board for induction and left with the above group.

The following boys were transferred out for induction:

John E. Poole, Britt; Clarence A. Schroeder, Kanawha; and Calvin L. Perkins, Britt.

HANCOCK COUNTY SENDS GROUP TO FT. SNELLING

Hancock County selective service officials report the following boys left last week for Ft. Snelling, Minnesota, for pre-induction physical examinations:

Lloyd K. Aax, Garner; Fritz Brunsen, Woden; William C. Keough, Garner; Arthur L. Benson, Goodell; Robert D. Keel, Forest City; Harley W. Pringnitz, Kanawha, Edward E. Christensen, Garner; Leonard B. Phillips, Garner.

The following also left who were transferred from other boards to this county: Luis Escobedo, Britt, (formerly of Waseca, Minn.; Howard H. Schoenwetter, Garner (formerly of Athens, Ga.); Orville L. Tompson, Woden (formerly of Los Angeles, Cal.)

Young Ladies Honored At Picnic

Members of the Klemme Methodist Choir held a picnic supper at Rev. Harvey's out-door fire place Friday evening in honor of Misses Glenna Gruetzmacher and Eunice Larsen who are leaving the choir during the school year. Both of the young ladies were presented with a gift.

Kanawha Farmer Electrocuted Thursday While Loading Hay

SCHOOL BOOKS MAY BE RENTED

Supt. A. L. Kingery announces that pupils will register in the grades and high school at 9:00 o'clock Monday, September 4th. The following information is needed for the registration forms:

1. Name of pupil as it appears on birth certificate.
2. Date and place of birth.
3. Father's name, and mother's name.
4. Guardian, if not the same as above.
5. Address and telephone number.
6. Name of school previously attended if pupil did not attend the Klemme School last year.

Textbooks May Be Rented

The pupil may rent textbooks and purchase workbooks at cost from the school. The following list of charges for each grade is printed for the convenience of those pupils who wish to pay cash for books. The charges include both textbook rental fees and cost of the workbooks for the coming year:

Grade 1, $1.95	Grade 2, $2.35
Grade 3, $2.50	Grade 4, $2.50
Grade 5, $2.55	Grade 6, $3 20
Grade 7, $2.65	Grade 8, $2.85
Grade 9, Boys $2.05	Girls $2.15
Grade 10, $2.70	

Grades 11-12, charges will vary depending upon subjects taken.

COMMITTEES NAMED FOR WAR CHEST DRIVE

Dr. C. V. Hamilton, Garner, chairman of the Hancock County War Chest, has announced the names of those who will serve on the Executive Committee for the 1944 drive. They are as follows:

V. D. Koons, Britt, vice-chairman; H. L. Ollenburg, Garner, treasurer; Alvin Hanson, C. L. Adams and Oscar Johnson, Kanawha; Chas. S. Whitney, Walter Edelen, Dale M. Bardo, William Ingram, Rev. W. T. Wolfram, Alfred Josten, Frank Schoun, Rep. W. S. Pritchard, Fred C. Missal all of Garner; Clarence Waterman, Lester Stille, and Ed. Thompson, of Klemme; J. M. Townsend, Carl Frick, L. J. Thies, all of Britt; Virgil Cock, of Goodell; A. C. Taylor, Hayfield; Rush Gabrielson, Crystal Lake; Armond Tabb, Corwith; Jake Helm, Woden.

A meeting of this committee was held at Duncan August 22 at which time plans were made for the fall drive to be held September 25 to October 2nd. The quota for Hancock County is $11,428. Last year the quota was $15,000. The quota for 1944 is reduced because of a surplus subscribed in the 1943 campaign.

The Hancock County War Chest is the local unit of the National War Fund which provides funds for all war relief agencies except the Red Cross.

A kick-off meeting will be held at Duncan on September 22nd.

GOODELL INDEPENDENT SCHOOLS OPEN SEPT. 4

The Goodell Independent Schools will open Monday, September 4, with all positions filled except 7th and 8th grade teacher, according to an announcement of F. A. Fee, superintendent.

Other teachers besides Supt. F. A. Fee are: Principal and English, Mrs. Ernest Lewis of Klemme; Home Economics, Mrs. Mabel Panhoff of Forest City; Intermediate, Mrs. Henrietta Hogenson of Belmond; Primary, Mrs. Leo Barkema.

Mrs. Panhoff has two daughters, 10 and 14 years of age and they will live in the L. G. Avery house.

As the Times goes to press we learn that a 7th and 8th grade teacher has been secured.

BROKEN POLE ON HIGH LINE CAUSE OF THE ACCIDENT

Machine Came In Contact With A Low Hanging Electric Wire

Kanawha—George Campbell, 40, a partner of Senator Oscar Johnson on a farm a mile west of Kanawha, was instantly killed by electrocution when he came into contact with a high line while loading hay at the barn Thursday afternoon.

Four thousand volts passed thru his body when he came into contact with a wire on a leaning pole on a power high line.

Campbell, working with Walter Asche, 18, the hired hand, was using a steel-rack loader and when it came into contact with the high line the hay on the load ignited.

Campbell got off the wagon and unhitched the trailer from the tractor when he came into contact with the current and died without uttering a sound.

Fortunately Asche had taken enough first aid that he knew he should not touch the man. He left him lying on the ground while he took the team into the barn and went to the house to summon help.

Asche called Senator Johnson who arrived on the scene in less than 15 minutes, but it was apparent that nothing could be done to save Campbell.

Senator Johnson said Friday that the accident was due to the broken high line pole which caused the wire to hang too low.

Campbell is survived by his wife, a son and a daughter.

YOUNG PEOPLE LEAVING FOR COLLEGE WORK

A number of Klemme young people will be enrolled in college this fall. Elwyn Jacobs returns to Simpson College at Indianola as a sophomore. Corrine Merkel goes to Iowa State Teachers College, Cedar Falls as a freshman. Eunice Larsen will be a freshman at Iowa University at Iowa City. La Vohn Schlawin will enroll as a student at a Des Moines beauty school. Verne Greiman will enter Simpson College as a freshman.

ege as a freshma. Leo Blumer will go to Waldorf College at Forst City. Avis Barz wil take a business ccurse at Hamilton's, Mason City.

LT. BYRNES MISSMAN BACK IN UNITED STATES

Sunday afternoon Dr. W. F. Missman received a telephone call from his son, Lt. Byrnes E. Missman of the U. S. Navy, from Omaha, Nebraska.

Lt. Missman had served in the medical corps in the Southwest Pacific for nearly two years. He told his father that he had a good trip home and that the sight of good old U. S. soil was one of the biggest thrills of his life. He is at present visiting with his wife at Atlantic, Iowa, and expects to arrive in Klemme this week.

THE PRIVATE PAPERS OF PRIVATE PURKEY

Dear Harriet:

Well, I just seen that list of magazines what has been approved by the army for GIs and I feel better now knowing what it is okay for me to be pretending I am reading. The list is twenty to one comics and this is the first time I ever knew there was so many published. Movie magazines is a bad second and I am glad to find National Geographic and House and Garden on the list on account of I do not want to laugh all the time.

—*—

Right between something called Blue Beetle and Big Shot Comics what do you think I find? Better Homes and Gardens! If that ain't a running broad jump in any library at home or at the front what have you? I think at first maybe Better Homes and Gardens has put in a funny supplement but it ain't.

—*—

Sandwitched in between a magazine called Gags which the army thinks we should read and Human Torch which Washington has a idea GIs can see without being done no harm is Good Housekeeping, which looks funny in that location. Well, I would like to see a GI concentrating on Good Housekeeping over here and get caught by his top sergeant.

—*—

Right in between Click, Captain Midnight and Dare Devil comics is Country Gentleman and I never seen no magazine looking so uncomfortable. Harper's is listed surrounded by Flash Comics, Funny Animals and Laff. The Saturday Evening Post is sandwitched in between Radio Hit Songs and the Scientific American which I started once but did not finish on account of there is not much sex interest.

—*—

You could knock me o vith a V-mail postscript when I d Outdoor Life on the list. That is a fine magazine but if there is one thing a soldier does not need to look up it is the facts about living outdoors. Physical Culture is there, too, I guess in case I do not know what to do for exercise.

—*—

I see Field and Stream surrounded by Downbeat, Flash Comics and Famous Funnies but I forgot to bring my fishing rod to the war and I don't get much time off to dig bait. Fortune is listed in between Front Page Detective and Funny Animals.

—*—

But what mixes me up is that I find Ladies Home Journal and the Woman's Home Companion on the list sent to me. Maybe it is just a gag. I have been shifted around a lot in this war but I have not been made a WAC yet.

—*—

Well, I hope you are fine and you ain't no sorrier than me that the bomb missed Hitler.

All my love,
Oscar

P. S. — Send me copies of Wow Comics, Colliers, the American Medical Journal, Ten Story Western, Nifty and Harper's Bazaar I want a all around library.

Imaginary Dialogues

Shimada—Going my way?

Tojo—And how!

Shimada—What have we done?

Tojo—Almost nothing; that's the trouble. As a naval chief you're pretty bad.

Shimada—Nobody seems to rate you much higher as a military leader, I notice.

Tojo—It isn't so much a question of blame. Didn't you listen to the radio? The cabinet is merely being renovated.

Shimada—I like that word renovated; it makes me feel less embarrassed.

Tojo—Yes, but being renovated with an ax isn't so comfortable.

—*—

Shimada—I wonder if we could have been wrong about those decadent Americans.

Tojo—I've been wondering for months. We are away behind schedule with what we were going to do to them.

Shimada—Weren't we to have been making peace in the White House by this time?

Tojo—Why bring that up? It only makes me feel worse.

Shimada—And it all looked so easy at Pearl Harbor!

Tojo—Didn't it!

Shimada—What we did to their fleet there!

Tojo—And what their fleet there has since done to us!

* * *

Scouts from Bretton Woods monetary conference informed us that at no convention in years did so many delegates have trouble adding up checks and counting the change.

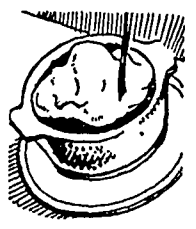
Keep Cool With Shrimp Salad in Aspic
(See Recipes Below)

Keeping Cool

There are still warm days ahead through late summer and early fall, and plenty of opportunity for keeping cool.

Formerly it was thought that one should eat extremely lightly of just low - calorie salads with hardly enough nourishment for the body, and cold drinks. Nowwe recognize the necessity of using enough proteins in the diet to keep the body in good condition, and also know that a cup of hot soup will be as cooling as the coolest drink.



Naturally our proteins may be in the form of salads for we like them especially well in the summer. Here is a good one using a shrimp in aspic, both cooling and nutritious:

Lemon Aspic.
Serves 6)

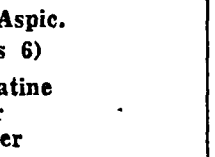
2 tablespoons gelatine
¼ cup cold water
1½ cups hot water
½ teaspoon salt
1 tablespoon sugar
½ cup lemon juice
1 cup cooked or canned shrimp
1 cup chopped celery
Chicory or other salad greens

Sprinkle gelatine into cold water. Add hot water, salt, sugar and lemon juice. Cool, then add shrimp and celery. Chill in ring mold. Unmold on crisp salad greens. Fill with:

***Shrimp Salad.**
(Serves 6)

½ cup cooked or canned shrimp
2 tablespoons french dressing
1 cup diced celery
1 cup lettuce, cut in pieces
1 cup peas
Mayonnaise to blend

Marinate shrimp 15 minutes in french dressing. Combine with remaining ingredients. Garnish the lemon aspic with lemon quarters and shrimps.



Do you ever feel that potato salad has a flat taste? That can easily be remedied by marinating the cubed potatoes in french dressing to give them an extra flavor.

Creamy Potato Salad.
(Serves 6)

4 cups cold, boiled potatoes, cubed
⅔ cup french dressing
1½ teaspoons salt
1 medium onion, minced
3 hard-cooked eggs
¼ cup diced celery
3 slices bacon, fried and crumbled
6 sliced radishes
½ cup mayonnaise or boiled dressing

Marinate potatoes in french dressing one-half hour. Toss together with remaining ingredients and serve with cold meats, wedges of tomato and cucumber slices.

Chicken Salad.
(Serves 6)

2 cups diced chicken or veal
½ cup diced celery
½ cup sliced, toasted almonds
Salad dressing

Mix all ingredients with enough salad dressing to moisten. Serve on lettuce and watercress.

Lynn Says

Go-Togethers: Some foods served together are inspired combinations. You'll like:

Roast loin of pork with minted applesauce, creamed onions, brown bread and coconut cake.

Curried Chicken with boiled rice; corn muffins with fig jelly or jam, or quince honey; lettuce salad; date and nut pudding with cream.

Beef en casserole, with potatoes, carrots and green beans; apple salad; bread and butter pickles; bread with plum jam; peach crumble.

Rye Bread-Cream Cheese Sandwiches
Olives Pickles
*Peach Crumble
*Recipes Given

If you are looking for fruity salads, there are any number the family will like:

Fruit Ginger Ale Salad.
(Serves 6)

1 tablespoon gelatine
¼ cup cold water or fruit juice
¼ cup orange or other juice
2 tablespoons sugar
2 tablespoons lemon juice
¼ teaspoon salt
1 cup ginger ale
1 cup fruit

Soften gelatine in cold water. Place bowl over warm water and stir until gelatine is dissolved. Add sugar, salt and fruit juice. Cool and add ginger ale. Chill, and when mixture begins to thicken, add fruit cut in small pieces (canned pineapple, pears, apricots, cherries or fresh fruit such as oranges, apples, grapes or bananas). Two tablespoons of ginger may be added if a high ginger flavor is desired. Turn into individual molds that have been rinsed in cold water. Chill. Unmold on lettuce and serve with mayonnaise.

Best Salad.
(Serves 6)

1 tablespoon gelatine
¼ cup cold water
1 cup cooked salad dressing
1 cup cream or evaporated milk, whipped
1½ cups chicken or diced veal
¾ cup almonds, blanched and chopped
¾ cup malaga grapes, canned pineapple or oranges
½ teaspoon salt

Soften gelatine in cold water. Place in dish over boiling water and stir until gelatine is dissolved. Cool and combine with salt, salad dressing, whipped cream or whipped evaporated milk. Fold in chicken, using white meat, almonds, and skinned grapes, seeded and cut into pieces. Turn into mold, rinsed with cold water, and chill until firm. When firm, unmold and garnish with lettuce, almonds and grapes.

Fruit desserts? Here are two with apricots and peaches:

***Peach Crumble.**
(Serves 6)

8 fresh peaches, sliced
¼ cup water
1 teaspoon lemon juice
¾ cup flour
1 cup brown sugar
2 tablespoons butter
½ teaspoon salt

Arrange peaches in buttered baking dish; sprinkle with water and lemon juice. Blend sugar, flour, butter and salt together until mixture resembles rough cornmeal. Sprinkle over peaches. Bake in a moderate oven (350 degrees) until peaches are soft and top is brown and bubbly, about 35 minutes.

Apricot Dessert.

Fill honeydew melon ring with orange sherbet and garnish with apricots halved and peeled, marinated in lemon juice and cantaloupe balls.

That Bulldog Grip

The proverbial "bulldog grip" of the bulldog does not result from obstinacy or any other quality but from the construction of the animal's mouth. The lower jaw is longer than the upper jaw, and therefore it is physically impossible for the dog to let go while there is any tension on the object being gripped.

RICHARD JOHNSON'S TOP CALF SOLD FOR $18.50 FOR TOP

Raymond Schoenwetter's Calf Sold For Most Money, $206.50

Thirty-one head of baby beeves sold for $4,869 winding up the annual Hancock County Junior Achievement Show held at Garner last Tuesday. The baby beef sale at the Garner Sales barn averaged $16 71 per hundred as compared to $15 22 last year.

James Conroy, representative of the Garner Sales Company at Britt, paid $18 50 per hnudred for the top calf The Jacob E. Decker Company paid $206 50 for the calf bringing the most money. The top calf was owned by Richard Johnson and the calf bringing the most money was owned by Raymond Schoenwetter.

Hancock County business men purchased 17 of the 31 baby beeves. Decker Packing Company, Hormel Packing Company, Rath Packing Company, and the Iowa Packing Company purchased the remainder of the calves. They also purchased the calves from the business men after the sale. Fourteen market pigs were also sold. Two lots of pigs sold for $15.25 and one lot for $15 per hundred.

The livestock judging contest was participated in by 45 4-H and F. F. A. members. Six classes of livestock were judged. Lawrence Engstler placed first with a total score of 562 out of a possible 600 points Arnold Prohaska placed 2nd with 557; 3 boys were tied for 3rd with 555. They were Raymond Dirksen, James Steward, and Alvin Meyer, Jr.

The 4-H Girls of Hancock County entered approximately 115 exhibits at the Achievement Show. The Madison Livewires and Liberty Busy Bees Clubs topped the list with the greatest number of exhibits.

Three demonstrations were given by 4-H Club teams. The Magor Farmerettes team composed of Ardys Bailey and Gloria Izzard was awarded a blue ribbon on their demonstration of "Serve Yourself." The Madison Livewires team composed of Helen and Mercedes Formanek was awarded a blue ribbon on their demonstration of "A swish in the suds, but is the dish clean?" The Liberty Busy Bees team composed of Marjorie Greiman and Lola Gast was awarded a red ribbon on their demonstration of "Spots Out."

Great Painter Designed Planes in Middle Ages

The great artist Da Vinci designed several "flying machines." Neighbors said after his death that he tested one model near Florence, possibly in the spring of 1506, taking off from the top of Swan mountain. He kept his experiments secret, recording his observations in code.

He studied birds to learn the secrets of flight. He applied himself to problems of center of gravity, equilibrium, airfoil, and other principles that face modern designers. He worked out a theory for gliding. He chose the bat's wing as the most practical model for an airplane wing. One of his "flying machines" resembled an ironing board with wings; the flier was to operate it lying down—the position Orville Wright took when he made his successful flight 400 years later.

Another Da Vinci model had four movable wings that were made to flap in pairs by ropes and pulleys; the flier stood in a suspended gondola. The landing gear consisted of ladders instead of wheels. A third design resembled today's helicopter. Instead of wings it had an overhead propeller shaped like a modern steamship's screw. There is no record of the model which Da Vinci tested. He failed not because he didn't understand flying, but because he lacked an internal combustion engine and fuel.

Oil Companies Turn to Science to Find Deposits

Not many years ago the drilling of a wildcat well was almost a pure gamble. Early wildcatters punctured cow pastures and prairies for no better reasons than wishful thoughts or hunches. If the project resulted in a dry hole—as it did about 19 times out of 20—the risk-taker was out of luck, and usually out of the wildcatting business as well.

Gradually big oil companies got into wildcatting, either directly or by grub-staking individuals. In the latter case the prospector, who is useful as an assembler of leases, is cushioned against the shocks of dry holes and lives to wildcat another day.

The oil companies, intent on taking some of the gamble out of wildcatting, and able to finance research, turned to science for help. They got it from physicists—short-haired professors in corduroys and knee boots who went into the dust and mud of Texas, Oklahoma and California to work out the problems. In the last 10 years especially they have developed methods and instruments to such good effect that wildcat wells are only about a quarter as risky as they once were.

U. S. prisoners of war behind the German lines have received 15,000 pounds of vegetable seeds from the United States through the American Red Cross the War Food Administration reports.

Ice, tea, coffee and other cold drinks use much less sugar if they are sweetened while they are still hot.

KLEMME NEWS ITEMS

Last Thursday Mr. and Mrs. Matt Smith received a package from their son, Kermit in England. The package contained the Purple Heart Medal which was recently awarded Kermit who was wounded. The medal is enclosed in a beautiful box and also contains the Purple Heart ribbon.

Frank Gibbs and family of Des Moines visited with Miss Anna Gibbs Thursday. The Gibbs family had been on a vacation and were on their way home. Mr. Gibbs is in government work and is employed in Civil Service. At the present he is working with the relocation of American Japanese.

Mr. and Mrs. R. A. Jorgenson, and Mrs. Ray Jorgenson, Jr. and daughter Maryl Judy were at Mason City Thursday. It was Maryl Judy's birthday and she had her picture taken on her first birthday.

Mrs. Mable Burgess of Goodell spent Thursday visiting at the Matt Smith home.

Mrs. Lena Schroeder took her grandson, Billy Ingle, back to his home at Waukesha, Wisconsin last Thursday. Billy had spent most of the summer in Klemme with his grandmother and great grandmother Mrs Schroeder will visit with her son-in-law and daughter, Mr. and Mrs Cleo Ingle for a short time before returning home. Mrs. Gretchen Schlawin is taking care of great grandmother Schroeder while Mrs. Lena Schroeder is absent. Mrs. Clara Barz accompanied Mrs Lena Schroeder and Billie.

Mrs. Harvey Hubbard Honored At Afternoon Party

Mrs. Keith Albertson entertained a group of ladies Friday afternoon at her home at a pink and blue party in honor of Mrs. Harvey Hubbard.

Mrs Hubbard received a variety of nice gifts. Lunch was served by Mrs. Albertson.

GOOD CROWD PRESENT FOR MEETING OF CIVIC CLUB

Everybody Had Fun Playing Bingo; Next Meeting In October

There were about forty business men and women present at the Civic Club meeting held at the Community Hall last Thursday evening. After a brief business meeting the balance of the evening was enjoyed playing "Bingo." The $25 War Bond went to Dean Merkel, employed at the Klemme Cooperative Grain Company.

President Thompson announced that the October meeting would be held on the evening of the last Thursday in the month and that a banquet would be served. A speaker will be procured for that meeting.

Stores Will Close

Some discussion was held in regard to closing the stores on Wednesday nights. It was generally agreed that they will close on Wednesday nights beginning about the 15th of September.

The date was not set definitely but will be announced later.

Card Of Thanks

We wish to thank all who sent flowers, cards and gifts to our little daughter Linda, while she was in the hospital.

Mr. and Mrs. Clarence Swalve.

BETTER IOWA GARDENS

Septoria leaf spot disease, called blight by many gardeners, causes tomato leaves to die eventually. Thus the fruits are exposed to the hot sun, bringing about considerable spoilage. Gardeners can save many tomatoes from such spoilage by shading fruits exposed to the sun with a light covering of straw or dried weeds.

* * *

Cracking of tomato fruits is caused by a spurt of very active growth following a period of very slow growth. Such cracks develop and radiate from the stem end of the fruit.

* * *

Unusually cool weather in many sections has caused tomatoes to mature slowly A deficiency of phosphate in the soil also slows maturity and tends to dwarf the plants.

* * *

A sudden decrease in the supply of moisture to the plant, such as hot, dry weather will bring about, causes a black dry rot area at the blosssom end of tomato fruits. Mulching tomato plants will help to avoid such trouble.

* * *

Tomatoes preferably should be allowed to ripen on the vines. If picked fruits are not sufficiently ripe they should be stored in the dark for uniform ripening

* * *

Gardeners bothered with worms in their sweet corn can control them by injecting about 20 drops, or ½ teaspoonful, of mineral oil at the point where the silk emerges from the ear. A medicine dropper can be used The oil should not be injected until the silk starts to wither and turn brown, however.

* * *

Sweet corn plants should all be pulled from the garden as soon as the ears are harvested. This is a good practice with other vegetables as well. As long as the plants are green, they will continue to sap the ground of moisture and fertility. Don't harbor free boarders in your Victory garden!

* * *

Potatoes should be dug as soon as possible after the vines die. If left in the ground too long they will begin to rot.

Seed with any primary noxious weeds or more than 3 per cent of weed seed may not be sold in Iowa for agricultural purposes.

In order to save immature corn and make most use of it, the corn must be made into silage or cut and shocked. To do this will require that every corn binder and silage cutter be used.

Starts Young

A White Rock pullet hatched on February 22 appeared on August 13 with a brood of nine chicks The 5½ months old pullet belongs to R. W Peterson of near Stuart.

Sept. 8. Women's County Committee at the Central States Electric Co. building at Britt a 2:00 p. m.

W. S. C. S. WILL MEET

The W. S. C. S. of the Methodist church will meet next week Thursday afternoon, Sept. 7 with Mrs. J. C. Thomas as lesson leader. The hostesses are Mrs. W. F. Pavey, Mrs. R. A. Jorgenson and Mrs. Fred Kluckhohn.

Corncobs have been found to make an excellent litter for poultry. Coarsely ground cobs have been in use at the Iowa State College Poultry Farm for several years.

Around Iowa

On Backwards

"Happy" Niehaus, a member of the Mediapolis fire department, hurried so much to get to a 6:30 Sunday morning fire that he did not discover for some time that he had donned his overall "hind side to." Not until he reached for some cigarettes did he discover the error.

Bikes Licensed

Pella officials have been making special efforts to have all bicycles in their city registered and licensed as required by a city ordinance Recently Chief of Police Joe De Hoog began confiscating the bikes and taking them to the city office for safe keeping pending arrival of owners who claim them. No one was immune as last week, a prominent Pella citizen appeared to claim his bike, paid the ten cent fee and five-cent fine. Mayor Frank Frush presents each person appearing for a bike license with a card printed with the regulations for safe riding and a colored sticker, the insignia of the Safe Bike Rider.

No Field Corn Now

Lawrence Jessen won't be able to see a field of Iowa corn for awhile, but he will be able to see and taste some Iowa sweet corn. The former Anamosa boy, now a Coxswain on a tanker somewhere in the Atlantic, wrote his parents that he would like very much to see a field of corn. Being unable to send a whole field, Mr. and Mrs. C. Jessen complied with his wishes inasmuch as possible by sending some dehydrated sweet corn

Prices Up

Land prices have gone up considerably since 1865 in Palo Alto county. Fred Kerber recently found a tax deed, much torn and battered, but most of it still legible for some property a mile north of Emmetsburg. The certificate of purchase stated that the transfer of land was made for the sum of $3.56, an average of nine cents an acre. The property was sold for the 1865 taxes which were delinquent. Recently two Palo Alto county farms sold for more than $200 per acre.

Same Cause

Henry Timm of Thornton donated a pint of blood at the blood bank at Clear Lake on August 3. Recently Mr. Timm received word from his son, Pfc. Roy Timm stationed in England, that he had also donated a pint of blood on the same day.

Easily Broken

A month after he fell while carrying two pails of milk, a bone in John Iverson's leg broke as he turned in bed. The attending physician stated that the Graettinger man had cracked the bone when he fell but did not completely break it at the time. A week after the accident, Mr. Iverson became slightly lame but did not attribute the cause to the fall.

Sixty-Six

Sixty-six years ago, Mr. and Mrs. Joe Johnson of Alden were married. They were both 14 years of age when married and are now 80 years old Fourteen of their 21 children are living. Mr. Johnson has been doing manual labor in Grundy county the past few weeks.

WEEKLY NEWS ANALYSIS

Yanks Set Pace in Paris Drive; New Pacific Blows Loom as U. S. Bombers Strike at Philippines

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Pacific—Top picture shows U. S. 5th air force bomber at right struck by Jap anti-aircraft fire above Kokas, Dutch New Guinea, while bottom photo depicts its crash into the sea while accompanying plane flies back home alone.

EUROPE:
Fronts Afire

The whole French battlefront quivered to the clap and clatter of gunfire as U. S. and British forces pressed their twin offensives against the German lines, with American troops reported approximately 50 miles from Paris.

While mechanized columns speeded the U. S. advance upon the former French capital from the west, British and Canadian forces were making slower progress to the north below Caen, where strong enemy armored formations hacked away to contain the onslaught while still other large concentrations defended their exposed flank.

As the Allied drive on Paris rolled on through good tank country, U. S. forces in Brittany threw in all the weight of their superior gun and tank fire to reduce the coastal ports of Brest, Lorient and St. Nazaire, which would open up important supply lines from the Atlantic ocean.

With every man, woman and child in East Prussia mustered for civilian war service, and Russian forces

Tough German paratroopers, who faced the American onslaught at St. Lo, developed a deep respect for U. S. fighting qualities.

According to one of their reports, which fell into American hands, they declared: "Enemy artillery is distinguished by the accuracy of its fire and maneuverability. Employment in depth, changes of positions, self-propelled guns—during infantry attacks close to the front lines—is the doctrine followed. A great number of observation planes makes it possible . . . to fire effectively even on small targets."

Speaking of U. S. fire and phosphorus bombs and high explosive ammunition, the report revealed: "They cause stomach trouble and headaches. . . ."

lurching on the threshold of their "holy soil," Nazi armies fought bitterly to hold off the Red forces advancing on that Baltic province of Germany.

Farther to the south, the Nazis countered Russian advances upon the former Polish capital of Warsaw with equal stubbornness, with the Reds seeking to relieve the stalemate by switching their attack from the front of the city to the northeast in an encirclement attempt.

On the southern end of the long eastern battlefront, the Russians pushed within 75 miles of the German industrial province of Silesia, while other Red forces moved within 27 miles of the Czecho-Slovak border in the towering Carpathian mountains, where the rugged terrain was suitable to Nazi defense.

As U. S. and British troops poised for their assault on the enemy's "Gothic Line" in the hills north of the Arno river in Italy, Polish and Italian units harassed the Germans on the eastern or Adriatic end of the battlefront.

With the Allies girding for an all-out drive on the latest enemy mountain fortifications, their problems of supply over earthy, choky roads in the rugged country were relieved by the restoration of the seaports of Livorno, Civitavecchia and Piombino.

PACIFIC:
Battle Plans

"It's good to see you, Doug," said the President upon greeting General MacArthur at Pearl Harbor, and on that note did the nation's chief executive open a three-day war conference with Pacific military and naval leaders on the development of new offensives for the unconditional surrender of the Japanese.

Heralding things to come in the Pacific theater, American Liberators raided the Philippines for the first time in 27 months, striking at airfields on Mindanao island, while giant B-29s flew over Japan itself to rain fire-bombs on the shipbuilding center of Nagasaki, and attacked oil refineries at Palembang in the East Indies.

Completely restored after the attack of December 7, 1941, Pearl Harbor was bristling with acres of planes, tanks and other battle equipment as Mr. Roosevelt inspected installations during the conferences. As a result of these developments, the President said, Hawaii was no longer an outpost of U. S. defense, but "one of our rear areas."

WEATHER:
Rain Needed

As another heat wave struck parts of the Middle West, drought conditions were intensified east of the Mississippi river, with crop growth faltering in many sections.

According to the weather bureau, Kentucky may harvest only 50 per cent of a corn crop, while condition of the grain was spotty in Illinois, Michigan, Indiana and Ohio, due to heat and moisture deficiency. In southern Illinois, soybean growth was poor to good, while extensive failures of potatoes, pastures and gardens were reported in Ohio.

West of the Mississippi, however, corn prospects were excellent, with promise of a banner crop in Iowa where the drought was broken in the south, and a record harvest in Nebraska, with one more good rain.

OIL:
Allied Accord

The withholding of raw materials from prospective aggressor countries to contribute to postwar peace loomed as a result of an oil pact signed between the U. S. and Great Britain, which conditioned future distribution of the product on supervision of an international organization to maintain world security.

Calling for availability of oil to all peaceable countries at fair prices and the orderly development of re-

U. S.-British oil conferees included (left to right) Interior Secretary Ickes, Undersecretary of State Stettinius, and Lord Beaverbrook.

sources without competitive wastes, the pact envisions the future organization of an international oil commission to advise governments on how they should produce and sell the product.

Other provisions of the pact seek to assure the recognition of the principle of equal opportunity in obtaining concessions.

RATIONING:
New Values

In an effort to control consumption, OPA removed utility grades of beef and lamb from rationing, restored pork loins, hams and canned fish to the lists, and increased the point values of cheese.

OPA's removal of utility grades of beef from rationing was prompted by the large movement of such classes of cattle to market, while the elimination of points on lamb was intended to spur the consumption of such meat.

Restoration of pork loins and ham to rationing, on the other hand, resulted from a seasonal decline in hog marketing. Canned fish was put back on the lists because of short supplies throughout the country.

Increases in point values of such cheeses as cheddar, colby, cream, neufchatel, creamed cottage, Swiss, Italian, Munster and limburger were necessary to slow down their movement into consumer channels.

WAR PRODUCTION:
Big Speedup

Army officials continued to stress the need for an increase in the production of tanks, trucks, big guns and ammunition in view of greater demands from the flaming battlefronts.

Latest army bigwig to call for more production was Maj. Gen. Lucius D. Clay, director of material for the army service forces, who declared that schedules for the last half of 1944 called for a 77 per cent boost in output of aircraft bombs over the first six months.

Production programs for heavy artillery ammunition will be up 110 per cent; heavy artillery weapons, 23 per cent; light-heavy and heavyweight trucks, 40 per cent; heavy-heavyweight trucks, 123 per cent, and tanks, 50 per cent.

New Oddities

Birth of quadruplets to the second wife of a 75-year-old artisan of Amalfi, Colombia, brough the number of his children to 47. He had 30 by his first wife and now has had 17 by the second.

Mary Phillips

Craving excitement, 19-year-old Mary Phillips of Trimsaran, Wales, stowed away on a landing barge which took her to the bustling Normandy beachhead.

After spending two weeks on the beachhead amid the rumble and roar of guns and bombs, Miss Phillips returned to Britain, none the worst for wear.

When Sheriff Claude Sullivan of Murphy, Idaho, decided to close his store after suffering injuries in an automobile accident, the town which serves as seat of Owyhee county has left with only a billiard parlor as a place of business.

POSTWAR RELIEF:
Hot Issue

While the nation's production hummed at top peak in the fevered war effort, senators wrangled over measures designed to afford relief to millions of workers who may be left unemployed in a postwar economic relapse.

Joined by southern Democrats, the Republican minority waged a successful fight against the Kilgore-Murray bill's delegation of authority to a federal work administrator, who could deny the unemployed compensation if they refused to accept positions offered them, which might involve moving their families to other regions in some cases.

While the administration forces gave way before the onslaught on this provision, they put up a stiffer fight for the payment of unemployment compensation ranging up to $35 a week, while the opposing coalition stuck by the George bill, which would leave these disbursements up to the individual states, where they run from $15 to $22 a week. The George bill also would place all federal shipyard, arsenal and other workers under state unemployment compensation systems.

TIRE OUTPUT:
More Sought

In seeking to speed up the manufacture of heavy tires to keep essential military and civilian transportation rolling, the War Production board revealed that it would strive to have CIO workers shift from passenger to truck tire production, and also persuade them to go over their own self-imposed quotas of output.

In attempting to arrange for a shift of workers from one department to another, the WPB sought to assure their seniority privileges to protect them against later layoffs, while the WPB proposed proportional pay boosts for increased output to counteract the employees' alleged policy of limiting their work to avoid rate cuts for more production.

LAND SALES

Sales of farm land acquired by the government should be limited to those who need it for a home and living, with first preference for former owners, and second for war veterans, Secretary of Agriculture Claude Wickard told the house.

Surplus land, he said, should be sold on the basis of its long-time earning capacity and not at current inflated prices. Some 6,500,000 acres have been acquired by the government, only 3,500,000 acres of which is considered suitable for farming.

HIGHLIGHTS . . . *in the week's news*

CANNED FRUIT PRICES: Government support prices on canned peaches, pears, apricots, fruit cocktail and fruit mix packed in 1944 will be set at 86.4 per cent of the area average ceiling prices for the industry, or 86.4 per cent of the canners' gross civilian ceiling prices, whichever is lower, according to an announcement of the War Food administration.

APPLES: An average crop of apples is predicted for the year by members of the International Apple association. About 123 million bushels will be harvested, according to the association. Of these, 10 million bushels will go to the armed forces, and 36 million will be sent out as lend-lease food. Maximum prices have been set for the 1944 crop,

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

U. S.-BRITISH OIL ACCORD

This column, it should be noted in advance, is likely to be dull. But if you are interested in keeping your son or husband out of another war, it should be important.

The United States and Great Britain are just concluding the first agreement aimed to remove the danger of war—an agreement on oil.

Oil is one of the most ticklish economic subjects in the world. Oil is what makes a nation's battleships move, runs the automobiles, sends the planes into the air—in fact, spells the difference between a nation of strength or a nation which must bow to the whims of others. The present oil agreement seeks to settle the battle for oil; eliminate one important cause of war.

The last war was scarcely over when Great Britain began maneuvering to corner the oil supplies of the world. British leaders were quite frank about it.

United States Protests.

Finding itself in this position, the United States government jumped into the battle for oil with vigor. The secretary of state, Charles Evans Hughes, wrote a series of blunt, bare-faced notes to the British, wanting to know why they barred American oil companies from Palestine, since Palestine was not British but merely mandated to the British by the League.

Meanwhile, the British, though barring the U. S. from their areas of interest, quietly invaded ours. They turned up with concessions in Colombia, not far from the Panama Canal. Even in Panama proper, a British gold-mining company staked out a huge and suspicious claim in an area where no gold was known to exist.

History Begins to Repeat.

In World War II, history at first began to repeat. The five senators who toured the world war fronts came back with the story of how the U.S.A. was rapidly depleting her oil reserves while the British were hoarding theirs. They told how the British were trying to keep us from further developing oil resources in Arabia; how the British had a refinery on the Gulf of Persia, 50 per cent idle, while we shipped oil clear across the Atlantic to British armies in the Near East.

Yes, it looked as if history would repeat.

On last April 29, however, representatives of the British and American governments negotiated an informal understanding aimed to eliminate the oil battles of the future. It was an excellent, far-sighted agreement. And during the last two weeks in Washington, Lord Beaverbrook and his associates have been negotiating with Secretaries Ickes and Hull to make this informal oil agreement formal and binding. This time, the British have been far more cooperative and far-sighted than in 1919 — with one possible exception.

After U. S.-British experts laid their excellent April 29 ground work, Lord Beaverbrook kicked over the traces at some things, and he seems to be keeping a more watchful eye on the interests of the empire than on a fair future peace. For instance, he has been insisting that Britain have the right to ban the sale of U. S. oil in England, despite the fact that British Shell sells in this country. However, the basic agreement is truly encouraging when it comes to future peace.

Provisions of Agreement.

It provides, first: "That petroleum shall be available in international trade to the nationals of all peace-loving countries in adequate volume, at fair prices and on an equitable and non-discriminatory basis."

This means that, if the U.S.A. runs out of oil or vice versa, it is up to Britain to help supply us unless, for example, one or the other attempts to conquer Ethiopia as Mussolini did, and the world peace-machinery countries attempt to cut off their oil as the League tried to do to Italy but, because of pressure from the big companies, could not do.

The agreement also gives "equal opportunity" for "acquisition," "development," etc., in areas under concession. This eliminates cutthroat rivalry for new fields. Each nation is to respect the valid concessions of the other and its citizens.

Finally, and very important, "exploration, development, operation of refineries and distribution shall not be hampered by restrictions imposed by either government or its nationals."

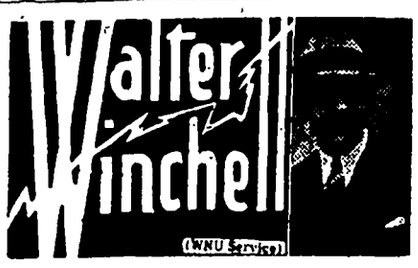
MERRY-GO-ROUND

¶ Cautious Mr. Turk—If you want the real low-down on why the Turks finally broke with Germany, it was because Hitler had moved troops out of Bulgaria just opposite Turkey. After that, the Turks weren't afraid of being attacked. . . . With Sweden and Switzerland both closed to Hitler for escape, his few remaining havens are Japan—which won't last long—and Argentina. . . . It has long been rumored that the Nazi top men were building up cash reserves in Argentina.

Walter Winchell



Notes of a New Yorker:

The New York papers recently offered an article by Gypsy Rose Lee's mother. The story was about Gypsy . . . New Yorkers are familiar with the silly quarrel between these two . . . Supposed to have started when Gypsy wrote articles for a magazine about her early career in which her mater was kidded a lot and unfrocked a little . . . Broadwayites later heard buzzing about mother and daughter getting to the point of name-calling.

Once Gypsy received a telegram from her Mom, which warned that unless the two could get together about a certain matter she—the mother—would "give" the story to the newspapers.

"Look, Mom, don't be a fool," replied Gypsy, "don't give it to the papers. Sell it to them."

Now is probably the last time to recount this instance of the humorous by-play that went on between FDR and Henry Wallace. When Mae West was suing Frank Wallace for divorce the papers were full of stories headed "Mae West Charges Wallace Unkind to Her." The President scissored one out and sent it to the vice president with a note (in his own handwriting) reading, "Henry, is this the way to treat your women?"

Ernie Pyle reported the incident of captured Nazi General von Schlieben, who squawked to Yank commanders about American photographers taking his picture without asking permission . . . And how General Collins reminded Von Schlieben that in the United States there is a free press "and we in the army cannot stop our newspapers from printing the news and taking pictures." In Time (or Life) a few editions ago, we read what the photographer said when Von Schlieben barked: "Oh, I am bored with you American photographers taking my picture." The American hocus-focus man (who understood German) snapped back: "And I'm bored taking pictures of captured Nazi generals."

This is the newest Russian gag overheard at the Madison Bar: "So Ivan Ivanovitch died gallantly in the midst of battle," sobbed Katerina Mikhailovna Mikhailovitch. "You say he uttered my name with his last breath?"

"Part of it," replied the returned soldier, "only part of it."

An ironic fact is that George M. Cohan never could scribble a successful ditty about baseball, the sport he loved so much. Cohan, as all Broadway knew, was a Polo Grounds faithful. Yet the two songs he wrote about baseball were never performed more than a few tired times, even with John McGraw and the Giants lending themselves to its promotion. Yet Albert Von Tilzer's "Take Me Out to the Ball Game" is as famous as the game itself, and Von Tilzer saw his first baseball contest only a short while back, after his tune had been played and sung for decades.

"Take Me, etc.," was not the first baseball song ever written. In 1885 a ballplayer named Kelly was an idol up in Boston. A faithful fan scribbled a ditty tagged "Slide, Kelly, Slide." The three-word phrase became more popular than the song.

A song was responsible for finishing a baseball star's promising career when it looked as though he might develop into another Hubbell or Walter Johnson. His name was Harry Covaleskie, and he was with the Phillies.

One season he established himself by pitching against the Giants three times in five days (beating them in all starts) and taking a pennant right from under their noses. The Giants, burned up, found out later that Covaleskie, as a kid, had trouped in amateur vaudeville singing "Silver Threads Among the Gold."

One afternoon the following summer Covaleskie was hurling against the Giants when from their dug-out came the strains of "Silver Threads." The Giants kept this up all during that series, and other National League clubs followed with the same ribbing . . . In six weeks, Covaleskie was a nervous wreck . . . The following year saw him fade from baseball completely.

Despite the ODT's warnings against unnecessary travel, vacation travel is up 10 per cent. Apparently, there are people who won't do anything to help win the war—even if it means staying home and doing nothing.

A certain New York State Senator, after a nervous breakdown and a holiday in a sanitarium, was pronounced honky-dooly . . . He returned to the Senate at Albany, where he engaged in a hot debate the first day.

During the debate, one of his opponents, forgetting the man's illness, lost his temper and yelled: "You're crazy."

Pulling out his discharge certificate, Our Hero waved it and said: "I can prove I'm sane—now can you?"

Speakin' of Sports

by Bob Considine

Released by Western Newspaper U

Two of the nation's most heralded civilian heavyweights on display at Wrigley field in cago a couple of weeks ago proved one thing—there is no for Sgt. Joe Louis, current cust of the world's championship, into serious training for the de of his title.

The Chicago debacle saw Baksi, a big, tough hulk, on his way to a 10-round decision over Lee Savold, Paterson, N. J., heavyweight. The victory carried with it recognition of the Illinois Athletic commission as "duration" heavyweight champion. That means until Louis, Conn, Pastor and the rest ret

We had figured Savold to win that we were particularly interested but after all it was a fight posedly of some consequence in current heavyweight picture. dentally, that picture is dark bidding and not very interesting see.

Fighting Machine

It wasn't so long ago that Sa the loser, looked like a fine fig machine. But the machine ap to be quite well worn out. He two good rounds against

JOE LOUIS

the fourth and fifth—but he w the same fighter who scored vious successes in Chicago ag Nate Bolden, Lem Franklin (tw and Lou Nova.

Baksi is no graceful gazelle. plods ahead with his pointed stuck out belligerently and his hands flopping. But that jaw is ioned of granite and is imperv to blows that would wilt a ma lesser stamina.

Savold was in bad shape muc the time, having been mauled close about the head and kidn Baksi slammed lefts to the body whisked short, right upper across the chin. From the s round on the big Pole kept pr ing his advantage, until, at the ish, Lee's nose was bleeding and left side of his body was the c of a boiled lobster.

Even Hymie Wiseman, Savo manager, couldn't think of a t to say in defense of his boy. looked like a preliminary boy T can be no excuse except that didn't — or couldn't — untrack h self. I swear that on his gym sh ing he looked unbeatable. He n was better."

Great Hearted

He had one thing that remin onlookers of the Savold of yester He had the same heart that he when he disposed of Bolden, Fr lin and Nova. When the last g sounded there were many who sisted that he had gone over crest, and that from now on fights would continue to grow effective. Perhaps the pace has always maintained fin caught up with him, depriving legs of speed and his fists of pu

Savold made no excuses. "I in shape," he said in his dres room, "but the maritime ser took some zip out of me. I c concentrate too much on my wars, especially when I'm trai for a bigger battle."

The fight wasn't a howling fi cial success, luring a $43,355 g gate, which probably means show was promoted at a deficit si the headliners took 60 per cent the net. It also proved a bit bo to the assembled 16,135 spectat 7,500 of them being uniformed s icemen and women, who were moter Jack Kearns' guests.

To be truthful, the custom probably including Kearns' nonp ing guests, began to boo the ac about the time of the seventh ro and didn't stop until the b reached its somewhat inglor end.

Louis and Conn

Perhaps we're too critical, there are only two contempor heavyweights we'd travel any tance to see—Champion Joe L and Contender Billy Conn.

Both men are real fighters. have the heart for it, the a to fight and are capable of put up a real show every time they into the ring.

In our book, Jack Dempsey Joe Louis are the two grea heavyweights of all time. Both were dangerous from the start.

Evacuation of Wounded Takes Its Place With a Drugs and Blood Plasma as One of Modern ilitary Medicine's Greatest Life-Saving Plans

ELMO SCOTT WATSON

Be- of front-line treatment given can soldiers, more than 97 per of the wounded brought from fields to evacuation hospitals been saved.

e the wounded have been treat- ey must be sent to hospitals far the scene of battle where they st and recover and, of course, ickest way to get them there is plane. Part of these wounded been flown from foreign thea- of war to their homeland and ands of them have been flown hospitals on the coast to hos- near their homes where they nvalesce and benefit in spirit visits of family and friends, is a basic army policy to get ounded soldiers as close to as possible for the convales- period.

a recent report on the handling n wounded during the invasion ance, Maj. Gen. Paul R. Haw- hief surgeon of the European er of war, stated: "There has een the slightest hitch in the of evacuation. As a result of peed with which these wound- ere evacuated from Normandy, condition of the casualties on al in the United Kingdom has surprisingly fine." To that com- might be added the fact that oximately 4,000 sick and wound- ve been returned to this coun- board Air Transport command s, part of them over regularly duled transport services operat- the ferrying division of ATC.

GOING HOME—A soldier is carried aboard a plane operated by the ferrying division of Air Transport command and in a few minutes will be flying to a hospital in the vicinity of his home. Flight surgeons inside the aircraft supervise the job.

Many hops are as long as 12,000 miles. Only one patient among those evacuated by the Air Transport command has been lost as the result of air travel.

Cooperation Does It.

Close cooperation between the several organizations of the army makes possible successful air evacuation of the war wounded. The combat air forces outside the United States, the foreign wings of Air Transport command and various air commands in the United States, notably the First Trooper Carrier command, have done experimental work on the problem. In 1943, a total of 173,527 sick and wounded patients were evacuated by American military aircraft throughout the world, ATC carrying all those returned to this country.

Here is the way evacuation from the combat areas is accomplished: Suppose the scene is Anzio beachhead. Medical corpsmen have toiled across the bullet-swept area, given a guy named Jim emergency attention, then inched back with him to the beach where he receives more extended treatment. At a nearby clearing station, the flight surgeon classifies the patients. He determines that this soldier, just arrived from the front, has a serious head wound which requires immediate surgical attention. When the transport plane flies in, Jim is among the outgoing patients.

The medical air evacuation units transform the plane from its troop or cargo-carrying mission and do it quickly lest snipers or bombs disable the aircraft. Litter equipment is installed in three or four tiers and as many as 24 patients are loaded. Two men carry each litter to the plane, two more place it in position inside and a third man inside fastens it in place. In an emergency, the flight nurse in the plane must use untrained personnel for this work and occasionally she takes the place of a loader.

When the plane takes off, the flight nurse is in medical charge. Only in extreme emergencies does the flight surgeon accompany her. A surgeon checks, when possible, during the refueling stops. Otherwise the flight nurse and a surgical technician, an enlisted man with noncommissioned officers' rating, handle the patients. The plane is equipped with an ambulance chest which is a small trunk containing bandages, medicine for the relief of pain, equipment for administering intravenous medication and blood plasma also is on the plane.

Once in the air, the flight nurse is in complete charge, aided by a trained staff sergeant. Aloft she handles any emergency and does anything a doctor would have to do —except operate. Already the men borne aloft from Anzio were feeling better. Removed from the din of battle, their shock condition improved. Jim, for example, mustered sufficient interest in life to ask where he was going. Six hours after he left Anzio he was in a base hospital in North Africa undergoing a delicate brain operation.

The evacuation chain does not end at the base hospital overseas. Efficiency and medical factors suggest that the men be kept moving rearward until they are as close to home as possible. Part of the wounded, of course, come home by ship. Patients for the trans-ocean flights are selected by flight surgeons.

Four Kinds of Patients.

Patients' general fitness for air travel is the deciding factor and they are grouped into four medical categories: (1) Mental patients requiring security accommodations en route; (2) Hospital litter patients who must remain in bed, services rendered by other individuals; (3) Ambulance patients requiring medical care en route from other individuals; (4) Troop class patients needing little medical care en route who can take care of themselves, even in emergencies.

Air evacuation increases enormously once the patients have reached coastal receiving hospitals in the United States, either by aircraft or by surface shipping. The same system of screening is employed at the coastal receiving hospitals that was described previously as prevailing overseas. Urgency of the patients' conditions, together with their susceptibility to air transportation are primary considerations.

Sergt. Walter A. Smith of Springfield, Mass., can testify that the army doesn't stint on its resources when one of its wounded needs special attention. On May 9, 1944, he was wounded in action in Italy. He reached the United States June 14 in a convoy and entered Baker General hospital at Martinsbury, W. Va. An examination by the staff there revealed that immediate surgical attention was necessary. Ashford General hospital at White Sulphur Springs, W. Va., had the specialist for the type of operation required.

Two mornings later a ferrying division plane was at Hagerstown, Md., when Sergeant Smith arrived by ambulance. He was placed aboard with a full crew making certain that the solitary patient received every attention. By noon that day, the sergeant was on the operating table at Ashford General hospital receiving the best surgical care that the army has.

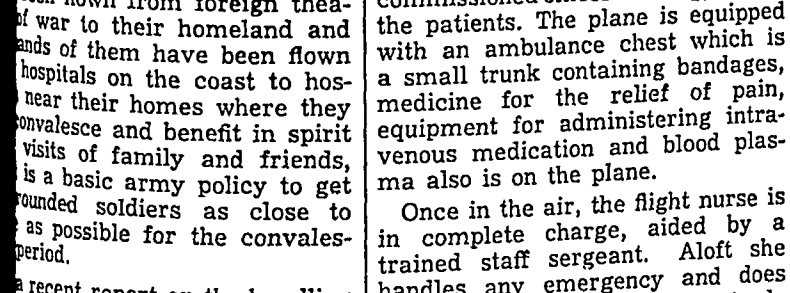
7,000 Patients Moved.

Ordinarily ferrying division planes engaged in air evacuation are completely utilized with all space occupied. Within the continental United States, the evacuation by air of the army's war wounded is the responsibility of the ferrying division of the Air Transport command. Since this responsibility was assumed more than 7,000 patients have been moved without injury to any of the personnel involved.

"The air evacuation of sick and wounded personnel of the armed forces was pioneered by the medical services with the AAF and it can be considered as one of the greatest life-saving measures in modern military medicine," Lieut. Col. Andres G. Oliver, surgeon of the ferrying division comments, "Its rapid and comfortable delivery of the patient to a hospital where he or she will get the best (and most specialized) treatment; or to another closer to his home, where his convalescence will be shorter and far more pleasant, has become a great morale factor among our returning heroes."

Thus justice is being served when the aircraft, so terrible an instrument of death and destruction, can be converted to such humanitarian functions as air evacuation.

Air Medal Ribbon Winner



MORALE BUILDER—Typical of the flight nurses assigned to the ferrying division of the Air Transport command is Lieut. Gerda H. Bouwhuis of Kalamazoo, Mich. In this picture she is giving a wounded soldier some attention that is obviously much appreciated. Lieutenant Bouwhuis wears the Air Medal ribbon in recognition of heroic services performed in the South Pacific war theater.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for September 3

SAUL REJECTED

LESSON TEXT—I Samuel 15:10-23.

GOLDEN TEXT—Because thou hast rejected the word of the Lord, he hath also rejected thee from being king.—I Samuel 15 23.

Moral failure is a direct result of disobedience to God's law. He established the moral order in the universe. His is the only right way, and the man who does not walk in God's way is wrong no matter how successful he may seem to be at the moment.

After a brief period of success, Saul sinned by intruding into the priests office at Gilgal (I Sam. 13: 10-14). This was soon followed by his disobedience in the battle with Amalek (I Sam. 15:1-9). This brought final judgment from the Lord, and Saul stood revealed as

I. A Self-Willed Backslider (vv. 10, 11).

"Turned back from following" God means just one thing, that is, turned back to self-will. These two principles, which are mutually exclusive, rule all actions of man—it is either God's will, or self-will.

Saul, who had every opportunity to make good as Israel's first king, lost out completely, and so turned away from God that God had to turn away from him, which is the thought expressed by "repenteth" (v. 11).

II. A Lying Hypocrite (vv. 12, 13).

Knowing that he had done just the opposite, Saul puts on his best "Sunday-go-to-church" manner and professed to be very pious, and completely obedient (v. 13). One marvels at his temerity, but not so much so when one thinks of those in the church who put on the same kind of a "front" to cover a worldly, self-centered life.

Nothing hurts the cause of Christ more than the nervy hypocrites who deny by their lives before the community the thing for which the church stands. By the way, are you a hypocrite, you who read these lines? If so, flee to God in repentance. You are in bad company.

III. A Proved Deceiver (vv. 14, 15).

The difficulty with falsehood is that ultimately the truth comes to light. With Saul it came quickly, for the sheep which he said were dead were alive enough to bleat at just the right time. The deceit of Saul thus was proved in the very instant of his false declaration of innocency.

"Be sure your sin will find you out" (Num. 32:23) is not just a religious theory, it is God's word. "He that covereth his sins shall not prosper; but whoso confesseth and forsaketh them shall have mercy" (Prov. 28:13).

IV. A Proud Disobeyer (vv. 16-19).

Now Saul had to stand before Samuel and hear the words of God's condemnation. He had to face his own life and see there the ground of the judgment of the Lord. He was reminded of the day of his humble dependence on the Lord, which had brought him exaltation to the highest place in Israel.

To be small in one's own eyes is to be great in the eyes of the Lord. He is looking for the acceptable sacrifice of a humble heart (Ps. 51:17; Isa. 57:15).

The tumult and the shouting dies;
The captains and the kings depart;
Still stands Thine ancient sacrifice,
An humble and a contrite heart;
Lord God of Hosts, be with us yet,
Lest we forget, lest we forget!
—KIPLING.

V. An Argumentative Evader (vv. 20, 21).

Once set in the way of disobedience, there seems to be no limit to the bold stubbornness of man. Instead of breaking down in contrition and confession, Saul tried to face the matter down by further argument and tricky evasion.

"I have obeyed," said he, **"but** the people." Who was king? Did the people obey Saul, or Saul the people? There is nothing honest about laying your sins over on another. How often people do it!

Notice also that Saul became very religious again. If anything had been done that seemed wrong, it was with a good purpose; they were going to "sacrifice to Jehovah."

"The sacrifices and ceremonies of religion are to aid and promote obedience, not to be a substitute. Disobedience can never be made a virtue, even though attended by a thousand sacrifices" (Stanley).

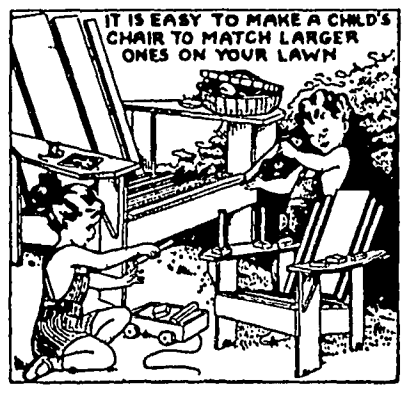
VI. A Rebellious Reject (vv. 22, 23).

"To obey is better than sacrifice." Oh, that we might learn well that lesson which God through Samuel tried to teach to Saul. We need to recognize that giving to the church, or working for the church, is not enough if there is not obedience to God; and with us that obedience must be the recognition of Christ as saviour and Lord.

Lip service, half obedience, a willingness to make sacrifices were not acceptable in the case of Saul. Be sure they are infinitely less acceptable to God in this day when we have His Son who wants to be our Saviour and to give us the enabling grace to obey His will.

Lawn Chair Like Mother's and Dad's Is Sure to Delight the Little Children

By Ruth Wyeth Spears



HERE is a pint-size lawn chair to delight the children and their young visitors. The seat is 10½ inches high, 13 inches deep and 15 inches wide—a good size for little ones now and roomy enough to be comfortable right up through their early teens.

A hammer and saw and screwdriver are all the tools you need to make this chair as well as the larger edition that you see in the sketch. All the pieces are straight cuts of standard widths, yet both of them have seats and backs at comfortable angles. The lines and proportions are good and the backs are removable for winter storage.

NOTE—Pattern 253 gives a complete list of materials, large diagrams for cutting all the pieces of the child's chair and step-by-step directions for assembling. Pattern 269 lists materials with diagrams and directions for the adult-size chair. Patterns are 15 cents each postpaid, or both patterns for 25 cents. Order from:

MRS. RUTH WYETH SPEARS
Bedford Hills New York
Drawer 10

Enclose 15 cents for Pattern 253, or 25 cents for Patterns 253 and 269.

SNAPPY FACTS ABOUT RUBBER

Using a combination of natural and synthetic rubber in the post-war period may result in automobile tires that will establish new high marks for longevity, according to a B. F. Goodrich chemical technician. He cites the big mileage returned from Goodrich synthetic tires, made in 1940 and composed of both types of rubber, as the basis for his predictions about post-war tires.

Another reason for tires for essential transportation: At the beginning of last year, 85,168 school buses were in service transporting 4,258,788 children over 1,383,091 miles of one-way route.

ACHIEVEMENT SHOW . . .
(Continued from first page)

red ribbon class and 49 in wnite ribbon class Awards were made on the basis of merit and not 1st, 2nd and 3rd ratings.

The Madison Livewires Club members received a total of 45 45 placings; Liberty Busy Bees received 33 placings; Magor Farmerettes 25 placings; Concord Chums, 22 placings; Avery Sunbeams, 14 placings; Ell Tip-Toppers 14 placings, and Bingham Boosters 12 placings.

Three Clubs, Madison Livewires, Magor Farmerettes and Liberty Busy Bees had demonstration teams. The Madison Livewires and Magor Farmerettes received blue ribbons, and the Liberty Busy Bees a red ribbon. These demonstrations were very interesting and instructive

The Girls will be glad to repeat their demonstrations for community programs if it can be arranged. Any organization desiring one of the demonstrations should consult the club leaders. The Madison club leaders are Mrs Albert Geddse and Mrs. Lewis Formanek. The girls, Helen and Marcedes Formanek demonstrated how to wash dishes. They named the demonstration, "A Swish in the Suds, But is the Dish Clean?" The Magor club leaders are Mrs. Phil Puffer and Mrs. Percy Bailey. The girls, Ardys Bailey and Gloria Izzard demonstrated the equipping of a medicine chest and the making of a handy pocket to hang on the head of a bed for a patient to use when lying in bed. The title of the demonstration was "Serve Yourself." The Liberty club leaders are Mrs. Aaron Stromer and Mrs. Roger Schlawin. The girls Marjorie Greiman and Lola Gast demonstrated how to remove stains from fabrics. They named their demonstration "Spots Out."

Mrs. Bernice Gross from the extension service of Iowa State College, acted as judge for the demonstrations, booths, vegetables and home efficiency articles.

Baby Beef Sale Held

NOTICE TO BIDDERS

Sealed bids will be received at the office of the County Auditor, Garner, Iowa, until 2:30 P. M. September 18, 1944, for the cleanout of the main open ditch and lateral No. 6, Drainage District No. 9, Hancock County, Iowa, as per profile and specifications of Wm Henschen, engineer.

Bids will be recived on the following items:

1. Main Ditch Cleanout, 45,506 cu. yd. earth excavation.
2. Lateral No. 6 Cleanout, 4,000 cu. yd. earth excavation.

A certified check by an Iowa bank in the amount of 10 per cent of the bid, made payable to the county auditor, shall be filed with each bid, which in the case of the bidder receiving the award, should he fail to execute a contract and file a bond within 10 days after the acceptance of his bid, shall be retained by the county as liquidated damages.

The successful bidder will be required to file a bond for 75 pr cent of the contract sum as security for the construction and completion of the work awarded in accordance with plans, specifications, and contract. Said bond to be purchased of some Hancock County agent.

Plans and specifications may be seen and may be secured at the above office or at the office of the county engineer, Garner, Iowa. The county reserves the right to waive technicalities and to reject any or all bids.

Work must be commenced by Nov. 1, 1944, and must be completed by September 1, 1945.

Dated at Garner, Iowa, this 28th day of August, 1944 A. D.

Published by order of the Board of Supervisors.

FRED C. MISSAL,
County Auditor

(Pub. Aug. 30, 1944)

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

F. A. Arnold was transacting business in Mason City Thursday.

Mr. and Mrs. W. F. Pavey and Mrs. Benn Coobs were Mason City visitors Friday afternoon.

Grandma Suckow went to Ventura last Thursday for a visit with the Brouwer family.

The Methodist Choir will meet at the church Thursday evening of this week at 8 00 o'clock.

Ed. Wenck and Jim Denny of Garner were in Klemme on business Monday forenoon.

Mrs Benn Coobs and Peggy were at Belmond Monday having dental work done.

Mr. and Mrs. Mel Paulson and Mr. and Mrs Roy Strate of Garner were visiting in Klemme Monday evening.

V. A. Stromer took one of his American Cream Color draft horses to Webster City Tuesday to exhibit him at the fair there.

Mrs. Peter Merkel and grandson, Lowell Ulrich, and Martin Bachman visited last week at the Walter Merkel farm near Lohrville.

Mrs. Naska Bock spent the past week at Mitchellville visiting with her son-in-law, Lyle Burr and family.

The American Legion Auxiliary will meet September 5th with Mrs. Earl Ruka, Mrs. Dave Schwichtenberg and Mrs. W. F. Pavey, hostesses.

Pvt. Clarence Kluckhohn arrived home Tuesday morning from Fort Bliss, Texas, to spend a fifteen day furlough visiting with his parents, Mr. and Mrs. C. E. Kluckhohn.

Keith Albertson and family moved today, Wednesday, to the Bill Johnson house on East Main St. The house was formerly owned by Quentin Stille.

Mr. and Mrs. Joe Liebendorfer of Hampton and Mr. and Mrs Lyle Liebendorfer of Forest City were supper guests at the R. A Jorgenson home Sunday evening

The Becker sisters have received word that their nephew, Seaman Eugene Haberkamp, who was home recently on a furlough, has gone to sea.

Dinner guests Sunday at the J. N. Day home were Mrs. Dorance Day and son Gary of Los Angeles; Mrs. Petersen and Mr. and Mrs. Bert Mathews of Clear Lake.

H. D. Ramsay and family returned home Sunday from Clear Lake where they spent two weeks vacation at a cottage on the south shore.

The Misses Glenna Gruetzmacher and Novella Bredbenner left on Tuesday for Des Moines where they will take up their teaching duties for the coming year.

Farmers who wanted rain so that fall plowing could be done better, got their wish. It rained steady all day Saturday, through the night, and most of the day Sunday.

Mr. and Mrs. W. F. Pavey went to Mt. Auburn Sunday, being called there by the death of Mr. Pavey's father who was over 90 years old.

Mr. and Mrs. Elmer Arnold attended the morning service at the Garner Methodist Church Sunday, and were dinner guests at the home of Mr. and Mrs. Tom Nelson. They also visited with Mrs. Etta Haskins, a former resident of Klemme.

Mr. and Mrs. Paul Grange last week purchased a house in Mason City. The house they purchased is a recently built brick home on So. Vermont, across the street from the house they are now living in.

Seaman Kenneth Kluckhohn arrived in Klemme last week Wednesday to spend a twenty-day furlough visiting with his father, Mr. Frank Kluckhohn and family. Seaman Kluckhohn has recently recently returned from duty in the Pacific.

Matt Smith has purchased the house they have been living in from Dr. D. P. Anderson. We understand Dr. Anderson also sold one of his houses to one of the new teachers coming to Klemme.

Rev. and Mrs. Calvin Grosshuesch and his parents, Rev. and Mrs. J. W. Grosshuesch are leaving for Menno, So. Dakota, Friday, where Rev Calvin Grosshuesch will speak at a Mission Festival.

Miss Eunice Larsen, daughter of Mr and Mrs. C. A. Larsen, has enrolled as a Freshman in the University of Iowa at Iowa City, and left this morning, Wednesday, for her college work.

A party for Glen Nagle was held Sunday afternoon from 2:00 until 5:30 o'clock at the Henry Jost home as a farewell for him as he leaves today, Wednesday for Berkeley, Cayif., his home Ten guests were present. Games were played and a lunch was served later.

Fred Nagle leaves today, Wednesday for Berkely, California and is taking his grandson, Glenn Nagle home after he had spent the summer here. Mr. Nagle will spend about three months visiting at the home of nis son, Ray Nagel at Berkely.

Coastguardsman Eugene Kluckhohn arrived home last Wednesday from the East Coast to spend a furlough visiting with his parents, Mr. and Mrs. C. E. Kluckhohn, and with his wife and baby at the Albert Schmidt home.

Cadet Nurse Luella Lewis is enjoying a vacation, part of which she spent in Minnesota visiting with relatives, and the rest of it in visiting her parents, Mr. and Mrs. Verner Lewis. Cadet Nurse Lewis is taking her training at the Methodist hospital in Des Moines.

Baptized

Shannon Kay, daughter of Seaman and Mrs. Eugene Kluckhohn, was baptized at the Evangelical and Reformed Church Sunday by Rev Calvin Grosshuesch.

In honor of the event Mr. and Mrs Albert Schmidt entertained at dinner Mr. and Mrs. C. E. Kluckhohn, Seaman and Mrs. Kluckhohn and daughter and Rev. and Mrs. C. Grosshuesch.

If you see a bright red car and a bright red truck coming down the highway, it may not be the Klemme fire department, but more than likely it will be V. A. Stromer, proprietor of the kennels north of town. Vern's automotive stock received a dazzling paint job Monday.

Mr. and Mrs. W. Henry G... and Billie of Des Moines ca... esday evening and spent unti... nesday night visiting at the Jorgenson home and with Klemme friends. Mrs. E. G. ...fer came with them and spe... day Wednesday visiting in City.

We Are Boosting For . . .

A Healty School Year

WE ARE PROUD OF THE FINE SCHOOLS IN OUR COMMUNITY . . .

• KLEMME HAS ONE OF THE FINEST and most up-to-date School Buildings in North Iowa. We also have nice, comfortable schools in our Rural Community. We like to have our Rural Eighth Graders come to the Klemme High School where we have an excellent staff of teachers and a likeable body of students who will make you feel at home. Yes, we are proud of our School System as our Klemme Graduates go out into the world and are making good as farmers, businessmen, professional men, soldiers, sailors, and marines and our girls are successful as teachers, business women, nurse and home-makers.

• IF YOUR BOY OR GIRL is not now enrolled in the Klemme High School, plan now to send him or her to Klemme when they complete their eighth grade work next year.

—V—

A GOOD SCHOOL DEPENDS ON A GROUP OF HEALTHY CHILDREN

•WE CAN ALL STRIVE for the continued success of our fine school systems, both in Klemme and in the Rural Districts, by keeping our children STRONG and HEALTHY . . . and that is where DAIRY PRODUCTS step in. We URGE YOU to give your children plenty of good, wholesome Milk, Cream, Cheese, Eggs . . . and above all . . . liberal helpings of KLEMME CREAMERY BUTTER There is no other food containing so many valuable VITAMINS to build strong, disease-resisting bodies as good BUTTER. Uncle Sam wants you to keep HEALTHY. So use BUTTER freely EVERY DAY!

Let KLEMME CREAMERY BUTTER Be an Important Part of the School Lunch Box Each Day!

Mr. and Mrs. Henry Kuppinger, 1431 Carolina N. E, Mason City, observed their Golden Wedding anniversary on Sunday and held open house for their friends from 2 to 5 and from 7 to 9 p. m. They were married in Mason City in 1894 by Rev. Wm. Schmidt and have two children: H. E. Kuppinger of Milwaukee, Wis., and Mrs. O. E. Meir of Mason City. The couple are well known to many Klemme people.

Those from Klemme who attended included Mr. and Mrs. Emil Blumer; Mrs C A. Arnold; Miss Minnie Lenz; Mr. and Mrs Harry Gibbs and family; Mr and Mrs J E. Stille; Mrs. D O. Turgasen; Wm Stille; Mrs. Frank Gruetzmacher; Mrs. John Terhufen; Mrs Minnie Schuldt.

LOREE VAN BUSKIRK AND SGT. RAYMOND YEGER WED AUG. 19

Marriage Was at Clarion; Groom Is Stationed In California

Goodell—Mr. and Mrs Lloyd Van Buskirk announce the marriage of their eldest daughter, Loree to Sgt. Raymond Yeger. The wedding took place in the A. Richards home at Clarion Saturday evening, August 19. Attendants were Mr. and Mrs. Geo. Richards of Clarion.

The bride was attired in a blue dress and the bridegroom wore his army uniform.

The bride is a graduate of the local high school, attended Creston junior college at Cedar Falls. The past year she taught one of the rural schools in Twin Lake township.

The bridegroom is the son of Mrs. Louise Yeger of Buffao, N. Y. He attended college also at Cedar Falls before entering the service and it was there that the couple first met.

Sgt. Yeger left the fore part of last week for Hamilton Field, Cal., where he is staticned with the U. S. army and Mrs. Yeger is staying in the parental Van Buskirk home for the present, and plans to join her husband at a later date.

MOTHER OF DR. DULMES DIED AUGUST 16 AT ADEL, WIS.

Mrs. A. H. Dulmes of Grundy Center, returned home last week after being called to Adel, Wisconsin, by the sudden death of her mother-in-law, Mrs. G J. Dulmes, mother of Capt A. H. Dulmes who is serving in the army medical corps somewhere in Italy.

Dr Dulmes has been over-seas about a year now.

CLIFFORD MONTGOMERY NOW EMPLOYED BY THE COUNTY

Clifford Montgomery, who has been employed by Lloyd Lau the past year, has accepted a position with the Hancock County Highway Commission as maintenance man for the Klemme district, taking the place of Lloyd Smith, who resigned after being employed by the county for a number of years

Mr Smith is now employed by the Garner Creamery and has a cream route out of Garner.

MR. AND MRS. CHAMBERS MARRIED 33 YEARS SEPT. 5

Tuesday was the 33rd wedding anniversary of Mr. and Mrs. John Chambers.

In honor of the occasion they received a beautiful silk covered, wool-filled quilt from their son and daughter-in-law, Pvt. and Mrs. Wayne Chambers. Their daughter, Thelma, of Britt spent the week end with them.

Something to Crow About

Mary Keith	Garner
George Schroeder	Britt
Curtis Greiman	Garner
Lewis Escher	Corwith

To avoid considerable settling during the winter, firm the soil well around the roots.

URGES LANDLORDS TO MAKE PLANS TO HANDLE SOFT CORN

County Extension Director Paul Henderson urges landlords to work out details now with their tenants for handling a possible soft corn crop. If plans are made ahead of time, they can be put into operation at once should an early frost catch the crop before it is matured.

L J. Bodensteiner, fieldman for the Northeast Iowa Farm Business Association says the landlord who has soft corn has two alternatives: One, he can sell the corn in the field or after it is harvested, two, he can feed some cattle himself.

Selling his share in the field probably is the best out for the landlord who "inherits" a soft corn crop, particularly where little or none of it is merchantable corn, Bodensteiner indicates.

Because of its high moisture content, soft corn is better "cattle feed" than "hog feed." The greatest feeding value from soft corn is obtained when the entire plant is cut. This means that the best method of salvaging a field of late corn is through the silo, with fodder a close second. Third in line is to snap the ears, then put them in the silo.

Where the tenant has the ability to feed cattle, the landlord may desire to market his soft corn thru a cooperative feeding program with the tenant. In such a case, the cost of providing a picket fence or trench silo, if necessary, probably would be borne by the landlord. The tenant probably would put up the soft corn and care for the cattle. Cost of the tractor and ensilage cutter, other feed costs and the original cost of the cattle would be divided equally between landlord and tenant. The profits then would be split equally.

Regardless of he kind of arrangements worked out by the landlord to market his share of a soft corn crop, the important thing is to decide arangements early, bebefore a killing frost comes.

REX BERESFORD TO TALK TO CATTLE FEERERS, TUES EVE.

Rex Beresford, Iowa State College Specialist will discuss the outlook picture on feeding cattle, hogs and sheep for the next year at a meeting in the C. D. of A. Hall in Garner, 8:00 P. M., Tuesday evening, September 12th.

The outlook has changed from last year so be sure you keep up to date on the latest developments and the latest information by attending this discussion by Mr. Beresford. 4-H and F. F. A. members are also urged to attend.

According to the press 73,500,000 leaflets are dropped over Europe every month by allied flyers, which leads our office boy to remark that no wonder there is a paper shortage.

WISCONSIN "SONG BIRD" IS NATIVE OF KLEMME

Arthur Carlson,, son of James and Clarice Carlson of Glen Flora, Wisconsin, was born in Klemme 4½ years ago. Arthur seems to have a natural ability for singing and at the age of three years he sang "White Christmas," at a program in a school entertainment.

Some weeks ago he was victorious over contestants in an amateur contest at the Ladysmith, Wisconsin Country Club, and last week at the county fair held at Ladysmith he took his place on the stage with professional performers and "stole the show" in his own way and with his own version of "God Bless America," "Victory Polka," and "In Der Fuehrer's Face."

His numbers were so popular and the applause of the crowd so great that the fair officials had him appear again the next night when he sang 'I'm A Yankee Doodle Dandy," and then in the embrace of one of the chorus girls Arthur sang "Put Your Arms Around Me Honey," and then signed off when he dedicated his last number to all of the boys in the Service, including his uncle Bob Carlson by singing, "Say A Prayer For The Boys Over There."

Arthur is a grandson of Mr. and Mrs. Arthur Wellemeyer of Klemme.

PVT. CLARENCE KLUCKHOHN IN AUTO ACCIDENT THURSDAY A. M.

When returning home from Garner early last Thursday morning, Pvt. Clarence Kluckhohn, who is home on a furlough, had the misfortune to wreck his car, but escaped injuries outside of a few minor cuts and scratches.

Pvt. Kluckhonn says he went to sleep while driving and awoke suddenly when near the Joe and August Schuldt farm just north of Klemme on Highway 69. The car was on the shoulder and he thinks he grabbed the steering wheel too suddenly and the car shot across the pavement to the east, turned over and jumped a fence and landed in a corn field. The body of the car was badly wrecked and all the windows were broken and it appears that it might have rolled over a couple of times. Kluckhohn was able to get out of the car and a passing motorist brought him home.

CALENDAR

Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for September 10

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

DAVID ANOINTED KING

LESSON TEXT—I Samuel 16:1-5, 11-18.
GOLDEN TEXT—Man looketh on the outward appearance, but the Lord looketh on the heart.—I Samuel 16:7.

Outward appearance, by which man judges, is almost always deceptive. God knows the heart and is able to evaluate a man correctly. In calling David, the ruddy shepherd boy, to be king, God cut across the ideas of men, but He was, as always, right.

I. A Man from God's Storehouse (v. 1)—"I have provided."

God's great storehouses are full of blessings, material and spiritual, but He also has a great and constantly replenished reserve of men and women from which He calls and sends them forth. The thing we must guard against is the setting of hindrances in His holy way, either in our own lives or in the lives of others.

A man power shortage is very serious, for it simply cuts off the stream of production without which action becomes impossible. There should never be any shortage of man power in the Lord's work, and there would never be any if all His creation were willingly subject to Him.

God was ready to set aside Saul, and He had David ready. Samuel the prophet was still grieving over Saul's failure. In a sense that feeling for Saul was most commendable, but it could not go on.

When men, even of our own families or circle of friends, persist in rebellion against the Lord, we must not let our grief hold us back, but move on with the man of God's choice.

II. A Man Who Had to Be Sought (vv. 2-5)—"Send and fetch him."

Usually those who are quick to offer themselves for an important place are not the ones for the place. And those who are sitting around doing nothing but waiting for some honor to come to them, are not the ones to choose.

"Let the office seek the man" is the highst ground, even in politics; surely it must be the proper procedure in spiritual activity.

David might well have wanted to be at the place of sacrifice and the feast that day, but since all his family were there, and someone had to care for the sheep, he did it. A man like that, hard at his work, is well worth seeking when something important needs to be done.

The interesting story of Samuel's effort to find one among Jesse's seven sons (vv. 6-10) is well worth reading. Samuel still had the idea that a king must be prepossessing and able to thrill men by his appearance. He should have learned better from his experience with Saul.

God put him right (v. 7), and we do well to renew our thinking on that point. The world is in a place where many leaders must be chosen in the months and years just ahead. Will we be eager and willing to have God lead us in our choice? Or will we be swayed by personal interests or political expediency?

III. A Man of Spirituality (vv. 11-13)—"The Spirit of the Lord came upon David."

The Holy Spirit, ever active in all periods of Bible history, became the abiding presence in the believer's heart after Pentecost, but during the Old Testament period He came on chosen individuals for a particular work. As David was anointed king the Spirit came upon him for that service. In spite of his failings (when he forgot the Lord) David was throughout his reign a spiritually-minded man who wanted God's will and His glory to be uppermost.

God never calls a man without enabling him for his task, and the chief and indispensable enabling is that of the Holy Spirit's power. Like David, we may enter upon a God-appointed responsibility without fear or question, simply trusting the Holy Spirit to take, transform, empower, and use us for God's glory.

IV. A Man Willing to Serve (vv. 14-18).

Upon Saul there came tremendous moods of despondency. These were "from the Lord" (v. 14) in the sense that God permitted His disobedient and rejected servant to suffer the result of his self-will and failure. How awful it is for anyone to be out of the will of God and conscious of His disapproval.

To help Saul in those dark hours David, the sweet singer of Israel, was willing to serve with his voice and his harp. How many thousands of times David has served all the generations since with his psalms. He was a man of gifts, gladly given for the Lord and for others.

Bear in mind that while David was not yet publicly crowned, he was already anointed to be king. Yet he was ready to serve the one whose place he was to take even in his hours of dejection and hateful ill-will.

Wise Cooks Use Their Ingenuity When Points Are Low

Leftover lamb makes a pretty salad when diced and crowned prettily by a celery wreath, then green pepper and red skinned apple slices.

Menus don't have to go begging just because ration points have been restored to a great many cuts of meat. In fact, this is the time when all good cooks will put forth all the ingenuity and inspiration they can stir up.

Less expensive cuts will give every bit the same nutrition as the most expensive ones, and with long, moist heat cooking they can be made just as palatable.

If you do decide to splurge on a roast or a ham occasionally, use the leftovers up so cleverly that the family will get a real palate thrill from them. It can be done!

And with that in mind, we're going right into our recipe round-up for today. First, the less expensive cuts come in for their share of attention with this Beef En Casserole:

Beef En Casserole.
(Serves 6)

1½ pounds beef (neck, flank or shank), cut into inch cubes
3 strips of bacon
1 clove garlic, peeled
1 cup boiling water
1 teaspoon salt
¼ teaspoon black pepper
2 whole cloves
1½ cups diced carrots
6 peeled small onions

Flour beef cubes. Cook bacon in heavy skillet until brown but not crisp. Remove. Add garlic to bacon fat and brown beef cubes on all sides. Remove garlic. Add water and seasonings. Heat to boiling. Turn into baking dish, adding vegetables and bacon (cut into inch pieces). Cover and bake in a slow (300-degree) oven for 2 to 2½ hours.

Veal-Ham Loaf.
(Serves 6)

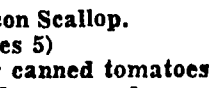
1½ pounds ground veal
1 cup ground ham
2 eggs
1 cup fine bread crumbs
Grated rind ¼ lemon
Juice of 1 lemon
1 cup milk
1 tablespoon butter, melted
1½ teaspoons salt
¼ teaspoon pepper

Mix all ingredients with a fork and shape into loaf. Place in loaf pan and pour ½ cup tomato juice over top. Bake in a moderate oven (350 degrees) 1½ hours.

Veal Schnitzel.
(Serves 6)

2 pounds veal steak (½-inch thick)
Seasoning
1 cup fine crumbs
1 egg
1 tablespoon water
4 tablespoons lard or bacon drippings
1 lemon
1 tablespoon flour

Pound veal to flatten out into thin pieces. Season. Cut into servings. Roll in beaten egg mixed with water, then in fine crumbs. Brown in hot fat until well browned. Add ¼ cup water. Cover and cook slowly 30 to 35 minutes. Fold over in half when ready to serve with sliced lemon, hard-cooked eggs or pimiento olives as a garnish. Sour cream may be added to the fat in the pan to make a sauce for the schnitzel.



Only a little meat is needed in the next two recipes for that meaty flavor:

Chicken-Corn Pudding.
(Serves 4 to 6)

8 slices bread
1 can whole kernel corn
½ cup chopped chicken
3 eggs
1 teaspoon salt
¼ teaspoon pepper
¼ teaspoon paprika
2½ cups milk

Arrange alternate layers of bread slices, corn and chicken in a greased casserole. Beat eggs, add salt, pepper, paprika and milk. Pour into casserole, adding more milk if necessary to cover mixture. Bake in a moderate (350-degree) oven 1 hour.

Tomato-Bacon Scallop.
(Serves 5)

2½ cups cooked or canned tomatoes
1 cup peas, cooked or canned
8 slices bacon
2 tablespoons onion, chopped
1 cup diced celery
2 cups soft bread crumbs
Salt and pepper

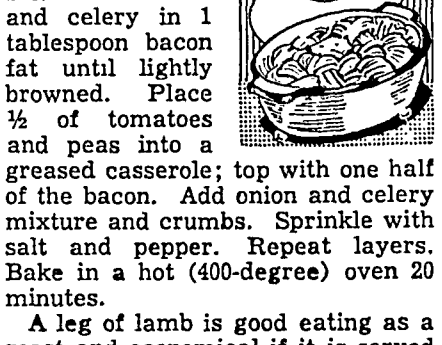
Combine tomatoes with drained peas. Fry bacon slowly until crisp. Drain on absorbent paper; crumble. Cook onion and celery in 1 tablespoon bacon fat until lightly browned. Place ½ of tomatoes and peas into a greased casserole; top with one half of the bacon. Add onion and celery mixture and crumbs. Sprinkle with salt and pepper. Repeat layers. Bake in a hot (400-degree) oven 20 minutes.

A leg of lamb is good eating as a roast and economical if it is served as leftovers in the form of creamed lamb or salad:

Lamb Salad Bowl.
(Serves 6)

2½ cups diced cold lamb
2 cups diced celery
½ cup chopped green pepper
6 slices red apple
1 cup mayonnaise
1 tablespoon fresh, chopped mint

Pile diced lamb in center of salad bowl. Arrange diced celery in a circle around lamb; repeat, using chopped pepper. Cut apple in half; core and slice cross-wise. Place slices around edge of bowl, peel side up, and extending about ⅛ of an inch above edge of bowl. Serve with mayonnaise to which has been added chopped, fresh mint.



Noodle ring with creamed leftover lamb and peas is another good suggestion for using bits of the leftover roast. The meat is extended with peas and gravy.

Creamed Lamb and Peas.
(Serves 6)

3 cups diced, cooked lamb
1 medium onion, sliced
3 tablespoons butter
2 cups leftover gravy
½ teaspoon worcestershire sauce
Salt and pepper
3 green pepper rings, cut in half
½ cup cooked peas
Slices of pineapple, if desired

Saute onion in butter until tender, add gravy and seasonings. Add meat and peas and heat through. Serve in noodle ring and garnish with pineapple and green pepper rings.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Lynn Chambers' Point-Saving Menu
Fried Chicken
Mashed Potatoes Cream Gravy
Green Beans
Lettuce and Tomato Salad
Fresh Blackberry Pie

Lynn Says

This is the fruit season: Fresh fruit will easily solve the dessert problem. Here are ways to do delightful things to fresh fruits:

Fill melon rings with mint sherbet.

Peel bananas, sprinkle with lemon juice, cover with honey and bake until tender. They're good with cream.

Marinate cantaloupe balls in grapefruit juice and serve well chilled.

Apricot ice goes with grapefruit sections, orange slices and freshly sliced apricots.

Serve applesauce hot with marshmallows folded in just before dishing up.

Apple pie is the better made with a little orange juice and rind for flavor.

SEWING CIRCLE PATTERNS

Princess Dress—Collarless, Cool

Pattern No. 8622 is in sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, jumper, requires 2⅞ yards of 39-inch fabric; jacket, 1⅛ yards.

Send your order to:

SEWING CIRCLE PATTERN DEPT.

It's Collarless

COLLARLESS and cooler is the keynote to this summer's play fashions! The handsome princess jumper illustrated has a most attractive collarless jacket which turns it into a smart business and street ensemble.

Black Ice Simply Dusty; Antarctic Ocean Crowded

Mr. Mackintosh, who spent five years in Discovery II, investigating the distribution and breeding of mammals and the formation and wanderings of icebergs in the Antarctic seas, has some interesting things to say about his observations.

Glaciers flow from the land into the sea, where a portion breaks off, thus forming the giant icebergs that start their travels in the open waters. Sometimes these bergs appear to be black, due to the fact that, while still landlocked, dust has settled on their surface, to be superimposed with a thin layer of transparent ice.

It is curious that though the Antarctic continent supports very little animal life, the Antarctic seas are more crowded with it than the tropical seas. Practically 90 per cent of the world's supply of whale-oil comes from whales harpooned in the Antarctic ocean. Apart from whales, however, the inhabitants are mainly minute forms of marine life.

AROUND THE HOUSE

A bit of wax rubbed on the bottoms of rockers will prevent them marking even the glossiest of floors.

—•—

Fill coffee pot half full of cold water, add 1 teaspoon of soda and bring to a boil for a few minutes. Then the pot should be washed in clean water.

—•—

If ice cubes are held under warm water for a few seconds, they will have no sharp edges to jab or cut the precious rubber icebag.

—•—

Knitted woolens and wool dresses and skirts washed by hand are less likely to shrink or become matted than if cleaned in a washing machine.

—•—

Oftentimes a pretty flower arrangement cannot be achieved because the frog is not the right size or shape. In this case, make one by melting paraffin, molding it in the desired shape and punching holes with a heated ice pick.

—•—

To clean rust from any kind of farm implements, dissolve one can of lye in five gallons of water and apply with an old broom or brush. Scrub well. The rust will come off quickly.

—•—

Garden tools free from rust are easier to work with and, if a small can of tractor oil and an old shaving brush are kept handy, it takes little time to clean and oil the tools after using.

—•—

If it is necessary to carry a number of small drills in your pocket, an old spectacle case comes in handy in which to carry them.

—•—

When flour bin or other kitchen container leaks dry ingredients, I pour melted paraffin or beeswax into the cracks and let it harden.

—•—

When clothes must be ironed soon after dampening, always use hot water as it penetrates the material more quickly.

SNAPPY FACTS ABOUT RUBBER

Before the end of the year, the U. S. should be producing enough man-made rubber to fill all military and essential civilian needs, in the opinion of John L. Collyer, President of B. F. Goodrich, who foresees the output of 800,000 tons of synthetic rubber in 1944.

Neglect of the rubber plantations now under Japanese control may be a benefit in disguise, according to authorities, since postponing the tapping of rubber trees tends to improve their subsequent yields.

Normally only one per cent of the rubber consumed in the U. S. went into the manufacture of medical, surgical, dental and drug sundries, while more than 72 per cent was used by the tire industry.

GOVERNMENT MERELY A TAX COLLECTOR

The United States News, after analyzing the effect of current tax laws on business, concludes that neither individuals nor corporations can be expected to risk money, increase production and provide jobs until tax rates are lower. The reards, in general, are too small for the chances to be taken." It adds, however, that "any plan to reduce taxes bumps up against the hard fact that the Treasury must have revenue—and vast amounts of it, to pay interest on the national debt, to care for veterans, to maintain an army and navy, and, finally to operate the regular government departments."

For years the trend has been toward higher and higher taxes against productive enterprise. The war has hastened the trend until at last the end of the road nas been reached. It is useless to cry for higher taxes against industry. The money isn't there.

From now on the bills of the Federal Government will be paid by a majority of the people instead of a minority. And that goes for the debt, too. Whenever a politician announces that the government is going to do this or that for the people he really means that government is going to tax the people to do it. The government is not Santa Claus, it is merely the tax collector and the people are beginning to realize it.

TAKING ADVANTAGE OF THE SITUATION

A tourist stopped his car in front of a country filling station and asked for some gas. As a means of making conversation he said to the gray-beard attendant: "MacArthur sure is doing great work, isn't he?"

"Who is Mac Arthur?" as the reply.

"Why, in heaven's name, man don't you read the newspapers?" said the tourist.

"No, I don't read the newspapers and I never listen to the radio."

"Well in that case," said the tourist, "just give me four new tires and fill the tank to the brim with high test gas."

INSULATED

The Sergeant had his troubles with one of the new recruits. The more the Sarge shouted at him, the more blandly unconcerned was the recruit.

"Doesn't anything I say make any difference," demanded the Sergeant.

"No," said the recruit. "I was a baseball umpire in civil life—I'm used to it."

HANCOCK COUNTY BOARD PROCEEDINGS

7TH. ADJOURNED JUNE MEETING

Garner, Iowa
August 28, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in DD No. 70, DD No. 116.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 72 Main

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in DD No. 85 Main.

On motion and second the salary of County Superintendent Charles S Whitney is hereby increased $250.00 per annum effective August 1, 1944

This being the 28th day of August A. D. 1944, a date heretofore set for a hearing on the cleanout of the main open ditches to grade DD No. 9 and lateral No. 6 of DD No. 9, Hancock County, Iowa, petitioned for by John P. Christians et al, the hour of said hearing having arrived, the Proof of Publication being on file, the report and amended report of the Engineer, was held as scheduled. No written objections were on file and no oral objections were presented at the hearing

WHEREAS said cleanout will be of material benefit and conductive to public health and benefit

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of DD No 9 and lateral No. 6 of DD No. 9 Hancock County, Iowa, that said cleanout be made as prayed and in accordance with the plans and specifications of the Engineer, Wm. Henschen, which are on file in the office of the County Auditor

BE IT FURTHER RESOLVED that a public letting be and the same is hereby ordered held on the 18th day of September, A. D., 1944, at 2 30 o'clock P. M. The County Auditor be and he is hereby directed to cause notice of said letting to be published as by law directed in the Klemme Times, A newspaper of general circulation published at Klemme, Iowa.

Said notice shall state the approximate amount and type of work to be done, the time of commencement and completion and that the Board reserves the right to waive technicalities and reject any or all bids.

The foregoing resolution was offered and read by Supervisor John Chambers, seconded by Supervisor Penn Eckels, whedeupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, Penn Eckels and John Chambers, aye. Nays none. Whereupon the Chairman declared the resolution duly adopted.

On motion and second the final hearing on the establishment of a highway petitioned for by Albert Chizek et al in Garfield Township is hereby continued to September, 5, A D 1944, at 10:30 A. M.

On motion and second the Board adjourned to September 5 A. D., 1944 at 9 O'Clock A. M.

ATTEST
Fred C. Missal, County Auditor
F. J Schoun, Chairman

CLEAN, STERILIZE MILK UTENSILS SEPARATELY

As with everything else, there's a right and wrong way to clean and sterilize milk utensils and milk cans. A. W. Rudnick, professor of dairy industry at Iowa State College, says that too many people make the mistake of trying to clean and sterilize at the same time.

The purpose of rinsing milk utensils and cans with a chlorine solution is so the chlorine can destroy the protein in any bacteria which may be present. However, Rudnick points out, chlorine isn't choosey. If it is used before the cans and utensils are thoroughly cleaned of milk, it will just as likely attack the protein in the milk as that in the bacteria.

Strength Reduced

The strength of a pail of chlorine solution is cut in half if so much as two ounces of milk gets into the solution. If the chlorine-milk mixture is allowwed to stand, the strength is reduced still further. The chlorine stock solution should always be tight corked and a clean, freshly prepared chlorine solution should be used each time for rinsing milk equipment.

The proper way to clean milk utensils is: First, wash them—in soft water, of possible—using soap, alkalies or a wetting agent to remove the milk. Second, rinse thoroughly with boiling water and allow to dry. Bacteria cannot grow where there is no moisture. Third, just before using the cans and utensils, rinse them with clean freshly prepared chlorine solution.

In conclusion, Rudnick stresses that clean milk cans returned from the milk or creamery plant always should be rinsed with a chlorine solution before being used.

KLEMME NEWS ITEMS

Merlin Smith has returned to his home at Hot Springs, South Dakota, after spending the past 2½ years at the Ernest Helps home. Merlin's mother has regained her health and is again able to have her four children with her.

Mr. and Mrs. Emil Patet entertained to supper Sunday evening Rev. and Mrs. Fred Griewe; Mr. and Mrs. W. C. A. Gast; Mr. and Mrs. Tom Nelson and Mr. and Mrs. Otto Lemke.

The principal river in Ceylon, Mahavela-Ganga, has a course 134 miles long.

SEPTEMBER IS CORRECT TIME TO MOVE PEONIES

September is the time to plant new peony roots and to transplant peonies which are too crowded or have failed to bloom because they are shaded too much L. C. Grove, extension horticulturist at Iowa State College, says peonies need full sun exposure and not to be disturbed, so gardeners should take care in choosing a sunny and permanent transplanting site.

Since a plant remaining in the same spot year after year is bound to deplete the soil fertility, the soil should be enriched before setting the peony root, Grove points out. Dig a hole 1½ feet deep. Place sod or leaf mold in the bottom. Add 1 or 2 handfuls of bonemeal or superphosphate. Then mix bonemeal and plenty of organic matter with the soil to within 8 inches of the top as it is replaced. If the soil is acid, some lime should be mixed in Peonies do not like an acid soil.

The old root should be planted in unenriched top soil, Grove states, leaving the new roots that form to grow down into the enriched soil. Buds near the crown should be planted about 2 inches from the soil surface. Peonies planted much deeper may not bloom. Each peony root division should have not less than three buds and roots should be spaced 3 feet apart to allow proper development.

Gardeners who transplant peonies should not expect blooms for several years as it takes peonies longer to get established than iris.

CATTLE GRUB CONTROL BY 4-H PROFITABLE

Four-H boys who participated in cattle grub control work last year will purchase calves from grub-free areas this year. That is the lesson Harold Gunderson, extension entomologist at Iowa State Colleg, hopesf the boys learned from last year's experiences.

Fifty-two Iowa counties had 165 active 4-H cattle grub control demonstration teams in 1943. Nearly 12,500 persons attended the 342 demonstrations or talks given by the teams Seven other countise report cattle grub control discussions or demonstrations in connection with club meetings.

Most outstanding report came from Delaware County where the entire cattle grub program was turned over to youth groups. Seventeen hundred pounds of dust were used to treat 10,000 head of cattle Gunderson interprets that as actual production of 50.000 pounds of free beef and 200,000 pounds of free milk.

KLEMME NEWS

Sgt. Lyle Schoenwetter is spending a furlough visiting with his parents.

Mrs. P. M. Wilson went to Des Moines Monday for a visit with her daughter Mrs. Robert Risser and son Bobbie.

Miss Audry Mau of Des Moines spent the week end and Labor Day visiting with her parents here, Mr. and Mrs. Lewis Mau and family.

Fred Neuhring has been busy the past week fixing up his house in town, where Keith Albertson and family have been residing.

Capt. and Mrs. Victor Greiman of Dayton, Ohio, came last week to spend a ten day leave visiting at the parental W. H. Greiman and Albert Kehl homes.

Seaman Thomas Thompson and wife of Great Lakes spent Tuesday and Wednesday of this week visiting with his brother, Ed. Thompson and family here.

Mrs. Lester Stille will go to Ft. Dodge this week Thursday to attend a Legion Auxiliary school of instruction for presidents of the Auxiliary.

Mr. and Mrs. E. C. Buntenbach and Edward and Mrs Harold Wicks, came home Sunday from Clear Lake where they had spent the summer in their cottoge on the north shore.

The following were guests at the home of Mr. and Mrs. Aug. Baack over the week end: Mr. and Mrs. W. Penkert; Mrs. Carrie Dunning; Mrs. Anne Glaser, from New Ulm, Minnesota.

Livestock AUCTION

During the summer months we have held our sales on Friday evevening, but hereafter we will hold our sale

EVERY FRIDAY AFTERNOON
AT OUR BIG SALES BARN IN
KANAWHA
—V—

We are having big auctions. All kinds of Cattle, Hogs, Pigs, Sheep, Lambs will be sold every Friday afternoon. Consign your surplus. Buyers here for everything. We want to give your stock the best attention, so have yours here early. Tell us your plans. We'll co-operate in every way possible.

To turn your stock into cash, consign to this great market. Do business with your friends and neighbors. Not necessary to ship your stock to a distant point. Come over Friday afternoon.

I. S. C. AGRONOMY FIELD DAY DATE IS SEPT. 16

Approximately 100 new experimental hybrids will be shown to visitors at the Agronomy Field Day to be held at Iowa State College, Ames, Sept. 16. Observations will be made of certified single crosses and demonstration plantings of inbred lines used in commercial seed production in Iowa.

Seed increase plots of Earlyana, Richland and Lincoln, and comparative growths of 40 soybean varieties will be examined and discussed. The soybean breeding and selection program will be explained. A third phase of the program will deal with soil response to crop rotations, and with manure, lime and fertilizer response from corn, soybeans and new seedings of clover.

BETTER IOWA GARDENS

Cave storage is considered the most satisfactory type of storage for the farm. Such a storage has many uses in addition to the preservation of vegetables and fruits. Farmers who are thinking of constructing a cave storage can obtain a blueprint with specifications by sending 15 cents to the Agricultural Extension Service, Ames, Iowa. Ask for Midwest Plan 73402 Permanent storages of any type should be completed and ready to receive garden produce by the last of October.

* * *

Old cave storages should be inspected and necessary repair work completed within the month. Poor circulation of air in caves makes conditions favorable for development of molds In caves where only 4 or 5-inch tile openings nave been used, it would be well to change to larger openings. An opening 1 foot square is needed for each 1200 cubic feet of space.

* * *

Practice of cleanliness in the cave is important. Clean out all debris. When the walls and floor are clean, spray with a strong solution of copper sulfate Use 1 pound of copper sulfate to 15 gallons of water. It also is a good practice to whitewash the ceiling and walls of the cave storage. It not only improves the appearance but greatly improves visibility for anyone working in the cave.

* * *

Tender vegetables, if injured by frost, do not store well. So, in case of an early frost in September, vegetables such as peppers, eggplants, tomatoes, pumpkins and squashes should be harvested

* * *

If a freeze is forecast and time is short, the tomato plants may be pulled and taken indoors where the fruits may be harvested and stored at a convenient time The mature green fruits should be saved to ripen Tests have proved it is better to harvest tomatoes before a frost than afterwards.

* * *

Peppers and eggplants ordinarily will keep just a few weeks after harvest. When pumpkin and squash leaves are injured by frost, it is time to pull or cut the fruits from the stem. About 2 inches of the stem should be alowed on each fruit. If there is no danger of another frost there is no danger of another frost immediately, the fruits may be left in the open a day or two.

* * *

The quanity of vegetable seeds earmarked for civilians in 1945 is about the same as that for last year Vegetable seed acreages are large this year and harvests of most varieties are expected to reach all-time peaks.

BOX ELDER BUG IS EASY TO CONTROL

But Measures Should Be Taken Now To Avoid Pests In The House

Thrifty homemakers who don't want boxelder bug in their houses this winter should take steps now to control them Harold Gunderson, extension entomologist at Iowa State College, says boxelder trees close to the house should be sprayed with a solution made by mixing 1 pint of nicotine sulfate and 1½ pounds of laundry soap in 50 gallons of water. The spray must come in direct contact with the bugs, wetting their bodies to kill them, Gunderson declares.

Bug congregating in large masses —either on tree trunks, sides of houses, or on sidewalks—can be killed by spraying with kerosene. tractor fuel, household fly spray or boiling water Kerosene will not injure the house paint, Gunderson states.

Make House "Bug-Tight"

A third method of dealing with the pests is to make the house "bug--tight." This can be done by using a caulking compound and plugging cracks around fireplaces and chimneys, window frames and uneven places where sills of the house do not fit tightly on the foundation. Caulking compound can be bought in any hardware store and should be used liberally, Gunderson says.

While boxelder bugs don't actually do any damage — simply seeking a place to hibernate through the winter whlie living on their own fat—they can prove a big annoyonce to housewives. Should bugs get into the house, a household fly spray can be used to kill them.

MANURE IS VALUABLE BY-PRODUCT OF FARM

Field Tests Show It To Have A Crop-Production Worth of $2.50 Per Ton

Conserve and utilize manure carefully. It's the most valuable by-product produced on the Iowa farm according to Iowa State College agronomists who value it at $2.50 a ton as the result of an actual field valuation of its crop-producing power as measured by crop response in field tests.

The $2.50 a ton valuation is based on an 8-ton application of manure made once in 4 year. A lighter application of 4 to 6 tons probably would show a somewhat greater value per ton tne agronmists point out.

200 Tons Yearly

An estimated 200 tons of manure is produced in the barns and lots of the average Iowa farm each year. Evaluated at $2.50 a ton the manure is worth conservatively $500; that is it will produce crops worth that much. This same average farm produces a $2,500 corn crop, a $500 oat crop and a $240 nay crop. So the annual unwasted manure product is worth two hay crops, equal to one oat crop and equal to one-firth of the corn crop in value.

The manure produced in the barn and in the lot also is worth, in terms of what it will produce on the average farm, more than eight times as much as the fertilizer and limestone used in recent years when calculated on the same basis.

Wise Management Profitable

Poor management in handling and storing results in a loss of at least half of the value of the manure, however, the agronomists report The average Iowa farmer probably loses $250 a year or more by careless management of manure. This loss is equivalent to the value of the average annual hay crop and of half an oat crop. Wise management in conservation and use of manure could double the returns from that produced.

FALL'S GOOD TIME FOR LIMING SOIL

But Make Sure Lime Is Going Where It's Needed Most By Making Tests

While every effort should be made to get all possible lime spread this fall, soil should be tested for lime requirements to insure that the available supply is spread where the need is greatest.

H. R. Meldrum, extension agronomist at Iowa State College, says lime can be top-dressed now on hay fields, rotation pastures and new seedings. While top-dressing does not give immediate benefit, it will prepare the land for new legume seedings 2 or 3 years from now.

Where to Put It

Lime can be spread on several places this fall in preparation for spring seedings of legumes. Land where corn is cut for silage or where soybeans are cut for hay is an ideal place to spread lime, Meldrum points out. Then, late this fall or early winter lime can be spread on soybean or cornstalk ground that is to be seeded next spring. It also may be spread on winter wheat ground, preferably before planting the wheat or after the ground is frozen.

If legumes are to be seeded in permanent pastures next spring the lime should be spread this fall and disked in. Meldrum says lime spread on bluegrass pasture without legumes is of doubtful value.

It is desirable to work land after the lime is spread this fall to mix it with the soil and prevent it from washing off. Rolling land should be disked on the contour.

MAY BE WISE TO START SILAGE FEEDING EARLY

With the outlook for some soft corn this year, many farmers are looking for silage to get the most feed value from their corn crop. Arthur R. Porter, dairy husbandry specialist at Iowa State College suggests dairy farmers feed silage early this fall to supplement dormant bluegrass pastures and to stretch out their grain supplies.

Feeding of silage not only will help to keep the dairy nerd in high production but also will keep the silage in the top of the silo from spoiling and will save the farmer the trouble of hauling spoiled silage to the field later on. Feeding can start as soon as silo filing begins without waiting for any fermentation to take place and can continue during the time that the silage material is fermenting.

Silage may be fed as liberally as ne dairyman desires. Porter states. Since it is low in protein feed also should be fed.

White Persian cats are generally deaf.

Around Iowa

LIGHTNING BAD EFFECT

Barns of Lundy farms near Eldora have been especially attractive to lightning this summer. Last week a barn on the John Lundy farm was destroyed by fire after being struck by lightning. All the stock and large farm machinery were saved but the building and a large corn crib and hog feeder nearby were completely destroyed. Earlier in the summer, two barns on other Lundy farms were destroyed by lightning.

COINCIDENCE

Thirty-three years to the day after his father landed in the United States, Pvt. Thor Fisko, Jr, arrived in England. It was on Aug. 11, 1911, that Thor Fisko, Sr., 18, arrived in the Uunited States. Private Fisko is 18 years old at this time.

ANYTHING GOES

During present-day shortages, anything handy can be used for delivery of various things. Recently Clear Lake residents were having difficulty in getting ice delivered to their homes. J. A. Vonder Linde solved his problem by taking home a 75-lb. cake of ice in a baby buggy.

HONEST PEOPLE

Two incidents happened in Belmond one night recently that brought to mind the fact that people are still helpful. Mrs. F. Jacobmeyer returning to Belmond on a bus found a gentleman's suitcase left in place of her own. Two days later, her suitcase was returned with nothing missing. The same night Mrs. F. E. Purcell lost a tiny wrist watch which was returned to her later.

MOWED BEES TOO

George Pearce of Griswold had an experience the other day he does not care to repeat for sometime to come, if ever. While mowing weeds a beehive was knocked over by one of the horses pulling the mower. Fast work by Pearce in getting the team away from the spot prevented serious injury to either himself or the team.

CARROT RING

A carrot pulled from the garden at the Ole O. Lund home in Northwood had an ornament not usually found on the vegetable. The carrot had grown through a ruby ring Mr. Lund recognized the ring as one lost by his daughter, now Mrs G. T. Norswing, 36 years ago.

ODD HIDDING PLACE

A roll of the first check - row corn planter wire ever made was found by Henry Dau Schmidt of Reinbeck in a grape arbor at his home. The wire had never proven satisfactory as the knobs were too small and checked unevenly. Wire manufactured the next year, with an enlarged button or ball on it, was also found in good condition. The marking wire was made over 50 years ago.

BAD DREAMS

Helen Short of Burlington dreamed that her house was on fire. Result was that she jumped from her second-story bedroom window, bruising herself badly. The 15-year-old girl thought possibly sharp flashes of lightning during a storm had something to do with her dream.

The OPA recently publisned a book for house tenants . and two million copies were issued. Among other things tenants were advised not to let their children scribble on the walls. Let's see didn't we notice something in the press the other day about not wasting paper?

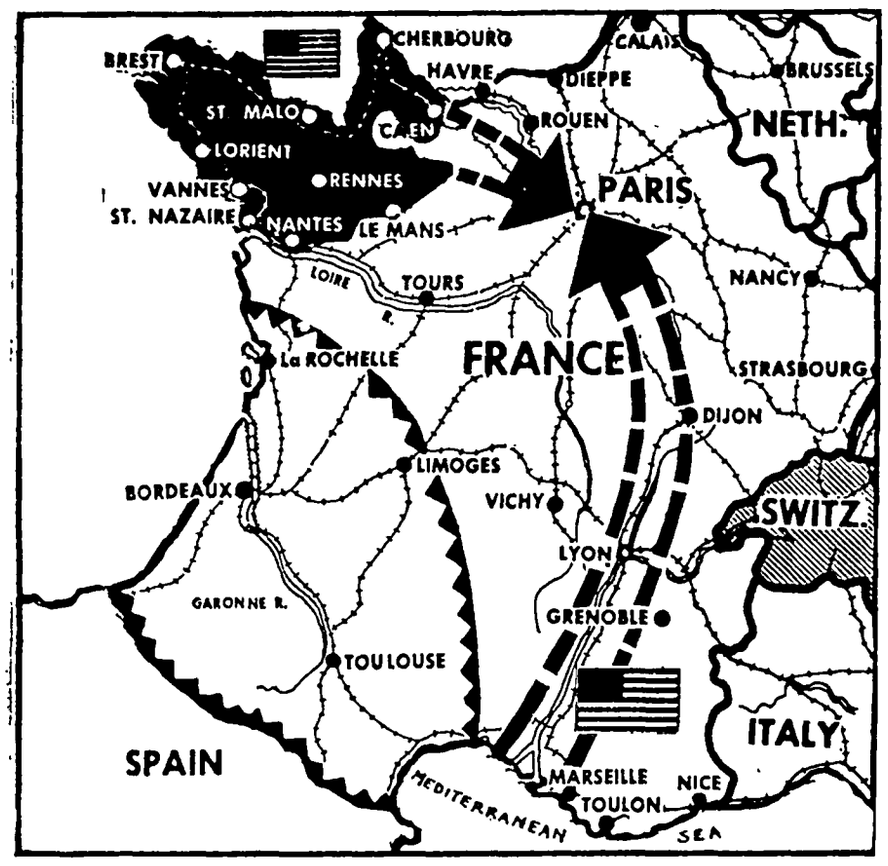
WEEKLY NEWS ANALYSIS

Allies Jolt Nazi Grip in France; Reds Carry War to German Soil; Summer Drouth Hits Ohio Valley

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



With landings in southern France and sweeping advances in the north, the Allies are forming a huge pincers to squeeze German forces in that country, as arrows in picture show.

FRANCE:
Form Pincer

With Allied forces everywhere on the move, the Nazi hold on France loosened, and German troops fell back to escape the death traps that lightning U. S. armored thrusts were forging.

In the north, U. S. columns that drove on Paris threw out a long arm around the left flank of the German army that wriggled out of the Falaise-Argentan pocket in Normandy, threatening the retreating enemy with still another entrapment.

While these U. S. columns under leadership of Lieut. Gen. George S. Patton pressed the Germans around Paris, British and Canadian forces hammered at the enemy in the region extending to th English channel to the north, pushing him back on a continuous front.

Swift Allied advances in the north were matched by equally successful gains in the new invasion area of southern France, where liberation troops spearheaded by Maj.-Gen. Alexander M. Patch's American Seventh army thrust far inland before encountering stiffening enemy opposition in the mountainous country.

Maj.-Gen. A. M. Patch

As the regular army formations drove inland, they joined hands with scores of paratroopers, who had been dropped far back of the beachhead areas to sever enemy communication lines and hamper his forward movements to the fighting zones.

As was the case in Normandy, many Czechs, Poles and Russians were included in the German units which manned the coastal defenses, and as the fighting raged further inland from Toulon to Nice, the Allies bucked up against a better caliber of enemy troops.

Encouraged by the Allied successes the French underground intensified their sabotage of Nazi communications and installations.

EASTERN FRONT:
Enter Prussia

In the face of heavy Nazi resistance and repeated counter-attacks supported by rocket fire, Russian troops under 36-year-old Gen. Ivan Cherniakhovsky crossed the East Prussian border to carry a war to German soil for the first time in 30 years.

As the Germans savagely countered the Russian invasion of East Prussia with continuing counter-attacks, the Nazis were reportedly throwing fresh reserves into the battle from Himmler's home guard.

On other sectors of the 1,000-mile front, German resistance was equally bitter, with the Nazis yielding ground grudgingly in the Baltic states and employing tank and infantry forces to slow the Red drive on Warsaw.

To the south, the enemy also brought his mechanized units into counterattack to impede the Russian advance on the central German border, 75 miles away from the front.

CIVILIAN GOODS:
Reconversion Step

Although the War Production board has allowed the use of surplus labor and factory facilities in the manufacture of civilian goods, no appreciable increase in the output of such material can be looked forward to until Germany is defeated, when it should jump 39 per cent to prewar levels, WPB Czar Donald Nelson declared.

WPB's order permitting limited manufacture of civilian goods constituted the fourth and final step in its program for gradual reconversion, previous provisions allowing use of aluminum and magnesium; construction of postwar working models of products, and immediate ordering of machine tools.

Under the WPB's latest ruling, manufacturers able to employ surplus labor will receive priority assistance for producing such items as electric ranges, heating stoves, pails and buckets, electric flat irons, farm machinery except tractors, and water storage tanks for agricultural use.

PACIFIC:
Step Up Bombing

With U. S. bombers operating west of New Guinea and pounding the enemy's shipping plying beyond the Philippines and Celebes islands, the position of 150,000 Japanese troops trapped within American lines in the South Pacific continued to deteriorate.

As U. S. bombers continued to range to the west of New Guinea, other U. S. aircraft hammered at Japanese bastions in the Bonin islands, guarding the southern approaches to the Nipponese homeland, 600 miles away.

While U. S. bombers continued their softening up campaign of the enemy's strategic island defense system, American ground forces dug into newly won positions in the Marianas, Adm. Chester Nimitz declared that it might not be necessary to invade Japan to win a lasting peace.

DROUTH:
Crops Periled

With only half a month of the June-August summer season remaining, the Ohio valley anxiously hoped that showers east of the Mississippi would develop into substantial rainfalls and break a two and a half month drouth, during which Tennessee had only about 45 per cent normal precipitation, Illinois 50 per cent, Indiana 52 per cent, Kentucky 44 per cent and Ohio 61 per cent.

Besides inflicting damage ranging from 10 to 70 per cent on corn crops in some areas, and threatening soybeans and gardens, the heat and drouth seared pasturage, compelling farmers to dip into dwindling feed supplies, and inducing many to hold back on purchases of stockers for future fattening.

Although the Ohio valley remained hardest hit by the drouth, continued dry weather threatened crops and pasturage in a wide region, including the North Atlantic coast area, the Northwest and Texas and Oklahoma.

BRIEFS . . . *by Baukhage*

RADIO PICTURES: A British radio and television expert recently disclosed plans to set up wireless photo-telegraphy stations that can flash complete typewritten or printed pages at the rate of 25 pages per second. At present the rate of transmission is six minutes for one page or picture. It is possible to speed up photo-telegraphy as much as 15,000 times, the inventor states.

WANTED CHEWING GUM: A burglar who broke into a filling station in New Haven, Conn., took gasoline coupons for 300 gallons, and then set to work to get what he really wanted—chewing gum. He smashed a vending machine, grabbed 100 sticks of gum and hastened away. He ignored the pennies in the machine and the money in the cash register.

SOLDIER READING:
Ease Restrictions

Irked by the army's interpretation of the political propaganda ban in the soldier's voting law, which resulted in exclusion of much popular reading matter in military camps, the senate moved to ease the tight administration of this provision of the act.

Originally, the law stipulated that no newspapers, magazines, motion pictures or literature paid for or sponsored by the government, and containing political propaganda, could be distributed to the armed forces.

Much of the trouble lay in the army's rigid interpretation of the word "sponsored," which it took to mean permitting the sale of popular reading matter containing political material at service posts, or use of company funds to subscribe to newspapers.

WHEAT:
Perennial Brand

Agricultural pioneers even back to the days of the Czars, when they developed artificial insemination at royal stables, the Russians claim to have developed an edible perennial wheat with a gluten content of 60 per cent.

According to the Soviet's ace agronomist, Prof. N. V. Tsitsin, the perennial evolved from cross pollination of wild grasses of the agropyrum family with wheat, produced satisfactory initial harvests, with real tests to come next season.

Although plant breeders in the U. S. have long worked on development of a perennial wheat, they have met little practical success thus far, with one hybrid composed of wild grasses and the grain lacking regular qualities.

No Fun

No different than a million other young men — but not as lucky — George Danhires, 2, of Pittsburgh, Pa., crawled halfway through the opening of an eight inch areaway between the walls of his home before he got stuck. Firemen were compelled to chop part of the living room wall to free him. If the picture's any indication, it was no fun, fellas!

COTTON:
Seek Parity

In an effort to raise cotton prices to parity, which is from $6 to $8 per bale above 1944 loan rates, Sen. John H. Bankhead (Ala.) urged growers to keep the commodity off the market.

Senator Bankhead's action came in the midst of his conferences with government officials and cotton manufacturers over elevation of the price level in conformance with his congressional act calling for attainment of parity of agricultural crops.

During the conferences, Senator Bankhead said, it was agreed that early OPA revision of textile prices to reflect parity would help boost the market. As a last resort, he said, 97½ to 100 per cent parity loans were considered.

DEMOBILIZATION:
Study Discharges

The all-important but complicated problem of how to release servicemen and women from the armed forces after the war is receiving the consideration of both President Roosevelt and the high command, it was reported.

Under a reported proposal, personnel would be discharged under a point system, with so many points granted for service abroad, length of service and number of campaigns, and marital status and dependency. Personnel with the largest number of points would be the first released.

At the same time, the President was said to be considering use of some camps and training facilities in this country for vocational study and rehabilitation of vets, and modernization of others for future defense forces.

EGGS

The War Food administration holds a huge stock of eggs, purchased at a cost of between 100 and 150 million dollars to maintain prices at 90 per cent of parity. Col. Ralph Olmstead of WFA testified before a senate committee that some five million cases have been bought.

Colonel Olmstead stated that he was uncertain what disposition would be made of the eggs, although he said that probably a large part can be sent to Britain and liberated countries in a dried state.

The Washington MERRY-GO-ROUND

By DREW PEARSON

Washington, D. C.

JAPANESE BLOW-UP?

Don't be surprised if there is a blow-up brewing in Japan not unlike that which nearly bumped off Mr. Hitler recently. This columnist has reason to believe that things are seething inside Japan right now and that the die is cast against the Fascist military clique at the top.

It was groups of young Fascist officers who shot Tokyo's leading moderates back in the days when it was not yet definitely decided that Japan should conquer Asia. Now the moderates are able to say "I told you so," and are beginning to get the upper hand.

The Emperor probably will not be a victim of the revolutionary turmoil, for two reasons: (1) He is a moderate himself, never did go as far as the cut-throat young Fascists, was kept more or less a palace prisoner by them; (2) he is better guarded than any other man in the world. High walls, moats, trained, trusted bodyguards surround him. Not even his personal tailor is permitted to touch him.

Unrest inside Japan has not had time to be communicated to Jap troops at the front, nor is it likely to affect outside war areas much. The Jap soldier away from home can be counted on to fight to the very end, because he cannot come home unless he is victorious. The code of Bushido does not permit it.

The big thing to watch, when and if things inside Japan reach the boiling point, is the Jap fleet. Its officers will be faced with the alternative, under the code, of all committing suicide or sailing into the enemy, no matter what the odds against them, and fighting it out.

* * *

HOOVER'S CHILDREN

Bachelor J. Edgar Hoover, who has jailed more desperate criminals than any man in history, has a secret weakness which not many people know about. He likes children. On many an afternoon you will find a group of boys going through FBI headquarters, getting points on crime detection. If he is not too busy, Hoover himself will take time to say hello.

Hoover has spent much time studying children, feels that a healthy younger generation is the best insurance against crime, once even wrote a magazine article, "If I Had a Son."

Here is some of the advice he gave: "If I had a son, I'd probably be frightened. I've never feared criminals, but if I were a husband and father I might be afraid. So much would depend on me.

"If I had a son, I'd do one thing. I'd tell him the truth. I'd never let him catch me in a lie. And in return I'd insist that he tell the truth. . . . When children go astray it isn't the fault of the children but of their parents. . . . A spoiled boy grows into a spoiled man. . . . I'd try to be a pal to my boy. . . . I'd encourage him to join the Boy Scouts and boys' clubs, but before he joined I'd make it a point of getting acquainted with the leader of the troop. . . . I'd have my son go to church. What's more, I'd go with him. . . . But above everything else, I'd try to understand my son. For if I didn't I'd be a failure as a dad."

* * *

STALIN-CHURCHILL CORDIALITY

Those who have watched the diplomatic wheels go round from the close-up inside, report that Stalin and Churchill are now getting along famously.

This is important because it was not the case at Teheran, where Roosevelt and Stalin did the getting along and Churchill didn't. That was when the present Second Front in France was the topic of considerable argument and when Churchill, bidding farewell to Stalin, said:

"Well, goodbye, Marshal. I'll see you in Berlin."

"Yes," replied Stalin; "I in a tank and you in a Pullman car."

Churchill's friends point out that at Teheran he was in the early stages of a very severe illness and definitely not himself.

Since then, Churchill seems to have got over any complexes regarding Stalin, and Stalin takes a like position toward Churchill. There has been complete teamwork between the two for some time.

Both British and American diplomats also pay tribute to the cooperation of the Russians in recent months on most subjects, even including Poland. The general view in diplomatic circles is that Stalin has been reasonable regarding Poland.

Nightlife Murders Baseball
Says Babe Ruth
By the Home-Run King Himself

Propped up on a cot in a hospital for several weeks recently, following an operation for the removal of a cartilage from my right knee, I spent a lot of time considering the future of baseball.

Let's start with that nocturnal nuisance, night baseball. It's murdering the sport with the help of the cradle-robbing magnates, who are killing the source and substance of the game by neglect of the kids, without whom it cannot exist.

Night baseball is strictly a business proposition—an offshoot of war conditions.

One or two games a week to give the defense workers a break is O.K. But now both major leagues are planning four and five a week. That will spell the end of the sport.

The magnates won't give up the regular week-end gravy of Saturday and Sunday daylight games. That will mean a layoff Monday and four night contests.

To the players, this will be a drastic and unhealthy way of life. Eye trouble will develop. Right now night games are compelling some players who never had to use glasses to wear 'em. Babe Dahlgren is an example.

Irregular meals and sleep is another disadvantage. An athlete can't get along without regular sleep and that will be impossible under a day and night schedule of games.

Danger of Catching Colds
In Night Games

Imagine what will happen to the veterans, pitchers in particular. A pitcher perspires profusely during a game. In the daytime, usually with the sun shining, there is less danger of catching cold.

I know what I am talking about. I caught one of the worst colds of my career in a night game, merely acting as a coach when I was with Brooklyn. What it is doing to those two-inning pitchers can well be imagined.

As for the fans. It's a mistake to think the men of the family are going to attend four night games regularly each week. Mothers, wives and girl friends will soon stop that!

Much publicity already has been given to the fact that night baseball will take the game away from youngsters. Kids are the backbone of the game. Smart baseball officials have done everything possible in the past to promote the interest of these future audiences by admitting them free to week-day, daylight games.

Boys, as prospective big leaguers, are not getting a square shake from organized baseball. The major clubs show no interest in a boy until he's 16 and can get working papers. Then, if he's got the stuff, they send him out to a Class D league where they squeeze what they can out of him as a hired hand.

Softball and Baseball
Just Don't Mix

There seems to be a growing apathy toward baseball. The village, town and former hot neighborhood teams and rivalries are fading. This cannot be attributed to the war, because the boys who made up those teams were usually under draft age.

I hate softball, though I approve any game that gets kids out in the sun, but softball has ruined many a potential big leaguer. You cannot play softball and excel at baseball.

Progress is also pushing baseball aside. Bit, by bit, we see the growth of cities and towns wipe out sandlots and semi-pro ballparks. Even in small villages you will discover cornfields that once were baseball diamonds. No efforts are made to save the diamonds.

Where are the kids going to turn to for aid?

The kids themselves tossed the answer to me at one of my recent Saturday morning radio broadcasts on the A. G. Spalding program. Devise a plan whereby the big leagues would sponsor baseball schools throughout the country, using retired star players as instructors.

Boys start playing the game at eight years and, until they become 16, get little or bad schooling in the sport. So they acquire unbreakable habits in batting, throwing, sliding and fielding unless they are natural-born players like the Otts, Cobbs, Collins, Speakers, etc. With professional coaching, the kids would be fit for league play anytime they were needed.

I played during the last war and can vouch for the fact that few of the players who saw active service ever reached top form again. Some of the aces like Capt. Hank Greenberg and Bill Dickey, who are along in years, may never return to the game. Chaps like Joe DiMaggio, Bob Feller, Ted Williams and Terry Moore, depending on the type and length of their service, may take as long as three years or more to hit their former stride again, if they ever hit it again.

Mail Regulations.

...Christmas mail **month will com...** ... the 30-day **period from Sep...er 15 to October 15, 1944, for ...se in the armed services over...**

... period **is the only time dur...**hich packages **may be sent to ...rs overseas without a specific ...n request from the soldier or ...t an APO cancellation.**

... one package **may be sent by** ... behalf of the **same person or ...m to or for the same soldier ...e week during this month.**

...ark the package "Christmas ...," using a label that does not ...ble a postage mark or stamp.

The package must weigh not ... than five pounds, wrapped, ... must be no longer than 15 ... in length and 36 inches in ... and girth combined.

Whenever the presents arrive is Christmas to soldiers across the sea. Sometimes the army and navy postal services deliver the goods sooner than expected, as happened last year in Italy, when packages from home arrived late in November. The boys opened them up at once, since they didn't know what they'd be doing or where they'd be on Christmas Day. It's safest to mail early, however, because unforeseen delays can come along any time.

The army recommends that the package container be a box of metal, wood, or solid doublefaced, corrugated fiberboard, reinforced with strong gummed paper tape or tied with strong twine or both.

Standardized boxes for mailing Christmas gifts to military personnel overseas will probably be on the market by September 1, the War Production board reported. Approximately 16,000,000 special applications for the purchase by retailers and box jobbers of these boxes have been filed with WPB.

WPB said that the standard boxes are to be manufacutured of 175-pound tested corrugated paperboard, 12 by 6¾ by 4 inches, in regulation slotted carton style with taped manufacturers' joints. The post office department has recommended that gummed flaps be supplied with the boxes for sealing the parcels, WPB reported.

Blanks for address and return address will appear on the panels of the box, also the statement "this box to be used only for sending merchandise to a member of the armed forces outside the United States."

4. Address the package completely and legibly. Print the address so that it will not run, streak, smudge or fade. Place an additional copy of the address and return address inside the package, so that if it comes apart, or the wrapper is torn, soiled, or lost, the additional copy may be used. Do not use gummed labels for addressing.

The army and navy point out that they know what not to send overseas for Christmas, on the basis of past experience. But what to send is another thing altogether. In general, soldiers and sailors and others like gifts that are unobtainable where they are and remind them with special significance of home.

What Not to Send.

The services advise generally against sending articles that may be obtained by sailors in ships' service stores, or by soldiers in post exchanges. But soap, for example, which is available in most post exchanges, is a valued gift, particularly for soldiers on the move, for in advancing they sometimes outdistance for hours or days even mobile post exchanges.

Perishable foods, intoxicants, weapons, poisons and inflammables, including matches and lighter fluids, are taboo and will not be accepted for mailing overseas.

A navy postal officer stationed overseas wrote: "During the Christmas rush we kept a considerable force of men busy rewrapping parcels and salvaging everything fit for forwarding. A very great service could be rendered to us out here if the widest possible publicity could be given to these matters.

"The people should be warned not to send liquids of any kind. They should use every possible precaution in packing powder of any kind. Fruit is not only dangerous to their own mail, but it causes serious damage to the other fellow's mail. Warn them about candy melting, fruit, cakes and cookies crumble and decay.

"Above all the fact should be stressed that mail sacks can be baked in the hot sun and drenched in transit, all in the same day."

The navy has found that unsuitable gifts include: leather goods (these mold in the tropics); chocolates (these melt); cigarettes (obtainable more cheaply in ships' stores); cameras (forbidden); electrical equipment (there may be no electricity available); food, unless tinned; liquor; clothing, unless requested.

Fragile articles and soft candies and pastries are poor gifts for obvious reasons, the army reported.

Gifts Poorly Wrapped.

The army cautioned that boxes of miscellaneous gifts should be packed carefully. Razor blades, for example, require extra wrapping. Numerous cases have been recorded of improperly wrapped razor blades working through packages.

In 1943, approximately 15 per cent of the Christmas mail handled by the navy was delayed in transit because of incorrect or incomplete addressing, the navy reported.

One navy postal officer wrote from the Pacific theater:

"It needs no considerable stretch of your imagination to understand how mail looks after it has been shipped for thousands of miles by water, then worked and shipped again, reworked and reshipped until it arrives at a Fleet Post office for directory service. By this time, any of the parcel post that was at all inclined to be perishable is thoroughly decomposed, causing damage to mails adjacent.

"Only today we dumped up a sack containing the contents of a parcel which had come entirely apart. There were rotten apples, decayed oranges, melted candy and stale cake crumbs throughout the entire sack. This happens all too frequently.

"A great deal of it was originally poorly wrapped. Many parcels have sticker addresses. The sacks may have become wet in transit, causing the labels to come off. Frequently these stickers have been hurriedly slapped on, leaving tiny air pockets beneath them. Friction in transit causes these to wear off in spots. All too often addresses are in pencil, or, if in ink, the ink has become wet and illegible."

Again this year soldiers overseas will be able to select gifts for the folks back home from the mail order catalogue operated by the army exchange service, special services division. Listed gifts include: men's toiletries, haberdashery, leather goods, luggage, games, including playing cards, books, magazine subscriptions, dolls, toys, doll dishes, stuffed animals, smokers' supplies, candy, perfumes, cosmetics and lingerie.

...ackages get rough handling all along the way, and unless they are ...ely wrapped and tied, they may be damaged in transit. Here ... scene in the New York postoffice, showing how busy sorters toss ...s into the hand-trucks. The big pile in the rear consists of packages ...are coming undone—the string working off, or the wrapping loose. ...e time your gifts have made the long trip in a mail sack, they ...been subjected to a lot of bouncing around on the railroad and ... The last stage may be made in a jeep or airplane.

Home Sewers Turning Attention To Smart Apparel for Autumn

By CHERIE NICHOLAS

TO BE able to sew and to design pretty clothes for yourself is a real asset in one's life. Enthusiasm for "making your own" is spreading among women everywhere these days.

It was fun and really a happy pastime to sew with dainty wash materials during midsummer. Even the amateur covered herself with glory in fashioning the easy-to-sew summery cottons and rayon weaves that seemed to be lovelier this year than ever before. Comes now, however, the time when homesewers are thinking in terms of good-looking apparel that will prove the perfect choice to bridge the gap between summer and fall and then to carry on through the late autumn days worn under a chic topcoat.

Today the first consideration in wardrobe planning from a practical point of view is how much is needed to look well dressed, and how about the "stretching" possibilities of one's wardrobe. It is the many-purpose wear of one's clothes that dominates in the general scheme of costume designs for the duration period. If you want to look fashion-right and yet keep within bounds of a strict wartime budget, you'll be wise in making a dual-personality bolero suit your immediate choice. For capricious summer-into-fall weather, a youthful, simple to make bolero-and-skirt costume is the ideal choice. With different blouses and interchangeable accessories it stands ready for any event, every day of the week.

It doesn't matter much whether you ever tackled a suit-making project before because you can get expert help in latest dressmaker tricks and sewing short-cuts at your local sewing center and many important stores throughout the country now conduct sewing classes in connection with their fabric department. Among other things you will be taught to make easy adjustments to your figure with the aid of a dress form of plastic materials molded individually to your own contours.

You'll get a lot of pleasurable wear out of a gay cardigan bolero version that contrasts skirt and jacket as shown to the right in the illustration. Fuchsia wool is used for this bolero, navy wool for the skirt. The sleeves are bracelet length to team with the new longer length gloves. The hat and bag to match is another sewing achievement that can be yours for the trying in that patterns are so easily available for all types of stunning accessory sets.

You may prefer the bolero style that takes on a classic notched collar and revers with straight long sleeves as shown to the left. Make it in a pastel woolen, for color is going rampant throughout the new fall style program. Restrained fullness is achieved with cluster gathers at the front of the column-slim skirt.

The ingenious sewer is given something new to think about in way of decorative button and buttonhole technique that is enhancing so many of the newer costumes. You can achieve smart individuality for the garment you are making if you avail yourself of the button-making and fabric-covered button service and plastic button collections offered at the notion counters of local sewing centers. The pen-and-ink sketches to the left illustrate some of the new and fascinating button and buttonhole maneuvering that is going on at present. Note the cunning use of handmade embroidered leaves, which together with gay fabric-covered buttons, add a decorative touch to the jacket sketched at the top.

A most exciting touch of individuality that sewing center experts recommend is made-to-order monogrammed buttons. You can make each button a standout by centering it against a diamond shaped piece of fabric as shown in the center sketch. The fabric diamond shaped motifs are easy to applique on the jacket closing if you use the zigzagger attachment on your machine. The tiny fabric squares with pinked edges done on the sewing machine pinker attachment are centered with clever buttons for the jacket pictured last in the panel sketches.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Pink Chiffon Blouse

This stunning dinner blouse is of blush pink chiffon with black, green and rose colored paillettes worked in star motifs. Emphasis on the luxury blouse is noted throughout the fall showings. Either they are handsomely embroidered, glitter-glamoured or hand-painted, or they are made of handsome rich fabrics such as brocades, lame or satin-striped materials. Very smart are the new blouses of gleaming slipper satin.

Dickies and Vestees Can Be Worn Formally

Halter dickies which can double for a bareback evening gown top are beautifully colorful, snapping up all the important dress and suit shades for fall. These are detailed with tiny pleatings, intricate embroidery and exquisite appliques and cutouts. Many quite formal pieces are shown in way of dickies, weskits and vestees, such as the pink crepe halter with starfish embroidery of black sequins, or a high-necked pink metallic ribbon brocade gilet worked in narrow stripes. There are also lovely embroidered net peplum dickies shown. With a collection of these charming fantasies one can rejuvenate one's costumes on hand until they look right up to the moment in style distinction and loveliness.

Jodhpurs for Youngsters

Something new has been added to the little folks' clothes program in way of jodhpurs that are now being sold for kindergarten wear and as practical utility garments for toddlers. These diminutive jodhpurs are made with swagger pockets and correctly pegged and taped silhouette. They are designed to replace overalls and leggings.

Gold-Color Fleece Coats

Style trends point to gold color for the popular fleece coats that are being shown for fall. Merchants regard it as the number one color and say a marked preference is being shown for this radiant autumn hue. Camel tan is still a favorite. Brown and green are the next in choice.

First Railroad Post Office Carried Mail to Soldiers 80 Years Ago

...nty years ago the first perma... railroad post office was estab... to speed up mail for soldiers. ...ugust 28, 1864, George B. Arm..., then assistant postmaster of ...go, sent his first railway post ... on its way over the Chicago ... North Western railway from ...go to Clinton, Iowa. Within a ...years the new system of ex...ng the mails spread to include ...incipal trunk lines of the na... Practically every nation in the world adopted the idea eventually.

Armstrong instituted the service with approval of the postmaster general as a means of facilitating distribution of mail, particularly to men in the army. From the first, Armstrong envisioned a national system and lived to see his plan become a success, despite public doubts and ridicule when he first announced his plan.

On the first trip 80 years ago prominent Chicago newspapermen, bankers and civic leaders went along to witness the initial operation. One banker refused to be convinced of the plan's practicability, remarking that "all the mail would blow out of the car."

Although Armstrong is generally credited with the first permanent railway post office, others preceded him by a few years with similar plans. All, however, were devised to meet local emergencies and no plan operated more than a year.

Seaman and Mrs. Eugene Kluckhohn and baby, and Calvin Schmidt left Friday evening for Ft. Hancock, New Jersey, where Eugene is stationed. Ft. Hancock is about seven miles across the harbor from New York City. The Kluckhohn's will live near Ft. Hancock and Calvin Schmidt went along for a visit.

WOMEN OF THE TOWN

Albert Dekker-Claire Trevor

Short: Easy Life

Mr. and Mrs. Ed. Thompson and Barbara spent Sunday and Labor Day at a cottage at Clear Lake.

Mr. and Mrs. Albert Fuller and John Fuller and son, Ronald of Amboy, Minn.; and Mr. and Mrs. Elmer Fuller of Des Moines, came Saturday evening and visited until Monday evening at the Ralph Elder home.

Mr. and Mrs. Roy Smock and daughter, and Grandma Smock, moved their household goods to Waterloo Sunday where they will make their future home. The Smocks have many relatives in the Waterloo community.

Dr. and Mrs. Wm. Gauger and children, Marylin and David, of Early, Iowa, visited for a short time Sunday with their old friends. They were on the way over to Mason City to visit over Labor Day with the doctor's father, Rev. A. W. Gauger and wife.

Rev. and Mrs. H. E. Harvey, Elwood and LaNelle, returned last Wednesday from Maryland where they spent their annual vacation and also attened the Golden Wedding celebration of Mrs. Harvey's parents, Mr. and Mrs. Henry A. Schmidt.

Mr and Mrs. W. T. Warner of Iowa Falls came last week Saturday, August 26th for a visit with Mrs. Warner's daughter, Mrs .C. K. Finders and family. Jerry Finders came home with the Warners after working on his grandfather's farm for the past three months.

Mr. and Mrs. C. E. Kluckhohn entertained the following to a 5:30 o'clock dinner last Wednesday evening: Seaman Eugene Kluckhohn and family; Pvt. Clarence Kluckhohn; Miss Mary Jane Lucas of Garner; Mrs. Lyle Wilcox and Mr. and Mrs. Albert Schmidt.

Sunday for dinner Mr. and Mrs. John Waddingham entertained Mr. and Mrs. Al. Fuller and son John, and his son Ronald from Amboy, Minn.; Mr. and Mrs. Elmer Fuller of Des Moines; Mr. and Mrs. Ben Katter and Lyle of Liberty township; and Mr. and Mrs .R. W. Elder.

Miss Jacqueline Kudje who teaches in Kanawha again this year, came home Friday to spend the week end visiting with her parents, Mr. and Mrs. Art Kudje. Last year Miss Kudje taught the primary department, but this year Miss Kudje is teaching typing and commercial work in the high school.

Mrs. J C. Thomas and Mrs. John Etchen took Miss Irene Harms to Newton, Iowa, where Miss Harms will again teach in the high school this coming year. On their return trip home the ladies stopped at Des Moines and brought Miss Betty Etchen home for the week end.

Private Life of the Siamese Twins Held in virtual bondage at birth Daisy and Violet began the intimate story of their fight for love and happiness which never before has been told. In the American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American. 1tc

Mr. and Mrs. Lester Stille and Lois went to Des Moines Saturday morning and visited over Sunday with their daughter and sister, Miss Ruth Stille. Ruth has resigned her position with the Polk County AAA and has taken a position with the State Triple A, and is now in the Civil Service.

Capt. Ray A. Jorgenson, Jr. and Flight Officer J. L. Weaver of Dodge City, Kansas, came Saturday evening to spend a fifteen day leave at the R. A. Jorgenson, Sr. home. Mrs. Ray Jorgenson, Jr. and daughter Judy have been in Klemme the past two months and will return to Dodge City with Capt Jorgenson.

Salute!

TO OUR SCHOOL TEACHERS . . .

Soldiers on the Home Front!

—V—

Our teachers are doing vital war work in preparing our youth for the responsibilities that the peace will bring. Their inspiration, guidance and example are helping, too, to stem the rising tide of delinquency. War-busy parents may well be grateful for the devotion to duty our teachers are showing. Tell them of your appreciation often . . . . they're "in service" in the fullest sense.

SQUIRREL SEASON OPENS FRIDAY, SEPTEMBER 15

Contrary to the opinion of some hunters in some sections, the squirrel season is not open until September 15 This date is set to prevent shooting female squirrels that still have young unable to care for themselves, as often happens when the opening is earlier. Reports from conservation officers indicates a heavy squirrel population in most of the timbered areas of the state, and in spite of some misunderstanding as to opening dates, there will be no relaxation in the enforcement on squirrels The daily bag limit is six; possession limit 12

MISSION FESTIVAL AT THE REFORMED CHURCH SUNDAY

A Mission Festival will be held at the Klemme Evangelical and Reformed Church Sunday, Sept. 17th.

Rev Clarence Koehler, Wheatland, Iowa, will deliver the morning address and Rev. A. Matzner, Supt. of the Deaconess Hospital at Marshalltown will deliver the afternoon address Rev Koehler will speak again in the evening.

O. W. FRIEDOW WILL HOLD PURE BRED BOAR SALE

O W. Friedow will hold a sale of 35 head of pure bred Poland China boars at his farm 7 miles west and 1½ miles north of Klemme next Thursday, September 21, beginning at 1:00 o'clock.

Mr. Friedow raises some of the best hogs n the county and his sales are always well attended by buyers from a long distance who want to improve their herds.

Turn to Mr Friedow's adv in this issue.

Soldier Home On Furlough Entertained At Party

Mr. and Mrs Ben Goll entertained twenty-four young people at their home in honor of their son, Cpl. Dean Goll who was home on a furlough. Court Whist and Bunco was played. Curtis Upmeyer and Beverly Hampel received the high prizes in Court Whist, while Lorraine and Ronald Bredlow received the high prizes in Bunco. Mrs Goll s rved a nice lunch after the playing of games.

Pvt. Goll left Thursday for camp at Langley Field, Virginia.

HELLO, FOLKS!

BUSCH - KREIGER REUNION

SIXTH ANNUAL REUNION HELD AT KLEMME PARK

Relatives Attended From Many Towns In Iowa

The sixth annual reunion of the Busch - Kreiger families was held in the Klemme Park on Sunday, September 10th A picnic dinner was served at noon and later in the afternoon lunch was enjoyed.

The afternoon was spent in visiting and writing letters to the six boys of the families who are in the armed services, some of whom are overseas.

Those present at the reunion included Mr. and Mrs Henry Kreiger, Mr and Mrs Wm Struecker and family, Mr and Mrs Alvin Harsellman and family, of West Bend; Mr and Mrs Louis Braatz and family, Mrs Clyde Gentzrich, of Whittemore.

Mr and Mrs Ervin Gatten and family of Algona; Mr. and Mrs. Elwin Schlei and daughter, Mr. and Mrs Clarence Struecker of Fenton.

Alouis, Gertrude and Ada Linda Schmidt, Mr and Mrs. Leo Schmidt and sons, Mr. and Mrs. Mike Roach and family, Mr. and Mrs Arnold Schmidt and daughter, of Garner.

Mr. and Mrs. George Alberts and family of Clear Lake; Mr. and Mrs. Clarence Lemke and Mr. and Mrs. Otto Lemke of Klemme.

Albert and Mary Swanson were afternoon visitors.

BUFFALO SKULL FOUND IN IOWA RIVER BY GREIMAN

While seining minnows in the Iowa River northwest of Klemme a couple of weeks ago, Henry C. Greiman and Joe Britzka found a buffalo skull.

While pulling the seine, the buffalo skull became entangled in the meshes and was brought to the surface.

The skull is in a remarkable stage of preservation and Greiman expects to mount it on a walnut board At present the skull is on display in Jacobs Hardware Store window.

Buffalo once roamed this section of Iowa, and near Klemme one can still find buffalo wallows. One such wallow is just south of town, in the pasture southeast of the cemetery.

Infants Baptized Sunday At The Ed. Christians Home

Keith Roger, son of Pfc. and Mrs. Harold Christians, and James Allen, son of Mr. and Mrs. Ed. Christians were baptized at the Ed. Christians home Sunday evening by Rev. Calvin Grosshuesch, pastor of the Klemme Evangelical and Reformed Church.

KLEMME GIRL IS FALL BRIDE

GRACE HARMS IS BRIDE OF YOUNG BELMOND FARMER

Young Couple Were Married At Reformed Parsonage Tuesday

The Evangelical and Reformed Church parsonage was the scene of a marriage ceremony Tuesday afternoon at 3:00 o'clock when Miss Grace Harms, daughter of Stenus Harms of Klemme, became to bride of Kasper Lamfers, son of Mr. and Mrs Ben Lamfers of near Kanawha Rev. Calvin Grosshuesch officiated at the ceremony which was witnessed by Miss Maggie Harms, sister of the bride, and Mr. Oafas Lamfers, brother of the groom as attendants.

Mr. and Mrs. Lamfers will live on a farm 1½ miles south of Belmond where he is now employed. They expect to farm for themselves next spring.

Reception Dance Friday Eve

Mr and Mrs. Lamfers invite all of their friends to a reception and dance at the Community Hall at Goodell on Friday evening of this week. Earle's Rythm Orchestra will furnish the music.

Looking Around

at the South St. Paul market were ARTHUR PRINGNITZ, top, and HARRY SANDREY, bottom, both from Goodell, Ia. Sandrey operates a quarter section, feeds 80-100 cattle a year and usually handles 180 hogs a year. Pringnitz farms 178 acres, usually feeds about 25 cattle and raises 100 hogs. Both have cut down somewhat on their hog operations this year. MARKETS Photo

Russians Suffering From Lack Of Clothing Need Relief

G. I. BILL OF RIGHTS WILL BE OF HELP TO VETERANS

The "G. I. Bill of Rights" recently enacted into law by congress, a vast government aid program for veterans of the present war, authorizes federl loans, hospitalization, job insurance, schooling, and other ex-service benefits estimated to cost between $3,000,000,000 and six and one-half billion dollars.

"The G. I. Bill of Rights" covers generally both men and women who have been in service 90 days or more after September 16, 1940, (date of the draft law's enactment) and prior to the termination of hostilities and who have been released from service "under conditions other than dishonorable."

The measure includes a provision that whatever benefits veterans receive under the "G. I." bill will be deducted from any bonus which may be voted.

1. A flat weekly $20 unemployment payment for each calendar month of active service. Payment will be limited to 52 weeks for the first two years after discharge and will be denied to veterans who refuse "suitable" work.

2. A minimum of a year's education for veterans whose schooling was interrupted by the war, with the government paying up to $500 in annual tuition in addition to $50 monthly subsistence, plus $25 for dependents. Maximum schooling will be limited to 4 years in any school the veteran selects.

3 Government guaranteed loans at not more than four per cent interest, repayable in 20 years, for purchase and repair of homes, farms and small businesses up to 50 per cent of the principal, provided the guarantee does not exceed $2,000 The veterans' administration will absorb the interest for the first year on the amount guaranteed.

4. Creation of a job finding agency within the United States employment service.

5 Authority for the veterans' administration to spend $500,000,000 in construction of hospital facilities to provide for the care of returned service people.

The veterans' administration will administer all the benefits.

TO SCRAP BLUE TOKENS OCT. 1

Most Canned Goods to Be Off Ration List

Washington, —The office of price administration is scrapping its 7 months old system of blue tokens for buying processed foods.

The blue tokens will go out of use Oct 1 no longer needed because most canned foods are going off the ration list.

Between Sept. 17—when all but fruit and a few other canned foods go off the rationing—and Oct. 1 shoppers will not be given blue tokens as change and they will be able to spend the processed food dicss only, in unit of 10. From that time on point values on processed foods will be in multiples of 10, There will be no change in use of red tokens for buying meats and dairy products.

Surprise Birthday Dinner For John Day Saturday Evening

Mrs. John Day and daughter-in-law, Mrs. Dorance Day, planned a surprise birthday dinner Saturday evening for John Day.

Those present were Dr. and Mrs. W. F. Missman; Mr. and Mrs. R. A. Jorgenson, Mrs. Dorance Day and son Gary, of Segunda, Cal.; Capt and Mrs. Ray Jorgenson, Jr. and daughter Judy, of Dodge City, Kansas; and Mr. and Mrs. John N. Day.

Mr. Day received some nice gifts in remembrance of the occasion.

CLOTHING FOR RUSSIA DRIVE TO BE MADE

People Donating Old Clothing Will Be Given Movie Ticket Free

Residents of Klemme and community will be asked to share their clothing with the destitute people of war-torn Russia when a campaign for the collection of clothing is launched here during the week of September 24th to 30th by the Russian War Relief under the chairmanship of the owner of the Avery Theatre. The clothing for the Russia Drive is being conducted throughout the state of Iowa under the sponsorship of the Iowa Motion Picture War Activities committee, but all local organizations, schools and churches will be called upon to assist in the campaign, according to Mr. Kirchner.

The need for all types of wearable garments, bedding and shoes is so desperate in the devastated areas recently liberated from German ocupation that the clothing gathered locally will be rushed to the Soviet Union in Russian boats at Soviet expense, even getting priority over Lend-Lease war materials Only thus will the litterally millions of people in Russia be able to survive this coming winter.

In recent months nearly 40,000,000 people in Russian territories conquered by the Red Army have been found literally stripped of their clothing and all their household possessions by the vengeance of the retreating Nazi hoardes.

"Surely we Americans who have been spared both home front hardships and military losses soley because of the Red Army's brilliant performance in this war owe, it to our valient Russian allies to share with them what we can spare out of our own abundance," Mr. Kirchner said.

While plans for the local Clothing For Russia Drive have not been completed, a free show at the Avery Theatre will be given for persons donating clothing to the drive. Full plans for the campaign will be formulated within a week.

In the meantime Klemme residents are asked to prepare for the collection of clothing by going thru wardrobes and closets and pick out every useable article you can spare, suits coats, overcoats, top coats, sweaters, capes, caps, trousers, vests jackets, dresses, skirts, blouses underwear, shoes and socks, stockings, wool and felt hats, for both adults and children. Be sure clothing is practical and in good condition Blankets and bedding are desperately needed Clothing left behind by men and women in the armed forces makes serviceable and welcome gifts. Shoes must be in good repair and tied together in pairs.

As a guide to the type of clothing acceptable for the collection, Mr Kirchner urged that people be guided by this slogan. "Give what you would expect a less fortunate relative to accept and wear"

Let's give our all to help the people who gave all they had for Victory!

ALL BRIDGES IN HANCOCK COUNTY ARE REPAIRED

All county bridges have been repaired and all roads in the county are now open, reports Co. Eng. C. F. Merten. Many bridges and culverts were either washed out or damaged by the flood during the early part of the summer and it has taken many weeks to make the repairs.

There are still some bridges to be built. Three concrete bridges have been repaired temporarily and may not be replaced with permanent structures until next year. Because all damage has not been permanently repaired no figure is available on the total damage.

THOUGHTS ON THOSE PREWAR SUMMERS

Can you remember those summers away back when the only wars raging were between baseball clubs?

When you could hear the name Adolf anywhere and not link it up with anything?

When you thought you were making a sacrifice if you shared the suntan oil with somebody else, passed up the moonlight swim or refused a second hot dog?

When an "all out" effort meant participation by the whole family in the argument with the motorcycle cop?

—*—

Those were the days!

The only "ultimatum" that disturbed you was "Pull over to the curb."

You thought a dictator was the fellow on the ferry pier who barked, "No more cars on this trip!"

Hitler was a name on a delicatessen store window.

"Total war" was an argument in Sunday traffic between the occupants of two cars, the fenders of which had just been scraped.

—*—

Ah me!

It was away back when all you worried about in summer was poison ivy, sunburn and whether you'd ever learn to dive.

The Russian front was a certain style in sable coats.

A 100 per cent American was any fellow who asked the swimming resort band to play "Yankee Doodle."

Hampering the war effort was throwing a pop bottle at a pitcher.

The headline, "Yanks Forge Ahead," meant that Babe Ruth was clouting 'em over the fence as usual.

—*—

The only way you could run short of gasoline was through a leak in the tank.

The complaint, "It's been a tough summer with me," could be voiced by anybody who had fallen out of a boat, lost a pair of oars or eaten too much stewed corn.

A disaster was thought to have occurred if one of the two spare tires had been stolen.

The "manpower problem" had something to do with getting the necessary music for a summer resort orchestra.

And the only "woman-power problem" revolved around the task of getting the dishes washed and the beds made in time to start the weekend auto trip by 12 noon sharp.

—*—

Oh, boy! Just recall 'em . . . the days when dotted lines on maps showed the best roads to vacation resorts.

The only "objective" that had to be taken was a room with cross-ventilation.

—*—

And you thought a beachhead was a bather with a hangover!

* * *

Salute

Here's to Stillwell—
Uncle Joe—
Fighter from his
Head to toe;
Soldier when the
Breaks are hot,
And even better
When they're not!

* * *

The Federal Council of Berne has ruled that Switzerland no longer shall admit bad actors to that country as a friendly haven. Swiss authorities are now empowered to forbid entry to all foreigners "who because of reprovable deeds, appear to have made themselves unworthy of asylum." At last the Swiss abandon the rather absurd view that an egg is an egg fresh, storage or rotten.

* * *

The film "Wilson" has been barred from the army. A great fuss is being made over the ruling at home, but the indignation among the fighting men is nil. "Wilson" is a swell movie, but it is not the kind the fighting men go for in a big way. For the GI's to get excited, it would have had to have Lana Turner playing Mrs. Wilson.

* * *

We see by the papers that the OPA in New York has fixed ceilings on "two eggs any style," the ham and egg sandwich, the hamburger and the ham and cheeser, but we remain a skeptic. You can't find two eggs any style on most menus, it having long been the custom to limit the dish to one egg.

—*—

And if Mr. Wooley can find a place where a hamburger sandwich is available at his ceiling levels we will crown him the Wizard of the Month.

* * *

A woman in a suburban town has been fined $100 because she fired a pistol at a house guest. If a woman can't provide more excitement than that at modern house parties she deserves to be punished.

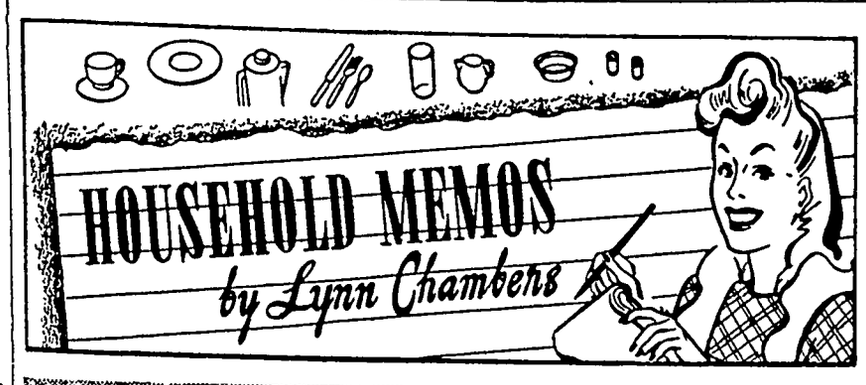
* * *

Can You Remember—

Away back when the term "butter and egg man" was used disparagingly?

* * *

We hope that America's postwar world will not include the "jet taxicab."



Families Like Meals With a Relish
(See Recipes Below)

Bit of Spice

"I've saved many a meal just by serving it with a good relish," homemakers often tell me.

This is the season to put up those small, precious jarfuls of sweetness and spice to go with meat-thrifty meals. There needn't be many if your sugar rations are low, but do fit a few of them in your canning budget and classify them as morale builders.

Pickles, chutneys, catsups, conserves and relishes add that bit of something special to the meal. They're easy to put up because the sugar, spices and vinegar in them act as preservatives.

First on the list is a tasty blueberry relish that goes with mild-flavored meats like lamb or veal.

***Blueberry Relish.**

4 cups blueberries (prepared)
7 cups sugar
½ cup vinegar
½ bottle fruit pectin

To prepare blueberries, crush thoroughly or grind 1½ quarts fully ripe, cultivated blueberries. Add ¼ to 1 teaspoon cinnamon, cloves, allspice or any desired combination of spices.

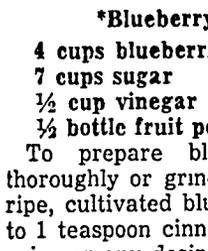
Measure sugar, prepared blueberries and vinegar into a large kettle. Mix well and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Skim; pour quickly. Paraffin hot relish at once.

Chili sauce has carried a high point value since rationing came into effect. It would be a good idea to put it up at home so as to save points for other canned food.

Chili Sauce.

1 gallon tomatoes
2 cups onions
2 cups sweet red pepper
1 pod hot red pepper
1 cup sugar
3 tablespoons salt
1 tablespoon mustard seed
1 tablespoon celery seed
3 tablespoons mixed spices
2½ cups vinegar

Skin tomatoes before chopping. Chop all vegetables before measuring. Tie mixed spices in a bag. Mix all ingredients except spice bag and vinegar. Add spice bag after mixture has boiled 30 minutes. Cook until very thick, then add vinegar and boil until there seems to be no more "free" liquid. Taste and add more seasoning, if necessary. Pour, while boiling hot, into hot, sterile jars and seal at once.



Tomato Ketchup.

1 peck tomatoes
3 sweet red peppers
1 pod hot red pepper
4 tablespoons salt
2 cups sugar
1 tablespoon celery seed
2 teaspoons mustard seed
1 tablespoon whole allspice
2 sticks cinnamon
3 cups vinegar

Lynn Says

Pickles are Crisper: If you put up your pickles this way:

1. Use a pure cider vinegar. Be sure that you get a good product, neither old nor adulterated.
2. Follow every direction, every measurement, and do every step carefully. Cucumber pickles may be made either by a long or short process, but the longer process yields a better pickle.
3. When slicing several kinds of fruit or vegetable for pickling, have all of them about the same thickness.
4. Too much spice destroys both flavor and color. Use the ingredients in tested recipes only.

Lynn Chambers' Point-Saving Menus

Stuffed Veal Roll
Creamed Potatoes
Parsleyed Carrots
*Blueberry Relish
Cantaloupe
Bread and Butter Beverage
*Recipe Given

Wash and chop tomatoes and peppers. Simmer until soft. Press through a fine sieve. Cook rapidly until reduced to about one-half. Add sugar, salt and spices (tied in bag) and boil until thick. Add vinegar about 5 minutes before removing from fire. Pour into hot, sterile jars and seal at once.

Two of the most popular types of pickles get a place in today's column. You'll like putting up both for variety's sake:

Bread and Butter Pickles.

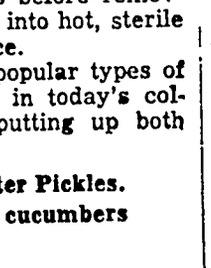
3 quarts sliced cucumbers
3 onions
½ cup salt
3 cups vinegar
1 cup water
3 cups brown sugar
1 teaspoon cinnamon
½ teaspoon ginger
2 tablespoons mustard seed
1 teaspoon turmeric
½ tablespoon celery seed
1 pod hot red pepper
1 piece horseradish

Mix cucumbers, onions (sliced) and salt. Let stand 5 hours. Drain. Boil vinegar, water, salt, sugar and seasonings 3 minutes. Add cucumbers and onions and simmer 10 to 20 minutes. Do not boil. Pack into hot, sterile jars and seal at once.

Dill Pickles.

35 to 40 fresh cucumbers
2 tablespoons mixed spices
½ pound dill
2 cups salt
2 gallons water
2 cups vinegar

Wash and dry cucumbers. Put a layer of dill and ½ of the spices in a stone jar. Add the cucumbers. Put the remaining spices and dill on top of the cucumbers. Boil salt, water and vinegar 2 minutes. Cool to room temperature and pour over cucumbers. Cover with a plate weighted down to hold the cucumbers in the brine. Keep at an even temperature (80 to 85 degrees). Remove skum each day. The pickles are ready for canning when they are crisp, uniform in color and well-flavored with dill. This usually requires 2 to 4 weeks. Pack the cured pickles into hot jars, cover with hot brine and seal at once. If the pickles are to be stored a long time, process them in water bath for 15 minutes at a simmering temperature.



If you like fruity pickles, you'll like this one:

Peach Pickles.

1 gallon peaches
7 cups sugar
1 piece ginger root
2 sticks cinnamon
1 tablespoon whole allspice
1 teaspoon whole cloves
2 cups water
3 cups vinegar

Clingstone peaches are best for pickling, although freestones may be used. Pare hard-ripe fruit. Leave whole. Boil 3-cups sugar, the spices (tied in a bag) and vinegar for 3 minutes. Add 10 to 12 peaches at a time. Simmer until they are tender. Let stand in syrup 12 to 24 hours. Pack peaches into hot jars. Add remaining sugar to syrup and cook to desired thickness. Pour over peaches. Process 5 minutes in hot water bath.

Greatest Ballyhoo

The greatest build-up ever given a movie actress before she appeared on the screen was the ballyhoo about Jane Russell.

Between November, 1940, and February, 1943, during the production of her first and only picture, The Outlaw, the lady was publicized by some 65 magazine articles and 50,000 photographs.

Hunting, 'Milking' Rattlers Is Good Business in Texas

Many people in Texas make a good living by hunting rattle snakes. The war is greatly extending the market for rattlesnake venom.

When the "rattlers" are caught they are sent to medical laboratories, where they are "milked" once a fortnight of a few drops of their poison. Usually they die after six weeks because their mouths are easily damaged.

The venom is used for treating various disorders, and excessive bleeding, as well as being an antidote for snakebite.

One oil-field worker has caught 3,000 rattlesnakes in a season.

EDITORIAL COMMENT

BACK TO THE FARM

A suggestion of some of our social workers and statesmen is that after the war is over millions of returned soldiers and unemployed civilian war workers can be settled on our farms, to take care of them and give them a livelihood

This suggestion is all right so far as it goes if it doesn't attempt to go too far There are many thousands of men from our farms and villages in the armed services, and in war work too. There is no question that these boys at the front, most of them at least, will be anxious to get back to the farm They are acquainted with farm life and the great majority of them have an affection for it These boys, and civilians from the rural areas, who get out of war jobs, may well go back to the farm and every effort cught to be made to help find a place for them.

But to put on the farms men and boys who know nothing about farm life and have no especial love for it would be a social and economic mistake. Most of them would be dissatisfied with their surroundings, especially if they found it difficult to make a living.

Some people have the idea that anybody can make money on the farm. This erroneous belief is as common as the one held by a great many inexperienced men that they could run a newspaper better than the editor. As a matter of fact it requires as much training and experience to become a good farmer as it does to graduate as a skilled mechanic Putting inexperienced men and boys on the farm, therefore just to find a place for them, would certainly be an error.

Of course we want to strengthen our farming industry. But this can only be done by those who know the soil and love it. The farm and the rural community form the bulwark of American traditin. We want to keep them that way. It would be fine to find a place on the farm for every experienced boy and man who has a love for the soil and wants to be there. And of course we will look with approval on the ambition of any man to become a farmer if he he has a real desire for it. The more small farms and the fewer huge tracts of land owned by one man or by a corporation the better. But we want to see to it that we do not try to make a settlement house out of American agriculture.

AN AGINNER

Everybody knows what an aginner is. He is somebody who is again. Agin what? Well, most anything, but just agin. We feel like an aginner today, and what we are agin is government.

This country needs a good nickel cigar again, it needs some cigarettes too, it needs a lot of things, but there is one thing it doesn't need, and that is more government. Russia tried the business of giving the government control over everything, and we hear it on the authority of Mr. Wallace, who is and should be a great authority on communism, that it hasn't worked too well, and Russia is switching over.

Mr. Wallace says the American system hasn't worked too well either, and we are tending toward the Russian system. We disagree with his first statement and agree with his last. The process started back in about 1930 and Mr. Roosevelt, who said he would stop it, has in his lust for power reached out for more and more authority until he has this nation just about as communistic as it could be.

We are communistic in everything but names and legal formalities. We don't call it communism, and Uncle Sam doesn't actually own the land and factories. But Uncle Sam tells everybody what to do with the land and the property they own, and don't think the war caused all of it. A greedy bunch of politicians did it, and they have bigger and better plans for after the war.

Our only faith is in the states which, like Iowa, have turned to electing honest men to office, men who could not be touched with a grafter's dollar if they starved for refusing it. We are electing that kind of men in this state, and if enough others will join us, we will oust from Washington the outfits who like gravy so well they make it every day—yes, even though they claim to give it all to charity, as does one near-official money maker claim. We haven't yet forgotten the crack of a democratic senator from Iowa, who, when his palm was crossed with $1,000 for endorsing a cigar he never smoked, very calmly commented, "my favorite charity is myself"

DOLLARS LIKE DIMES

It is small wonder that dollars look like dimes to the younger generations. Franklin D Roosevelt, in eleven years, has spent 370 billion dollors. He has run the cumulative government debt up to 258 billions. The total expenditures of 31 presidents before Roosevelt covering a total of 144 and one-half years was 112 billion. The time covered by the 31 presidents included many wars—all of Indian wars, War of 1812, Mexican War, Civil War, Spanish-American War, and World War I. The abundant life and waste and extravagance of the Roosevelt regime have in eleven years put a burden onto the unborn children of America that in the day to come will eclipse even the spending of his period as president notwithstanding its incomprehensible proportions If America is to remain the America of its founders, there must be a change.

THE COMMUNITY

A good and great community is not made by its art, business, agriculture, science, and government etc. These are the results: The root of a great community are these fundamental traits — good will neighborliness, open - mindedness courage, fair play and honesty patience, tolerance, cooperation and above all a spiritual consciousness for ourselves and the other fellow A community rich in these qualities need not be concerned in developing people of great science, agriculture, industry, churches, homes government and art; these will develop by themselves a great people. If these qualities are not respected, no matter how wealthy a community, how brilliant the learning and polished the culture—that community will crumble.—Publisher's Auxiliary.

IOWA BIRTHS 100 A MONTH UNDER 1943

Des Moines, —Iowa births are running about 100 a month below last year, the state department of health reported Thursday. It attributed the decline to the separation of families due to the war Loren E. Chancellor, vital statistics director for the department, said the number of births during the first seven months totaled 25,734, a decrease of 701 compared with the like period of 1943. This is the second consecutive year the number of births are below the previous year.

OLDEST SETTLER

William Elerding of Eldora was the oldest person attending the recent Old Settlers meeting in Eldora. He recorded his age at 95, and said he came to Pleasant township in Hardin county in 1854.

ESSENTIAL
to the life and growth of America

Its vital root-system reaching deep into the earth, a great tree receives the nourishment essential to maintain life and sturdy growth.

So too does the American way of life depend upon the huge network of railroads which developed the resources of the nation, moving on through great agricultural and industrial areas, carrying the essentials of America's life and growth.

Of this network, 8,000 miles are the ROCK ISLAND LINES. Here are 8,000 miles of well-kept steel highways which draw from the resources of 14 middle-western states. ROCK ISLAND helped to bring growth and success to that vital area, at the same time serving the entire nation through interchange of traffic to all points.

Essential in the early building of our nation—vital today in moving steady streams of war supplies—ROCK ISLAND LINES will have a big job to do in the future, too.

When America's chief concern is the building of the peace, ROCK ISLAND'S responsibility will be the moving of the essentials to another period of American prosperity.

As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation.

Around Iowa

RIVER OF LOTUS

Excursionists on Mississippi river boats at McGregor and travelers on the highway bridge at Lansing in the past several weeks have been treated to a sight of what was perhaps the greatest display of golden lotus in bloom ever seen in northeastern Iowa. At Lansing, the lily beds were a half-mile long on the north side of the dikes that extend across the sloughs and islands to the Wisconsin shore.

THE SOUP EXPLODED

Not all explosives are on the war fronts, it seems At Clarinda, Mrs. Arlo Hawley was knocked unconscious and severely cut on the back by flying glass, and the windows of the Hawkey kitchen broken, when eight cans of tomato soup which she had just removed from the stove, exploded When she regained consciousness she found herself under the sink, and the kitchen a mess of tomato juice

CHICKEN DE LUXE

It was left to Capt Stanley E Prall of Indianola, now stationed in England, to show the British how to cook and enjoy a meal known in this country as fried chicken, but to the British family with whom he was staying an unheard of dish. It took a month to obtain the bird. Capt. Prall not only fried the chicken himself, but served it, as well, to the English family, who was his host.

SHOE LEFT UNLACED

Somewhere in France, Capt. Loren Herway of Warren county, Iowa, had just stopped to tie his shoe lace, when he was astonished to hear a cry of "Kammerad!" behind him He whirled upright to take prisoner an oversized German soldier The Hun had left his foxhole to surrender. Herway's outfit was greatly surprised to see the captain returning with a captive twice his size.

AUSTRALIAN BRIDES

John W Slagle, Seaman second class, an armed guard on the ship which recently brought 500 Australian war brides to this country to await the return of their American husbands from the Pacific theater of action, was a visitor on leave at his home in Algona, several weeks ago

REUNION IN ROME

A number of Page county boys in service in the Italian campaign held a reunion in Rome recently The group included Robert Richardson and Marshall Dragee of Blanchard, Maj Harvey Carruthers, Lieutenants Harvey Ramsey and Ben Tomlinson of Clarinda, and Lieut Cannon of Shenandoah

SEEK ABANDONMENT

Claiming that it is losing approximately $100,000 a year operating its branch line between Osceola and Des Moines, the Burlington railroad has asked the commerce commission to abandon the line which connects the towns of Osceola, Norwalk, Prole, Martinsdale, Wick, Truro Jamison and New Virginia

INSPECT HOME CHIMNEY BEFORE STARTING FIRE

Homemakers should make a careful inspection of house chimneys before it becomes necessary to fire up furances or heating stoves for winter. A trip to the attic to inspect the chimney just underneath the roof line may prevent many fire losses. Most defects in chimneys show up at the roof line because of the unequal expansion which results due to the defference in climatic conditions in the attic and outside the huose.

Harold Beaty, extension agricultural engineer, says many fires in owa are caused by defective flues. New chimneys should have flue liners built in.

Every chimney should be so built that it can expand and contract completely independent of the rest of the house. Any wooden parts should be separated from the inside of the chimney by at least 4 inches of brick or other masonry.

Asbestos flue stops — not sheet metal—should be used to close any unused openings in the chimney. Sheet metal becomes hot, corrodes and may set wallpaper on fire.

Many chimney fires result from soot collecting in the inside of the chimney This is due to careless firing of the furnace Sparks from a chimney blaze could set the roof of the house on fire.

Connections between the furnace or stove and chimney also should be checked to see that they are direct and tight.

The equator is about 24,902 miles long

CORN FODDER IS GOOD FEEDING - VALUE SAVER

Corn fodder runs a close second to silage as a means of saving the greatest amount of feeding value should some of Iowa's late-planted corn lose the race with the weather and fail to mature.

Immature corn contains less feeding value in the ears and more in stalks and leaves. In order to salvage the maximum feeding value, it is necessary to save the stalks and leaves. E. S. Dyas, extension agronomist at Iowa State College, says this is the main reason why corn fodder should be cut before a freeze kills the leaves. Leaves killed by frost soon become brittle and drop off.

In order to save the leaves, immature corn should be cut and shocked in small loose bundles so the air will cure the fodder without spoilage. Extreme care must be used, if fodder is to be stacked, shredded or stored inside, that the moisture content is low enough or the weather cold enough so that it does not heat and spoil.

76% of FOOD STORES COMPLY FULLY WITH OPA

Des Moines, —Seventy-six per cent of 2,306 food stores in the Des Moines office of price administration district were found to be complying fully with OPA regulations during the August survey, it was announced Thursday by Walter D. Kline, OPA director. One fourth of all violations were in price ceilings. The other violations involved errors in posting store group signs, price lists, price and grade tags.

A grey mare up for auction in an Albia horse sale, not liking the way the bidding was going, laced out and kicked the auctioneer, H. E. Peterson on the right knee causing a painful bruise.

Albertson, Manager. Klemme, Iowa

BETTER IOWA GARDENS

The ordinary house basement furnace room is not satisfactory for storing most vegetables. It is too dry warm to store potatoes cabbage and other leafy vegetables and root crops There are three kinds of vegetables, however, that require storage conditions offered by the ordinary house basement room They are squashes, pumpkins and sweet potatoes.

* * *

The potato is stored more commonly and in larger quantities than any other vegetable. Carrots, onions, cabbage (including Chinese cabbage), parsnips, beets, turnips and other root crops are stored in relatively small quantities It is possible to store all these vegetables in a basement room providing the room has at least one window in it and is insulated from the furnace room If the heating system has been changed over from coal to gas or oil, the coal room can be converted to a satisfactory vegetable and fruit storage by nailing balsam wool batting on the walls exposed to the furnace room and on the ceiling If the basement has no small room, one can be constructed in a corner where there is a window Insulation type of building concrete blocks may be used Then balsam wool will be needed only on the ceiling and door

* * *

Concrete building blocks and wide boards can be used to make shelf space for the vegetables and fruit cellar in a very short time Several blocks placed along the wall to support the first board will make the first shelf A block placed at each end of the first shelf will give support for the second shelf and so on. More produce can be stored conveniently if shelves are used and by storing high on shelves a relatively small storage room is sufficient for the average family

* * *

Everything should be in readiness for storing garden vegetables beforehand Containers of various sorts should be collected in preparation for storage this fall. Carrots, parsnips and other root crops that shrivel easily should be stored in lined baskets with lids or in covered crocks. Do not store such vegetables in the open air.

* * *

Edible soybean pods all mature at about the same time Instead of stripping the beans from the plants in the garden, gardeners can pull the plants instead, pile them by an easy chair and be comfortable while stripping the pods from the plant. Most gardeners plant too many soybeans. In such cases, allow excess beans to mature on the plant for dry beans for storage this winter. Soybean seed may be stored without fear of the bean weevil.

WEEKLY NEWS ANALYSIS

Nazi Armies Fall Back in France; Hitler's Hold on Balkans Shaken; Lend-Lease Totals 28 Billion

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Carried on ox-carts, wounded Allied soldiers arrive at Myitkyina airstrip, Burma, for transfer to hospital plane.

EUROPE:
Nazis Pull Back

As fast-moving Allied forces pushed the Nazis back throughout all of France, German spokesmen hinted that Hitler's high command planned a withdrawal to the Reich frontier so as to concentrate the greatest number of men on a short line.

But even as the Nazis fell back, swift armored thrusts by the U. S., British and French continued to slash at the harassed enemy's flanks and threaten his encirclement from the rear, and clouds of Allied planes roared over the battle-lines to dip low and gun the retreating German columns.

With the bulk of their forces crowded in the area immediately north and south of Paris, the Germans put up their stiffest rearguard resistance in this region. In southern France, Lieut. Gen. Alexander M. Patch's Seventh army fanned out quickly in all directions, with only scattered bands of enemy troops standing up briefly to slow the Allied drive.

After capture of the great French Mediterranean port of Marseille, American engineers went to work quickly to restore facilities damaged by the Germans and enable the Allies to funnel supplies quickly to their armies in the south. Use of Marseille's installations would relieve the troublesome practice of landing supplies on the sandy beaches in shallow-draft craft.

Armistice arrangements for the German evacuation of Paris having fallen through, Free French armored columns were compelled to fight through a screen of Nazi defenders to liberate the city, with heavy U. S. howitzers backing up Gen. Charles de Gaulle's troops, and helping to break enemy resistance. Occupation of Paris with its 3,000,000 people in need of food and fuel for utilities, posed a supply problem for the Allies.

Turbulent Balkans

With formation of a peace government in Rumania, Adolf Hitler's unsteady grip on the turbulent Balkans grew unsteadier, with Rumania's defection threatening to topple Germany's whole southeastern front.

As young King Michael announced his country's willingness to accept Allied peace terms, Russia called for Rumania's expulsion of German troops from her homeland, or a war against Hungary to clear the latter from Transylvania, as the price of armistice terms.

Even as Rumania acted to quit Germany, Bulgarian peace proposals reportedly were forwarded to the Allies, who were said to have insisted upon the Bulgars' withdrawal from all occupied Grecian and Yugoslav territory as one of the armistice terms.

To prevent any peace factions from obtaining a grip in Hungary, the Nazi-inspired regime dissolved all political parties, including the conservative elements.

Russ Pressure

Figuring in the Balkan countries' swing toward the Allied camp was the Russians' power-house drive bearing down from northern Rumania.

As the Reds hurled their might at the enemy lines, they bored down on the Galati Gap between the Transylvanian Alps and Black sea, barring the way to the heart of Rumania and the Ploesti oil fields. From this region, there was short going before the Reds would reach the Bulgarian frontier.

POSTWAR PEACE:
Powers Confer

Meeting in the quaint, old Dumbarton Oaks estate in Washington, D. C., representatives of the U. S., Britain and Russia began momentous conferences on preserving postwar peace, with emphasis on the need of force as an ultimate resource. China was to join the conference after the Reds had finished their talks, since Russia is not at war with the Japanese and is unwilling to discuss repressive measures against them.

John F. Dulles

Accepting the invitation of Secretary of State Cordell Hull to discuss postwar peace plans, Gov. Thomas E. Dewey sent John Foster Dulles, his advisor on foreign affairs, to the capital to consult on the conferences. Hull issued his invitation after Dewey expressed concern that the major powers might overlook the interests of the smaller nations.

Although the conferees were said to agree on the principle of employing force to suppress future aggression, plans under discussion called for the use of force only after measures for peaceful settlement had failed.

ANTI-TRUST:
Railroads Named

Charging maintenance of noncompetitive rates, prevention of improvements and facilities of western lines, and suppressing development of other forms of transportation, the government filed an antitrust suit against the Association of American railroads; the Western Association of Railway Executives; 47 railroads; and the investment houses of J. P. Morgan and Company and Kuhn, Loeb and Company.

Focusing its attention on western rail operations, the government declared that establishment of higher rates in that territory than in the east placed it at a competitive disadvantage, retarding its economic growth. The government also claimed that movement of perishable commodities has been delayed by unwillingness to speed up schedules, and efforts have been made to stunt the development of truck and water transport.

In naming J. P. Morgan and Company and Kuhn, Loeb and Company in the suit, the government charged that they controlled major railroad financing and possessed substantial industrial interests in the East.

LEND-LEASE:
Aid Mounts

Declaring that continuation of lend-lease was essential for speedy victory until both Germany and Japan were brought to their knees, President Roosevelt revealed that the U. S. share of such assistance approximated 28 billion dollars up to July 1, while other countries contributed in excess of 3 billion.

Of the 28 billion dollars, Britain received over 9 billion; Australia and New Zealand, 1 billion; Africa, the Middle East and Mediterranean, 3 billion; Russia, almost 6 billion; China and India, 1½ billion, and Latin America, 172 million.

As an indication of the gigantic contribution U. S. industry has made to the war, figures showed that this country lend-leased 11,000 planes and 300,000 trucks and other vehicles to Russia; 6,000 planes and 9,900 tanks to Great Britain, and 4,800 planes, 51,100 tanks and 73,000 trucks and other vehicles to the Mediterranean area.

AGRICULTURE:
Seek to Avoid Glut

Looking forward into the postwar world with all of its economic problems, the War Food administration has sought to develop a procedure designed to avoid the accumulation of vast stores of surplus foods which might constitute a market threat when hostilities cease.

Under WFA plans, the agency now buys food only for foreseeable demands, and declares that any commodities required for relief in liberated countries will first be withdrawn from surplus army and lend-lease stocks before purchases are made in the domestic market.

In establishing a surplus sales division, which is to sell current food stocks when demand is high to make room for fresh supplies, the WFA has set up machinery for future disposals.

World Plans

Drawn up with the avowed ambition of improving the efficiency of farm production and distribution, and bettering the economic conditions of rural populations, plans for a permanent international agricultural organization have been submitted for approval to the 44 United Nations by their food conference committees.

To act in an advisory capacity only, the proposed organization would consist of a governing body in which each nation would be represented, with efforts directed toward promoting research, spreading information and offering recommendations.

Other objectives of the plan include the elevation of nutritional standards throughout the world, and the development of agriculture as a contribution to an overall economic expansion.

PACIFIC:
Bombers Active

With thousands of Japanese troops stranded on the enemy's string of outer defense islands from the Solomons down to New Guinea, Gen. Douglas MacArthur's air command concentrated on the bombardment of shipping lanes through which supplies might seep to bolster the sagging garrisons.

At the same time, Adm. Chester Nimitz revealed that navy planes continued their attack upon the strategic Bonin islands, which lie approximately 600 miles from the Japanese mainland and just above the U. S. occupied Marianas, in an effort to soften up these stepping stones to Tokyo.

In pressing their bombardments, General MacArthur's airmen ranged over Mindanao, important basing point for enemy shipping in the southern Philippines.

Fatherly Marines

Having been removed from hillside dugout on Tinian island in the Pacific, these native children were scrubbed clean by battle-hardened but fatherly U. S. marines, then outfitted with new clothes and sent to rear areas.

WAGES:
AFL Wants Boost

Declaring that the President possessed the power to raise wages, and that the stabilization act calling for a balance in the nation's economy afforded him the grounds for such a move, the executive council of the American Federation of Labor asked for abandonment of the "Little Steel" formula, limiting pay increases to 15 per cent of the January, 1941, level.

At the same time, the council chartered the International Office Workers union, which would embrace a vast number of white-collar employees, who, as a class, have felt the squeeze of rising living costs more than any other group, since most wage increases have been enjoyed in the heavier war-boomed industries.

In appealing for higher wages, AFL President William Green declared: "The working men and women of this nation have been made to suffer from a maladjustment that exists between wages and cost of living. This maladjustment has broken and depressed their peacetime standards of living. . . ."

U. S. LAND

More than 34 million acres have been acquired by the federal government for war purposes, exclusive of land taken over by the Defense plant corporation, according to Senator O'Mahoney of Wyoming.

The war and navy departments have stated that 6,750,000 acres of their holdings are surplus for postwar purposes. Of this, 1,576,000 acres are tentatively classified as good agricultural land, 2,197,000 acres as grazing land, and 2,107,000 as forest tracts.

HIGHLIGHTS . . . *in the week's news*

USE OF AUTOS: A recent survey discloses that 74 per cent of car owners are driving their autos less than half the peacetime mileage. This reduction has come about through shorter and fewer trips rather than the laying up of cars for the duration. Gasoline and tire rationing have combined with patriotic motives to lessen car use, the survey continued.

TRAP SHOOTING: Capt. Joseph Hiestand of Hillsboro, Ohio, has once again won the North American clay target championship in the 45th Grand American Trapshooting tournament held at Vandalia, Ohio. This is the fourth time he has captured the award, the previous occasions being in 1935, '36, and '38. He broke 200 straight targets to lead the field of entrants

The Washington MERRY-GO-ROUND

By DREW PEARSON

Washington, D. C.

PRESIDENT AND WILLKIE

Only insiders know it, but after the President held his press conference denying he had sent a letter to Wendell Willkie, Judge Sam Rosenman and Steve Early rushed up to his desk and remonstrated that he had made a bad mistake. They were afraid FDR had rebuffed the man who had gone down the line for him 100 per cent on taxes, foreign policy and the war.

"They caught me a little unprepared on that one," the President admitted ruefully. "However, I tried to tell them it was a personal question. I didn't want to embarrass Willkie by letting people think he and I had a political deal."

Later, the President repeated to some of his cabinet that he hadn't expected the question at his news conference. Explaining that he wanted to talk to Willkie about postwar peace plans and foreign policy, not politics, he indicated that he would go ahead with his plans for the talk regardless of what had happened.

The President was quite irked that news about his letter to the former Presidential candidate had leaked out. Only a few people knew the letter existed. The carbon copy was not filed with his regular correspondence, and the first draft of the letter had been written in his own handwriting for Grace Tully, his secretary, to copy.

Despite this, Willkie began to get queries about the letter two weeks after he received it. The news men making the inquiries cited White House sources, said they had the tip from Presidential secretaries. Willkie made no comment, never admitted receiving the letter, but he got the impression that the White House wanted the story out.

Therefore, you could have knocked him over with a feather when the President replied to news men last week that he didn't know anything about writing Willkie a letter.

Immediately after the White House denial appeared in the press, Willkie's phone began buzzing with Republican friends warning him that Roosevelt would always kick him in the teeth. They urged him to come out for Dewey.

ARMY DEMOBILIZATION PLAN

Here is the inside story on White House-war department plans for demobilizing part of the army after the defeat of Germany. The war department is planning to release about 2,000,000 men immediately after a German armistice.

Under this plan, the army will set up a point system for every man in the service, and men with sufficient points will be retired. Here is how the points will be calculated:

1. For each month in the service, every man will receive one point.

2. Each month overseas will count an additional point.

3. For each battle honor, a man will receive four points.

4. The congressional medal of honor or legion of merit will count four additional points.

5. Each bronze star denoting service in battle will count four additional points.

6. For every child, a soldier will receive eight points.

7. Married men without children will also receive eight extra points.

There are still several important gaps in this program which the army and the White House have not yet filled in. There still is no special credit for age. However, it is already decided that, because the army will have a greater need for air men in the Pacific, a separate system will be set up for discharging air corps veterans. Of course, the basic point which everybody wants to know is: "How many points will a man need to get out?" That has not yet been determined.

It has been determined, however, that at the end of the Atlantic war, the navy does not plan to release any of its men.

It can also be revealed that President Roosevelt is anxious to discharge hardship cases first.

When the President discussed this plan recently with several senators, they asked him how he planned to handle the problem of policing Germany and other occupied enemy territory after the armistice. He replied that he hoped to do so by using men who have learned to like the army, plus professional soldiers who were in the army before the selective service program got under way. He also plans to use men who have had no overseas experience and want to volunteer for it now.

Lady, Learn to Cook or Your GI Will Go Home to The Army!

By Captain Ben Irvin Butler

(Founder and President of the Society of Amateur Chefs.)

"Sitting by the roadside on a Summer day
"Chatting with my mess-mates, passing time away—
"Singing in the shadows underneath the trees;
"Goodness — how de-li-ci-ous — eating GOOBER PEAS!"

That's an old Civil war song. And it goes to show that in all wars uppermost in the soldier's mind is food. I should spell that word with capitals—FOOD.

Zora Layman, the radio and recording artist, sang "Eating Goober Peas" the other night at a cocktail party. I don't know whether it was her singing or what, but Zora Layman's song practically started a riot. I was the center of it all.

The women at the party began asking me questions. They wanted to know all about Army food. And believe me, I told 'em! I told them both as an ex-Air Corps captain and as the founder of the Society of Amateur Chefs, an exclusive New York club composed of famous men who make a hobby of cooking.

First of all, I explained about this business of KP.

The movies and fiction have painted kaypee mostly as a business of peeling potatoes and cleaning garbage cans. But that's a lot of nonsense. Many soldiers try to get on KP. And why not—the kitchen is one of the warmest spots around the camp in the Winter time. The duties are easy enough. And there's always the pick of a well-stocked larder from which to select one's food. I'm not kidding. Instead of being a punishment job handed out by the army to recalcitrants, kaypee is one detail GI Joe doesn't mind.

According to Bill Rhode, who is one of the editors of Gourmet, many of their fan letters come from soldiers and sailors. I had lunch with Bill the other day and he told me how many requests for epicurean recipes there had been from men in the various services. That very day, he'd received a letter from an Admiral asking how to smoke herring.

The slogan, "the best fed Army in the world," has been tossed around a great deal. People don't any longer grasp entirely what it means.

The Army kitchen is no harum-scarum affair. In many instances it is an electrical job, spick-and-span, offering an open invitation to good cookery. It has everything in the way of equipment and, believe me, the medical officers see to it that it is as sanitary as a kitchen can possibly be made. No foolin'—you can just about see your face in the bottom of an Army garbage can.

Thousands of Army lads have been carefully trained in cooking, butchering and baking and most of them have become good cooks. Some, at least, have become efficient cooks, although perhaps uninspired. And then, of course, some will never learn. Hence the discrepancy between reports from various camps and units. Some men will rave about the food they enjoyed in their outfit. Others will keep on yearning for Mother's beef stew and apple pie. But, take it from me, very few are telling their pals what a wonderful cook the girl is they left behind.

And there's something else I told the ladies at the cocktail party to ponder over.

Though the Army food wins no squawks, the GIs occasionally yearn for the finer things of life. For instance, a nephew of mine, John Piper, who is an Army pilot somewhere in the South Pacific, upon learning that I was back in New York, wrote to me for a recipe for Wild Duck a la Press. My old mess sergeant, now stationed in a southern climate, inquired as to how to make a tart lime marmalade.

Another inquiry came to me from a service man far away—I'll let you guess — asking how to make "Tuiles." These are thin wafers that accompany curry when the latter is served in the elegant manner.

An officer connected with the Army's dietary service told me that he'd had an inquiry from a mess sergeant asking how to make wine out of berries—a reasonable enough request—only the Army doesn't give out with answers to such questions.

They Know Now All Food Doesn't Come Out of Cans!

With repeal came the renaissance of American gastronomy. Slowly, an interest in good food returned. But with the War, millions of boys are learning and discovering that all food does not come out of tin cans. And this interest is growing by leaps and bounds. In camps, soldiers have eaten freshly baked bread and the old "cotton wadding" type of bread from the corner grocery store won't have much appeal to these boys in the future.

SNAPPY FACTS ABOUT RUBBER

Normally there are 20 per cent more tire failures during the summer months than others. Tests have shown that at a temperature of 90 degrees tires wear out twice as fast as at 60 degrees and that at 100 degrees they wear out four times as fast as at 60 degrees.

Even with production being restored at Far East rubber plantations and our synthetic plants working at peak, authorities believe there will be a tight rubber situation for some time following the end of the war.

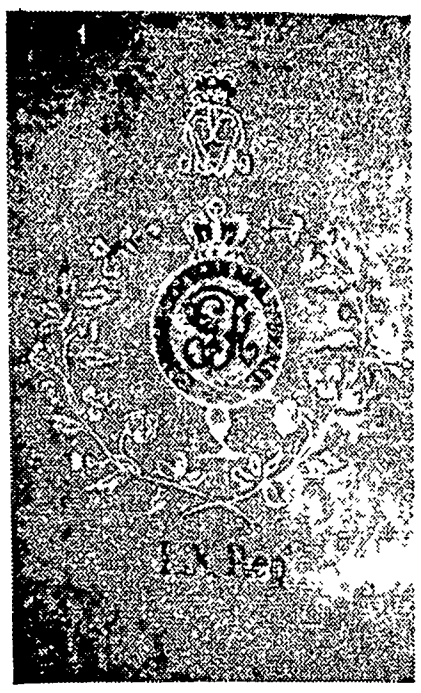
is crisis the Swiss adventurer lled upon to save the day— rching to the relief of Fort It is no overstatement to call pedition a "forlorn hope," n he arrived at Carlisle late e, he found there neither ade- stores nor transport which he dered — only panic-stricken es from the west. He had a of little more than 500 men, ed of a detachment of his



Colors of the 60th Royal Americans in the Chapel of Saint Cornelius the Centurion, Governors Island, New York.

own regiment, the 60th Royal Americans, and portions of two regiments, the 42nd Highlanders (the famous "Black Watch") and the 77th (Montgomery's) Highlanders, which had recently been invalided home from the West Indies.

With this "army" Bouquet reached Fort Bedford, the first leg of his 200-mile journey, on July 25. There a force of experienced rangers joined him and they proved invaluable as an advance guard against ambush. By August 5 he was nearing his goal. About noon of that day, after a forced march of 17 miles through the hot forests, he reached a place called Edge Hill, 25 miles from Fort Pitt. Suddenly there were rifle shots ahead and screaming warwhoops. The Indians had attacked his advance guard.

The two light infantry companies of the "Black Watch" went to their support and scattered the Indians. But they came swarming back immediately and within a short time his little army was surrounded and fighting for their lives behind a hastily constructed defense on top of the hill. By nightfall Bouquet's losses, in killed and wounded, were more than 60 officers and men.

A Desperate Situation.

It was probably as desperate a situation as any military commander had ever faced. In the dark forest around him swarmed a force of savages three or four times the size of his. Flushed with their recent successes in capturing the British posts and remembering how they had overwhelmed Braddock who had more than three times as many soldiers as did Bouquet, the Indians were confident of another great victory. Outside the little circle of piled-up supplies, which formed the walls of his "fort," lay the bodies of 25 soldiers, killed in the fighting that afternoon. Inside there was suffering from undressed wounds and heat and thirst. For there was little water to be had—except for a few precious mouthfuls, brought in the hats of some of the rangers who risked their lives to creep down to a spring nearby to get it.

The hot dawn of August 6, 1763, brought a renewal of the Indian attack. Slowly but surely their plunging fire cut down the number of defenders on the hill. At last, Bouquet, seeing that destruction of his command was inevitable if this unequal kind of fighting continued, resolved to attempt one risky maneuver and wager everything on one desperate chance. If he could get the enemy out into the open long enough to give his Highlanders an opportunity for a bayonet charge, one such decisive stroke might end the affair.

Explaining clearly to his men what he wanted them to do, so there would be no mistake and no confusion when the crisis came, Bouquet ordered the two companies of Highlanders to withdraw suddenly from the line, retreat rapidly across the hill until they reached a little ravine which ran along one side of the eminence. They were then to advance down this ravine and be ready to attack from it when necessary. Meanwhile the Royal Americans were to extend their line across the hill to replace the Highlanders.

As the kilted Scotsmen withdrew, the Indians, seeing this maneuver and believing it to be the beginning of a retreat, came screeching out from their hiding places like a pack of famished wolves. Charging out into the open they struck the thin and weakened line of the Royal Americans which began to waver under the force of the savage onset. For a moment the issue hung in the balance with disaster just a hairsbreadth away. Then—the Royal Americans stiffened their resistance—just long enough. Out of the ravine came charging the Highlanders who poured a volley at point-blank range into the flank of the red mob.

The Finishing Touch.

Although greatly surprised, the Indians faced about and returned the fire. But before they could reload, the Highlanders were bearing down upon them with their bayonetted guns and the red men realized that they were trapped. Then Bouquet put the finishing touch upon his daring maneuver.

Once more taking a desperate chance, he again broke his line and threw two companies out of the circle on the other flank of the enemy. The flying Indians, retreating before the grim-faced Highlanders, ran squarely into the Royal Americans and withered away before the volley which swept their line. A few moments later the savages had fled, leaving Bouquet and his men in full possession of the field.

It had been a dearly bought victory. Fifty of his men had been killed, 60 wounded and five were missing, a total casualty list of 115, nearly a fourth of his entire force. But Bouquet had saved his army, Fort Pitt and Pennsylvania. It took him four long days to march the remaining 25 miles to Fort Pitt. But the Indians had had enough. They had suffered a loss of more than 60 killed and many more wounded. There was little opposition to his advance and when he reached that outpost and raised the siege, it sounded the death knell to the high hopes of the great Pontiac. Within a year the Ottawa's confederation of tribes had collapsed and the last threat to English occupation of North America was ended.

The next year Bouquet scored an equally brilliant success in an expedition into the heart of the Indian country beyond the Ohio. With two Pennsylvania battalions he cut a road into the wilderness of the Muskingum valley. There he summoned the Indians to a council to demand, not merely ask, that they cease their raids upon the English settlements. Moreover, he demanded and secured the release of more than 300 white captives who were restored to their families.

Bouquet's brilliant campaigning brought him the thanks of the King and the colonial assemblies of Virginia and Pennsylvania. He was promoted to brigadier-general but he did not live long to enjoy his honors. He died of the yellow fever at Fort St. George (Pensacola, Fla.) in 1766.

The great commander of the 60th Royal Americans might die, but the regiment lived on. After Bouquet's death, British troops in the South were commanded by Augustine Prevost, another Swiss adventurer who had become lieutenant colonel in command of the 60th in 1761. During the Revolution the regiment was in the expedition led by Prevost which marched north to the conquest of Georgia and the first battalion took part in the successful defense of Savannah in 1779, against a combined French and American force.

In the Revolution.

Parts of the regiment fought with Lord Rawdon at Hobkirk's Hill and were with Lord Cornwallis at the Battle of Guildford Court House. It was also with that luckless commander when he laid down his arms and surrendered to Washington at Yorktown in 1781. But whatever enmities, growing out of the Revolution, there may have been between Briton and American they have long since been forgotten.

Today there hangs in the Chapel of Saint Cornelius the Centurion on Governors island, New York, the colors of the 60th Royal Americans (pictured above). They were presented to the chapel in 1921 by Field Marshal Lord Grenfell on behalf of the officers and men of the King's Royal Rifle corps, lineal descendant of the 60th Royal Americans. At that time they were the symbol of a tradition shared by the British army and the American army—the tradition of Britons and Americans fighting and dying side by side while fighting a savage foe in the forests of western Pennsylvania one hot August day back in 1763. Today those colors are a symbol of the same tradition—the tradition of Britons and Americans fighting and dying side by side in Tunisia, in Italy and in France.

ne American Revolution Might Have Ended Differently If . . .'

quet was the most brilliant of light infantry that the and Indian War produced. survived until the Revolu- Bouquet would—is the reason- urmise—against his erstwhile officers and friends in the Col- have pitted his battalions with thless efficiency of the pro- al soldier." — E. Douglas in a talk before WESTERN- n, Chicago, July, 1944.

eems a heartless thing to say, but the bullet that struck down Wolfe on the Plains of Abraham, and the fever that carried Bouquet away at Pensacola, did good service to the country destined to become the United States of America; for they were such accomplished soldiers, men of such talent and genius, that had they been in command of the British forces in the War of the Revolution, that struggle might have been shorter and its results possibly vastly different. They were both young enough men when they died to have been available for service in 1775.

"We do not find such another Indian fighter as this gallant Swiss in the colonial records, and it is noteworthy that the same sort of troops as were found entirely inadequate to the situation when led by Braddock, proved themselves heroes indeed when under the command of a greater and abler man." — Cyrus Townsend Brady in "Border Fights and Fighters."

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

THE KINGDOM STRONGLY ESTABLISHED

LESSON TEXT—II Samuel 2:4-7; 5:1-10.
GOLDEN TEXT—They that trust in the Lord shall be as mount Zion, which cannot be moved, but abideth forever.—Psalm 125:1.

Position and power are important to a king, but of even greater importance is the winning of the hearts of his people. Only as he has them with him can he build a great nation.

David was the Lord's anointed. The kingdom was his. But God expected him to make the necessary effort and use his own abilities to bring it into a place of honor and usefulness. God gives us all we have, but He does not shower it down on us; we must go out and possess it.

Note in the three verses that precede our lesson (vv. 1-3) that David moved forward only after prayer and divine guidance. Little wonder that he succeeded.

I. The Southern Tribes Declare Their Loyalty (2:4).

The nation was divided into two parts, Judah in the south and Israel in the north. To bring them together again called for consummate skill. David had it.

When Saul had died, David showed his respect and genuine loyalty to the king by his actions and by his song of lament which we find in II Samuel 1. Then by the Lord's leading he went to Hebron, the national capital of Judah, and there awaited the will of the people.

Their declaration for David was not long in coming. They knew and respected him. He had shown himself to be their friend (I Sam. 30:26) and now they made him king. It was the first step and a long one in the right direction.

II. The King Makes Friends by Being Friendly (2:5-7).

The men of Jabesh-gilead, hearing that the Philistines had killed Saul, went for his body and gave it suitable burial. This gave David occasion to show his fine spirit of appreciation, which naturally warmed the hearts of all those who had loved and followed Saul. It was excellent strategy, but at the same time it was the natural expression of a kind heart.

He that would have friends must show himself friendly (Prov. 18:24). And why not? The friendly and open-hearted kindness of some Christians does more to win others to Christ than the brilliant discourses of some cold, exclusive Christian worker. Most of the Lord's work is done by ordinary people with warm hearts. Is there any reason why we cannot all be winsome and attractive in Christ?

III. The Northern Tribes Recognize Their King (5:1-5).

A period of seven years elapsed before this took place. The house of Saul was not willing to yield its supposed rights to the throne, and there was fighting and struggle. In it all David showed himself to be upright and considerate.

There is value in gradual development and in the struggle for the right. Had David found immediate success one wonders whether he would have gained the strength he needed for the future.

Then came the day when Israel, the tribes of the north country, of their own accord chose to put themselves under David. Note that it was because of their regard for him (vv. 1, 2) that they came to him (v. 3). That was great gain.

A united people! How important that is in the affairs of the nations. Nothing is more disturbing or a greater hindrance than internal friction. We ought to deal quickly and decisively with any group or force in the life of our nation which is clearly divisive or disloyal.

Think, then, how important it is that God's people in the Christian Church stand together in undivided loyalty to Christ, our King, and in loving devotion to one another.

IV. The King Established a National Capital (5:6-10).

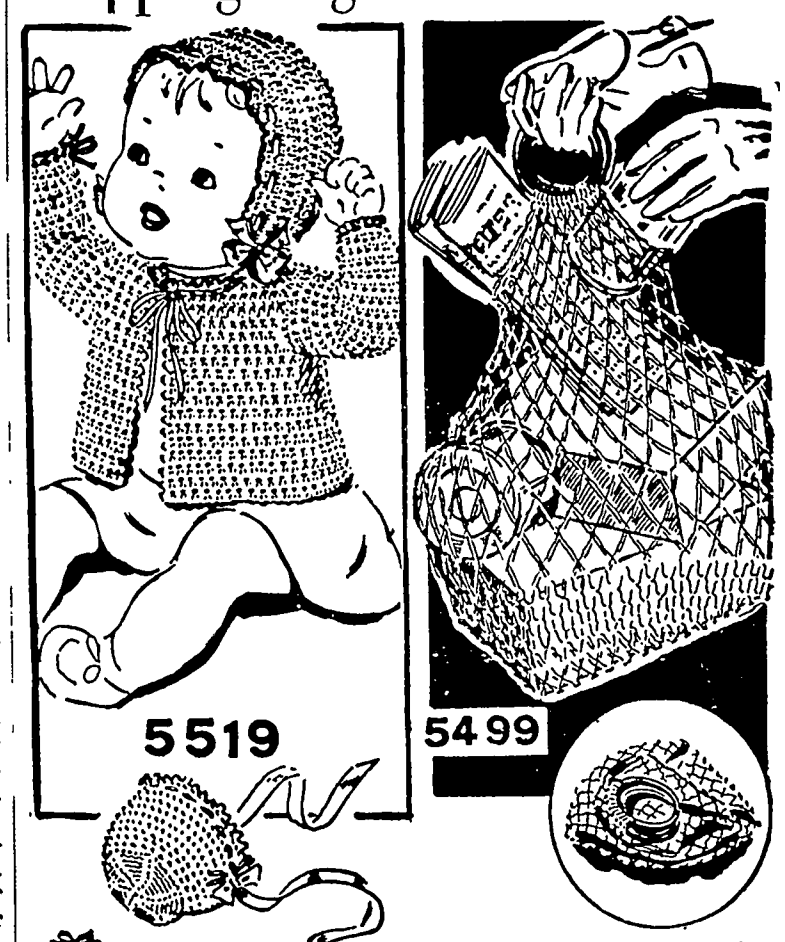
Jerusalem, which was to be the "city of David," and which figures so prominently not only in history but in prophecy, had to be wrested from the hands of the heathen Jebusites, and be established as the sacred city and the capital of the Jewish nation.

Note that the kind and considerate king was not a weakling. He knew how to fight and to win. Verse 8 is difficult to interpret, but evidently does not mean that David was cruel. The Jebusites taunted him by saying that their blind and cripples could hold the wall against David's men. Then they doubtless put their best soldiers on the wall, and David said to his men, "Let us take these cripples."

We see in verses 9 and 10 that David was not only a fighter, but also a builder. He began then the development of Jerusalem, the great city of which we are yet to hear wondrous things.

SEWING CIRCLE NEEDLEWORK

Soft-Weight Jacket and Bonnet Shopping Bag of Crochet Cotton



Crochet Jacket and Bonnet

A CUNNING baby jacket and bonnet can be crocheted in a very short time and is the perfect new baby gift to have on hand when you receive a birth announcement. Bonnet and jacket sets are always welcomed by the mother, no matter what the season is, as babies do wear these soft-weight little jackets in all but the very hottest weather.

The set illustrated is done in a rather loose crochet stitch so that a lacy effect is obtained. A very simple beading is crocheted at throat and at wrist so that pale pink or blue satin ribbon can be used for ties. The bonnet also is of very simple stitch.

* * *

To obtain complete crocheting instructions for both Baby Jacket and Bonnet (Pattern No. 5519) send 16 cents in coin, your name, address and the pattern number.

Carry "Rations"

UNBLEACHED string, household twine, crochet cotton will make this 18-inch folding bag. Take it to market in your purse. It's strong enough to hold a raft of groceries.

* * *

To obtain complete crocheting directions for the String Marketing Bag (Pattern No. 5499) send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Pipe Organ at West Point Now Largest in America

Few pipe organs have grown like the one in the Cadet chapel at West Point. When installed in 1911, it contained 2,418 pipes and cost $12,000.

Today through memorial contributions made in the name of graduates, it contains 13,529 pipes, is evaluated at $150,000 and is the largest church organ in the Western Hemisphere.

"MONKEY DOODLE DANDLES"

Mr. and Mrs. Lyle Liebendorfer of Forest City entertained to dinner Sunday at their home in Forest City, Capt. and Mrs. Ray Jorgenson, Jr. and Judy of Dodge City, Kansas; Mr. and Mrs. Joe Libendorfer and Dick of Hampton, and Mr. and Mrs. R. A. Jorgenson of Klemme.

Elwood Harvey, son of Rev. and Mrs. H. E. Harvey, entered Cornell College at Mt. Vernon, Tuesday. Elwood will complete his senior year of high school and freshman college work at Cornell. He was employed at The Times for the past year as helper and linotype operator.

Paul Mueller left Saturday for Des Moines where he began work Sunday at the Beatrice Creamery Company. Mr. Mueller, who was manager of the Klemme Creamery Company and employed here for 22 years, will be employed in the churning room at the Beatrice plant.

Mr. and Mrs. Ben Goll and Elaine took their son and brother Cpl. Dean Goll to Mason City last Thursday evening where he left for Langley Field, Virginia where he will enter school to finish his training as Chief Gunner. Corporal Goll had been home on a furlough.

Mrs. Dorance Day and son Gary, left early Monday morning from Ames for their home at El Segunda, California, after spending a month in Iowa visiting at the John Day home in Klemme and at the Mrs. Petersen home in Clear Lake. Mr. and Mrs. Day took them to the railway station at Ames Sunday night.

Capt. and Mrs. Ray Jorgenson, Jr. and daughter Judy, left this Wednesday morning for their home at Dodge City, Kansas. Mrs. Jorgenson and Judy had spent the summer in Klemme and Capt. Jorgenson was here on a 15 day leave. He is a bomber pilot instructor and Public Relations Officer at the Dodge City Army Air Base.

Klemme Couple Married Twenty-Five Years Monday

Mr and Mrs. Frank Ward, of Klemme were married twenty-five years on Monday, September 11th.

They have two children, Elsie, who graduated from Iowa University this spring and who is now teaching; and Chester, who is a jeweler and watch repairman and is employed in California.

An Oklahoma couple, after fifty-three years of marriage, say they can't get along and want a divorce. How would you like to be a participant in a fifty-year argument?

The only other war ief drive is that of the Red oss.

Forty-six and one-half cents out the National War Fund dollar es to work for our own armed ces through the activities of the O with its 3,000 units reaching r men and women everywhere;

DUCK SEASON OPEN TODAY IN IOWA

The Iowa duck season opened 30 minutes before sunrise this morning, September 20, and closes at sunset December 8, and in spite of the confused ammunition situation, game officials reported many hunters were out at sunrise.

The daily bag limit on ducks remains at 10 In addition to this, however, each daily bag may include five more mallards, widgeons, or pintails, or any combination of these three species Black ducks, erroneously called "black mallards" by some hunters, may not be included in the extra five ducks allowed each day. Only one wood duck may be had in the daily limit or in possession, except wood ducks.

The daily bag limit on Canada or white-fronted geese is two, and in addition four blue geese or snow geese may be taken. After the first day four Canada or white-fronts and eight blue or snow geese may be held in possession.

The coot or mudhen season is the same as for ducks and geese, and both bag and possession limits are set at 25 The season remains closed in Iowa on jacksnipe.

Waterfowl may not be taken with any shotgun larger than No. 10 guage, or by the use of live decoys, bait, aircraft, motor or sail propelled craft, rifle, horses, cattle, or mules. Repeating or automatic shotguns of more than three-shell capacity must be plugged to limit the combined capacity of barrel and magazine to three shells.

Every person over 16 years of age is required to have a federal migratory bird hunting stamp when hunting migratory waterfowl in addition to his state hunting license. These stamps may be purchased at any post office at a fee of one dollar.

AVERY AND ELL HELD ANNUAL TOWNSHIP MEETINGS

On September 13 at the Center School, Avery township elected the following officers for the Farm Bureau: Walter Koehler, director; V. A Cock, Chairman; Mrs. Floyd Franklin, secretary; Chairman for the women's program, Mrs. V. A. Cook.

On September 14 at school no. 3 Ell township elected the following Farm Bureau officers: Jennings Anderson, director; Edwin Thieman, Chairman; Mrs. Alvin Goll, secretary; Chairman for the women's program, Mrs. L. F. Weaver; vice-chairman and secretary, Mrs. Vern Stromer.

Methodist Choir Had Birthday Picnic Supper

The members of the Klemme Methodist Choir and their families enjoyed hot hamburgers, salad, coffee, ice cream, cake and melons at the Manse fireplace Sunday evening in honor of the members who have birthdays in September.

Those who have birthdays during the month are Ira Overholt, Sept. 13; Mrs. Overholt, Sept. 15; Rev H. E. Harvey, Sept. 17; Mrs. Lyle Wilcox, Sept. 17 and Mrs. Matt Smith, Sept. 28.

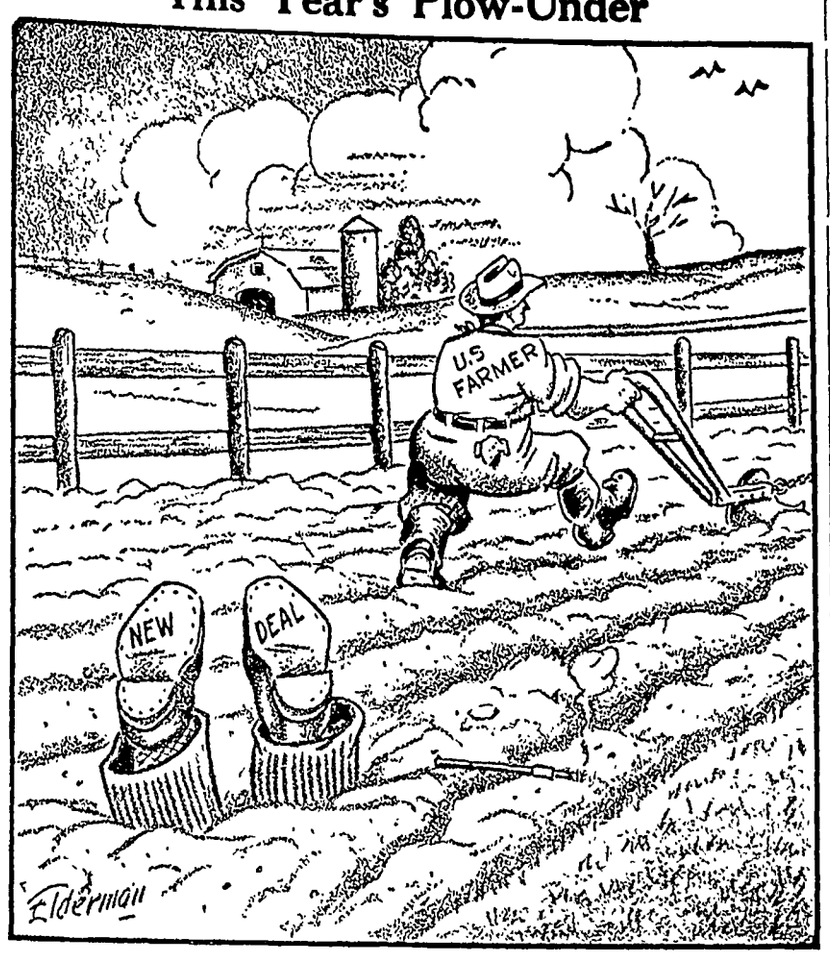
About twenty were present at the picnic supper Sunday evening

USO camp shows provided entertainment for fighting men and women on all fronts; and United Seamen's Service with 104 clubs and units on six continents.

All oversubscriptions to the Hancock County War Chest will remain to the credit of the county just as it did last year, which is a fixed policy of the National War Fund.

A large display advertisement in this issue of The Times will be of interest to contributors.

This Year's Plow-Under



Swea City Young Lady Bride Of Klemme Overseas War Veteran

MISS LUCILLE LELAND AND PVT. OTHO KERAUS WERE MARRIED WEDNESDAY

First Methodist Church Chapel Of Minneapolis Scene Of Candle-Light Marriage Ceremony

The First Methodist Church chapel in Minneapolis, Minnesota, was the scene of a candle-light marriage ceremony on Wednesday evening, September 16, when Miss Lucille M Leland, daughter of Mrs Elfrieda Leland, of Swea City, Iowa, became the bride of Pvt. Otho K. Keraus, son of Mr and Mrs William C Keraus of Klemme, Iowa The wedding ceremony was read by Dr Virgil Kraft, pastor of the First Methodist Church.

The couple were attended at the altar by Miss Bernice Braland, of Minneapolis, as bridesmaid; while Mr John Naas, also of Minneapolis was the best man.

Only a few close friends of the couple attended the ceremony, among whom was Mrs Lyle Wilcox, of Klemme, cousin of the groom.

The bride wore a biege suit and her corsage was of orchids. Her accessories were brown. Miss Braland wore an orchid colored suit and a gardenia corsage. Her accessories were black.

The groom wore his army dress uniform and the best man wore a dark blue suit with a white carnation buttonnier.

After the wedding the couple came to Mason City and Thursday they were honored at a wedding dinner at the Keraus home here, after which they went to Swea City for a visit.

Mrs. Keraus is a graduate of the Swea City high school and attended the Iowa State Teachers College at Cedar Falls, after which she taught school for two years. At the present time she is employed as a secretary at the Mayflower Corporation in Minneapolis

Pvt. Keraus graduated from the Klemme high school in 1930 and has followed the printing trade, being employed for several years at the Times office in Klemme and later going to Swea City where he was employed as printer and linotype operator on the Herald until he entered army service in April, 1941. He recently returned from overseas service and is a veteran of numerous battles from Africa, and up through Itlay. He is home on a furlough and will report the latter part of the month at Miami Beach, Florida, for re-assignment.

Pvt. and Mrs. Keraus are dividing time between Minneapolis, Swea City and Klemme during his furlough.

REQUEST OF 4-H ACHIEVEMENTS BY OCTOBER 1-15

Twenty boys and girls will be elected next month to represent Iowa 4-H club members at the National 4-H Club Congress in Chicago, Ill, December 2 to 6.

Hazel Grimes, County Extension Home Economist reminds Hancock County girls that the records chosen are due in the county office on or before Oct. 1. Boys' records are due October 1, Paul Henderson, county extension director, reports. The records to represent the county must be submitted to the state office Oct. 1 and Oct. 15, respectively. State winners' records must be in the National 4-H club office by Nov. 1.

Club members benefit through keeping club records, whether they receive awards or not, according to Paul C. Taff, state 4-H club leader. Emphasis this year is being placed on recognition for club members who do an outstanding job in any phase of 4-H work or in any special activity.

One girl, Margaret Jean Lindeman, of Benton county, already has been selected to attend the Congress. Her trip is awarded on the basis of her selection as Iowa Better-Groomed Girl. The other nine to be chosen after Oct. 1 are: the girl with the best long-time record; best master demonstration team records (2 girls); girls with best records in home efficiency, clothing, home furnishing, food preparation, and food preservation projects; and winner of the style revue.

Boys will be selected to receive the Wilson Meat Animal awards; awards given by the Chicago Producers' Commission association; the outstanding dairy club member, the top boy in Home Front Service, war food production, garden clubs, soil conservation, fire prevention and rural electrification.

Your Extra Clothing May Save A Life Of Someone In Russia

CITATION FOR SEAMAN STILLE

KEITH E. STILLE, P. R. 1-c

Keith Estelle Stille, Parachute Rigger First Class, U. S. Navy, son of Mrs. Blanche Fredrick of Klemme has been presented with the Presidential Unit Citation, signed by Secretary of The Navy, Frank Knox and is entitled to wear the Citation Ribbon Bar with the Blue Enamel Star.

Keith was the first Klemme boy to join the navy, before Pearl Harbor and has seen a lot of action in the Pacific.

Following is a copy of the Citation which Keith received:

"Cited in the Name of The President of the United States, The First Marine Division, Reinforced, Under Command of Major General Alexander A. Vandgrift, U.S.M.C.

"CITATION:

"The officres and enlisted men of the First Marine Division, Reinforced, on August 7 to 9, 1942, demonstrated outstanding gallantry and determination in successfully executing forced landing assaults against a number of strongly defended Japanese positions on Tulago, Gavutu, Tanambogo, Florida and Guadalcanal, British Solomon Islands, completely routing all the enemy forces and seizing a most valuable base and airfield within the enemy zone of operations in the South Pacific Ocean. From the above period until 9 December, 1942 this Reinforced Division not only held their important strategic positions despite determined and repeated Japanese naval, air and land attacks, but by series of offensive operations against strong enemy resistance drove the Japanese from the proximity of the airfield and inflicted great losses on them by land and air attacks. The courage and determination displayed in these operations were of an inspiring order."

FRANK KNOX,
Secretary of the Navy.

HARVEY AUSBORN PRESIDENT OF AVERY 4-H CLUB FOR '45

Harvey Ausborn, Klemme, was elected president of the Avery Hustlers 4-H Club for the 1944-45 year. Ivan Blumer was selected for vice president and Arnett Ostendorf as secreatry - treasurer. 13 members were present at the meeting held at the home of their leader, Raymond Wille. The boys also planned their program for the next year. They are inviting more boys to join their club. Paul Henderson discussed projects and record books for the next year.

The members say, "If you live in Avery township and are between the ages of 10 and 21, join us in the greatest Rural Youth organization."

Colonel "Andy" Boe At Forest City Next Sunday

Klemme's former students of Waldorf College will be interested to learn that Colonel "Andy" Boe will speak at the Immanuel Lutheran Church at Forest City next Sunday at 11 a. m. and 8 p. m.

LOCAL RUSSIAN CLOTHING PLANS TOLD BY CHAIRMAN

Free Show At Avery Theatre Will Be Feature Of Campaign

Fall house cleaning can be converted into a wartime treasure hunt for the benefit of destitute Russians starting life anew in the liberated but devastated villages, towns and cities of the Soviet Union, Klemme housewives were informed today by G. B. Kirchner, chairman of the clothing for Russia Drive.

In our attics basement and closets most of us have suits, dresses, coats and other apparel which we rarely wear. Any wearing garment can serve a vital need for a man, woman or child in the war-torn Soviet Union. You are urged to contribute all such items to the current Russian War Relief Clothing campaign for immediate shipment to Russia.

The chairman announced that a special free show to reward donors of the clothing for Russia will be held at the Avery Theatre on Saturday afternoon, September 30 at 2:00 p m.

The local organizations of the community and the schools are cooperating with the chairman in the clothing drive and the following collection stations have established:

Children in school are asked to bring their clothing donations to school on Wednesday morning, September 27. At the school buildings in Garner and Klemme, someone will be there to take care of the clothing and issue tickets to the free matinee.

At any time during the week of Sept 24 to 30 clothing may be left at the Avery Theatre in Garner or at the Jim Thomas Barber Shop in Klemme, where free matinee tickets will be given out.

Harley Barz Celebrated Birthday With Movie Party

Harley, son of Mr. and Mrs. Harvey Barz, was eleven years old on Thursday, September 14th and to celebrate the event he invited his room at school to a movie party at the Avery Theatre.

After the movies all returned to the Barz home where Mr. and Mrs. Barz served ice cream and cake.

Harley received a number of gifts from his friends.

Wedding To Take Place At Methodist Church Sunday P. M.

Mr. and Mrs. J. L. Tompkins of Ventura announce the approaching marriage of their daughter, Tressa Mae, to Ardell Waddingham of Ventura will take place Sunday afternoon, September 24, at 2:00 o'clock at the Klemme Methodist Church.

The public is invited.

Twenty-one Women Attended Study Group Meeting Thursday

Mrs. J J. Stile entertained the Study Group of the Methodist W. S C. S. at her home last Thursday and present were twenty members and one visitor.

Mrs. J A. Chambers lead the devotions and Mrs. E. J. Arnold gave a book report.

Lunch was served after the meeting.

GIRL SCOUT NEWS

Eleven girls were present at the Girl Scout meeting at the school house Monday evening.

Contests and games were enjoyed and the history of Girl Scouts was reviewed.

The meeting was closed with the Girl Scout promise and laws and singing.—By LaNelle Harvey.

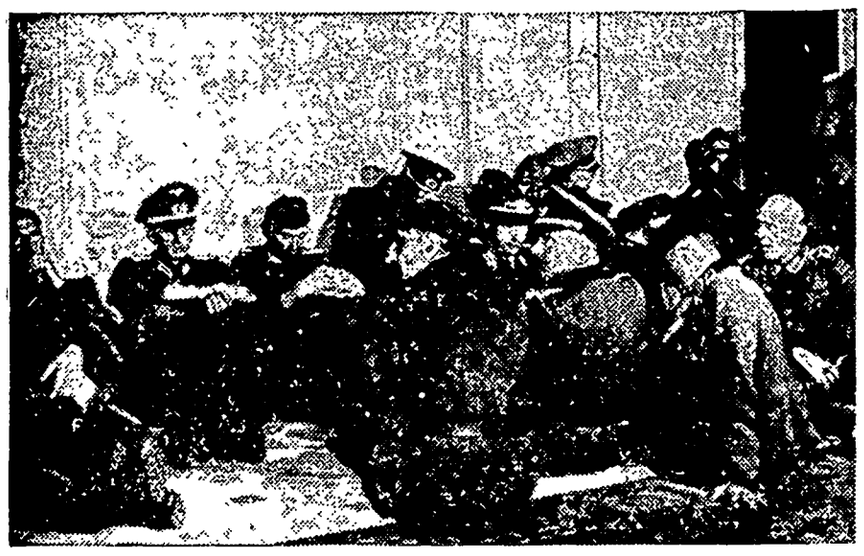
Mrs. Armour Mullin and daughter moved to Mason City Monday. They have been residing in one of Dr. Anderson's house.

WEEKLY NEWS ANALYSIS

Allies Drive on German Border; Expand Navy by 65,000 Ships; August Beef Output Hits Peak

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



Seated on ground at Hotel Majestic following their capture by Free French forces in liberation of Paris, high-ranking German officers await removal to prison quarters.

EUROPE:
Nazi Losses

Having suffered losses of 400,000 men since D-day, and with its power in France broken, the once proud German army reeled back toward the Siegfried line guarding the reich's border, there to hole up for a final stand.

Although the bulk of the German armies escaped annihilation in both the north and south, swift moving Allied armor hacked enemy rearguards to shreds, and U. S. and British planes swarming over the battlefields took a heavy toll of men and equipment in the retreating columns.

As the British and Canadians drove up along the Channel coast, they overran many of the enemy's robot-bomb installations, but the continuance of attacks on southeast England with the flying missiles indicated that the Germans moved their dispatching ramps farther inland.

Illustrating the vast scope of Allied operations in France since D-day, Gen. Dwight Eisenhower reported that we had lost 3,000 planes ourselves, required more than 900 tanks for replacements in the first 70 days of fighting, dropped more than 55,000 tons of bombs and used 44,000,000 gallons of aviation gas. As the battle tempo heightens, and supply lines lengthen, there is also need for more trucks and tires, "Ike" declared.

Deep in Balkans

Rolling on American wheels, the surging Russian army pushed through Rumania and pointed spear heads at Hungary to the northwest where Marshal Josip Tito's rugged Partisans have been waging relentless guerrilla warfare against the Axis occupational forces.

As the Russian drive carried deep into the heart of the Balkans, Red forces in northern Poland stepped up their pressure against reenforced Nazi troops battling grimly to stave off the capture of Warsaw.

In their developing Rumanian offensive, the Russians sought to exploit an early break into the Carpathian mountains guarding Hungary, where Adolf Hitler desperately sought to keep that country in the war by agreeing to rush reenforcements to bolster its tottering eastern defenses. By rolling through Bucharest to the southwest, the Reds also had the choice of driving forward for a junction with Tito's Partisans and endangering the entire Nazi hold on the southern Balkans.

BEEF:
Cheap Grades Abound

Reflecting the heavy run of grass-fed cattle, August beef production in federally inspected plants reached the all-time record output for that month of 600,000,000 pounds, and 21 per cent higher than the same period last year.

Meanwhile, August pork production was 19 per cent under August of last year, reflecting continued short receipts in the markets, which were expected to prevail until October when the spring crop is moved to slaughter.

As a result of the heavy grass-fed marketings, ample supplies of lean, pointless utility beef will be available to consumers, but the government's recent order to packers to set aside 50 per cent of their higher grades for military and lend-lease account, will decrease the supply of the choicer roasts and steaks.

INCOME TAX:
New Returns

Thirty million taxpayers earning under $5,000 per year no longer face the ordeal of filling out a complicated income tax form under a new system of the treasury.

Uncle Sam himself will undertake to figure out the taxpayer's liability next year after he has filed a withholding receipt furnished by his employer showing income and pay-as-you-go deductions with space for listing exemptions.

In figuring out the taxpayer's liability, Uncle Sam will allow 10 per cent for charitable contributions, interest, medical expenses, etc., and anyone claiming larger credits for these items will have to file a 1040 form.

U. S. NAVY:
Rapid Buildup

Reflecting the American genius for mobilizing the country's tremendous resources, Secretary of the Navy James Forrestal revealed that U. S. naval strength had increased by 65,000 vessels since the outbreak of war in 1939, and personnel had been expanded from 152,086 men to 3,717,000. Of the 65,000 vessels, 1,150 were major fighting ships.

At the same time, Forrestal divulged that the navy's air strength

Navy Secretary Forrestal (left) discusses operations with Vice-Adm. H. K Hewitt.

had been increased by 57,600 planes since 1939, 20 times more than before the war.

In addition to being built up into the greatest fighting force afloat, the navy lend-leased 5 billion dollars of ships, materials and services to the Allies, Forrestal said, with the British receiving 92 per cent of the aid.

PACIFIC:
Subs Boost Bag

While U. S. army and navy planes pounded the Japanese Pacific outposts preparatory to further strides along the stepping-stones to the Asiatic mainland, American submarines continued their deadly warfare against enemy shipping.

In latest operations in far Pacific waters, U. S. subs were credited with bagging 17 vessels, including two destroyers, to bring the total number sunk or damaged to 875 since Pearl Harbor.

Operating from advance bases, U. S. bombers hammered Halmahera, strategic gateway to the Philippines, and also hit the enemy's supply lines in neighboring waters.

WAGES:
Top Levels

With employment 28 per cent over January, 1941, weekly and hourly earnings in 25 manufacturing industries rose to record levels for June.

As a result of the payment of higher wages to obtain help in the flourishing labor market, and overtime to meet war demands, workers' weekly earnings averaged $49.23 for the month, 60 per cent over January, 1941, while hourly pay totaled $1.06, a rise of 40 per cent over three and a half years ago.

Because of a slight dip in living costs for the month, "real earnings" —or income in relation to the price of goods—increased almost 2 per cent over May.

WORLD MONOPOLY:
Peace Threat

Declaring that cartels — agreements among different international business firms for controlling world trade—formed the basis for Germany's military rejuvenation, Attorney General Francis Biddle told congress that such enterprises must be destroyed if the Allies are to control the enemies' capacity for future war.

As a result of cartel agreements, Biddle said, important companies were kept from South American markets; others could not manufacture such strategic products as synthetic rubber; development of the magnesium industry was retarded; an American company was prevented from selling a certain munition to the British, and restrictions were imposed on plastic production.

Even though certain giant German corporations were prevented from manufacturing military products after the war, Biddle said, they worked around these restrictions by organizing subsidiaries in other countries.

TELEVISION:
Here After War

Although television will come into general use after the war, it will be an addition to, and not a substitute for, radio, Chairman James L. Fly of the Federal Communications commission declared.

Said he: "You can't sit and look at a television screen for 18 hours a day. You can't turn on television and make the beds, or play bridge, or wash the dishes, as you can with oral broadcasting. Television . . . will be interspersed with other programs.

Fly also recounted the spectacular rise in revenue of standard stations and networks during the war years, time sales in 1943 amounting to 196 million dollars, with net income of 66 million dollars, as compared with time sales in 1942 of 164 million dollars and profits of 45 million dollars.

Young Wizard

An inventive genius at high school age, Stanley Hiller Jr., now 19, demonstrated a new type helicopter to the army, navy and national advisory committee for aeronautics at San Francisco, Calif., one day before his induction into service.

Using opposite rotating propellers, Hiller's helicopter is designed to overcome the conventional model's torque, or inclination to pull over with the turn of the single blade. Built to cruise at from 1½ to 90 miles an hour, with top speed of 100 miles an hour, the new helicopter's longest flight has been about 90 miles.

Son of a pioneer Pacific flier and steamship company president, Hiller founded a large miniature automobile manufacturing business, using a special die-casting process.

WORLD WHEAT:
Ample Surplus

With the four great wheat-producing nations of the U. S., Canada, Argentina and Australia expected to harvest 2,000,000,000 bushels in 1944, and with a carry-over of 1,100,000,000 bushels as of July 1, total supplies will approximate 3,000,000,000 bushels for the coming year.

Of the amount, the International Wheat council reported, the four nations will consume about 700,000,000 bushels and use another 700,000,000 for seed and other non-food uses, leaving a reserve of 1,600,000,000 bushels. Of this amount, about 600,000,000 bushels will be exported, the council said, and 200,000,000 will constitute a working stock, leaving a holdover supply of 800,000,000.

As the result of unusually favorable July weather for spring wheat in Minnesota and North Dakota, the U. S. department of agriculture estimated a total wheat crop of 1,132,000,000 bushels for this year, which would make the U. S. harvest about half of the big four's.

POLIO:
Incidence Increases

Abating in some sections, infantile paralysis has increased in others, with the result that the U. S. is experiencing its worst polio epidemic in 28 years, although the 6,258 cases reported up to August 19 were far below the 1916 high of 17,375.

Offsetting downward trends reported in North Carolina and Kentucky were increases in New York, Pennsylvania, Virginia and the District of Columbia. States reporting mild or normal incidences included California, Kansas, Utah, Florida, Arkansas, Arizona, Missouri, Wyoming and Oklahoma. New England and the mountain states reported few cases.

As a result of the high incidence in some areas, school openings have been delayed as much as a month. All children under 14 were banned from swimming pools and theaters in Kentucky, and those under 12 were placed under house quarantine in Milwaukee, Wis.

REDEEM BONDS

Holders of war bonds are cashing them in at a steadily increasing rate, treasury officials reveal. This is particularly true of the smaller denominations, series E, F and G. The percentage of cumulative redemptions compared with cumulative sales of these three series since May 1, 1941, has risen steadily from 9.27 per cent last February to 11.88 per cent in June. Sales since May 1, 1941, amounted to 36 billion, 252 million dollars on July 31, and redemptions above 3 billion.

HIGHLIGHTS . . . *in the week's news*

RICH DIET FOR ARCTIC: A series of tests conducted at the U. of Illinois indicates that the best diet for high flying aviators and soldiers stationed in arctic regions is one rich in starch, sugar and fat. These three food essentials were found to minimize the drop in internal and surface body temperatures, and to reduce the effect of cold on the coordinating of the muscles.

ALUMINUM MATS: Landing mats made of aluminum are thoroughly satisfactory, the army air force reveals, after a number of tests. Previously steel had been used for this purpose, but when the mat sections have to be transported by air, aluminum, which weighs less than half as much as steel is more satisfactory. The aluminum sections can be laid faster.

Washington, D. C.

NEWSMEN AND FDR

Most important college of amateur physicians anywhere in the world, approximately 200 strong, now meets Tuesdays and Fridays at the White House. . . . These are newsmen assigned to cover the President. They assemble, make careful scrutiny, write lengthy analyses of the President's complexion, nervousness, every facial expression; try to interpret these in relation to his health. . . . Actually the President looks thinner, not too well tanned, but calm and fit, though he shows obvious sign of wearying at the scores of questions thrown at him during press tussles. . . . FDR still knows how to turn charm on and off, calls newsmen by their first names, teases them about "dope stories." . . . Since his return from the Alaska trip, Roosevelt is seeing more people than in the last six months, is growing more aware of domestic issues.

* * *

DUMBARTON OAKS

Secretary Hull's message to the opening Dumbarton Oaks peace parley had whole paragraphs paralleling Woodrow Wilson's statement of January 16, 1920, on the eve of the first League of Nations council meeting. . . . "It is our task here," Hull said, "to help lay the foundations upon which, after victory, peace, freedom and a growing prosperity may be built for generations to come." . . . Twenty-four years ago, Wilson said: "It will bring the League of Nations into being as a living force devoted to the task of assisting the peoples of all countries in their desire for peace, prosperity and happiness."

* * *

INDIAN TYPHOON

When Amb. William Phillips' famous letter advising Roosevelt that India was a U. S. problem leaked into print, the British government sent instructions to all British consuls in this country to inspire letters to editors, plus editorials in the local press. One man in New York alone wrote 76 letters to different newspapers. . . . Later, British consuls sent copies of editorials, etc., to the British Embassy, with accompanying notes, showing what a good job they had done. . . . In the Embassy, Jossleyn Hennessy, British public relations man for India, left off the accompanying notes, sent the editorials to Sir Olaf Caroe in New Delhi, so Sir Olaf could see what a good job Hennessy had been doing. Sir Olaf then sent them to London. . . . Sir Olaf also cabled London that he had been able to keep the Phillips letter out of India so far, but "under existing conditions" it was sure to be smuggled in, in which case it would be published by the Indian press and there was nothing he could do to stop it. . . . By "existing conditions," Caroe meant anti-British subversion on the part of Indian officials who smuggle news into India despite censorship. Once inside India, the British can't prevent publication in Indian newspapers.

* * *

WASHINGTON PERSONALITIES

Breath-taking Bob Gros, California lecturer, has the faculty of coming to the nation's capital every year and interviewing more big-wigs per hour than anyone else in the U.S.A. He has just finished one of his breathless trips and sizes up performers on the Washington merry-go-round as follows:

Wendell Willkie — "The thinkingest, guttiest guy on the merry-go-round; politically unastute."

British Ambassador Lord Halifax —"Worst dressed, but one of the most charming. His sleeves were patched with red thread, he had on almost threadbare gabardine pants."

Donald Nelson—"Determined that small industry shall have a chance to reconvert now, before the armistice."

Economic Stabilizer Fred Vinson —"The best balanced."

Secretary of the Navy Forrestal—"Quick, likable, expounds this philosophy: 'Administration consists 95 per cent of smoothing out human frictions. The secret of American success is driving, restless energy that makes you have ulcers.' "

Secretary of War Stimson—"The most arbitrary."

Small Business Administrator Maury Maverick—"The most two-fisted and dynamic."

Jim Farley—"The most realistic political analyst, the most bluntly and disarmingly frank."

In general, Gros found Washington taking the war in its stride; officialdom much more settled down than last year; less excitement, less hysteria, more efficiency.

Cabled From Somewhere

In Dutch New Guinea

By George Lait

(International News War Correspondent.)

Col. David W. Hutchison, commander of one of the wings of Lieut. Gen. George Kenny's bomber force in the New Guinea interior, now en route to his home in Madison, Wis., on leave, told me of a new technique evolved on the spur of the moment by one of his night fighter pilots. The technique, however, is not recommended too highly for repeat performances. This night fighter took off to attack Jap bombers which were raiding Wake Island. Anti-aircraft gunners and searchlight crews could hear his engine purring in the sky. Suddenly, over the radio they heard the pilot shout: "I am coming into searchlights! For Pete's sake shoot this so-and-so off my tail." The fighter pilot roared into the searchlights' beams with the Jap bomber close behind. The anti-aircraft crews shot off the Jap's tail.

There's a big treasure hunt going on at Lae, British New Guinea. Not for Guinea gold, but for 200 cases of prewar Scotch whiskey buried there by Manager Burns, of Philip Company, before the Jap invasion. Burns, who is now in England with the RAF, intends returning after the war to dig up his cache. The Yanks, with everything from entrenching tools to bulldozers, meanwhile are ripping up the jungle, hoping to beat him to the swag.

Some New Guinea points have a real Broadway flavor these days. In one day I bumped into Maj. Abe Schechter, former bigshot at NBC; Sgt. George McLemore, noted sports columnist, now a combat correspondent; Lieut. Jack Miley, the sports writer, still of approximately the same tonnage as the heavy cruiser on which he is serving; Lieut. Larry Jones, whose father operates Gertner's restaurant, New York., and who is in charge of the largest GI messes in the southwest Pacific; Lew Parker and Jackie Heller, night club performers entertaining troops; Jack Davis, New York representative of the Australian Consolidated Press, who came over for a six-month gander at the war; Capt. Jack Cross, Westchester county journalist (husband of Powers model Betty Riddell) and Capt. Dick Krolick, also a journalist and habitue of East 45th street's famous Pen and Pencil bar; Eddie Dowling's son, Jack, war correspondent for a Chicago newspaper; Douglas (Wrongway) Corrigan, ferrying planes for the Fifth air force, and Col. Merian Cooper (he's gone home on leave to visit his wife, the former Dorothy Jordon of the movies) who produced "Chang," "Grass," and "Long Voyage Home"; Alfred Vanderbilt, who with his brother, George, is giving the Japs hell as commanders of PT boats.

Phil La Follette, former Governor of Wisconsin, has just been promoted to full colonel. He'll be going home soon on leave. . . . Lady Emily Coote of Boston's Back Bay and widow of the first Baronet of Ireland, is now in charge of one of the largest Red Cross outfits in Australia, caring for the wants of recently arrived WACs. . . . Everybody knows Corp. Lew Ayres now serving as a chaplain assistant at Hollandia, but few know that Tech. Sgt. Frankie Darro is a dispensing pharmacist at one of New Guinea's big hospitals. He is the former child star who specialized in tough kid roles.

Capt. Lanny Ross has been almost solely responsible for shepherding around the southwest Pacific all of the bigshot entertainers such as Jack Benny, Bob Hope, Carol Landis, Martha Tilton, Jerry Colonna, Larry Adler and Gary Cooper. . . . One of the biggest successes in New Guinea, who, wiseacres thought, would be a flop, was Judith Anderson, who presented Shakespeare to the GIs, and they loved it. . . . Lee Vanatte, INS daredevil flying correspondent with the Far East air force, tells the story of a combat sergeant who, physically unfit for further fighting, was transferred to army post office censorship to assume duties ordinarily assigned to women. The disgruntled, disgusted sergeant reported to his commanding officer, "Sir, I have come to replace a WAC!"

Jack Benny got plenty of belly-laughs from General MacArthur's GIs with his crack: "I am an old-timer in these Pacific Islands — I used to spend weekends at Catalina." . . . Lt. Cmdr. George Halas, who used to coach the Chicago Bears professional football team, and is now serving as recreation and welfare officer for the 7th fleet, is accompanying Bob Hope's party on its tour of the southwestern Pacific area and sees that the navy boys get their share of the entertainment.

We the People of the United States, in order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common Defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.
Article. I.
Section. 1. All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.
Section. 2. The House of Representatives shall be composed of Members chosen every second Year by the People of the several States, and the Electors in each State shall have the Qualifications requisite for Electors of the most numerous Branch of the State Legislature.
No Person shall be a Representative who shall not have attained to the Age of twenty five Years, and been seven Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State in which he shall be chosen.
Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons. The actual Enumeration shall be made within three Years after the first Meeting of the Congress of the United States, and within every subsequent Term of ten Years, in such Manner as they shall by Law direct. The Number of Representatives shall not exceed one for every thirty Thousand, but each State shall have at least one Representative; and until such Enumeration shall be made, the State of New Hampshire shall be entitled to chuse three, Massachusetts eight, Rhode-Island and Providence Plantations one, Connecticut five, New-York six, New Jersey four, Pennsylvania eight, Delaware one, Maryland six, Virginia ten, North Carolina five, South Carolina five, and Georgia three.
When vacancies happen in the Representation from any State, the Executive Authority thereof shall issue Writs of Election to fill such Vacancies.
The House of Representatives shall chuse their Speaker and other Officers; and shall have the sole Power of Impeachment.
Section. 3. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six Years; and each Senator shall have one Vote.
Immediately after they shall be assembled in Consequence of the first Election, they shall be divided as equally as may be into three Classes. The Seats of the Senators of the first Class shall be vacated at the Expiration of the second Year, of the second Class at the Expiration of the fourth Year, and of the third Class at the Expiration of the sixth Year, so that one third may be chosen every second Year; and if Vacancies happen by Resignation, or otherwise, during the Recess of the Legislature of any State, the Executive thereof may make temporary Appointments until the next Meeting of the Legislature, which shall then fill such Vacancies.
No Person shall be a Senator who shall not have attained to the Age of thirty Years, and been nine Years a Citizen of the United States, and who shall not

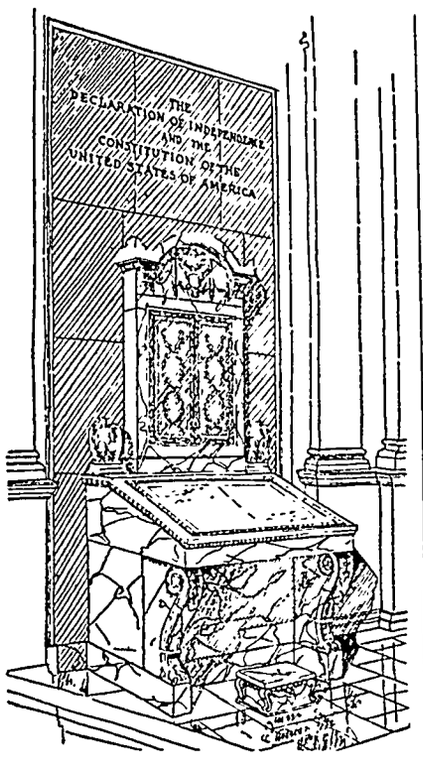
Philadelphia Celebrates.

t having such an introduction to origin of our Constitution, most le do not even know when Con- tion day is. But the Philadel- ns have observed it with great- regularity than any other place merica. Perhaps this city is cious of the distinction it holds aving Independence Hall, the ding in which both these docu- ts were drafted. In 1887 Phila- hia held a national centennial oratio. on September 15, 16 and arranged by a Constitutional ennial commission. This com- ion included representatives each state and territory ap- ted by the governors; the Presi- and his cabinet; governors and r officers from each state and tory; members of the diplo-



In this shrine in the Congressional library in Washington are preserved the "birth certificates of this nation" —the Declaration of Independence and the Constitution of the United States.

matic corps. The celebration began with an industrial parade in which 12,000 people demonstrated the progress made by the United States in the century of its existence. In the evening Governor Beaver of Philadelphia held a reception in honor of the official guests.

On the second day 30,000 members of state and federal military organizations paraded in review before President Grover Cleveland. At night the President held a public reception in the Academy of Music attended by thousands.

Cleveland Is Speaker.

On the third day, the real anniversary of the Constitution, exercises were held in Independence square before the building where the Constitution was drafted. President Cleveland made an address in which he concluded:

As we look down the past century to the origin of our Constitution, as we contemplate its trials and triumphs, as we realize how completely the principles upon which it is based have met every national peril and every national need, how devoutly should we confess with Franklin, "God governs in the affairs of men; and how solemn should be the reflection that to our hands is committed this ark of the people's covenant, and that ours is the duty to shield it from impious hands."

In the 20th century the anniversary has attracted general attention throughout the country. Various radical groups, small but noisy, began to agitate for the overthrow of American institutions. Public-spirited men decided that citizens ought to be more fully instructed in the nature of the Constitution and its guarantees of their freedom. So in 1914 the National Security league was organized to promote this instruction. The league prepared a catechism of the Constitution, circulating hundreds of copies. It urged schools to devote more time to the teaching of the Constitution and observance of the celebration of September 17.

By 1919 there were active committees working in 41 states with chairmen from: presidents of state bar associations; presidents of colleges; chairmen of school boards; presidents of historical societies; state branches of Sons of the American Revolution and other distinguished citizens. Under the guidance of the league, Constitution day was observed by 22 states and a hundred cities in that year.

The National Security league tried to counteract the effect of attacks upon the Constitution by radicals out of office. In 1934 these radicals charged the Democratic President and congress with setting up a government disregarding the Constitution, a kind which the radicals of previous years had advocated. At that time measures were adopted to overcome the effects of financial panic in the fall of 1929 and the consequent business depression.

To Save Our Liberties.

Prominent Republicans and Democrats organized the American Liberty league to use all means in its power to prevent the destruction of those liberties guaranteed by the Constitution. The Constitution day anniversary in 1934 was observed by distinguished orators of both parties calling legislation for the relief of business as subversive of the Constitution. Meetings were held under the auspices of the SAR, DAR, YMCA, American Legion and other organizations. Some speakers defended the recovery legislation as constitutional and said they had as profound respect for the Constitution as the critics of such legislation. This difference of opinion on fundamental issues made the 1934 celebration more notable than any before. It demonstrated, too, the rights Americans were privileged to exercise under this same Constitution.

In more recent years there is a growing tendency to have "I Am an American Day" on September 17 as an especially appropriate way to celebrate the Constitution day. Those who become of age before that day and any aliens who have been naturalized are welcomed as new citizens of these United States by their local community officers. The pledge and national anthem given by these new citizens has such fervor that it makes one conscious anew of what it means to be an American.

Few Changes.

Perhaps this year's celebration of Constitution day, just two months before a national election, would be a good time to look up the Constitution in any encyclopedia and study its articles. Drafted by 55 delegates from 13 states, who, working four months in secret session, often violently disagreed, the Constitution, now in its 157th year, has had few changes in its text. Among all the constitutions in the world it is the oldest and yet is well adapted to the expanding needs of the resourceful American people even in their complex civilization. Men like Washington, Franklin, Hamilton and Madison had a hand in shaping it and because of their divergent views compromised to make a "more perfect Union" possible. You will learn that it confers powers upon the federal government and again exerts limitations upon both state and central governments.

Today with accusations hurled by presidential candidates ringing so loudly in our ears, a quiet contemplation of the original Constitution is almost a must for every citizen. It is a good way to celebrate Constitution day this year.

THE AUTHOR

Editor's Note: This article won first prize in a contest, sponsored by Western Newspaper Union at the Fifth Annual Writers' Conference at Northwestern university in July, 1944, for the "best feature article appropriate to the observance of Constitution day." It was written by Mrs. Marie H. Mudra, a teacher in a Chicago high school. Mrs. Mudra is the daughter of an immigrant Bohemian shoemaker and, although born in this country, she did not learn to speak English until she was six years old. She has achieved distinction as a writer, having won several contests in short story and feature writing in the Middle West. She is the mother of a son who recently was accepted for CAA training and who hopes to become an army aviator.

RELIGION IN THE LIFE OF A NATION

LESSON TEXT—II Samuel 7:17-29.
GOLDEN TEXT—The Lord shall be unto thee an everlasting light, and thy God thy glory. Isaiah 60:19.

"Righteousness exalteth a nation" (Prov. 14:34). True religion is vital to the life of a nation and is the only foundation for national stability and growth. David, the man after God's own heart, knew this, and was not content that the ark of God, the center of the nation's worship, should be without a suitable house. He was not one to be content with a fine palace for his own comfort while the ark of God had a temporary abiding place within curtained walls (v. 2).

Although the prophet Nathan encouraged him in his plan (v. 3), the Lord revealed to the prophet that David was not to build His house (see I Chron. 22:8, 9), but to prepare the materials so that his son Solomon could do it. David's response to that message reveals the true religious attitude of a king and a people who fear and worship God. They were ready to—

I. Receive God's Grace (vv. 18-22).

The great Davidic covenant, which is yet to have its final fulfillment in David's greater son, our Lord Jesus, was made with him at this time. He was promised that the throne of his kingdom was to be established forever (vv. 13-15), a prophecy to be fulfilled in Christ.

But there was also the great promise of blessing upon David's son Solomon, and the reminder of God's grace upon David, the one brought up from the sheepcote to be king (v. 8).

In humility of heart David received this grace and thanked God for it. Note such expressions as "Who am I?" "What is my house?" "What can David say more?" and "For thy word's sake thou hast done these great things." David knew and admitted his unworthiness; he realized that this was indeed unmerited favor from God, but he accepted it as God's gift.

II. Recognize God's Power (vv. 23, 24).

Israel had seen the mighty hand of God at work on their behalf repeatedly, since the day God had brought them forth out of Egypt. God had literally redeemed them for Himself, a purchased possession, protected by His limitless power.

That redemption was not only national but spiritual—they were set free from the gods of Egypt (v. 23) and confirmed to the Lord (v. 24).

It is a great and noble thing when a nation recalls its past and thanks God for His powerful hand upon its destiny. It has been said that a nation which does not remember its past will not have a future worth remembering; and when it remembers, let it recognize God in its history. He is the God of the nations as well as of individuals.

III. Rest in God's Promise (vv. 25-27).

"Do as thou hast said." That is a perfect prayer for any nation. Let the will of God be done, and all will be well—now and in the future.

There is nothing commendable about doubting God's promise or limiting Him in fulfilling it. It glorifies God and magnifies His name to take Him at His word and to confidently expect Him to fully meet His promise. To do anything else is to reflect on His power and His integrity.

It was the prayer of David that the Lord's name might be magnified forever in the keeping of the covenant which He had made with him. That squarely put all of the authority and dependability of God behind the keeping of the promise.

David found peace of heart there. May not we do likewise, resting on the promises of God?

IV. Rejoice in God's Blessing (vv. 28, 29).

David praised God for the assurance that His words were true, and claimed the promise of a blessing upon his house, "That it may continue forever before thee."

He evidently saw beyond the immediate fulfillment of the promise in Solomon to the coming of Christ (cf. vv. 18, 19; Rom. 4:5-8). And his heart leaped for joy at the unspeakable honor which had thus come to him.

This is substantiated by the translation of verse 19 by the Hebrew scholar Adam Clarke: "O Lord God, thou hast spoken of thy servant's house for a great while to come, and hast regarded me in the arrangement about the MAN that is to be from above, O God Jehovah."

Little wonder, then, that David raised his voice and heart in praise and worship. His "adoration and thanksgiving at the revelation of this great truth is beautiful. Its humility, faith, and gratitude reach a sublimity unequalled since Moses" (James M. Gray).

The 'Five Gospels of Americanism' Which All of Us Should Know

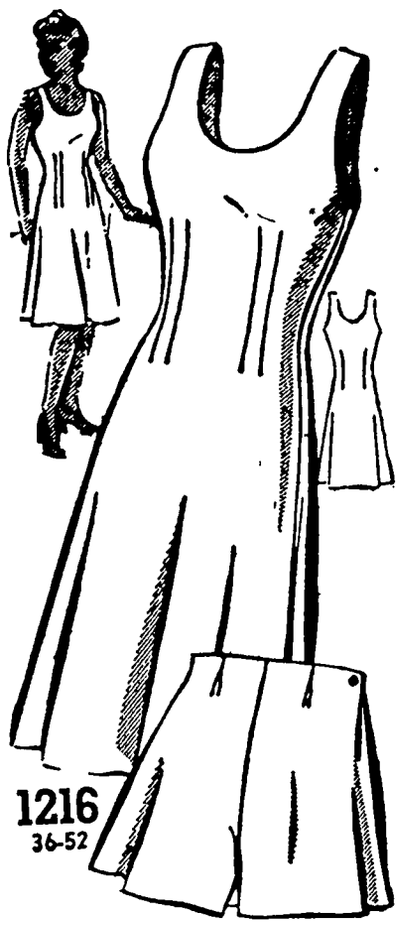
bert J. Beveridge, statesman historian, once wrote:
eople ask me, "What is Ameri- sm?" I say, "Read its five gos- — the briefest gospels ever ed."

hese are the five gospels: The flower Compact, the Declara- of Independence, the Constitu- of the United States, the fare- address of George Washington Lincoln's second inaugural.
ou can read them all, every one of them, in less than half an hour, and any man, or woman, or any boy or girl, who will read them understandingly, will have the foundation, the climax, the beginning and the end, the heart, the limbs and the brain of true Americanism.

"And I like to feel that all these people who are living here—for our country is the only thing, after all—that every time they think of anything public, every time they think of this nation, for which all of them are glad to go out and die, if need be—that in that thought there sound the strains of the fife and drum of Bunker Hill; that in their victory, glorious and beautiful, never shall fail the heroism of Valley Forge, and all that is sacred, all that is dear to our hearts, through our traditions of the great men and noble women, who have lived and sacrificed and died for this republic and its flag, shall still continue in our hearts and in our brains."

SEWING CIRCLE PATTERNS

Non-Slip Straps Sure to Appeal



Straps Cut With Slip

A BOON to the woman who likes a wide shoulder strap cut right in with the slip. It's particularly appealing to the older woman and the woman of stout build. Makes up nicely in both rayon silks and satins and in cottons. The tailored panties match the slip.

Barbara Bell Pattern No. 1216 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38, slip, built-up shoulders, requires 2⅞ yards of 39-inch material; 1¼ yards for panties.

For this attractive pattern send 25 cents in coins with your name, address, pattern number and size wanted.

Send your order to:

GRADES 1 AND 2

For Art this week, each of us made Mr. Milkman. We have them proudly marching above the blackboards in our room. We learned that if we drink milk every day it will help us to grow strong.

GRADES 3 AND 4

When the last bell rang the first morning of school it looked as if the Third and Fourth graders were going to have to have a Chinese school. There were not enough desks for everyone and we thought some of us were going to have to sit on the floor. But by the next morning we all had desks.

We have 23 pupils in our room this year, compared with 18 last year. In addition to the Third graders coming into our room we have three new boys, Eric Meyer, and Reverdy Mace in the fourth grade and Thomas Heivilin in the third grade.

GRADES 5 AND 6

In Fifth grade Geography we have just completed a plane trip across the United States. This gave us an air-view of what we are to study this year. We boarded our plane at Boston, Massachusetts. Some of the places we stopped were Chicago, Minneapolis, Seattle, San Francisco, Los Angeles, New Orleans, Jacksonville, Philadelphia, and New York. Now we are going to spend time on learning about the Pacific states.

We enjoyed looking at pictures and reading of pyramids and sphinx in Sixth grade History. It was particularly interesting to us because so many of our boys in the service have written home telling us that they had visited these places of interest.

GRADES 7 AND 8

In Eighth grade Science we are beginning a new unit on Astronomy.

We are enjoying our new English books. We have had many class discussions and conversations. In the Eighth grade we have conducted club meetings and written the minutes.

Pencil sketches of wild animals and birds were made Friday during our first work in Art.

Merlin Brinkman has been absent two days this week because of a foot injury.

MUSIC NEWS

With the beginning of the third week of school, we find much has been done in the Music department.

Mr. Sucher has quite a few new members started and will devote much of his time to them.

Many more instrumental pieces are needed to make our band complete. Anyone interested in horns from the fourth grade on up are eligible to have an instrument and become a member of the K. H. S. Band.

If anyone has an instrument in their home to sell, please leave your name with Mr. Kingery and you will be seen about it.

We are now having regular band rehearsal on Tuesday evenings and Thursday afternoon.

Tuesday evening the following officers were elected to head our band:

President, Ed. Barz; Vice President, Jim Thomas; Secretary and Treasurer, Ruth Bell; Librarian, Patricia Kudje; Reporter, Ruth Bell.

COATING WALLS OF SILOS IS BENEFICIAL SAYS BEATY

Stops Deterioration Caused by Silage Acids, Lengthens Time of Service

Treating silo walls before 1944 silage is stored will lengthen the service of many Iowa silos.

All islos need an annual inspection, according to Harold Beaty extension agricultural engineer at Iowa State College. He points out walls do deteriate. To stop the deterioration, it becomes necessary to treat the walls with a cement wash or other coating.

Inspect Mortar Joints

Farmers who have clay tile silos should inspect mortar joints of the structures. Where the joints are buckling or in a bad state of repair they should be pointed up with new mortar. Silage acids have no effect on hard-glazed tile, but they do affect the mortar betwen the joints.

Loose and crumbling cement on the inside of the silo is a warning that cement silo walls need immediate treatment. For wooden walls, creosoting probably is the most favorable treatment. Interiors of wooden silos should not be painted; however, all metal reinforcing, such as staves used on the outside of silos, must be kept painted to prevent corrosion.

Linseed Oil Treatment

Linseed oil also may be used for treatment of silo walls. Two coats are necessary. The last coat should dry at least 2 weeks before the silo is filled. One gallon of linseed oil will cover about 200 square feet with the two-coat application.

Asphalt or coal tar also may be used to coat silo walls. They are very satisfactory coatings but need to be repaired or replaced from time to time because the asphalt tends to dry and crack. Several new commercial materials for treating silo walls are now available. They are more expensive, but they are more durable.

Farmers Bulletin No. 1820, available from the Agricultural Extension Service, Ames, contains instructions for treating silo walls.

CARRY PACKAGES TO HELP MEET WRAPPING SHORTAGES

Homemakers who shop equipped with shopping bags or baskets during the next few months can help stores meet the shorage of paper bags and wrapping paper. Miss Marie Budolfson, extension home management specialist at Iowa State College, says the War Production Board has indicated supplies available in the next few months will be about one-third of the normal pre-war consumption.

Customers may help stretch the supply to meet essential needs by taking small articles home unwrapped Purchases from different department of a store may be put in one bag, and merchandise already wraped or boxed may be taken "as is" Paper bags often may be reused, too.

Good Government in IOWA
IOWA'S RESPONSIBILITY TODAY IS GREAT! She must be vigilant and choose the Right Men for public office to retain Good Government in Iowa! No group is better qualified than the All-Star team on the Republican ticket . . . men who have proven their ability through openly and honestly serving in Public Offices of Trust!
BOURKE B. HICKENLOOPER, candidate for U. S. Senator, veteran of the first world war, learned in law and schooled by many years in public service has administered the office of Governor honestly and efficiently. Already a national figure of commanding stature, he is the ideal man to represent Iowa in Washington. VOTE . . . Nov. 7th, for Bourke B. Hickenlooper as United States Senator and send to Washington a man who in every way will ably represent the convictions of Iowa people. A self-made man and possessing rare good judgment, Hickenlooper will vigorously defend the interests of the people he serves.
ROBERT D. BLUE, candidate for Governor of Iowa, has advanced a step-at-a-time! He graduated from the school of experience with distinction. Every position he ever held has been filled by him with credit to himself and to his party. A successful lawyer, business man, farmer and public official . . . his record justifies his promotion to Governor of the State of Iowa!
VOTE FOR THESE LEADERS OF PROVEN ABILITY!
REPUBLICAN CANDIDATES
FOR UNITED STATES SENATOR
Bourke B. Hickenlooper
FOR GOVERNOR
Robert D. Blue
Lieut. Governor K. A. Evans
Secretary of State Wayne M. Ropes
Auditor of State Chet B. Akers
Treasurer of State J. M. Grimes
Sec. of Agriculture Harry D. Linn
Attorney General John M. Rankin
Commerce Commissioner Carl W. Reed
FOR CONGRESS
First District Thos E. Martin
Second District Henry O. Talle
Third District John W. Gwynne
Fourth District Karl M. LeCompte
Fifth District Paul Cunningham
Sixth District James I. Dolliver
Seventh District Ben F. Jensen
Eighth District Charles B. Hoeven

KLEMME NEWS

Sunday afternoon visitors at the Ben Riemer home in Liberty township were Mr. and Mrs. Fred Gates and Mr. and Mrs. Ira Lathram of Clear Lake; Mr. and Mrs. Will Riemer and Iola, and Mr. and Mrs. Emil Beier.

Mr. and Mrs. Harry Gubbs entertained to dinner Sunday at their home southeast of Klemme, Rev. and Mrs. H. E. Harvey and LaNelle, Mrs. C. A. Arnold, Miss Minnie Lenz, Miss Lois Gast, and Jimmie Fredin of Fort Dodge.

Mr. and Mrs. Verle Keraus and children of Garner entertained over the week end at the Buntenbach cottage at Clear Lake, Pvt. and Mrs. Otho Keraus of Minneapolis; and Mr. and Mrs. Wm. C. Keraus of Klemme.

Monday the Iowa Department of Agriculture estimated that only 40% of the corn crop is safe from frost. Some fields of corn around here are drying out nicely, but a lot of fields still need a couple of weeks of dry, warm weather to mature the crop.

Russell Medim and family are now located in Klemme permanently and are residing in the apartment in the Wellemeyer building. Mr. Medim is the new manager of the Klemme Cooperative Creamery Company and comes here from the creamery at Whittemore.

Rev. Calvin Grosshuesch will go to Ackley Sunday where he will conduct services at the Evangelical and Reformed Church His son. Reuben Grosshuesch student at the Mission House Seminary will conduct services at the Klemme Evangelical and Reformed Church.

Mr and Mrs. R. A. Jorgenson attended a banquet and meeting of the Hawkeye Press Club combined with the Iowa Press Association district meeting held at the Lakeshore Hotel at Clear Lake Saturday evening Mr Jorgenson was one of the speakers on the program, discussing commercial printing.

Mr. and Mrs. Conrad Quandt and their granddaughter, Gracka Maria Gerardi, returned Saturday afternoon from Two Harbors, Minn., where they spent about two months at their cabin on the North Shore of Lake Superior. Mr Quandt is troubled with hay fever and goes north each year.

The Maid from Northern Ireland —another in the captivating "Global Glamour" series of paintings by the well-wnown artist Henry Clive, depicting typical beauties on all our war fronts. In full color on the front page of The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American. 1tp

Rev and Mrs. Calvin Grosshuesch were happy to have all of their children home the past week.

Pvt. "Bill" Grosshuesch came Friday from Camp Roberts, California on a furlough; Cadet Nurse Gertrude Grosshuesch came Sunday from Marshalltown, and Reuben Grosshuesch, who is studying for the ministry at Mission House Seminary at Plymouth, Wis., came on Monday. Their other two sons, Ewald is a senior in high school, and Edward is a freshman.

OSE NEW HOTEL RULES

War Manpower commission ome out with an order to hotels t down on service. Change the s only twice a week, limit the s to three a day, hire older and reduce room service 50 ent, it commands. All of which s that the members of WMC 't been stopping at hotels for ast year or they'd know the men have been ahead of

—*—

I could get three towels a day hink I had political influence," res Elmer Twitchell. "For the year I've been bringing my towels. And they cut room ce practically out soon after l Harbor. You not only can't hotel to serve breakfast in It won't even guarantee it in ining room!"

—*—

used to phone a hotel and le about the room and the er of windows. Now I just ask room with two towels and an ional sheet," said Elmer.

—*—

WMC has come out with one order, however. It says hotels ld limit guests to one bath a unless they want to use the bath towel again. One bath per day is the new Federal You can wring a towel out, ever, and use it again without iring the war effort.

—*—

met a man with two towels some spare sheets over one arm a box of lunch under the other . He said he was going to one e smartest hotels in the city was taking no chances.

—*—

Twitchell came out with a few s on the subject:

u go to a hotel go ncern for service show; for little, with a laugh, be satisfied with half.

ot grab the phone and roar, , what am I paying for?" that old familiar yell, called this a good hotel?"

e but once and don't get sore; ls now have gone to war; sheets are not too white 've been in the global fight.

kfast would you have in bed? for days you'll stay unfed; a bellhop P.D.Q.? good trick . . . if you do.

no beer as of yore up to the 19th floor; your kicks don't be too free. . . COULD be in Normandy!

* * *

QUERY FOR RESIDENTIAL CANDIDATES

ner Twitchell today demanded ll candidates for President an er to the following questions to American life:

What is your position on the er ingredients for a wartime burger?

Are you for fewer stickers on shields?

If elected will you do some- about rose beetles?

Do you promise to work for ral operation of lawn mowers?

Are you for a ceiling on shore ers?

What is your attitude regard- the dirty towel so common to soda fountain and quick-lunch- ns?

Do you promise to fight for the rn of the second crab to the rican order of soft-shelled s?

Are you in favor of some regu- ns that will make it easier for radio audience to tell when the e ends and the commercial be- ?

Will you take a stand for a two- ute limit to those boresome pre- s of coming events at picture es?

Will you investigate the prob- of what has become of por- at railroad stations?

—*—

Will you fight the idea being ly promoted among young ricans that the routine path to rity is to make the round of radio programs offering cash s for answers to easy ques- ?

How do you stand in the mat- of cleaning the washrooms in ad trains?

Will you do anything about g it possible to get spare parts automobiles occasionally?

Are you for the return of cuffs en's pants?

What is your position on wom- hats?

* * *

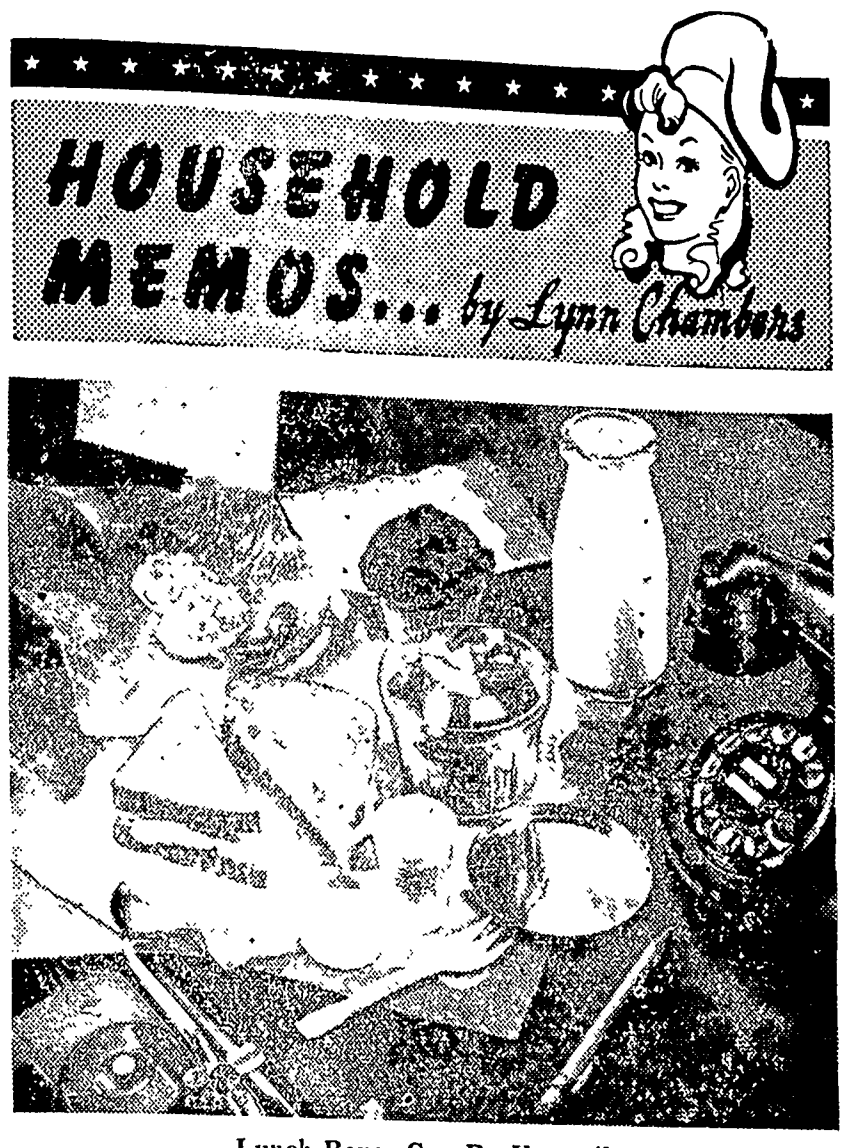
t about the time you decide idiocy is on the decline in rica you tune in and hear an- radio musical jingle for a ng gum, hair tonic or bun.

* * *

tler must have a terrific yen days to purge the fellow who him U-boats would win the war.

* * *

re are to be fewer turkeys for as this year. The home-front may have to undergo the sacrifice of refusing a third .



Lunch Boxes Can Be Versatile
(See Recipes Below)

Lunch Box Tips

Vacation times are over! Invigorated by fresh air and tanned by the sun, children, office workers and defense plant employees are returning to their various duties.

It's important that a healthful schedule be followed after returning to work so that the benefits of vacations are not despoiled immediately. That means, for one thing, a sensible lunch to carry both children and adults energetically through the day.

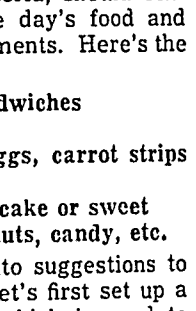
Lunches, whether they're eaten in the quiet of home, at the school desk or in a plant cafeteria, should contain a third of the day's food and nutritional requirements. Here's the plan:

2 or more good sandwiches
½ to 1 pint of milk
Salad or stuffed eggs, carrot strips or celery
Dessert—pudding, cake or sweet
Surprises—dates, nuts, candy, etc.

Before we get into suggestions to amplify the plan, let's first set up a list of equipment which is good to have on hand for the makings of lunch. When the lunch is an everyday matter, and there are more than one to make, perhaps, it's a good idea to get a corner of the cupboard with equipment ready so as to save time in making.

A bread board with a sharp knife for cutting bread, and another knife or spatula to make the spreading of butter and fillings easy is a must. Then you need waxed paper for wrapping, string or rubber bands for tying in some cases, paper napkins, paper cups or jelly glasses with tightly fitting covers for salads, puddings, etc., straws for drinking, forks and spoons, individual salt and pepper cellars to tuck in the lunch box itself.

In a corner of the refrigerator itself, you can keep butter for spreading (to be taken out night before so as to be soft for spreading in the morning), fruits and vegetables, salads, puddings, and jars of sandwich filling. This latter can be made at any time during the day and stored for use. Make enough to last for several days.



Now, we're ready for the business of the lunch itself. Sandwiches are first on the list. Everyone knows how to make sandwiches, but are they the kind you like to eat? Use this score card for them:

1. **Is the bread fresh and moist?**
2. **Is there a variety of bread from day to day?**
3. **Is the filling palatable and moist, with peak flavor?**
4. **Is the filling spread out to the sides of the bread?**
5. **Is the sandwich well wrapped so that it is not messy and dried out by the time lunch time comes?**
6. **Is the filling varied from time to time?**

Here is a good, home-made bread to keep on your list when you are using a lot for sandwiches:

Partial Whole Wheat Yeast Bread.
⅓ cup molasses
3 cups lukewarm milk
1 cup lukewarm water
4 teaspoons salt
6 tablespoons shortening
1 teaspoon sugar
About 6 cups all-purpose flour
About 6 cups whole wheat flour
2 cakes quick-acting yeast

Dissolve yeast in lukewarm water, add sugar. Let stand 10 minutes. Scald milk, add molasses and salt. Cool milk to lukewarm and add yeast mixture. Combine the flours and add all but 1 cupful. Hold that until you know whether it is needed. Some flours require more liquid than others. Then add softened shortening, mix well and turn out onto a floured board. Knead dough until it is elastic and does not stick to the board. Place in a greased bowl and cover. Allow to rise until doubled. Shape into 4 medium loaves and place in greased tins. Let rise to top of tins or double in bulk. Bake in a 350-degree oven for 1 hour.

You'll want a variety of sandwich fillings on hand. Include these in your repertoire:

***Deviled Egg Filling.**
(Makes 1 serving)
1 hard-cooked egg
⅛ teaspoon salt
Pepper
Mustard
1 teaspoon vinegar
1 teaspoon chopped parsley
1 tablespoon mayonnaise

Chop eggs fine. Add other ingredients and mix well.

***Liver Sandwich Spread.**
1 chopped onion
1 tablespoon butter
2 hard-cooked eggs
⅔ pound liver sausage or steamed liver
⅓ cup cream
Salt and pepper

Put liver through grinder or mince. Mince eggs. Brown onion in melted butter until light brown. Mix all ingredients well. Keep spread in cool place.

Bacon Cheese Sandwich Spread.
3 ounces cream cheese
¼ cup chopped, cooked bacon
½ teaspoon horseradish
½ teaspoon Worcestershire sauce
1 tablespoon milk

Blend all ingredients and store in the refrigerator until ready to use.

Flaked Fish Spread.
1 cup fish flakes (salmon or tuna)
1 tablespoon chopped celery
1 tablespoon chopped sweet pickle
3 tablespoons mayonnaise
½ tablespoon catsup
1 teaspoon horseradish
Salt and pepper

Mix all ingredients together and store until ready to spread.

Do you have recipes or entertaining suggestions which you'd like to pass on to other readers? Send them to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill.

Milk Butterscotch Rice Pudding

Lynn Says

Cooking Quickies: Whipping cream won't whip? Pour it into a bowl and set in another bowl filled with cracked ice. Then beat and watch it whip.

Use liquid from canned or cooked vegetables with which to flavor soups, gravies and casseroles.

Make one crust pies instead of two crust ones. It saves time and pastry.

Save dabs of butter from butter plates. Use them for flavoring vegetables in cooking.

Don't over-buy because foods are a bargain. Buy only those you can use.

Grind bits of leftover meat, mix with softened butter or mayonnaise, pickle relish, celery and a dash of catsup. Store in jars and set in refrigerator until sandwich time.

That Old Chair Can Be Reclaimed With New Seat and Coat of Enamel

2. MAKE A PAPER PATTERN
1. WORN CANE SEAT CUT AWAY
TAPES SEWN TO SEAM
TIE TO LEGS

By Ruth Wyeth Spears

NEW cane seats are expensive because the work is done by hand. Endless time is required also for scraping off layers of paint to get down to the grain of the wood in doing over many pieces of furniture. The chair shown here did not seem to be worth this labor. It was reclaimed with a seat from a scrap of plywood, blue paint and seat cover of blue and white ticking edged with white material raveled to make narrow fringe.

The chipped white enamel that was on the chair was rubbed with coarse and then with fine sandpaper until smooth. The new seat came next; then flat paint which was allowd to dry 24 hours before applying enamel. Next, the seat cover was made with a straight band around the front and across the back terminating in ties at the back corners.

NOTE—This chair remodeling idea is from BOOK 10 which also contains directions for making an adorable padded boudoir chair from an old kitchen chair; a high-back chair from an old rocker and an attractive upholstered chair from odds and ends of wood, a little padding and some chintz. Send name and address with 15 cents and receive a copy of BOOK 10.

Radio Intelligence

Since July 1, 1940, the radio intelligence division of the Federal Communications commission has discovered and shut down 375 illegal radio stations. Incidentally, the RID's listening post in Portland, Ore., was the first in the organization to pick up the secret Nazi station being operated in the German embassy in Washington, D. C.

Eagle Trained to Hunt In Manner of Falconry

In days of old, falconry and hawking, the sport of hunting with birds, was a popular pastime in both Asia and Europe. It consists in training the falcon, goshawk, and other birds to capture their prey for man, rather than to devour it. In a modern application of falconry, Dan and Jule Mannix, naturalists and explorers, have trained a golden eagle, which they have named Tequila, to hunt and bring back its subdued quarry to them.

Biggest game yet tackled by the eagle, which has an eight-foot wingspread, is a giant iguana lizard, five feet long, not including its whip-like tail.

SNAPPY FACTS ABOUT RUBBER

Sorting the contributions to the nation's scrap rubber drive has been a tremendous job. There are more than 75 types of rubber scrap, but most reclaimed rubber tonnage is derived from ares.

Rubber plantations covered over eight million acres at the outbreak of the war and had a potential production capacity of 1,600,000 long tons a year, according to rubber experts. Our synthetic rubber plants, some of which have already exceeded rated capacities, are expected to turn out over 1,000,000 long tons a year when operating at peak.

Firestone
GROUND GRIP TIRES
Give EXTRA TRACTION because
THEY CLEAN BETTER!

HAVE you been hearing or reading claims about tractor tire cleaning lately? As a farmer, you are entitled to know the facts. And here they are:

Remember that the Firestone Ground Grip Tread is *patented.* Its extra-long, triple-braced traction bars do not have "broken center" traction leaks, no trash-catching stubs or buttons. The wide spaces between the bars clean easily, even in soft soil, because there are no corners or pockets for mud to stick or hide. No wonder Firestone Ground Grips clean so much better in ALL soil conditions!

And don't forget that Firestone Ground Grip Tires give you up to 215 *extra* inches of traction bar length per tractor. That means *extra* pulling power—and the more pulling power you get, the more time and money you save!

From these facts, it's easy to see why more farm tractors are equipped with Firestone Ground Grip Tires than with any other make. Farmers naturally want the tires that pull better longer—the tires made by Firestone, the pioneer and pacemaker.

Listen to the Voice of Firestone every Monday evening, over N.B.C.

A Time For Planting . . .

THE broad lands of Europe and Asia, freed of the oppressor, can now be planted again. The farmers in Russia and Poland and other ravaged countries can raise food to banish the specter of starvation... if they get the seed.

You can help them make their fertile acres fruitful once more. You can bring them new hope, new faith, and a chance to grow their daily bread. You can help —with your gift to your local War Fund this year.

Through this fund, not only is seed provided for fellow farmers, but a host of other kindly things are done for Americans here at home as well as for people in other lands.

This once-a-year war drive provides such vital necessities as books and sports equipment for prisoners of war; entertainment for millions of American boys through the U.S.O.; medicines and surgical equipment for our fighting allies; aid for struggling China; help to men of the merchant marine who often lose all their possessions to the hungry oceans.

The money you give will yield many-fold. Give once—and you give to many organizations engaged in sowing good will. The need this year is very great. Won't you try to increase the amount you gave last year?

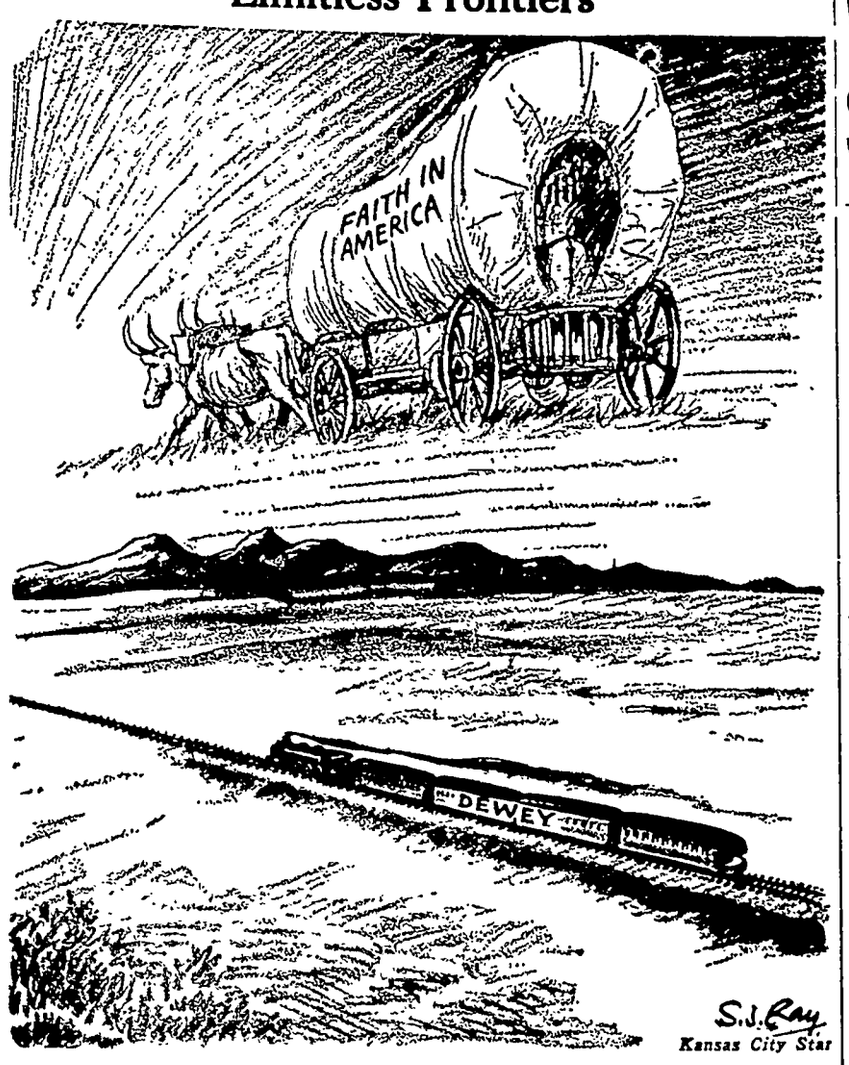
Court Whist was played at four tables with Mrs Keith Albertson winning the high score and Mrs. C. E. Kluckhohn second high.

Mrs. Otho Keraus received many nice gifts from the ladies present.

A two course lunch was served by the hostesses late in the afternoon.

The office of war information's psychological warefare department together with the British has been producing 11,000,000 leaflets each day to drop by plane to the peoples of occupied Europe and Germany.

"Limitless Frontiers"



Ventura Young Lady Marries Farmer North-east Of Klemme

TRESSA TOMPKINS, ARDELL WADDINGHAM MARRIED

Klemme Methodist Church Scene Of Wedding Sunday P. M.

The Klemme Methodist Church was the scene of a beautiful wedding ceremony Sunday afternoon, September 24, 1944, at 2·00 o'clock when Miss Tressa Mae Tompkins, daughter of Mr and Mrs. James Tompkins of near Ventura, was united in marriage with Mr. Ardell Waddingham, son of Mrs. Anna Waddingham of northeast of Klemme, at a double ring ceremony with Rev. Herschel E. Harvey officiating. The bride was given in marriage by her father.

The marriage rites were performed at the altar, profusely decorated with fall flowers and lighted with candelabrum. The wedding music was provided by the church chimes system operated by Wallace Pavey.

The bride wore a white wedding dress with a three-quarter-length veil and matching accessories and carried a bouquet of roses and white gladiolus. Her only jewelry was a locket, a gift of the groom.

The bridesmaids were Mrs. Verner Orcutt, of Fertile, sister of the bride, and Mrs. Arnett Waddingham, sister-in-law of the groom. Both bridesmaids wore identical pink net dresses with matching accessories and corsages.

Mrs. Violet Bohenke of Ventura, the maid of honor, wore a dress of blue net and a corsage.

The groom wore a pin-striped dark blue suit, while the best man, his brother Arnett Waddingham, were a dark suit.

The ushers were Verner Orcutt and Curtis Waddingham.

Following the ceremony a wedding dinner was served at the James Tompkins home northwest of Ventura. The decorations were of pink and white and a three-tier wedding cake served as the centerpiece at the bride's table.

After a few days honeymoon trip the couple will be at home at the Mrs Anna Waddingham farm north and east of Klemme. Next spring the couple will take over the operation of the farm and Mrs. Waddingham will retire.

Miss Minnie Blumer, an aunt of the groom, of Jewel, was an out-of-town relative at the wedding.

Mrs. Ardell Waddingham

Auxiliary Will Meet Oct. 3

The Klemme Legion Auxiliary Unit will meet at the hall Tuedsay evening, Oct. 3rd with Mr. and Mrs. Lester Stille and Mr. and Mrs. J. C. Thomas serving lunch.

FORMER KLEMME GIRL BRIDE AT CAMP SHANKS, NEW YORK

CAMP SHANKS, N. Y. Sept. 27 —In an impressive evening candlelight ceremony, T-4 Arlene Tallman, daughter of Mr. and Mrs. Ed. G. Ell, Belmond, Iowa (formerly of Klemme) was married to Pvt. Henry Maack, son of Mr. and Mrs. D Dutcher, Melrose, Wisconsin, in the Dayroom of the WAC Detachment, Camp Shanks, N. Y., on the 8th of September, 1944. Chaplain Henry C. Stamey of Camp Shanks officiated.

The couple are both members of the Station Complement at Camp Shanks. T-4 Tallman was with the first WAC contingent to arrive at Camp Shanks, and has worked for most of her 16 months here in the Medical Coordinating Office at the Station Hospital. Pvt. Maack, now attached to the M. P. Detachment at Camp Shanks, recently returned from overseas. He served with the 34th Infantry Division in Italy, where he was awarded the Purple Heart.

The wedding was held in the spacious WAC Dayroom, which was decorated with flowers for the occasion. The bride was given in marriage by 1st Lt. Dorcas Kaiser, Commanding Officer of the WAC Detachment, and the bridesmaid and ushers were all WACs from Camp Shanks. T-4 Tallman as well as her attendants, wore their off-duty uniforms.

A reception following the ceremony was attended by a large number of officers, Wacs, soldiers and civilian friends of the bride and groom. The couple spent their six-day honeymoon in Pennsylvania visiting relatives of Pvt. Maack.

Birthday Surprise Party Given For Mrs. Ridder, Monday

A number of relatives and friends held a birthday surprise party on Mrs. Francies Ridder on Monday afternoon, which was her 64th birthday anniversary.

The ladies enjoyed a social afternoon visiting and then served a nice lunch. They presented Mrs. Ridder with a variety of gifts.

ON NAZIS' TRAIL — S. Sgt. Wayne Fee, of Goodell, who has been in the service 3 years, is now with the armed forces in France. He has medals for good conduct and sharp shooting. His father, F. A. Fee, is superintendent of [illegible].

(Picture Courtesy of Mason City Globe-Gazette.)

NINETY-TWO SCHOOLS OPEN IN COUNTY SAYS CO. SUPT.

Four Town Schools Have New Superintendents This Year

Schools in Hancock County having a change in superintendents for the school year 1944-1945 are, Corwith, Crystal Lake , Klemme and Goodell.

Mr. A. L. Kingery, the new superintendent of the Klemme Independent school, is not a stranger in the county as he was a member of the teaching staff there for a number of years, leaving in 1942 to accept a superintendency in Kossuth county, and returning to Klemme this year.

Mr. Sam Cataldo, the Crystal Lake superintendent, taught science and coached boys athletics in the Garner public schools last year.

Mr. Vern Troupe, the Corwith superintendent, comes to this county from Cambridge where he was superintendent last year.

Mr. F. W. Fee, the Goodell superintendent, comes from the Plymouth public school. He taught agriculture in his previous assignment.

County Superintendent Charles Whitney further states that schools fortunate enough to have physical education director and coach of boys' athletics on their respective staffs are: Britt, Garner, Corwith and Kanawha. In the other independent and consolidated schools the coaching assignment has fallen to the superintendent of schools.

Two schools, Britt and Garner, are maintaining their vocational home - making departments. Two schools, Garner and Kanawha, are maintaining their vocational agriculture departments; two schools having vocational agriculture departments closed these departments since we entered war.

War Has Forced Changes

Supt. Whitney says that most of the schools in the county have been forced to make some changes in policy, program or both. Changes generally are due to lack of properly trained personnel, costs more than the tax unit can levy, or a combination of both.

Generally speakin, continues Supt. Whitney, your schools are carrying on because of the willingness of some who have stayed on the job, who would rather be in the service or some other war work, and by former teachers who are teaching only until the school board can find a qualified substitute.

Ninety-two Schools Open

Data on rural schools, including St. John's Parish School:

Total number of schools in the county	92
Total number of teachers in the county	92
Those teaching same school as last year	38
Experienced but teaching in new positions	38
Beginning teachers:	
Normal Training	4
Others	12
War Emergency Certificates	25

Surprise Party Held For Mrs. Anna Waddingham Friday Eve

Mrs. Anna Waddingham had a birthday on Sunday, September 24 so she did not suspect a surprise party planned for her on Friday evening at the Arnett Waddingham home in Klemme where she had been invited for the evening.

Soon a large number of relatives and friends arrived to complete the party in her honor.

The evening was spent in visiting and refreshments were served, after which Mrs. Waddingham was given a variety of nice gifts.

Save by buying bonds . . . Save the bonds you buy.

Planless Planners

"YES, WE HAVE NO BANANAS"

Before the fourth term campaign, cheese and meats were in scant supply on the American table. War Food Administration now announces that a million pounds of cheddar cheese must be sold to avoid deterioration.

WFA's controls and spoilage records are a trial to faith.

MEAT LOSS

Director of Philadelphia comes the report that 1,000,000 pounds of meat products have been tossed into fertilizer vats.

The excuse offered by the War Food Administration regional supervisor is that the storage space was needed for highly perishable meats removed out of cold storage.

NEW HATS

Lend-Lease were to be continued under New Deal Administration, wouldn't it be a good idea to call in Hopkins to work in an advisory capacity? Perhaps he could be talked into doing something to cut down the need for diapers both here and abroad. They are plenty scarce.

Official Photo of Gov. Thomas E. Dewey

One Senator was stunned to learn from the Lend-Lease Administration that material for 600,000 diapers had been shipped to North Africa, particularly when he discovered that the Arabs were wearing them as turbans.

FISHERMEN BEWARE!

A woman bopped her husband off a pier in Rhode Island 30 feet into the water the other day with a shout "Fishing, fishing, fishing! That's all you ever do, and the porch screens still out!

—*—

If this develops into a movement few men will feel safe. This is the time of year when piers, docks, beaches, and seawalls are lined with so-called anglers. For every fisherman there is a little woman quietly sitting at home nursing a suspicion that he is ducking his homework.

—*—

She knows it is not mainly the love of fish. He seldom gets any. He would not get up at daybreak, spend it happily wet, hungry and frustrated just for those bullheads, blowfish and eels.

—*—

He would not sit in the rain 12 hours at home and call it fun. A loud "No" would be his reply to her proposition, "Look dearie, get into some sopping clothes, hang around home all day with a line in your hand and I'll buy you a halibut."

—*—

She knows it is something else. She is sure he is escaping something.

—*—

She could swear he is getting away from repainting the porch chairs, putting up the screens, clipping the hedge, washing the dog and helping her with the home-gardening.

—*—

So far she has borne her suspicions with restraint, but this Rhode Island incident may be the shape of things to come. It may be necessary to throw guards around those piers.

—*—

Elmer Twitchell, always playing it safe, has already taken precautions. He now fishes only from piers from which he can jump.

—*—

And he is talking of organizing the Fishermen's Protective association. He doesn't think there is much sense in trying to get any guaranty from wives that they will not follow the precedent just established.

"Once a thing like that is started, it is pretty sure to go far," he said today. "I look for a lot of fishermen to be shoved off wharves by irate wives. But I am for the establishment of certain rules!"

—*—

Elmer thinks they should be drawn up for the signatures of fishermen's brides at once, and that they should embrace the following regulations:

1—No wife should shove a husband off a pier without first ascertaining whether the water below is of rock or mud bottom.

2—In case of a rock bottom she should first propose adjournment to another pier.

3—No wife should assault a fisherman without a preliminary warning.

4—This warning must be in writing.

5—In no case shall any wife approach him by stealth and obtain a running start before shoving.

—*—

"I also think," said Mr. Twitchell, "that before shoving me off a dock my wife should agree to see that my fishing rod is saved. It is pretty hard to get tackle this year.

* * *

Donald Nelson has issued orders permitting the manufacture of many items cut off during the war. The list includes bobby pins, electric pads, garbage cans, escalators, bicycles, vacuum bottles and bottle openers. Ho, for the open road again!

—*—

The order also permits the manufacture of wire coat hangers. This depresses us no end. We had hoped the postwar world would definitely exclude them.

—*—

Factories may also reconvert to making insecticide spray guns, too, a sufficient supply to take care of the Nazis having been assured to the forces abroad.

* * *

The Japs have a new slogan: "Iki, waki, konki, sookeeki." It makes about as much sense as their war effort.

—*—

Iki, waki, konki sookeeki,
For the Japs the outlook's bleeky;
How they wish their hopes so weaky,
They had never been so sneaky!

* * *

"Six More Nazi Bases Taken by Russians"—headline.

—*—

Stalin is hanging up a new record for stolen bases.

* * *

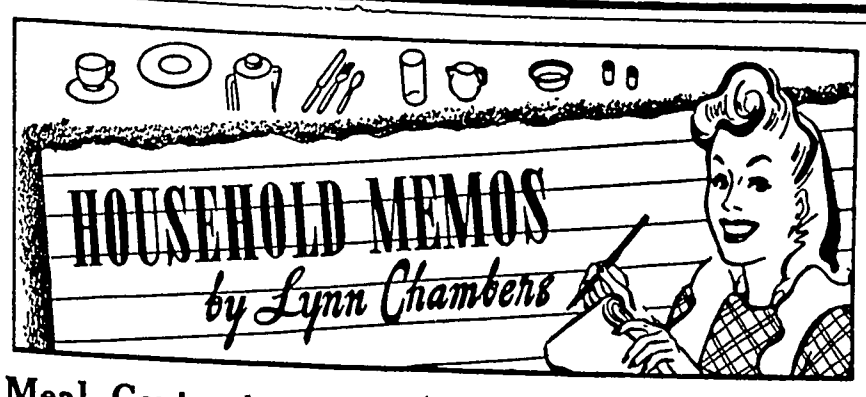
The WPB is permitting the production of some auto replacement parts. Those rattles had become so loud that they were getting to be a definite blow at morale.

—*—

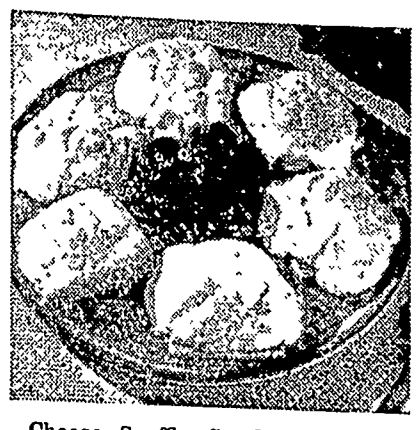
It will seem good to go to a garage now and not have them demand "Don't you know there's a war on?" when you ask if there's any chance to buy a couple of bolt-washers.

* * *

Sign on a New England road—"HUNGRY? TRY WEEDS — 100 YARDS."



Meal Contrasts In Color, Texture Help Appetite



Cheese Souffle Sandwiches team up with ripe olives to give good flavor and color contrast to those quickie lunches.

How is your contrast IQ in meals? Do you serve whitefish, potatoes and cauliflower all at the same meal and expect the family to eat it? Do you put before them Bean Loaf, mashed squash and bread pudding and expect them to find the meal palatable?

Yes, the foods are all highly nutritious and may be well prepared, but there's an important element in meal planning missing in these suggestions. It is contrast. There's a lack of contrast in flavor, color and texture in these food combinations, and without that meals will often go uneaten.

Real interest in foods is an interest in the way they look and how they feel in the mouth. If the meal is colorful, the family is immediately attracted. There is also a desire for different textures. That's why the family wants something crispy in a salad when they have a soft food like stew, spanish rice or spaghetti.

People are very fond of macaroni and corn or potatoes and parsnips, but they don't care for them at the same meal. If you're having macaroni, try serving it with something green like green beans, peas, broccoli or asparagus and watch the family go for it. The table will be more colorful, too, and we eat with our eyes, too, you know.

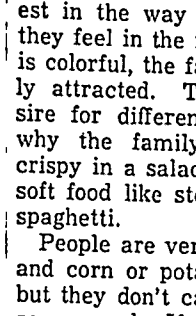
Now, how would you like this combination? Mock drumsticks, lima beans and carrots. There's no sameness about texture or color there.

Mock Drumsticks.
(Serves 6)

1½ pounds veal, beef or pork steaks, cut thin
6 skewers
2 cups cornflakes
1 egg
2 tablespoons milk
1 teaspoon salt
⅛ teaspoon pepper
3 tablespoons fat
¼ cup water

Cut meat into strips and roll around skewers in the shape of a drumstick.

Roll cornflakes into fine crumbs. Cover drumsticks with crumbs, then dip in slightly beaten egg to which milk and seasonings have been added. Roll again in crumbs. Brown the drumsticks in fat, then add water, cover tightly and bake in a moderate (350 degree) oven about 1 hour or until tender.



Here's an easy dinner as good to the eye as to the palate:

Cream of Tomato Soup
Lamb Roll Baked Squash
Hashed Brown Potatoes
Cole Slaw
Apple Sauce Chocolate Cookies

Lamb Roll.
(Serves 6)

Boned Breast of Lamb
¾ pound bulk pork sausage
2 tablespoons lard
1 small onion, diced
2 tablespoons Worcestershire sauce
1 cup tomatoes

Have lamb breast boned, spread with sausage meat and tied into a roll. Brown on all sides in hot fat. Season with salt and pepper. Add all other ingredients. Cover closely and cook very slowly until done, about 1½ hours. Add more liquid, if needed.

Colorful vegetables in this menu are all cooked with the meat:

Braised Liver with Vegetables
Mashed Potatoes
Orange-Watercress Salad
Rye Bread — Butter
Butterscotch Sundae

Braised Liver With Vegetables.
(Serves 6)

1½ pounds sliced liver
Flour
2 tablespoons bacon drippings
6 carrots
2 green peppers
6 small onions
Salt and pepper
½ cup water

Dredge liver with flour. Brown in hot drippings. Clean and dice vegetables. Arrange in piles on slices of liver. Season. Add water. Cover and cook slowly until liver and vegetables are done. Beef liver will take about 45 minutes. Pork, lamb and veal (or calves') liver will take about 30 minutes.

Now, for a luncheon dish that has unusual flavor and contrast. First, here's the menu I'd suggest:

Vegetable Broth
or
Grapefruit Juice
Cheese Souffle Sandwich
Jellied Fruit Salad Beverage
Date Bars

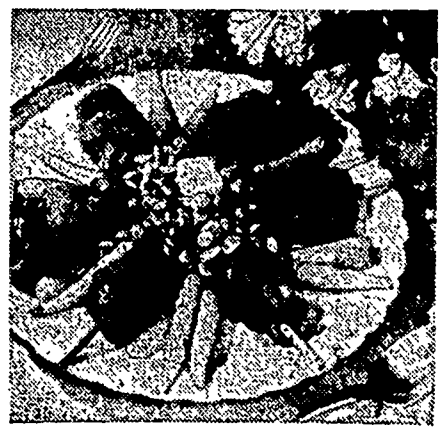
A double boiler will help the cook produce perfect souffle sandwiches:

Cheese Souffle Sandwich.
(Serves 6)

6 slices white bread
¼ pound processed cheddar cheese
Dash of pepper
Dash of paprika
3 eggs
Ripe olives

Toast the bread (crusts trimmed) on both sides. Melt the cheese in the top of a double boiler. Add pepper and paprika to egg yolks. Beat until thick, then fold this mixture into egg whites which have been beaten until stiff but not dry. Pile on toast and bake in a moderate oven (350 degrees) until puffy and golden brown. Place on a chop plate and garnish with ripe olives.

For the fruit salad suggestion, you may have cherry flavored gelatin with melon balls and dark grapes; lemon flavored gelatin with pineapple, white grapes, nutmeats, and cherries.



Mock Drumsticks, crisply coated and fried to tenderness, are fine foil for whole cooked carrots and lima beans. Use a circular platter to carry out the pattern.

Date bars are a chewy contrast to the rest of the meal.

Date Bars.
(Makes 2 dozen)

1 cup sifted flour
½ teaspoon salt
1 teaspoon cinnamon
1 teaspoon baking powder
¼ cup bran or wheat germ
1 cup chopped dates
1 cup chopped walnuts
3 eggs
1 cup honey
¼ cup melted butter

Sift together flour, salt, cinnamon and baking powder. Add bran, dates and nuts. Beat egg until thick, add honey and butter. Mix well. Stir in flour mixture, blending thoroughly. Spread evenly on well-greased pan and bake in a moderate (350-degree) oven about 35 minutes. Cut in squares while warm, then remove from pan.

Butterscotch Rice Pudding.
(Serves Six)

⅓ cup rice
2 cups milk
½ teaspoon salt
⅓ cup brown sugar
2 tablespoons butter
1 tablespoon lemon juice
½ teaspoon vanilla
½ cup chopped dates

Wash rice, then add rice and salt to milk. Bring to a boil and simmer 25 minutes. Meanwhile melt butter and add sugar. Cook slowly until mixture melts and turns dark brown. Add to rice-milk mixture and stir. Remove from heat and add lemon juice, vanilla and dates. Cool.

Do you have recipes or entertaining suggestions which you'd like to pass on to other readers? Send them to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill.

Released by Western Newspaper Union.

Lynn Says

Looking Mighty Pretty: Slice cucumbers thinly but not quite all the way through. Place slices of radish in between each slice of cucumber.

Fill spiced beets with chopped spinach and serve around beef roast.

Break cauliflower into flowerlets, sprinkle with paprika and place around ham slice.

When serving carrots with lamb, roll the whole carrots in chopped mint.

Bananas and pineapple slices make a smart accompaniment to ground beef.

SEWING CIRCLE NEEDLEWORK

Crocheted Sacque Is Seamless

For That Pretty Baby

IT'S a darling of a little sacque—crocheted of white baby wool and edged in pink wool. The tiny rosebud sprays are embroidered on the completed garment in pastel silk floss in colors. The circular jacket, which ties with satin ribbon under the arms is exceptionally easy to crochet as it is done all in one piece. There are no seams.

To obtain complete crocheting instructions for the Circular Crocheted Sacque (Pattern No. 5759) color chart for embroidering rosebuds send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE NEEDLEWORK
530 South Wells St. Chicago.

Boxer Rebellion Award

In 1902, China awarded the United States $24,440,000 to indemnify the government and American citizens for damages and expenses resulting from the Boxer Rebellion. In 1908, after all accounts had been settled, there still remained $11,960,000 or nearly half of the award. So the United States, in a unique gesture, returned this balance to the Chinese government, which used the money to educate Chinese students in America.

Source of Immigrants

Of the 42,000,000 immigrants who came to America from some hundred countries in the past 300 years, 15,000,000, or 36 per cent, were from England, Ireland and Germany.

SNAPPY FACTS ABOUT RUBBER

Tests have shown that a single skid may take 100 miles off the life of a tire. The loss will be greater with tires made of synthetic rubber.

A B. F. Goodrich official believes that before natural rubber is again available in quantity the industry will so improve the quality of synthetic rubber that it will be equal to the former for many uses.

It's important to put your spare in service when making periodic tire switches. In that way the wear is distributed over five tires instead of four.

HANCOCK COUNTY BOARD PROCEEDINGS

8TH ADJOURNED JUNE MEETING

Garner, Iowa, Sept. 5, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, John Chambers and Penn Eckels present

The minutes of the last meeting were read and approved as read

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D D No 34, D D. No. 57, and D. D No 1 and 2, lateral No. 15

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D D No 75, and D D No 13, lateral No. 2.

On motion and second Mrs Minnie Peterson is hereby granted $72 00 per month for the care of the Benson children to be paid semi-monthly effective at once and until the end of the current school year.

In the matter of a gravel pit lease whereby Hancock County Iowa leases the North 1256 feet of the East 1040 feet of the NE¼ of the NE¼ of section 14, Township 94, Rang 24, West of the 5th P. M., for a full term of 50 years from and after the 3rd day of July A D, 1944 at an agreed rental of $8,000 00 payable upon the execution of said lease

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, that Hancock County, Iowa, enters into a lease with William F Greiman, Jr and Emma L. Greiman his wife, whereby Hancock County, Iowa, leases the North 1256 feet of the East 1040 feet of the North of the NE¼ of Section 14 Township 94 Range 24, West of the 5th P. M., containing 30 acres. Said lease to be for a full term of 50 years at an agreed rental of $8000 to be paid from the Road Construction Fund upon the execution of said lease

Chairman F J Schoun is hereby authorized and ordered to execute said lease in behalf of Hancock County, Iowa

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption was seconded by Supervisor Eckels, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J. Schoun, Penn Eckels and John Chambers, aye. Nays none.

WHEREAS County Engineer Charles F Merten has recommended the crushing and stock piling of approximately 35,000 cubic yards of gravel and has further recommended a public letting thereon

BE AND IT IS THEREFORE RESOLVED by the Hancock County, Iowa, Board of Supervisors that a public letting will be held on the crushing and stock piling of approximately 35 000 cubic yards of gravel Said letting to be held at the Courthouse in Garner Iowa, at 1:30 P. M., on the 25th day of September, A D., 1944.

The County Auditor be and he is hereby ordered to publish notice of said letting setting forth the approximate amount and type of work to be done, the date for the commencement and completion of said project the time and place of letting that the successful bidder will be required to file a bond for 75% of the contract price to be purchased from some Hancock County Agent The Board reserves the right to waive technicalities and to reject any or all bids

On motion and second the matter of petition for a highway petitioned for by Albert Chizek et al to be established in Garfield Township between sections 16 and 21, is hereby tabled indefinitely.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

REGULAR SEPTEMBER SESSION

Garner, Iowa, September 11, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with John A. Chambers, Penn Eckels and F. J. Schoun, present.

The minutes of the last meeting were read and approved as read.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 76, Main.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D. D. No. 58.

In the matter of the petition of Donald Hamilton et al, for the establishment of a D. D. No. 138, a sub drainage district of Lateral No. 4 Drainage District No. 1 and 2, Hancock County, Iowa.

WHEREAS Wm. Henschen was appointed Engineer on July 10, A. D., 1944, to investigate and make a report on the necessity and feasibility of the establishment of the Drainage District referred to in the preamble hereof and

WHEREAS said Wm. Henschen did file his report on September 11, A. D., 1944, which report states that he did survey the lands in the proposed district petitioned for by Donald Hamilton et al. and further states that the construction of said proposed district will be conducive to public health and benefit and recommend that said district be established and constructed as prayed and that the benefits to be derived will be greater than the cost thereof.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 138, petitioned for by Donald Hamilton et al, that the report of the Engineer be approved as a tentative plan and same shall come on for further hearing at the Courthouse in Garner at 2:30 P. M. on the 6th day of November, A. D., 1944.

The County Auditor be and he is hereby directed to cause notice of hearing to be published in the Garner Leader and Signal, a newspaper of general circulation published at Garner, Iowa, advising all owners, occupants, lienholders and encumbrancers of record in the water shed of the district of the pendency and prayer of the petition, the favorable report of the Engineer thereon, the approval by the Board of said report as a tentative plan, that same may be amended before final action thereon, the date and hour of hearing thereon and that all claims for damages and all objections to said establishment must be filed in writing with the County Auditor at or before the hour set for hearing thereon.

The foregoing resolution was offered and read by Supervisor John Chambers who moved its adoption, was seconded by Supervisor Eckels whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers aye. Nays none.

Whereupon the Chairman declared the resolution duly adopted

This being the 11th day of September, A. D, 1944, a date heretofore set for a final hearing on the report of the Engineer approving the completion of the contract of the Lowe Construction Company of Cedar Rapids for the cleanout of D D. No. 14, petitioned for by J Howard Corzine et al., the hour for said hearing having arrived, the Proof of Publication being on file and the Board being fully advised, said hearing was held as scheduled.

BE IT RESOLVED that the County Auditor be and he is hereby ordered to draw a warrant in payment of the final estimate due after deducting claims on file.

On motion and second the Board adjourned to Sept. 18, 1944, at 9 o'clock A. M.

F. J SCHOUN, Chairman

ATTEST: FRED C. MISSAL,
County Auditor.

1ST ADJOURNED SEPTEMBER MEETING

Garner, Iowa, September 18, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, John Chambers and Penn Eckels, present.

The minutes of the last meeting were read and approved as read.

On motion and second Notice of Warning to Depart is hereby served on Mr. Theodore Ruka, Mr. and Mrs. Erwin Ruka and family and Mr. and Mrs. Donald Ward and family.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D. D No. 9.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 7.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D D. No. 7 Section five Main and Branch 90 and D. D. No. 102.

This being the 18th day of September A. D 1944, a date heretofore set for a letting on the cleanout of the main open ditch and lateral No. 6 of D. D. No. 9, the hour for said letting having arrived, the proof of publication being on file and the Board being fully advised said letting was held as scheduled

The Chairman proceeded to open all bids on file and after duly considering all bids on file, the Board, on motion by Chambers and seconded by Eckels, voted to continue the hearing to 3.00 p m on the 20th day of September A D 1944 to enable the contractor whose bid is being considered to make further investigation of the exact nature and amount of work to be done.

On motion and second the Board adjourned to September 20th, A D 1944, at 2 o'clock P M

F J SCHOUN, Chairman.

Attest: FRED C. MISSAL,
County Auditor

2ND ADJOURNED SEPTEMER MEETING

Garner, Iowa, September 20, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J. Schoun, Penn Eckels, and John Chambers present.

The minutes of the last meeting were read and approved as read.

On motion and second Clarence Hartzell is appointed constable in Britt township to fill the vacancy.

Whereas Hancock County, Iowa, has available some bridge lumber which has been taken from bridges rebuilt.

Be it therefore resolved that a sale of used bridge lumber shall be held at the County Shop in Britt on Saturday, September 30 at 10 o'clock a. m.

The County Auditor is hereby authorized and ordered to advertise said sale of used bridge lumber in the official papers of Hancock County, Iowa.

This being the 20th day of September A D 1944, a date heretofore set for a continuation of the letting on cleanout on D D No. 9 and lateral No. 6 of D. D. No. 9 petitioned for by John F. Christians et al

The hour for same having arrived the Board members and contractor being present and the contractor requesting additional time for consideration, same is hereby granted and the 25th day of September A. D 1944 at the hour of 10 a. m. is hereby fixed as a time to which said letting is continued

The vote theron is ayes all. Nays none.

On motion and second the Board adjourned to September 25 A. D. 1944 at 9 o'clock a. m.

F J. SCHOUN, Chairman.

Attest: FRED C. MISSAL,
County Auditor

MUSIC NEWS
Ruth Bell, Reporter

The Band meets Tuesday evenings and Thursday afternoons. It was decided at Band last Tuesday evening to start at seven o'clock as the time for the evening band rehearsal.

There are twenty-seven beginners started and who are playing in the Junior Band which meets two times a week.

Mr. Sucher has a private lesson schedule arranged for the band members. Each person has a regular time for his lesson.

SENIOR CLASS NEWS
Patricia Kudje, Reporter

There are fifteen members in the Senior class this year. Mabel Sterba, Wayne Schoenwetter, and Elwood Harvey are not with us this year.

Our classes vary this year but all of us are taking English Literature, American History, and Advanced Algebra The other class was a choice from Home Economics, Sociology, or Commercial Law

JUNIOR CLASS NEWS
Jeanne Trumbull, Reporter

The Junior class is smaller this year There are six girls and eleven boys The two new members are Dorothy Meyer, who attended school in Sheyboygan, Wisconsin, last year, and William Cosgriff, who attended the Britt School.

The subjects we take are: Business Law, Typing, English Literature and Economics.

Our play books have arrived. The title of the play is "The Antics of Andrew." The characters have been cast and we will start practice some time next week The play will be produced October 27, under the direction of Miss Crabtree.

SOPHOMORE CLASS NEWS
Lois Ann Lau, Reporter

Emily Johnson is a new member in our class this year. We now have sixteen members.

The subjects we take are: Geometry, Biology, World History, and English.

We have started studying axioms and theorems in Geometry. They were quite difficult at first but are getting easier.

Biology class has been very interesting. We are studying about plants and their parts. Wednesday we used a microscope to study a leaf We also did an experiment to show which parts of the leaf manufacture food.

For World History, we made up maps of Europe showing which of the countries are Allied, and which are not. We are to keep them and add more territory as the Allies advance.

We are writing stories in English.

FRESHMAN CLASS NEWS

Alice Anderson returned to school after an absence due to an appendicitis operation.

GRADES 1 AND 2

This week a new pupil, George Andersen, came to school. We are glad to have George in the second grade class.

Every morning we have our "Good Health Habits" check-up We must have clean hands, fingernails, and face, a clean handkerchief, our teeth brushed, our hair combed, and a neat desk.

We try to get a perfect record each day.

GRADES 4 AND 5

We have just finished a unit in third grade Geography called "Our Homes and Where They Are." In addition to reading about some of the boys and girls who live in places very much like our own, we studied about some boys and girls who live in a different kind of a neighborhood.

Everyday in fourth grade Geography we go on an imaginery trip We are crossing our United States on the Lincoln Highway by automobile. Our trip started in New York City. We learned many new and interesting things about this city. From New York City we traveled to Philadelphia and next to Pittsburgh. This is as far as our automobile has taken us. Before we finish our journey we will have seen the following things:

Chicago, the Mississippi River, Omaha, Rocky Mountains, Yellowstone National Park, Salt Lake City, Sacramento. San Francisco will be at the end of our journey.

GRADES 5 AND 6

We were sorry to have some of the members of the Fifth grade absent this week because of illness.

Several people have brought plants to school for us to enjoy. They help to make our room more cheerful.

In Sixth grade we have completed our first lesson in Iowa History Iowa being our home it makes this subject doubly interesting.

Our first two issues of the Weekly Reader came this week. On Friday we read these in our Reading period and have a discussion during History class.

JUNIOR HIGH SCHOOL GRADES 7 AND 8

We are very proud to have ten band members n our room. Robert Baack and Larry Ramsay were former band members while the new ones are: Don Finders, Jerry Finders, Phyllis Kirkwood, Luella Priebe, Dorance Baack, Merlin Brinkman, Alice Meyer and Marjorie Lau.

In Science we have enjoyed several experiments. We especially enjoyed looking at various things through the microscope.

It is practically impossible for shock to explode maximite, used as a bursting charge for armor-piercing projectiles

REV. H. E. HARVEY RETURNS TO KLEMME-LIBERTY CHARGE

The annual Methodist Conference of the Sioux City District was held last week at Sioux City.

Appointments and changes were made the latter part of the week and were announced Sunday.

Rev. Herschel E. Harvey, who has been serving as pastor of the Klemme-Liberty charge here, was returned here by the Conference as pastor for the coming year.

New Appointments

In the Algona District of which Rev. F. E. Burgess is the superintendent, new appointments are: Rev. A. G. Heddle, Burt; Rev. W. M. Hubbard, Clear Lake; Rev. G. Hjelmaas, Crystal Lake - Hayfield; Rev. S. W. Cunningham, Rowan-Latimer (supply pastor) and Rev. G. F. Jay, Thornton-Swaledale.

Rev. Collins of Clear Lake, goes to Ida Grove and Rev. H. E. Whyte, a former Klemme pastor who was at Ida Grove, goes to Rockwell City.

REAL ESTATE TRANSFERS

Josephine E. Blake and Clarence C. Blake, husband to Lloyd Smith and Anna Smith. Wty Deed 8-30-43 $1.00. Lot 6 in block 1, lot 1 in block 2, lot 6 in block 1, lot 1 in block 2, also all that part of 5th St. lying between lot 6 in block 1 and lot 1 in block 2 in Barz Add. to Klemme, Iowa.

Archie Bowers, a widower to Fred Gates. Warranty Deed, 9-8-44, $1.00. Lot 1 in block 17, Original Town of Garner.

William F Greiman, Jr. and Emma J., his wife, to Hancock County, Iowa. Gravel Pit Lease, 7-3-44, $80.00. North 1256 feet of E. 1040 ft. of NE¼ NE¼ of section 14-94-24.

Glenn A. Clark and Jessie B., husband and wife to Gene Pechota and Helen T W. D. 9-16-44, $1500. Lots 3 and 4 in block 26 in Anderson's 2nd Add. to Britt.

County Triple A Office Will Be Closed October 3rd

The Hancock County AAA office at Garner will be closed all day on Tuesday, October 3rd.

The County Committee and office personnel will attend a district meeting to be held at Clarion on that day.

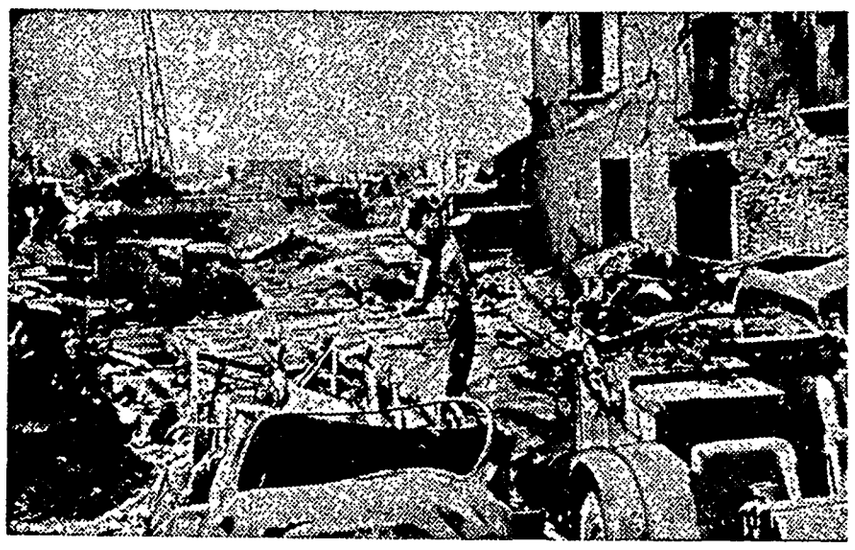
WEEKLY NEWS ANALYSIS

Allied Invasion of Yugoslavia Poses Another Threat to Reich; Plan for Small Standing Army

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



Entering Chambois, France, the Allies found abandoned, wrecked and burned German equipment, common sights along the enemy's battered retreat route to the Reich.

EUROPE:
New Front

For the little man with the clipped mustache, there seemed to be no end of trouble.

Although his broken armies in the west were reorganizing for a stiffer stand against the U. S. and British onslaught, and although his battered armies in the east were slowing the Russians from the Black sea to the Carpathians, the Allies posed still another threat to his narrowing defensive circle by an invasion of Yugoslavia.

As Russian troops tore across Romania onto the eastern Yugoslav border near the capital of Belgrade, U. S. and British forces landed on the western coast for a drive inland. As the two Allied armies worked forward for a junction, Marshal Josip Tito's Partisans were active in harassing German troops and sabotaging communication lines.

The twin offensive in Yugoslavia doubly imperilled the harried legions of Adolf Hitler.

First, the U. S., British and Russian drives promised to link the Allied armies for a concerted attack against southern Austria and Hungary, and, also to outflank the Nazis manning the Gothic line in Italy to the west; and, second, an Allied junction would cut off an estimated 260,000 enemy troops remaining in lower Yugoslavia, Greece and the Aegean islands.

Stiffen at Border

Bleated the German radio to fanatical Nazi rearguards resisting the U. S. and British drives to the Reich's western frontier:

"Every day gained now amounts to a reinforcement of our national strength for the defense of the Reich itself. . . ."

Partly because of such resistance, partly because the fast-moving Allied armies had outrun their lengthening supply lines, the U. S. and British thrusts in the Lowlands and France temporarily lost their whirling momentum.

Fighting was particularly heavy in northeastern Belgium before the fortress city of Liege and in the rugged Ardennes forest, and directly to the east of Paris, where American troops drew up along the Moselle river for an assault on Nazi defenses guarding the rich industrial Saar basin.

Mounted thickly in the precipitous, wooded heights east of the Moselle, the German artillery maintained a steady drumfire against doughty U. S. troops seeking to establish firm bridgeheads across the river.

Farther to the south, Lieut. Gen. Alexander Patch's Seventh army, driving up from the Mediterranean for a juncture with Lieut. Gen. George Patton's Third army along the Moselle, drove on the Belfort gap, the low-lying plane between the Vosges mountains of France and Swiss border leading into Germany.

Costly Fighting

Reflecting the strong pressure the Russians were exerting to the northeast of Warsaw, the Germans acknowledged their withdrawal across the Narew river, ". . . to avoid the danger of a Russian breakthrough on the southern border of East Prussia."

In withdrawing across the Narew, the Nazis continued their policy of economizing their forces by giving ground when the superior weight of their opponent promised to grind down their manpower.

Because of the proximity of the Russians to German soil, however, the Nazis no longer were free to make wholesale withdrawals, but now faced bloody front-line fighting.

MISCELLANY

OPA VIOLATIONS: In the first half of this year, formal enforcement of Office of Price administration regulations was necessary in 42,000 cases, involving violations of price ceilings, rationing quotas, and rent levels. Action included revocation of 20,684 consumer gasoline rations, 4,265 suits for injunctions, 1,158 triple damage suits, and 2,191 criminal prosecutions.

CIVILIAN GOODS:
Postwar Formula

Manufacture of civilian goods will begin in earnest with the fall of Germany, with war output due to drop about 40 per cent, and 4,000,000 workers freed for other jobs, the War Production board revealed.

At the present time, a limited reconversion program has been instituted, with emphasis placed upon preparation for the eventual resumption of civilian production. Under current regulations, manufacturers are permitted to develop working postwar models and order machinery for civilian output.

In allowing those manufacturers not engaged in war work to start turning out civilian lines after the Nazis' downfall, the WPB will maintain priorities for military production alone and will relax most of its controls over materials. Furthermore, it will provide assistance for manufacturers in switching over to civilian work.

Because of the U. S.'s record-breaking production of 79,350,000 tons, world steel output rose to 146,500,000 tons in 1943. While production increased here, it dropped from 28,000,000 to 20,000,000 tons in Germany and from 18,000,000 to 12,000,000 tons in Russia.

DEMOBILIZATION:
Discharge Plans

Total length of service, time served overseas, combat record and dependency will govern the demobilization of soldiers following the defeat of Germany, the army announced.

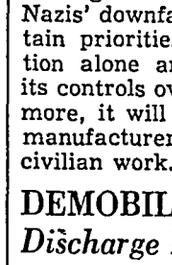
Under the army's plans for releasing surplus men, each of the first four mentioned factors will be worth a certain number of points, with release going to doughboys with the highest ratings. However, it was pointed out, men with qualifications needed for the war in the Pacific will be transferred to the Far East regardless of their status.

Because the war in the Pacific will receive first call on shipping, it may take many months for men eligible for demobilization to return to this country, the army said. Since men in camps here are expected to have the lowest priority ratings, they will constitute the principal pool for replacements.

Since the U. S.'s full seapower will be needed in the all-out war against Japan, there will be no demobilization of the navy when Germany falls.

Future Army

Declaring that . . . "a large standing army has no place among the institutions of a modern democratic state," Gen. George C. Marshall told officers planning the postwar military organization to work on a small, efficient force with a reserve of well-trained citizens.



Gen. Marshall

In issuing his directive, General Marshall assumed that congress would pass legislation requiring every able-bodied American youth to undergo training before placement in the reserves.

By advocating a small, efficient force with a large pool of reservists, General Marshall said that there was more opportunity for advancement in such an organization than there was in a big standing army, where the size made it necessary to maintain a large, professional officers' cast at all times.

HELP WANTED

A shortage of 200,000 workers exists in the principal industrial regions of the country, and it can be remedied only by shifting men and women from areas where there is less stringency, the War Manpower commission declares.

Heavy war industries in New England, North Atlantic, Middle West and the Pacific Coast are being hampered by lack of skilled help. Only in the South and Southwest is there an approximately adequate labor supply.

PACIFIC:
Tougher Going

With U. S. forces edging closer to the Philippines and Japan itself through intensive operations against the Bonins lying 600 miles from Tokyo, Navy Secretary James Forrestal warned the country that the going would become increasingly tougher as the enemy concentrated his forces for a fight on a shorter front.

In speaking of the enemy's air force, Forrestal said: "The Japs have obviously been saving their planes for the engagement to come. Except for the battle of the eastern Philippines, they have not risked a big aerial battle for months."

In addition to concentrating numbers, the Japs have also been improving the quality of their planes, Forrestal revealed. Said he: "Jap planes of every type . . . now have greater fire power, armament, speed, range and load capacity. United States navy planes have been improved, too, but we don't now have as big technical advantages . . . as a year ago."

CANNED FOODS:
Remove Rationing

Because War Food Administrator Marvin Jones advised that available and prospective supplies justified the step, the government removed from rationing all canned and processed jams, jellies, fruit butters, asparagus, lima beans, corn, peas, pumpkins, squash, mixed vegetables, baked beans, tomato sauce and puree and all varieties of soups and baby foods.

At the same time, a WFA spokesman declared that heavy runs of cattle may permit the removal of commercial grade beefsteaks and roasts from rationing in October or November. At present, sizable marketings of grass-fed stock have resulted in ample point-free supplies of utility grade meats. Lighter runs of prime cattle, on the other hand, will make continued rationing of top cuts necessary.

Charts Quake

Using a cross-sectional model of the globe, Rev. Joseph Lynch, director of the observatory of Fordham university, charts course of recent earthquake which shook northeast corner of U. S. and extended as far southwest as Wisconsin. According to Reverend Lynch, disturbance centered near eastern end of Lake Ontario.

CATTLE:
War Prices

As the war entered its sixth year this month, price levels of meat animals were from 45 to 105 per cent higher than they were in September, 1939.

On the Chicago market, cattle that brought $12 per hundredweight six years ago sold at $18.35. Steers that averaged $10.30 then drew $15.85.

The rise was equally marked in hogs, with head under 240 pounds, which brought $8 per hundredweight six years ago, selling for the $14.75 ceiling. As a whole, the average of $7 of 1939 was far below the 1944 figure of $14.35.

Against the top of $10 in 1939, lambs drew $14.65 per hundredweight, with the $9.50 average of six years ago below this month's mark of $14.25.

FURLOUGHS:
Shipping Factor

As a demand was made in congress for an investigation of the war department's handling of furloughs, especially in the Pacific, a letter from Gen. Douglas MacArthur stated that the scarcity of shipping hindered a more liberalized policy.

Citing the shipping shortage, General MacArthur said: "The return to the United States without replacement of all men who have served a specified length of time would, of course, halt our offensive against Japan and might indefinitely prolong the war."

While the demand was made for the investigation, Rep. Carl Hinshaw (Calif.) urged that soldiers stationed in Alaska be rotated by units to other posts.

SURPLUS GOODS
Release Vehicles

Excess stocks of war materials are being declared surplus at the rate of 100 million dollars worth a month. Goods "declared surplus" can be sold off as rapidly as possible. Eighty-five per cent of the materials are from the war department at present, and consist of airplanes, motor vehicles, medical supplies and radio equipment. So far, goods sold have brought 83.8 per cent of original cost.

The Washington MERRY-GO-ROUND

By DREW PEARSON

Washington, D. C.

FEAR OF CASUALTIES

The inside story can now be told regarding one of the greatest worries of the Allied High Command in connection with the Normandy invasion—namely, casualties. It was feared they would be terrifically high.

In fact, Prime Minister Churchill, who had hung back from a cross-channel front for two years, feared the Allies might suffer losses comparable to the early days of the last war, when the cream of British manhood, then relatively untrained, was mowed down in Flanders fields. He frequently told FDR that he was worried about losing the "seed" of Britain.

This worry gives an insight into the sudden change between the type of slow fighting during the first few weeks in Normandy and the headlong onrush of today.

Allied orders during the early weeks in Normandy were to advance under a "curtain of steel." As a result, the greatest artillery barrage ever laid down in history was thrown at the Germans in advance of Allied infantry. It was an artillery barrage so heavy that it wiped out almost everything in its path.

However, it was slow. It took time to unload big guns on shallow beaches. It also took time to batter down German positions. But once these positions were battered down, and the rim of German defense was broken, the Allies found what General Eisenhower knew was the case—a complete military vacuum inside.

In other words, the Nazis had staked everything on holding the rim, had no defenses in the interior. That is the explanation for the headlong rush of Allied forces in recent weeks. The Nazis were gambling on their Atlantic wall, a wall which could not stand up under Bradley's "curtain of steel."

NOTE — General Montgomery's cautious advances in Normandy probably reflected in part Churchill's worry over casualties. However, he has been cautious in other areas also. Before the Battle of El Alamein, when the British army had been pushed back and back across the desert toward Cairo, Montgomery queried his chief, General Alexander: "What casualties can I take?" Alexander, with the fate of the Suez canal at stake, replied: "One hundred per cent." Caution, of course, is no reflection on courage.

SAILOR'S OUTMODED UNIFORM

Now that Adm. Ernie ("Clothes Horse") King has finally relented and will let naval officers shed their jackets under certain conditions in hot weather, a lot of sailors wish he would also examine the uniform of the enlisted man.

Most enlisted men would whoop with joy if their present, long-outmoded uniform was discarded. What most people don't realize is that the sailor's uniform was designed by the British about 200 years ago and is now just as outmoded as the sailing ship.

Take, for instance, the broad collar worn over the shoulders. It was designed for vermin-infested ships of the 1700s, when sailors had to be deloused and a broad collar was practicable to catch the tar oils used in a sailor's hair.

Again, the bell-shaped trousers, which flap around the ankles and nearly trip the wearer when he runs, were designed for days when sailors rolled their trousers up over their legs to scrub decks. Today, dungarees are provided for this sort of work.

Again the drop front, 13-button trousers were designed for a day two centuries ago when tidiness was nothing like what it is today.

One thing which particularly gripes the enlisted man is the tight-fitting waist of his blouse, which has to be slipped on and off over his head. If a sailor is dumped into the water and has to swim for any length of time, it is almost impossible to get this blouse off. It is tight, sticks to the body, and you can't very well swim and at the same time hold two arms above your head while you wriggle out of your middy.

Some of the boys wish that Admiral King would take off his new grey-green uniform, designed for him by His Majesty's tailor in London, long enough to experiment with a middy-blouse in the water. They think that, despite a century's delay, he would then design for them a new uniform overnight.

CAPITAL CHAFF

¶ Before every White House press conference, scores of newsmen crowd against the velvet rope outside the President's office, awaiting the signal to enter. When secret service men let the barriers down, the rush is terrific. Cracked one perspiring secret service man, "It's worse than a New York subway."

¶ First new international magazine to be published in liberated France is a French edition of "Free World," edited by members of the French underground.

Walter Winchell

(WNU Service)

Man About Town:

Eric Johnston, Chamber of Commerce chief, has been cracked down by his superiors over the Russian boosts. They feel he was too pro. As of today, no postwar trade agreements between U. S. industry and Russia have been set up. One of the biggest shipping deals, however, is being readied without their help. . . . Paul McNutt's receptionist at the WPB has become the hottest model on the Conover list. She is Ann Bell. . . . The newsprint shortage may be over by mid-December. Wood pulp is waiting for shipment from Scandinavian ports. . . . Pals of Steve Early hear that his sinus agony (caused by Washington's climate) may force him to quit against his wishes.

Paulette Goddard and her groom, Buz Meredith, have asked the FBI to probe the poison-pen writers who have landed divorce rumors in various columns. . . . The reason the planned new mag Pageant has been held up is that it planned to ape Coronet and then decided not to. After spending a mint, too. . . . Overheard at the White House: "Clare Luce is the Aimee Semple McPherson of the Stork Club." . . . John Edgar Hoover was so ill recently he thought he would die.

"Going My Way" will gross 8 million. Producer Leo McCarey will get about two million dollars for his bit. . . . Sec'y of War Stimson is mending now. He went to the Adirondacks recently where a nurse remained in attendance. . . . Jesse Jones, whose condition worried pals, is better.

Notes of a Newspaper Man:

Damon Runyon and a New York newspaper apparently disagree on the hobby of some Americans who enjoy telling quips on well-knowns. . . . Mr. Runyon, in his column, complained: "It is always bad taste for people to sit around and make odious remarks about any national leaders of respectability and integrity." . . . The same morning a respectable New York newspaper featured a report (in a box) quoting a Washington columnist. . . . The story dealt with the argument: "Who Was the Strongest President?" . . . One arguer said Lincoln—because he split rails. Another said Washington—because he tossed a dollar across the Potomac. But FDR was declared the strongest. "He threw the U. S. Treasury across both oceans!"

Now that is a pretty good gag. But it is also pretty stale, too. . . . It was used often during the second campaign of Woodrow Wilson in the war debt issue. . . . The quips and barbs about Mrs. Roosevelt are still being swapped by anti-4th Termers, and the President is often the butt of devastating jokes. . . . We do not recall hearing that they complained. . . . Mr. Runyon probably will admit that it isn't so bad to tell a joke as it is to elect one.

Governor Dewey isn't immune from the jokesmiths these days. . . . The current quip has him suffering from fierce insomnia which "keeps him up all night pacing up and down under his bed!" . . . The New Dealers go into spasms over that one. But it was funnier 20 years ago when Al Jolson told it after an overnight trip from Boston. . . . "I didn't sleep a wink," he groaned. "One of Singer's Midgets drank some coffee and paced up and down his upper berth!"

Col. Carlos Romulo, who helped MacArthur and Quezon escape to Australia, didn't know that persons addressing Congress must not do so in uniform. He has been in his army uniform for years. . . . An hour before he spoke in the House the other day Romulo was informed that he must wear civvies for the event. . . . His staff hastily borrowed civilian apparel. . . . On the way to the Capitol he realized he was wearing his army sox. . . . He paled. . . . "I am wearing the wrong sox!" he exclaimed. "Oh my goodness, wot'll I do?" . . . His Girl Friday solved matters right there on the Capitol steps. . . . He wore her bobby sox!

A New Yorker just back from Argentina alleges that the majority of the people there are not anti-U. S. or pro-Nazi. . . . Most of the people, said our informant, do not even take the government leaders seriously and openly quip: "If I thought my son would ever grow up to be President of Argentina, I'd have sent him to school!"

Norman Littell, of the Dept. of Justice, and Will Clayton, Jesse Jones' man, regret that feuds cannot be carried beyond the grave. . . . The Demmy Nat'l Comm. is functioning as smoothly as a ward at Dr. Freud's. . . . Churchill has cooled on the King of Greece, but has warmed on the King of Italy. . . . White House attaches are blaming each other for the recent Willkie boner. . . . General O'Dwyer becomes a civilian about October and will start campaigning for the Mayoralty.

DOAN'S PILLS

ve You Any Ideas for 'Secret Weapons'? Inventors' Council Wants To Know Them

ny War Machines ere Developed by Civilian Amateurs

nt to help finish winning war?
ll, just settle down some t in that favorite easy chair, up the old pipe, take out il and paper and figure out asy way of generating an cial fog—one that can be just where you want it and do the business.

nds simple, doesn't it? But the would give a great deal for a tical solution to the problem of ing advancing troops this way. be done. A number of meth- ave been tried out; but most e equipment is too big and ersome for effective action at ront. The army is still looking simple, effective way of pro- this cover.

d while it is looking for a way eate an artificial fog, it is also e alert for any new methods pelling such a fog laid down e enemy. Here, too, a number ethods have been suggested, have been tried with a degree ccess; but the problem hasn't en really licked.

s is where the National Inven- council comes in. It was set ithin the framework of the de- ent of commerce in 1940 to as a clearing house for just ideas that military men might aluable. Headed by Charles F. ring, a past president of the y of Automotive Engineers, composed of the nation's lead- scientists and engineers, it s as a funnel between the rican ingenuity of the man in treet and the proper military rities.

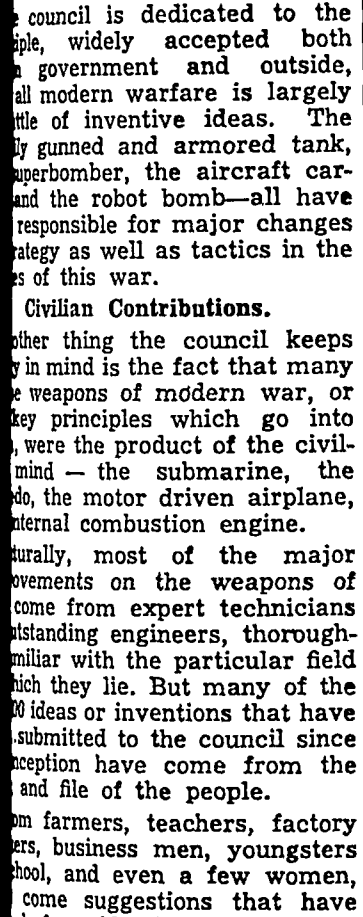
e council is dedicated to the iple, widely accepted both n government and outside, all modern warfare is largely ttle of inventive ideas. The ly gunned and armored tank, uperbomber, the aircraft car- and the robot bomb—all have responsible for major changes rategy as well as tactics in the s of this war.

Civilian Contributions.

other thing the council keeps in mind is the fact that many e weapons of modern war, or key principles which go into , were the product of the civil- mind — the submarine, the do, the motor driven airplane, nternal combustion engine.

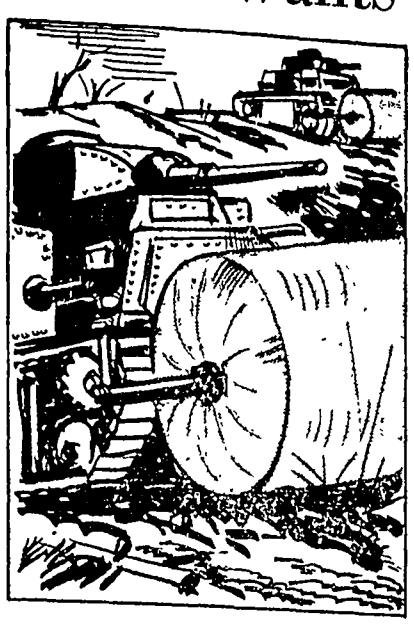
turally, most of the major ovements on the weapons of come from expert technicians tstanding engineers, thorough- miliar with the particular field hich they lie. But many of the 00 ideas or inventions that have submitted to the council since nception have come from the and file of the people.

om farmers, teachers, factory ers, business men, youngsters hool, and even a few women, come suggestions that have d of considerable assistance to



e army is still looking for a le method of generating arti- fog to cover advancing troops.

rmed forces. And these inven- suggestions follow a definite rn in volume with each new e of the war or introduction of weapons by the enemy. r example, when the submarine ace was at its height, the coun- as receiving an average of 100 rs a day describing how tor- nets could be used to keep the fish" from blasting the sides of hant ships. Now that the sub- ne menace has been licked, suggestions are rare. Right suggestions for combatting the bombs are on the upswing;



Can tanks be equipped with explosive-absorbing rollers to lessen the effectiveness of minefields?

but none as yet has furnished the complete solution.

When the soldiers and marines first began landing on Pacific beaches in the face of heavy enemy fire there were scores of suggestions that infantrymen be equipped with shields. This idea had to be discarded, the council says, because the weight of such a shield, if it were to prove capable of stopping a military projectile, would be too great for a fully-equipped infantryman to handle.

Ideas from Soldiers.

Some of the suggestions, too, come from men at the fighting fronts and in army camps, A lieutenant-colonel on duty in Italy wrote in with an idea for equipping tanks to blow up enemy mines without danger to the tank-crew. His suggestion was equipping a heavy tank with a gigantic explosive absorbing roller, to be pushed ahead of the vehicle as it waded through the mine field.

An army sergeant, Lauren N. Elkins Jr., figured out an improved design for a field kitchen, tested it himself on maneuvers, found out it worked and submitted his idea to the council. Within 24 hours it had won acceptance of the army quartermaster corps and test models were constructed. Along with the new type field kitchen, Sergeant Elkins submitted an idea for a shipping case for the kitchen, which broke down into two benches and a table.

Another invention which has saved scores of lives is a simple signaling mirror which can be directed straight into the eyes of pilots searching for crews of sunken ships or airmen down at sea. This mirror, cheap, light and easy to construct has been known to send a shaft of sunlight into the eyes of a pilot up to 10 miles away 36 times in a single minute. And there is no trick to focusing it.

Value of Milkweed Floss.

From the floss of the common milkweed, the researches of a civilian scientist filled one of the most pressing of military needs at the outset of the war. Supplies of kapok, used in the heavy jackets of high altitude fliers and in life belts, had been shut off by the advancing Japanese. This scientist showed that milkweed floss could do the job better and that it could be used, too, for insulating and soundproofing.

Many of the ideas adopted, the council's records show, have served to speed up quick repairs in the field, to get planes and guns back into the battlelines faster than they could have been readied previously.

But not all of the inventive and mechanical problems of the armed forces have been solved. Many new ideas still are urgently needed, even in fields where considerable improvements have been made since the start of the war.

For example, there is a crying need for some means of controlling fires in tanks until the personnel have had time to evacuate. At present, the council's records show that carbon dioxide under pressure in a small metal container is being used with some success. But the carbon dioxide treatment doesn't serve to prevent the live oxygen-carrying ammunition from exploding within the tank as the fire soars past the burning point of TNT. An improvement over this method would be widely welcomed if adapted to the peculiar needs of the tank, where interior space is so limited.

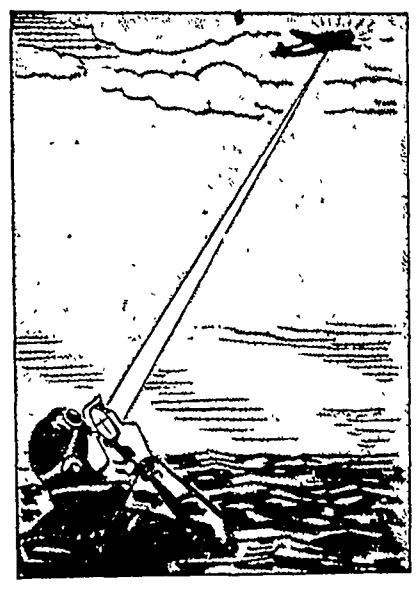
Tanks Need Improvements.

The cramped quarters of the present-day tank make it a fertile field for improvements. The operator's vision is extremely limited when the tank is "buttoned-up" for battle. He can see only ahead. Performance of gyroscopic compasses and other instruments on the control panel could be stepped up. Improvements already have been made, through ideas submitted to the council, in methods of ventilating the tanks to reduce the extreme heat under which its crew must operate. At present a roof-suspended unit that takes in air through a bullet-proof enclosure is in use in many types. But the field for improving the comfort and fighting ability of the men who man the tanks has by no means been exhausted.

Another invention the council would like to put its hands on is a voice-transmitting gas mask which would permit its wearer's voice to be heard clearly. At present the new type masks are using a flexible diaphragm. Others combine the features of a lip microphone and a portable transmitter. But the field is still wide-open for improvement.

Keenly needed, too, as a protection to fliers, is a means of inflating carbon dioxide life rafts more speedily at high altitudes. Fliers forced to bail out in cold North Atlantic areas at 30,000 feet find that their carbon dioxide supply has been burned to dry ice by temperatures ranging as low as 60 below. In the rapid parachute descent, the carbon dioxide doesn't have time to resume its gaseous state and shock of the icy water, if the life raft isn't immediately available, is often fatal in far northern latitudes.

Range finders, too, are important factors in directing artillery fire at enemy positions. Delicate optical instruments, they are subjected to hard usage in the field and reflect sudden temperature changes. A method of providing more sturdy construction and at the same time reducing the width without reducing the accuracy of operation is a real need. Right now, the council is particularly interested in homely ideas that might aid in destroying or removing obstacles to landing operations that have proved so costly in lives in the far Pacific and on the beaches in Normandy. A simple idea from a mechanic or a farmer might develop a technique that would preserve the lives of the men who must go out ahead of the main landing parties and clear the way.



This signalling mirror can be directed into the eyes of pilots who are searching for crews of sunken ships or airmen down at sea.

Japs Clever, Too.

The council cited the report from Saipan that men, clad only in bathing suits and armed with rifles and detonating charges, had to swim to the obstacles off shore and blast them individually from the path of the oncoming troops.

The Japanese, too, have shown themselves ingenious in adapting simple decoy devices to battle-front use in attempting to confuse or mislead attacking forces.

One Japanese sniper had rigged up an over-sized "puppet show" to harass American landing forces. He concealed six dummies in trees surrounding his position and attached them to his own station with ropes. When his shots attracted American fire in his direction, he would jerk the cord, let one of the dummies fall from a tree. Each time the American troops were confident they had eliminated his sniping post. Then he'd wait his chance and open fire again.

Some ideas along that line, developed by Yankee ingenuity from close experience from hunting and fishing, from work around farm machinery, or from bench and lathe, the council believes, might go a long way in saving the lives of our fighting men and give them opportunity to develop tactics of surprise that could come in handy in many a close encounter.

The American people have responded tremendously to the need for wartime inventions of all sorts and character, the council believes, but there are still hundreds of ways in which American "know-how" can be applied to the problems of a mechanized war.

Archives of Patent Office Hold Story of American Greatness

e files of the patent office con- the graphic story of the prog- of America and the achieve- ts of the men who helped build great country of ours. In these are the "birth certificates" of hundreds of thousands of inven- that have placed America out in front in scientific and trial achievement. Every week, y day in fact, these files grow er. For Americans are still in- ng, even though most of their brain children will not see the light of day until the war is over.

The institution of patenting is provided for in article I, section 8, of the constitution of the United States, which states that congress shall have the power "to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries." To date, the U. S. patent office has issued nearly 2,500,000 patents, some of which marked turning points in the history of the world. The steam engine, telephone, electric light and airplane are only a few of the more obvious ones. The others are broken down into 310 classifications, under which there are some 50,000 sub-classifications.

A patent gives the owner the exclusive right to make, use or sell his invention or discovery throughout the United States and its territories for a period of 17 years.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for October 1

JESUS THE LIGHT OF THE WORLD

LESSON TEXT—John 9:1-7, 13, 34-41.
GOLDEN TEXT—I am the light of the world: he that followeth me shall not walk in the darkness, but shall have the light of life. —John 8:12.

Light is a fascinating subject for study, and especially is that true when we speak of spiritual light. In the lessons of the next three months we are to see the light which Christ sheds on the problems of life today.

How appropriate to begin that study by recognizing Christ as the one true "light of the world." He it is who brought us out of darkness, and it is from His light that we too are lighted and become God's lights in this wicked world (Matt. 5:14-16).

The story which presents our Lord as the light and the light giver is that of the man born blind. Four choices confront us.

I. Guesswork or God's Glory (vv. 1-5).

Men have an inordinate curiosity about those who are handicapped or crippled. Even the disciples of Jesus had fallen into the sad tendency of seeing in one who needed their help, a case for theological speculation rather than one in whom God's glory could be revealed.

Need without power to help is a depressing thing, and may encourage man to a bit of scientific or religious guesswork. Here is a specimen—let us examine it. How did this happen? Who was responsible? But when we know the power of God, guessing and theorizing is gone. Here is help!

Jesus declared a great truth here—suffering is not necessarily the result of sin, nor for the purpose of judgment or punishment. This man was here that God might show His grace and power.

Those who suffer in our day may be the means of declaring God's glory, either by His deliverance from pain and sorrow, or by His grace to bear the burden graciously and for His glory.

II. Impossibility or Obedience (vv. 6-7).

"Clay cannot bring sight to a man's eyes—anyone knows that! All such a covering can do is to make the darkness of sightless eyes even more impenetrable." The blind man might have reasoned that way. He would have been entirely logical in so doing—and he would have gone right on being blind.

It is possible to thrust from you God's richest blessing by insisting that God's work be done in accord with your ability to understand.

But the blind man chose the obedience of faith—"he went . . . and washed, and came seeing." Jesus is the light of the world to those who will believe. The blind man found it so—we may also find it to be true, if we will believe. The impossible becomes possible—with God, for "with God all things are possible." Jesus said it (Matt. 19:26); let us believe it and act on it.

III. Controversy or Confession (vv. 13, 34-38).

This is a great chapter, one in which we see the glory of faith contrasted with the controversial smallness of unbelieving men. The Pharisees were religious men, but they hated Jesus (a combination possible even in our day), so they sought in every possible way to discredit Him, to deny the miracle, and to destroy the one who was healed.

Against that dark background the light of this man's faith shines the more brightly. The more they tried to confuse him, the deeper they entrapped themselves, as he answered in simple faith.

Testimony is a tremendously effective thing, even though it must cling to the elementary and blessed truth "I was blind, now I see" (v. 25). But note that he went on, and under the tender ministry of Jesus, he received his spiritual, as well as his physical, sight. "I believe"—what majestic words, what transforming words, what world-shaking words! Friend, do you believe on Christ? If not, will you do it right now?

IV. Healing or Hardening (vv. 39-41).

The same sun which softens the wax hardens the mud. The light which attracts some out of the dark places causes others to shrink farther into the shadows lest they have to give up their dark deeds and thoughts.

So it was in this case. The blind man who had faith, saw, and that sight was the sight of the soul as well as of the body. But the embittered Pharisees were only hardened in their sin. Because they boasted of their spiritual sight which made the ministry of Jesus unnecessary (as they thought!), there was nothing for Him to do but to leave them in their darkness.

The light of Christ, which is to shine on the problems of life in the lessons of the three months ahead of us, will either bring men to the light in faith, or confirm them in their unbelief. Which is it to be in your case and in that of those to whom you minister?

SEWING CIRCLE PATTERNS

Sports Jerkin Has Dozen Uses

Sure to Flatter

A CLASSIC which has a dozen uses and which is flattering on all types of figures. The tailored, buttoned-under-the-arm jerkin can be worn over cotton sports shirts, or can be worn as a cool "sunbacker" top over slacks or shorts.

Barbara Bell Pattern No. 1222 is designed for sizes 11, 12, 13, 14, 16 and 18. Size 12, jerkin, requires 1¼ yards of 39-inch material; skirt, 1⅞ yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

ASK ME ANOTHER?

A General Quiz

1. Does Newfoundland belong to Canada?
2. Was Abraham Lincoln over 6 feet tall when in his teens?
3. How large does a country place have to be before it is called an estate?
4. What name is applied to a phrase or sentence which reads the same forward or backward?
5. How long has the American flag had 48 stars?
6. What bay on the North American coast is noted for its exceedingly high tides?
7. What country was once called Caledonia?
8. Generally speaking, do pianists have delicate hands?

The Answers

1. No. It is a British colony, entirely independent of Canada.
2. He reached his full height of 6 feet 4 inches at the age of 17.
3. The bureau of census defines a country estate as a farm of 10 acres or over, with a residence valued at $25,000 or over.
4. Palindrome.
5. Since 1912.
6. The Bay of Fundy.
7. Scotland.
8. The hand of the average concert pianist is exceedingly muscular.

NEW PHEASANT SEASON OPEN OCT. 28 TO DEC. 8

Tuesday the State Conservation Commission announced the longest open season o pheasants Iowa has ever had, 42 days in this part of the state, October 28 to December 8.

The bag limit is six male birds each day. No hens are allowed to be shot this year.

V. B. Hamilton To Speak At Annual F. B. Meeting, Oct. 19

V. B. Hamilton, former secretary and treasurer of the Iowa F. B. F. will be the feature speaker at the annual meeting of the Hancock County Farm Bureau on October 19, according to V. A. Cook, president.

Mr. Hamilton is well known to many Farm Bureau members. Plan to hear his discussion on Oct. 19.

SEAMAN WADE ENTERTAINED AT PARTY FRIDAY EVE

Miss Doris Spitler entertained a group of young people at a weiner roast at her home Friday evening in honor of Seaman Russel Wade, who is home on a 30-day furlough.

The evening was spent in playing games.

After enjoying a short vacation here visiting with his parents, Rev. and Mrs. Calvin Grosshuesch and family, Reuben Grosshuesch left again Sunday for Plymouth, Wisconsin where he is a student in the Mission House Seminary. Grandma Grosshuesch accompanied him and will visit with her sister, Mrs. Ellicker at Madison, Wisconsin.

Mr. and Mrs. Lee Stewart, of Webster City came for visit at the Louis Perkins home Sunday. Mrs. Bert Hinton, mother of Mrs. Perkins, acompanied them to Webster City for a visit. Mrs. Hinton also expects to go to Chicago for a visit.

Mr. and Mrs. Theo. Wright of Belmond visited Sunday afternoon and evening at the Sumner Trumbell home.

Bread baking is one of the most ancient of human arts.

HIGHWAY VACATION NOTICE

To the Bankers Life Company of Des Moines, Iowa, Geo. F Heginger, to occupants of the West half section thirty-three (33), Township ninety-four (94) North, Range twenty-four (24) West of the fifth P. M and the SE¼ of section thirty-three (33) Township ninety-four (94) North, Range twenty-four (24) West of the fifth P. M and to all whom it may concern:

The Commissioner appointed to vacate a road sixty-six (66) feet wide commencing at the Southeast corner of section thirty-three (33) Township ninety-four (94) North, Range twenty-four (24) West of th 5th P. M., Hancock County, Iowa, and running thence West between section thirty-three (33) in Twin Lake Township, Hancock County, Iowa, and section four (4) in Belmond Township, Wright County, Iowa, a distance of one (1) mile and terminating at the Southwest corner of section thirty-three (33) Township ninety-four (94) North, Range twenty-four (24) West of the fifth P M, petitioned for by Mary E. Hildebrand et. al, has reported in favor of the vacation thereof, and all objections thereto, or claims for damages, must be filed in the office of the Hancock County Auditor at Garner, Iowa, on or before noon of the twentieth (20th) day of November, A. D 1944, or such road will be vacated without reference thereto.

Witness my hand and seal this 13th day of September, A. D. 1944.

(Signd) FRED C. MISSAL,
County Auditor in and for

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Lydia Pearson was a Mason City visitor Saturday.

Mr. and Mrs. Wm. Bell and Jeff were Clear Lake callers Tuesday.

Mrs. Sumner Trumbell visited with her sister at Goodell Friday.

The annual meeting of the Liberty Farm Bureau will be held at No. 5 School on October 5th.

Mrs. Blanche Fredrick and Mrs. George Buseman were Mason City visitors Friday.

W. F. Pavey atended a sale of blacksmith tools and equipment at Forest City Saturday afternoon.

Mrs. Gerald Koerner and Mrs. John Clements were Mason City callers Friday.

Mrs. Harvey Hubbard spent Saturday visiting with her parents at Goodell.

Mr. and Mrs. Clarence Bachman and children visited Sunday afternoon at the Wm. Lacey home.

Mrs. R. W. Elder was at Mason City Tuesday afternoon on business.

Mrs. Paul Kramer assisted with work at the John Bachman home in Garner, Tuesday.

Mrs. C. A. Larsen and Clarence Jr., were at Belmond Tuesday afternoon on business.

Mr. and Mrs. Wm. Rhinehart of Alleman spent Sunday at the parental J. J. Cook home.

J. A. Chambers entered the hospital at Belmond Tuesday for a few days medical treatment.

Mrs. C. A. Larsen visited with Mr. and Mrs. Herb Bailey at Belmond Sunday afternoon. Mrs. Bailey has not been well lately.

Rev. Harvey returned Saturday evening from Sioux City where he went to attend the annual Methodist conference.

Mr. and Mrs. Lyle Liebendorfer of Forest City, were dinner guests Sunday at the R. A. Jorgenson home.

Mrs. Martin Karsjens was a patient at the Mercy Hospital at Mason City from Thursday until Sunday, receiving treatment.

Mrs. Naska Bock was visiting at the home of her son, Mr. and Mrs Ed. Bock and family at Garner on Monday afternoon.

The Methodist CSCS children will not meet Sunday, but will hold their meeting on Sunday October 8th at 10:00 a. m.

Mr. and Mrs. Fred Bachman and Seaman Wayne Bachman, who is home on furlough, visited at the Rob Roths home Sunday.

Charles Gibbs and family of Mason City visited at the home of Miss Anna Gibbs Saturday afternoon.

The Becker sisters have received word from their nephew, Seaman Eugene Habercamp, that he is now in New Guinea.

Mr. and Mrs. Clifford Montgomery entertained to dinner Sunday, Mr. and Mrs. Elmer Larson and family.

Mrs. Swanetta Haefner and son spent the week end at Aplington, visiting with her brother who was home on a furlough.

Rev. and Mrs. H. E. Harvey were entertained to a wedding dinner at the Tompkins home northwest of Ventura Sunday evening.

Lloyd Smith has been ill the past week suffering with yellow jaundice. However, he has been able to take care of his cream route.

G. B. Kirchner, manager of the Avery Theatre at Garner, chairman of the Clothing for Russia drive, was in Klemme Saturday evening getting the campaign lined up.

The Fred J. Arnold family has been ill the past week, and this week a registered nurse is on the job taking care of Mrs. Arnold and Bobby, both ill with the flu.

Grandma Caroline Schlawin was visiting at the G. A. Goll home on Monday. Mrs. Schlawin has been at the Carl Wille home for several weeks.

Mr. and Mrs. Donald Braner and baby son, Randall Lee of Belmond, visited at the parental Earl Ruka home Sunday evening and were supper guests.

Howard Spitler and family were supper guests Sunday evening at the John Spitler home in Belmond.

Doris Spitler spent the week end visiting with Vivian Harberts.

The Methodist Loyal Workers Sunday School Class will have a dinner at the church Sunday. You are asked to bring covered dishes for the pot-luck dinner.

Miss Novella Bredbenner, who teaches in Des Moines this year, spent the week end in Klemme visiting with her mother, Mrs. Martha Bredbenner.

The Methodist ladies will quilt again Thursday afternoon and are asked to bring sacks that can be made into dish towels needed for the fall bazaar.

Mr and Mrs. Clifford Montgomery and children visited at the C. A. Bachman home Friday evening.

Mr and Mrs Virgil Waddingham visited at the Harm Dirks home on Sunday.

Wm Lacey, Margaret and Klevin went to Mason City last Wednesday and brought Mrs. Lacey and infant home from the hospital. The Laceys have named their new son, Donald Eugene.

Junior Roths arrived home last Thursday from Van Couver, Wash. to spend a vacation visiting with his parents, Mr. and Mrs. Tom Roths. Junior has been working in the shipyards at Van Couver.

Mrs. Louise Johnson of Goodell, mother of Mrs Clara Smith, Klemme school teacher, left Sunday for New Richland, Minnesota, for a visit with her daughter, Mrs. John Hagen.

Pvt Calvin "Bill" Grosshuesch left Tuesday night for Ft. Benning, Georgia, where he will continue a special course in radio. "Bill" has been home on a furlough from Camp Roberts, Cal.

Mr. and Mrs. Lester Stille and daughter and Mr and Mrs. Benn Coobs and Peggy went to Humboldt Sunday for a visit with the P. W. Johnson family, former residents of Klemme

Mr and Mrs J A. Chambers moved into their new home the latter part of the week and Mr. and Mrs Ira Overholt moved into their own house, vacated by the Chambers family.

Mrs. Viva Linville and daughter, Mrs. Roche Murray and son from Chicago, came Sunday morning for a visit with their mother, grandmother and great grandmother, respectively, Mrs Frances Ridder and other relatives in the community.

Mr. and Mrs J A Chambers, Mr. and Mrs. Ira Overholt, and Mrs. R. A. Jorgenson, attended the Republican luncheon at Garner on Friday noon. Speakers on the program were Gov. Bourke B. Hickenlooper and James Dolliver.

Mr. and Mrs. John A. Johnson have received word that their son-in-law, Donald Carson, has been advanced by the Navy Department from the rank of Lieutenant, junior grade to Lieutenant, senior grade. He is in the Naval Air Corps.

Pvt. Otho K. Keraus will leave Friday for Miami Beach, Florida for re-assignment. Pvt. Keraus was home on a furlough after nearly three years of service overseas. He is a son of Mr. and Mrs. W. C. Keraus. Mrs. Otho Keraus has returned to her work in Minneapolis.

Several more houses have been painted in Klemme recently, adding to the neat appearance of our little city. Houses we refer to are Fred Bell's, Grandma Roths', Mrs. Frances Swalve's and Carl Heginger's. Quite a number of other houses have been repainted here this past summer.

Mrs. Frank Gruetzmacher expects to leave soon for Des Moines where she will spend the winter with her daughter Glenna, who is a high school teacher in Des Moines. Mrs. Mary Waterman will occupy Mrs. Gruetzmacher's apartment as soon as Mrs. Gruetzmacher leaves Klemme.

Mr. and Mrs. Erick Meyer and three children from Sheyboygan, Wisconsin, have moved to Klemme and are residing in the house recently vacated by Roy Smock and family in the northeast part of the town. Mr. Meyer is a painter by trade. We welcome the Meyers to our little city.

The Law vs. Snake Worship. With another misguided cultist dead from a rattler's bite, Gerald Duncan tells how the State of Kentucky ponders what to do with its curious sect of serpent handlers. In The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Liberty Young People To Entertain Youth From Seven Churches

SUB-DISTRICT RALLY WILL BE HELD AT LIBERTY OCT. 15

The Liberty Youth Fellowship will entertain the Garner Sub-District Rally of the seven Methodist Churches with their pastors and young people on Sunday, October 15th, from 4.00 until 8:30 p m.

The principal speakers will be the Rev Alvin T Maberry of Buffalo Center; the Rev Geo. A Shiels of Corwith, and Miss Hilda Abele, the local president Rev. Maberry will give the evening address to which the public is invited.

MISS PEGGY COOBS PRESIDENT OF YOUTH SOCIETY

The Klemme Youth Fellowship met Sunday evening for reelection and business After devotions by Miss Peggy Coobs, Rev H. E Harvey assisted by Junior Larsen and Miss Thelma Renner, gave a lesson in the form of a forum. The officers elected for the year were as follows:

President, Miss Peggy Coobs.
Vice-Pres, Clarence Larsen, Jr.
Sec., Miss Dorothy Ellingson.
Recreation Commissioner, Roger Ridder.
World Friendship Chairman, Miss Lois Stille.
Community Service Chairman, William Montgomery.
Pianist, Miss Marcille Josten.

Following the election a social hour was enoyed with refreshments.

SEWING MACHINE CLINICS WILL BE HELD IN COUNTY

Miss Hazel Grimes, county extension home economist, finds that due to the clothing situation many Hancock County women are planning to do more home sewing this year A clean, oiled, correctly adjusted sewing machine is of prime importance.

In order to help meet this situation the first lesson in the county extension program will be cleaning and adjusting sewing machines. Whether a machine is new or old, the owner needs to know how to care for it.

Women who wish to obtain this training should let their neighborhood cooperator or township chairman know soon. The number of machines needed for the lesson and other details will depend upon the number of people.

The following township dates for the sewing machine clinic have been set: Avery on November 1st; Amsterdam, Nov. 14; Orthel, Nov. 16; Ellington, Nov. 24; and Bingham on Nov. 30.

Miss Grimes says other township dates will be made for the last of October, November and the first part of December.

LIBERTY HOME BUILDERS ORGANIZE AT MEETING

A group of young married folks met at the Liberty Church Sunday evening for a social and business meeting. After the supper hour an election was held with the following results:

Pres, Mrs. Bernard Pringnitz.
Vice-Pres., Kenneth Schultz.
Sec-Treas, Mrs. Carol Brager.
Teacher, Emil J. Blumer.
Asst. Teacher, Kenneth Schultz.

The next meeting will be on Friday night with an oyster stew at the church.

COOK PROTESTS O. P. A. RULING ON SPUD PRICES

Telegrams have been sent by V. A. Cook, Klemme, president of the Hancock County Farm Bureau to Senator Guy M Gillette and Senator George A. Wilson, Senate Office, Washington, D. C., and our Representative, Hon. F. C. Gilchrist New House Offices, Washington, D. C. protesting the O. P. A. ceiling price on potatoes because the ceiling in this area is less than any other area in the State.

It is the feeling of the Hancock County Farm Bureau that it is just as necessary to have the same ceiling price for areas that were flooded out as it was for areas that were damaged because of drouth.

SUPERVISORS AWARDED CONTRACT TO CLEAN DITCH

The Hancock County Board of Supervisors awarded a contract to the Peterson Construction Company of Minneapolis for the clean-out of the main open ditch and lateral No. 6 of drainage district No. 9 in near Klemme.

The job involves the excavation of approximately 50,000 cu. yards of dirt and the contract price is approximately $12,000.

Work will commence as soon as the contractor can get equipment on the job and must be completed by August 1, 1945.

UNITED SERVICE WOMEN SEND PACKAGES OVERSEAS

The United Service Women of Klemme packed and mailed out 45 packages this week to men in the Service overseas. There are nine more packages being held up waiting for addresses.

The ladies are quilting their service man's quilt at the Henry Jost home this week. They will give the quilt away Saturday evening, October 14th The quilt will be on display in Thada's window.

The ladies will hold their rummage sale on Saturday, Oct. 14th all day and evening, and coffee and doughnuts will also be sold.

4.H Club Girls Helped With Farm Work Past Year

Our Men In The Service

Klemme Soldier Hit By Shrapnel, But Escapes Injury

Kermit Smith, son of Matt Smith of Klemme, always seems to be where the Nazis are throwing their ammuniton. Sometime ago he was injured in battle and hospitalized for a few weeks, for which he received the Purple Heart Medal, now on display at the Smith home.

Kermit wrote his father that he stopped a chunk of Nazi shrapnel with his shoulder, but luckily it did not penetrate and he was uninjured.

Klemme Dentist Sets Up Clinic In Paris, France

Mrs. E. G. Schaeffer has received word that her husband, Capt Earl Schaeffer is now in Paris and has set up his dental clinic there Capt Schaeffer, former Klemme dentist now with the U. S. Army, says he likes Paris very much.

Wayne Buseman Gets Promotion In New Guinea

Mr. and Mrs. George Buseman have received word that their son, Wayne, has been promoted from the rank of Corporal to the rank of Staff Sergeant. Sgt. Buseman is in the New Guinea area.

Pfc. Charles Bock Has New Address

Pfc. Charles Bock, son of Mr. and Mrs. Philip Bock is now stationed in Florida. His new address is as follows:

Pfc. Charles Bock 37670924,
371st H. C. Co., Area I,
Camp Gordon Johnston, Florida.

Pvt. "Bill" Grosshuesch Studying Radio At Fort Benning

Pvt. Calvin "Bill" Grosshuesch who was recently home on furlough from Camp Roberts, Cal., is now stationed at Fort Benning, Georgia where he is taking an advanced course in radio. Bill's new address follows:

Pvt. Calvin Grosshuesch,
24th Co., 1st Str., E. C. C. 56,
Fort Benning, Georgia.

LIGHT FROST IN NORTH IOWA DID NOT DAMAGE CROPS

North Iowa experienced its first frost of the season last Thursday night, September 28th. However, the frost was so light that crops were not damaged.

4-H GIRLS TO STUDY FOODS AND NUTRITION THIS YEAR

"Foods and Nutrition," emphasizing food preservation, meal planning and simple cooking will be the home economics project for Hancock County 4-H Club Girls during the coming year. Plans for the project, as well as for other phases of the club program, were discussed Friday, Sept. 29, when members of the county 4-H Girls' Club committee, local leaders and county extension staff members met with Mrs Ella Lougran Brown from Iowa State College.

Hancock County 4-H Girls last year studied Home Efficiency. Each girl made several articles which could be used in her home to make it more efficient, such as a bulletin board for the kitchen, a liner for the clothes basket, and a kitchen truck. Each girl also assumed the responsibility for at least one new home task. In addition, they helped with gardens, canning, poultry flocks and with field work to relieve labor shortages. The girls bought War Stamps and Bonds and participated in many other war activities.

Three leader training schools will be held this year in connection with the home economics project, in order that leaders may be prepared with a maximum of up-to-date information to pass on to their club members. These meetings are scheduled as follows: October 19 at Hayfield; January 11 at Britt; April 17 at Garner.

CONTOUR FIELDS TO BE INSPECTED ON OCTOBER 6

Field Day And Soil Conservation Study At Crystal Lake

October 6 at 1:30 p. m. is the date for a field inspection of the contoured fields on the College Farm at Rex Austin's farm and on the Harry Riehm farm. There are some interesting observations on all three of these fields.

Iowa State College will show what has happened to crops planted after the flood on the peat land. Some interesting observations may be made for a commercial vegetable grower or anyone having peat soils.

The contoured fields and the drainage demonstrations will also be of special interest. Nearly every farmer has either a run-off or a drainage problem.

Paul Henderson, County Extension Director, urges you to attend this field day put on through the cooperation of the Soil Conservation Service, Experiment Station, Extension Service of Iowa State College, County Farm Bureau and cooperating farmers.

The practice of selling art by auction in England dates from the 17th century.

Planless Planners

SCRAP TO JAPS

years the Republicans fought ace an embargo on scrap iron an. On January 3, 1939, Rep. Crawford, (R. Mich.) introa bill in Congress to stop the of scrap iron, pig iron, and scrap to that country. Not 1941 did the administration stop ale of scrap. This was too late event the building of the Jap machine.

the first 8 years of the New over 10,000,000 tons of scrap went to Japan. This amount have built 20 battleships of tons each, 50 plane carriers ,000 tons each; 100 cruisers of tons each, 500 submarines of tons each; and still leave near-000,000 tons for planes, tanks, s, torpedoes, and bullets.

ring the Roosevelt depression ere buying toys, novelties and ery from the Japanese while rican plants remained idle. Our s could not compete with 25-per-day Jap labor.

Do It With Dough!

hope we get 25 million dollars. ant all we can get. The more et, the more we can spend. The we spend, the better Congress ill have. The more we spend in

WEEKLY NEWS ANALYSIS

Allied Columns Thrust Toward Industrial Belt in Rhineland; U. S. Carries War to Philippines

Released by Western Newspaper Union

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Belgian pedestrians stand by as U. S. medical corps men dress wounds of German soldiers caught in withering machine gun fire.

EUROPE:

Sight Rhineland

Quickly catching their breath after their drive across France and Belgium, the valiant U. S. First and Third armies renewed their offensive against a reorganized enemy in a supreme effort to knock the Germans out of the war this year.

While the Nazis regrouped behind their vaunted Siegfried line, or west wall, Lieut. Gen. Courtney Hodges' First army and Lieut. Gen. George Patton's Third rolled forward again, with the former's strong armored forces thrusting against the fortress city of Aachen, gateway to the rich industrial Rhine valley to the northeast, with its great manufacturing centers of Cologne, Dusseldorf, Duisberg and Essen.

As General Hodges' troops gathered strength for their smash into the Rhineland, General Patton's men worked their way beyond the bitterly defended Moselle river against the rich Saar coal and manufacturing country, which curves off sharply to the east with the winding German border.

To the south of General Patton's Third army, Lieut. Gen. Alexander Patch's Seventh drew up its ranks before the historic Belfort Gap, great open plain lying between the Vosges mountains and the Swiss border and leading into southern Germany. As the Seventh army with its complement of French troops smashed at the enemy here, it encountered stiffening resistance and heavy artillery fire from the hills beyond.

As the U. S. First, Third and Seventh armies smashed against Germany's western frontier in a quick move to end the war, British troops worked their way slowly against bitter opposition through southeastern Holland, where the enemy contested their advance in strength in an effort to protect the far northern flank of their Siegfried line, reportedly its weakest link.

Do or Die

As the reinforced U. S. Fifth and British Eighth armies threw their full strength at Germany's Gothic line in northern Italy, guarding the rich agricultural and industrial valley of the Po, Nazi Field Marshal Albert Kesselring went all out in an effort to hold his ground.

With his 19 divisions of roughly 250,000 men outnumbered by the Allied forces, Kesselring was placing his chief reliance on the mountainous terrain, and other improvised obstacles dotting the rugged countryside, such as tank traps and buried tank gun nests, etc.

U. S. officers looked to "tough fighting" ahead.

Utilize Manpower

With manpower always Russia's strategic military trump, the Reds were making full use of it on the eastern front, where four major actions were in progress against the Germans' shortened, but strained, defense lines.

In the north, the Reds were grinding their way forward against the enemy's stiff East Prussian lines, and attacking heavily around Warsaw with armored columns that were drawing a steady stream of Germans into the fight.

To the south, strong Russian forces held up about 100 miles from Germany proper, switched their attack to the mountain passes leading into Czechoslovakia, while deeper in the Balkans, the Reds were pressing on Hungary's Transylvanian wheat fields.

MISCELLANY

EMPLOYMENT: Of the 53,170,000 persons employed in the U. S., 18,440,000 are women, the bureau of census reported. Although 3,000,000 women were added to payrolls during the 12-month period ending in August, 1943, there was no appreciable increase in the following year. As a whole, the civilian labor force decreased 1,000,000 from July to August, 1944.

CROPS:

Huge Harvest

With August rains checking the serious deterioration of the crop in the drought area east of the Mississippi, the U. S. department of agriculture predicted a bumper corn harvest of 3,101,319,000 bushels for 1944, second largest on record.

With the wheat crop set at an all-time high of 1,115,402,000 bushels, oats production at 1,190,540,000, barley at 290,036,000, soybeans at 179,024,000 and sorghums at 149,962,000, a total grain harvest of over 6,000,000,000 bushels was predicted.

Because of the bumper crops and reduced feeding, the live stock and poultry industry should find sufficient grain available throughout the coming months, the USDA declared.

Markets Dip

With the USDA reporting excellent crop prospects, prices on leading grain markets dipped, with only wheat bearing up under purchases of the Commodity Credit corporation and information that the agency was interested in deferred shipments.

PACIFIC:

Homecoming

Two and one-half years after the Japanese over-ran the Philippines, U.S. naval forces under Admiral Chester Nimitz's command have come back to subject enemy installations on the islands to withering aerial and artillery fire.

Adm. Nimitz

At the same time, marine and army assault forces under Admiral Nimitz's command swept ashore on the Palau islands, 600 miles east of the Philippines, while units under Gen. Douglas MacArthur's leadership invaded the Moluccas, 300 miles south of the Philippines, thus establishing a menacing steel ring around the islands.

Presaging major operations against the Philippines guarding the enemy's vital supply lines from the Indies to the west, U. S. naval aircraft swept over the southern string of islands, lashing at enemy planes which had been carefully husbanded to resist U. S. advances. Big battleships, riding with smaller cruisers and destroyers, raked enemy shipping, using water routes to supply the disconnected jumble of islands.

PETROLEUM:

Draw on Stocks

With military requirements approximating 800,000 barrels daily out of total production of 2,000,000, there is little possibility of an easing in gas rationing until after the end of the European war, the Office of War Information declared.

The tightness in the gasoline situation exists even though the output of crude oil for petroleum production has averaged an all-time high of 4,470,000 barrels daily, natural gas output has approximated 269,000 barrels daily, and imports are above the 1941 level.

With demand outrunning supply, the industry has been compelled to dip into reserve stocks at a rate of 2,500,000 barrels of crude monthly, OWI said, bringing holdings to the lowest level since 1922.

Hidden Resources

Although present U. S. oil reserves are estimated at 20 billion barrels, our known oil in the ground actually is nearer 100 billion barrels, much of which could be recovered by some new method or if higher prices were established, this is the opinion of experts.

No nation has been completely explored for all of its oil possibilities, and in countries of greater area, only a small fraction of existing resources have been tapped, the experts added.

AIR TRAVEL:

Postwar Preparation

Taking full advantage of the wartime stimulus given aviation both in the development of equipment and transportation service, three major airlines planning for postwar traffic placed orders for 93 super sky ships with the Douglas Aircraft company at a cost of more than $50,000,000.

In filling the orders, Douglas will furnish DC4 ships carrying 44 passengers and cargo with a speed of four miles a minute, and DC-6s accommodating 56 passengers and cargo with a speed of five miles a minute. Both planes are a development of Douglas' C-54 military cargo ship.

Four-engined and powered by Whitney Wasp motors, the planes will cut coast to coast schedules to 8½ hours, officials said, and reduce the Chicago to New York flight to 2 hours and 40 minutes.

NO STRIKES:

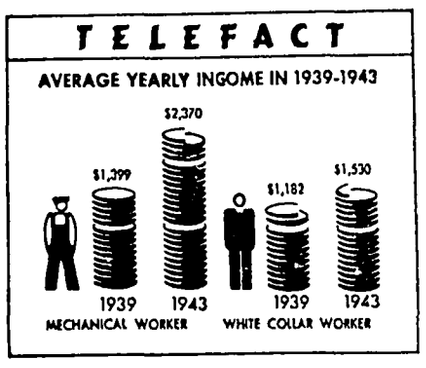
UAW Keeps Pledge

Predicting that the "Little Steel" wage formula limiting wartime pay increases to 15 per cent over January, 1941, levels would be altered to meet labor's complaint that living costs have soared far above the permitted boost, CIO Pres. Philip Murray joined United Automobile Workers union officials in pressing membership to maintain the no-strike pledge for the duration of the war against Germany.

Although 3,801 votes were mustered against keeping the no-strike pledge at the UAW's convention at Grand Rapids, Mich., a majority of 6,463 favorably responded to the bigwigs' plea to retain it.

Miners Meet

While the biggest union in the world — the union John L. Lewis helped to build — was meeting in Grand Rapids, the United Mine Workers were holding their biennial convention in Cincinnati, Ohio.



Here, in all of his glory, shaggy, portly John L., who seemed to have ridden out a rebellious movement led by one of his ex-lieutenants for district self-rule in the union, railed against the record of mine disaster victims as "butchery" and a "crying national shame."

Said Lewis: " . . . The time is coming when this union will have to take stern action to abate this slaughter of our people. Were this war not on, I would be prone to recommend that the coal miners . . . stop coal mining for a time until we receive assurances from the operators of a greater degree of safety."

BIG TWO:

Meet in Quebec

Although selection of a supreme commander for the Pacific and master overall plans for dealing a deathblow to the Japanese chiefly occupied the attention of President Roosevelt and Prime Minister Churchill at their second historic Quebec conference, postwar European problems also loomed importantly in the discussions.

Foreign Secretary Anthony Eden's dramatic last-minute airplane dash to Quebec following talks with the Polish government-in-exile's cabinet officials led to reports that the conferees went over Premier Stalin's claims to eastern Poland, and his suggestion that Poland be compensated for this loss of territory through annexation of German soil.

Because of the eastern front's pressing demands on his time, Premier Stalin regretted his inability to attend the discussions.

ARMISTICE:

Pattern Set

Armistice terms under which Romania agreed to pay Russia $300,000,000 in goods, industrial equipment and foodstuffs in six years was considered to constitute a model for other dealings with enemy countries.

Because of Romanian participation in the war against Germany under Russian command, however, the reparations payments reportedly were scaled down.

Other conditions of the armistice included Romania's cession of Bessarabia and Bukovina to Russia, restoration of all Allied property, abolition of racial discrimination laws, and elimination of Fascism.

PAYROLL

Declaring that about 5 per cent of the working population in the U. S. is now employed by the federal government, Sen. Harry Byrd (Va.) revealed that there were 3,112,965 persons on the payroll July 31, exclusive of 252,978 war department employees engaged outside of the country.

Contradicting the U. S. civil service commission's report of personnel cuts, Byrd said the payroll increased by 96,046 between May and July.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

CONGRESSMEN TO LONDON

Without any publicity, the British government has quietly moved to improve British good will by arranging air transportation for six congressmen to London. They will inspect the damage done by the robot blitz and take side trips into France.

The British embassy did not actually invite the congressmen to come to England, but made a point of letting three Republicans and three Democrats know that seats on British planes leaving New York for London were available.

First pair to go were Representatives James Richards, South Carolina Democrat, and Karl Mundt, South Dakota Republican. They were followed by Democratic Congressman Brooks Hays of Arkansas and Republican Walter Judd of Minnesota. The latter trip may be significant since it occurred only a few days after these two had introduced their resolution calling for bi-partisan consideration of the peace terms by this country.

The last pair includes Republican Walt Horan of Washington and Democrat Chet Holifield of California. Holifield, incidentally, was planning a quick trip overseas in order to check on some lend-lease matters for the house Democratic leadership. Each pair consists of one Republican and one Democrat, with the British determined to do all they can to prevent inter-party strife in the U.S.A. from interfering with the peace conference.

The congressmen were told by the British: "We have already been host to several American scientists and educators for brief trips across, and we don't like to discriminate against congressmen."

* * *

ALLIED SKI TROOPS

For the first time in the war, Canadian and American ski troops are due to see the sort of action they were trained for.

The first special service force, trained in mountain warfare at Helena, Mont., and in Alaska and the Aleutians, is now in southern France with the forces of General Patch. A thrust across the Maritime Alps into northern Italy will give them their first actual skiing action. This special service force includes both Canadians and Americans, and will probably come up against German rear-guard units as the Allied armies chase the Nazis toward the Brenner pass.

* * *

ELECTION IN BRITAIN

British government leaders aren't saying anything about it, but Roosevelt has been tipped off by Churchill that immediately after the fall of Germany a general election will be held in England.

In fact, Churchill's Conservative party leaders have already sent instructions down to their borough leaders to begin organizing for a national election.

Churchill's party strategists have already had conferences with leaders of the Labor party and have sought their support for a continuation of a future coalition government. The Labor leaders of the Churchill cabinet, however, have said no. They believe that after the war, Labor should go on its own.

Conservative leaders, however, figure that the rank and file of the Labor party will not follow their leaders but, instead, will follow Churchill.

Churchill's move in calling the general election immediately after the armistice is considered very shrewd timing. Today he is popular in England. A few months from now he may not be. The British prime minister will stand on his war record, and his cooperation with Roosevelt will not be played down as one reason why he should be returned to power. It is expected that the Conservative party will win without too much difficulty.

* * *

NAZIS IN SPAIN

Once again Nazi troops are making for Spanish soil. Members of the army which got its first taste of war seven years ago by putting Franco in Madrid, today are stealing through the French countryside below Bordeaux to be interned in Spain rather than be captured by the Fighting French. This was why the Spanish ambassador in Washington last week issued his statement barring Nazi exiles.

However, a real test of U. S.-Spanish policy is in the making. Some Nazi military men are already in Spain, plus French collaborationists who will later be charged with war crimes against France. It will be up to U. S. Ambassador Carlton Hayes, apologist for the Franco government, to deal with them.

* * *

CAPITAL CHAFF

¶ GI Joes are plenty peeved over the army's mustering-out pay program. Canada gives its discharged men $100 for clothing, plus $9 for each month's service.

¶ GI Joes are writing the war department that most men will need an entirely new wardrobe costing their total mustering-out pay.

¶ Officers receive extra pay for all the time-off they are entitled to when they leave the service. . . . GIs want to draw their furlough pay when they leave the army too.

Walter Winchell

(WNU Service)

Notes of a Newspaperman:

Londoners relayed this one via D. Chandler . . . About the luncheon rendezvous between the King and General Eisenhower, during which His Majesty turned to the General and remarked: "What do you think of Montgomery?"

Eisenhower paused and then replied: "He's a great military genius, but frankly I often have the feeling he's trying to get my job."

"Oh, really?" said King George. "I'm glad to hear that."

"How do you mean," Ike asked, "you're glad?"

"Well," answered the King between giggles, "to tell the truth I've been a little worried about the same thing, myself!"

If this George Bernard Shaw sally has been printed, it eluded us. Tennyrate, at his last birthday he told newspapermen: "Yes, I am now 88 and I haven't an enemy in the world, not one enemy!"

"A beautiful thought," responded a reporter.

"Yep," added Shaw, "I've outlived them all!"

At a Hollywood gathering the other night Donald Ogden Stewart made a talk on the brave new world. He told the story of the little boy whose Sunday school teacher asked who made him. The boy replied: "I'm not done yet. I plan to have a part in making myself."

Joe Alger is the chief copywriter of Life promotion . . . With others on the staff Alger was figuring out a new slogan for Fortune . . . Fortune, they all agreed, was changing in character and it should also have a new slogan . . . His clown suggestion got a howl, to wit: "Although Fortune is only half the size of the phone directory—it is twice as interesting!"

Mark Ethridge, the Louisville newspaperman, and his wife recently had Vice President Wallace as their house guest . . . Mrs. Ethridge recruited the entire family to help dust off things, wash every window, etc. . . . After two days of housecleaning, Mrs. Ethridge cautioned the children: "Remember now, Mr. Wallace is a very simple man."

"Well, if he is," groaned the tiniest of the Ethridges, "then all I can say is that we've done a lotta unnecessary work!"

It happened in the Stork Club . . . Two handsome young Army lieutenants walked in and table-for-two'd across the way from where a Major was seated with a charming young thing . . . The wolves decided to try and meet her—but how? . . . They scribbled a note to the Major, hoping he would be flattered by it—and send for them . . . The note read: "We wish, sir, you would settle something for us. We are seated across the way. My friend says you impress him as being a lawyer in civilian life. I say you have the manner and poise of a dignified doctor."

The Major enjoyed the flattery for a moment but after noting their handsome features and youth, sent back this message: "I was neither a doctor nor a lawyer as a civilian. As a matter of fact, I was a taxidermist and I fully intend to preserve this pigeon for myself!"

Lint From a Blue Serge Suit:

Mme. Chiang Kai-shek walked out because his first wife is living in the house . . . Tax experts point out that Frank Sinatra's income of $1,450,000 will net him little more than $25,000 . . . The Dep't of Justice is insisting it be consulted on the legality of any peace treaties.

A movement has started to decorate Bob Hope, Jack Benny and others who have gone overseas with the boys . . . Ben Swig, a Boston realty man, bought the St. Francis Hotel (San Francisco) for 4½ mill. He paid $750,000 in cash. Four days later he sold half interest for that sum. In short, he owns a 4½ million dollar hotel for the price of a round trip ticket to the coast.

The G-Men have a complaint about a musician in a symphony orchestra. He allegedly refuses to play the National Anthem and curses it.

Baseball is the only enterprise that hasn't raised its prices . . . His friends are urging a high diplomatic post for Mayor LaGuardia . . . Knopf will get James Stevens' new manuscript, said to be a masterpiece. He gave Paul Bunyan to American literature.

William A. Lydgate, editor of the Gallupoll (his book, "What America Thinks," is due on the 26th), offers this to show what Americans think about Germany. Not long ago they took a poll asking people how they thought Hitler should be treated after the war. Practically everybody wanted him hanged, shot or imprisoned indefinitely. There were a lot of ingenious suggestions from the public. A San Francisco school teacher said: "Have somebody read his own speeches back to him day and night until he goes nuts."

...More Machinery in Use.

...ere has been a decided in- ...e in the use of farm machinery ...the outbreak of war. Today ...and is the most highly mech- anized farming country in Europe. The big tractor works that had contemplated closing down early in 1939 were given a contract by the government to produce all the tractors they could. Farm machinery was also shipped from Canada, Australia and the United States.

Making a "V for Victory" symbol with his pitchfork, George Casely, an English farmer, defies Hitler and his bombs. "He needn't think he can starve us out," said George, who operates a 50-acre dairy farm in Devon.

In order to make the best use of available machinery, plowing contractors were helped to extend their operations, and farmers were asked to help each other. In some counties implement depots, where a farmer could hire an implement for a few shillings a day, were set up. There has been a remarkable increase in the actual number of machinery of different types employed. The number of tractors has about tripled, cultivating instruments have increased about two and a half times the prewar level. Harvesting machinery, however, has not shown a comparable increase, but the introduction of improved types, such as the combined harvester-thresher, together with its greater use over longer hours per day and for longer periods, have helped.

Farm wages have almost doubled since the war and it is hoped to keep a considerable part of the increase after the war. This is important because tenant farming in England is widespread—most of the farmers do not own the land they work. They are furnished homes with garden plots as part of their wages, and usually live on one farm all their lives. The wages are reached by agreement between the National Farmers' Union and the Agricultural Farm Laborers' Union.

Britain Feeding Self Now.

Before the war Britain was only 40 per cent self-sufficient in food, and imported 8½ million tons of animal feed annually. Perhaps this was the basis for Hitler's decision not to invade England; it looked easier to bomb and starve the country into submission.

But while the bombs were dropping in London and the seacoast towns, the British farmers were busy plowing up the grasslands. In 1939 there were 19 million acres of these grasslands, and seven million acres have now been brought under cultivation. This is against two million acres of grassland plowed up in World War I. Today Britain is raising more than 70 per cent of its food.

The general policy governing agricultural production is laid down by the cabinet, and the minister of agriculture is responsible for carrying out the government's plans. The execution of these plans is in the hands of war agricultural executive committees, who in turn appoint district committees of local farmers. Farmers' organizations, land owners and agricultural workers all have their share in shaping the plans of the government, for the ministry of agriculture consults regularly with the National Farmers' union, the workers' unions, and the Central Landowners' association.

Before the outbreak of war in 1939 the minister of agriculture had called for an increase in the amount of land under the plow. In the spring of 1939 a subsidy of two pounds sterling ($8) an acre was granted for the plowing-up of seven-year grassland and bringing it into cleanliness and fertility, and immediately after war broke out, each farmer was asked to plow up roughly 10 per cent of his unplowed land.

Further financial grants are now made in order to encourage the production of certain crops and to discourage the production of others. Payments of four pounds ($16) per acre are made on crops of rye and wheat harvested, and ten pounds ($40) per acre on potatoes.

The Farm Survey.

However, much of the land has had to be reclaimed to offset losses of land to military and industrial use. Therefore, it was extremely important that the best possible use be made of each farm acre, and in 1941 the Farm Survey was initiated.

This survey consisted of: (1) a "farm record" for each farm, containing information under the following heads: conditions of tenure and occupation; natural state of the farm, including its fertility; the adequacy of its equipment; the degree of infestation with weeds or pests; the adequacy of water and electricity supplies; the management condition of the farm, and its wartime plowing-up record. The information on the management condition of the farm is summarized in the grading of the farm as: (A) well farmed, B) moderately farmed, and (C) badly farmed.

(2) The complete 1941 June 4 census return of the farm including all the usual statistics of crop acreages and live stock numbers together with supplementary information, asked especially for Farm Survey purposes, on length of occupation and rent of the farm.

(3) A plan of the farm showing its boundaries and the fields contained in it, on six-inch or 12½-inch scale.

The Agricultural Executive committees have the right of entry on all farms and the power, which it has not been necessary to use often, to remove inefficient farmers. They can compel farmers to follow their directions, and have the power to take over badly farmed land with the consent of the minister of agriculture. They may then rent this land to suitable tenants, or farm and improve it themselves. The land taken over is acquired at value when possession is taken, and within five years after the war it must be offered back to the original owner at a price determined by agreement or arbitration if the minister of agriculture believes the land will be properly managed and cultivated.

Today a trip through the English countryside is a refreshing experience. Wheat acreage has increased from a million acres in 1939 to 3,200,000 in 1944. Potato acreage was 700,000 in 1939 and is now 1,400,000 acres. Milk production has increased in consumption total from 363 million gallons in the year ending March, 1939, to 1 billion 40 million gallons in the year ending March, 1944.

Tractors, many of them from the United States, rip up the English grasslands as the British determinedly set to work to raise as much of their own food as possible. At the outbreak of the war in 1939, the British isles produced less than 40 per cent of their food. By 1944, they were raising 70 per cent.

After two lessons in one generation, the British farmer is determined that the land must not go out of cultivation again. Whether his desire will be realized or whether Britain will return to the policy of importing food as a balance to manufactured goods exported, is one of the problems of peace. Perhaps the two can be correlated with the increased use of farm products for manufacturing purposes.

In any event, the farmers of England have joined hands with all the farmers of the Allied nations to show that this most peaceful of occupations can become a mighty implement of war.

...ery Sort of Persuasion Used to Keep British Farm Hands on Land

...orous measures have been tak- ... Britain to keep farm laborers ...e land. Agricultural workers ...have left the industry have ...encouraged to return to it, and ...cientious objectors are used to ...ement the existing labor sup- ... Labor gangs and labor pools ...been set up to supply labor ...rainage, harvesting and other ...ses. Special hostels have been ...by the ministry of works and ...ngs to house mobile labor gangs and members of labor pools. Some groups live in small mobile trailers in which they travel around the country.

The schedule of reserved occupations, set up on the outbreak of war, was finally replaced in January, 1942, by a system of personal deferment, and all applications for deferment of military service in respect of workers on the land in the agricultural industry are dealt with by the district manpower boards under a special scheme operated jointly by the ministry of agriculture and the ministry of labor and national service through the county war agricultural executive committees.

In general, men over 25, if they are bona fide farm workers, are retained in the industry; men under 25 are subject to an individual examination and if they are deemed to be "key" workers where they are employed, deferment is granted for an indefinite period.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for October 8

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS' PROGRAM FOR MEETING LIFE'S PROBLEMS

LESSON TEXT—Matthew 4:1-4; 6:31-34; Luke 4:16-21.

GOLDEN TEXT—Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God.—Matthew 4:4.

Problems, sorrows, needs, anxieties—how they press in on mankind from every direction. What is he to do about them? He cannot meet them in his own strength. They worry him almost to the point of distraction. What shall he do?

There is just one answer, and it is blessedly simple and completely satisfying. Take your burdens to the Lord and leave them there! Cast all your care upon Him, for He careth for you (I Pet. 5:7).

From the teachings of Jesus our lesson tells us why and how we may do this. Let us not miss its glorious —and convicting—message.

I. We Can Overcome Temptation Through Christ Matt. (4:1-4).

Temptation is the common lot of all mankind (I Cor. 10:13). The strongest and most noble of men are subject to it. Angels were tempted, and our scripture reveals that even Jesus was tempted. We recognize that Jesus was tempted as the Messiah (vv. 3, 6) and as one without sin (Heb. 4:15), but it is also true that He was tempted in all points as we are, apart from sin, and that we may learn from His temptation how we may meet and be the victors over temptation.

We learn of our Lord that temptations may be victoriously overcome—

1. By the right use of Scripture. If Jesus needed that weapon, how can we do without it? But how can we use Scripture if we do not study it and hide it in our hearts?

2. By dependence on God. Every Scripture used by Jesus honored God. We cannot fight Satan in our own strength. To attempt to do so is to fail utterly. The real victory for the Christian is to bring Satan back to the cross where Christ won a decisive victory over him.

3. By denouncing Satan. Jesus sent him on his way. We may do the same in Jesus' name. It is always a serious error to try to argue with Satan or to engage in any discussion with him. Let us meet him with Scripture and say "Get thee hence."

II. We Can Learn to Trust God for our Daily Needs (Matt. 6:31-34).

Some want to be rich. Their folly is made clear in verses 19-24. But then there are some who while not wanting to be rich, are in constant anxiety about food and raiment for the morrow.

What is the answer of the Lord Jesus? Consider the birds. They are not able to work, nor are they able to pray, but God feeds them. Consider the glory of the flowers of the fields, for not even a king can dress himself in such beauty. "Are ye not much better than they?" (v. 26).

"As far as known, no bird ever tried to build more nests than its neighbors; no fox ever fretted because it had only one hole in which to hide; no squirrel ever died of anxiety lest he should not lay up enough nuts for two winters instead of one; and no dog ever lost any sleep over the fact that he did not have enough bones laid aside for his declining years" (Public Health service).

Proper forethought is good and right, for we are intelligent beings, but anxiety about our daily needs is always dishonoring to God.

Yes, says someone that's all very well, but how about the future? Well, why should we fret about that? It is in God's hands, and even if it were in our hands, what could we do about it? Even tomorrow, with its needs and its blessings, with its joy and its sorrows, is not yet here, and when it does come, there will be God's gracious provision for each passing hour.

III. We Can Follow Christ in Sacrificial Service (Luke 4:16-21).

Let us be clear at once that we cannot do what Christ did, for He is the Son of God. He had a special ministry to perform as the Messiah. But we may learn much from this story.

Jesus began His ministry among His own people even though He knew of their unbelief. He used the Word of God as the background for His calling. He recognized the special need of the poor and the suffering, and especially of those who were bruised and broken by sin.

In all these things we may follow His example. Let us declare the truth to those nearest to us, even if they do reject it. Let us look to God's Word for our call and our commission—different from that of Jesus, but nevertheless from God and for His glory.

Then, too, let us learn of Him that we are to serve those who are most needy and possibly neglected, serving their physical needs, but above all bringing to them the light of God's redeeming grace.

Here is light from the Lord on our problems of sin, sorrow, supply and service.

SEWING CIRCLE PATTERNS

Pretty and Comfortable Frock A Smart Collarless Cardigan

Date Dress

AS PRETTY as they come—and as comfortable as any yet designed, a frock with a wide-shouldered effect which is achieved by the subtle placing of the two rows of frill which ends neatly under a velvet bow at the waistline.

* * *

Pattern No. 8683 is in sizes 12, 14, 16, 18 and 20. Size 14, short sleeves, requires 3½ yards of 39-inch material.

For this pattern, send 25 cents in coins, your name, address, size desired, and the pattern number.

Smart Two-Piecer

THE smartest of the high-priced suits are collarless—and American women will take this cardigan fashion to their hearts instantly! You just can't have too many separate cardigan jackets, suits and two-piecers in this style.

* * *

Pattern No. 8660 is in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36, short sleeves, requires 4 yards of 39-inch material; ½ yard contrast for collar.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Your Car Is Needed
If you really do not need your car, why not sell it to us? We have many prospects that are essential workers who may need just the car you have. Call, write, phone or come in. We will buy your car any place in Iowa.
No red tape when you sell your car to us.
BRADY MOTORS
1208 Locust St. Ph. 3-8173 Des Moines, Ia.

Household Hints

Paint a large white spot on the tractor belt, then when running tractor unattended some distance from the house, you can see if the engine is still running and if the belt is on.

—•—

When fastening your food grinder to the table, put a piece of sandpaper, rough side to the table, under each clamp.

—•—

When your teakettle becomes coated with limestone, pour hot vinegar into it and let it stand for 12 hours.

—•—

Sweet peas planted the last of October or first of November, before frost gets into ground, will come up early in the spring and should blossom in June. Plant six inches deep.

—•—

Liquid should be drained from fruit used in salad dressing. Save it for use instead of water in making gelatin salads and desserts.

—•—

Cover hangers with felt or velveteen to hold sheer and silk dresses securely.

—•—

Imitation leather chair seats should be cleaned with an untreated dustcloth. Oil or polish is injurious to the finish.

—•—

Preserve the "pop" in popcorn by keeping the corn moist in a tightly closed container.

—•—

To prevent loss of stitches when you lay your knitting down, put corks on the ends of the needles.

—•—

In preparing oven meals, it is a good plan to choose food that cooks in approximately the same length of time and about the same temperature.

Today flasher signal lights and invasion-barge searchlights are more important than battery-powered lights on the home front. Burgess Batteries go *first* to the men who need them most, so we'll all have to take better care of what batteries we may have. Keep them cool and dry... use them as little as possible and rest them as *often* as possible. For Free Battery Hints—Write Dept. U-2, Burgess Battery Company, Freeport, Ill.

EDITORIAL COMMENT

THE AMERICAN FARMER

The American farmer is the greatest living example of "rugged individualism" that can be found any place throughout the earth. He stands alone. In many of the problems and mysteries of life he is law unto himself. He gives no orders to the outside world, neither does he expect to take orders from others. He tends strickly to his own empire within the line fence that forms the border of his little kingdom. In short the American farmer is a "feudal lord" ruling his acres with what might be termed "The Divine Right of Individualism."

His soil is his possession .One field he plants to corn, another to wheat, still another to oats; one he turns ino a meadow and another into pasture land.

A good farmer loves his soil and will not abuse it. He will not take from its storehouse of vital wealth without restoring a like amount of the vitamins he receives from it.

The real American farmer makes direct contact with God by way of his soil as well as through the church Here is where God answers his prayer How well the farmer knows that if he is hungry and prays for food, God will supply the field if he the plow. If he is cold God supplies the wood lot and he the axe. He knows it is his duty to plant and to cultivate and God will do the rest. His is not an "eight-hour day" No one tells him what time to go to work or to retire. His clock is God's given sun. Sunrise finds him in the field and sunset leaves him there.

The American farmer belongs to no union Should it be to his advantage to join some sort of union, he would not sacrifice his independence for anything a union might have to offer him. America should thank God on bended knees for the American farmers' firm attitude. The farmer is the backbone of Americanism. Through the cities and the great centers may stray from the "Faith of Our Fathers," the farmer still has enough power to hold our "Ship of State" true to her course.

The American farmer may be a Republican or a Democrat in his political affiliation, but rest assured every real farmer in our land is first an American. If you attack his country America, you are face to face with the type of man who left his plow in Colonial days to pick up his firearms to help drive the enemy from our shores. To this very hour every farm home in a small arsenal. Guns of various kinds hang upon the walls. Every school boy knows about the "Squirrel Hunters" that assembled from the hills of Ohio to help save the Union.

The farmer not only feeds and clothes the nation, he stands ready regardless of age, wealth or position, to fight to the death to preserve it. He is a patient person; for the soil taught him how to wait, but one must not try to push him too far. Do not arouse the strength stored within his being for if you do he will defend his rights, and the farmer draws no punches once he is aroused. Do not try to drive the American farmer in an un-American way. This has never been done successfully.

—Exhange.

MILITARY TRAINING

Already some of our forward looking statesmen are examining the postwar future and suggesting that we need to protect ourselves from enemies who may arise some years hence is not a huge standing army but a citizenry trained in basic military principles The plan most often suggested is that in the future our youth be given a year's military training before they enter civilian life.

The complaint by the pacifists that this might lead to a "citizen army" which would eventually give rise to a dictator, resulting in the overthrow of the public is bunk. The little republic of Switzerland, with its universal training, has lasted a long time without submitting to dictatorship, although war has repeatedly burst out on all sides of its borders.

The thing which will keep us free from dictatorship is not ignorance of basic military training, but ignorance of the solid principles of American traditional government, and the waning of our love for it. Those given a year's training will not become puppets, subject to the will of a dictator, but healthier, stronger and more patriotic young men.

Some so-called reformers have suggested training that might turn out to be a sort of half-baked CCC, with a new name. But that is not what we want. If anything were to lead to paternalism, the forerunner of dictatorship, it would be the kind of organizations which were saddled upon us in the prewar period.

As Secretary of War Stimson put it recently it isn't "civilian conservation" we need worry about—that term could be used as a camouflage for socialism—but "the fact that our cherished country and our democratic way of life may some day be lost to us unless we are prepared to depend and preserve them," Mr. Stimson added. "I believe that universal military training wil give us the best means of providing that defense."

If another attack comes upon us in the future, it will be a surprise attack which will not give us time to prepare, from an undefended beginning as we did in the present war. There will be no time to start with untrained youth to raise an army. The only alternative to a big standing army therefore is universal military training.

And we can't rely entirely on an international policeman. He may be looking the other way when we need him.

Around Iowa

New Scenes

Houses belonging to Bill Backhaus of Schleswig are being moved and not just the people living in them. The Rothe house recently purchased by Mr. Backhaus was moved across the alley to a corner lot. Bill intends to put a full basement under the house at its new location. Another house is being moved to another location also recently purchased by Mr. Backhaus. The latter building was an old school house which has been remodeled into a tenant house.

Incentive For Gardening

Clyde Stephens of Bedford found a United States minted $1.00 gold piece, dated 1852, in his garden recently. Mr Stephens had never seen a similar piece before nor knew such a coin existed. He has been unable to offer an expalnation of the presence of the coin in his garden as he has lived on the place 40 years and it had been vacant many years previously.

No Grocery Store

For the first time in 50 years, the community of Dinsdael in Tama county may be without a grocery store. The present manager, Mrs. Aenid Smith, is forced to retire because of ill health and as yet no one has been found to take over the business. The post office is in the same building and Mrs Smith has been postmistress of Dinsdale in addition to running the grocery store.

Helps Community

Tom Avery of New Concord, Minnesota, noticed that the Deep River church was in need of a coat of paint. Mr. Avery, a transport trucker, wrote a check for $10 to be added to the church paint fund However, by the time the check had reached Deep River, work had already been started to paint the church.

High Kick

Riding a horse does not prevent another horse from kicking high enough to injure the rider. At least, that is what the young son of Emil Loutsch of LeMars learned when a horse ran alongside and kicked at the horse he was riding. The boy's leg was hit by the kicking horse and bones near the ankle were fractured.

Antiques Go Wild

In olden times, injuries attributable to buggies occurred in runaways but not so today. A buggy stored high in a building was the cause of injuries to two fellows recently. It had been put away and suspended over nails and hooks but became loosened and fell onto some men shelling corn. Harm Meyer, and a son of Eppo Gremmer, both of Wesley, received injuries.

Needed Groceries

Dr. P. V. Janse of Algona parked his automobile while he made visits in the local hospital. The brakes became released and the car backed down the driveway into the Teenie Weenie grocery store The south wall of the building was pushed in three feet and groceries on shelves on the wall were scattered over the store.

Hard Trip

"Tippie" made a fast and rather dangerous trip to school the other day. The dog, belonging to the Dr. M. G. Bourne family of Algona, had been tied to the rear bumper of the family car to prevent him from following Julia Bourne to school. Julia's mother did not know the dog was tied to the car and drove another daughter, Barbara, to her school. When Tippie arrived at school, too, his toe nails and foot pads were worn but otherwise he seemed in good spirits. After all, he wanted to go to school, too.

IOWA CONFERENCE WAS OPENED BY METHODISTS IN 1844

On August 14, 1844, the first meeting of the Iowa Conference of the Methodist Episcopal Church was called to order in Iowa City by Bishop Thomas A. Morris. As early as 1839 Bishop Morris had insisted on the creation of the Iowa District as part of the Illinois Conference The following year the Illinois Conference was divided into the Iowa and Burlington districts, was made a part of the Rock River Conference. The latter held its 1843 conference at Dubuque. The next year the General Conference of the Methodist Episcopal Church met in New York and created the Iowa conference to incude all the Territory of Iowa.

Of the seventeen members of the Rock River Conference who had charges within the boundaries of the newly-created Iowa Conference eleven answered present. Fourteen young men sought admission into the elect circle. Committees were appointed, one on worship, one on post offices, and a third on Sabbath schools. Conference stewards and examiners for candidates seeking ordination were also named. three districts, (Burlington, Dubuthree ristricts (Burlington, Dubuque, and Des Moines) and an education committee established with one man representing each of these districts. Mount Pleasant Literary Institute and Iowa City College sought Conference support.

The Methodist had enjoyed a healthy growth since they established the first church in Iowa in 1834 The Dubuque District reported 1522 white and six colored members, the Burlington District had 2343 white and six colored Methodists. The Des Moines District counted 1566 white members, making 5443 members. The story of the first Iowa Methodist Conference is told by Dr R. A. Gallaher in "The Palimpsest" for August.

THOMAS E. DEWEY Says:

"The means by which our present unity in war can be preserved in the peace to come is the vital problem of our time. It seems to me that much of our success in war has come from the sense that every individual has a personal job to do. While there has been a maze of regimentation, some necessary, some inexcusable, **our strength at home has come wholly from the genius of our free men in industry and the devotion of our workers and our farmers to their jobs.** Our success or failure after the war will depend on whether we take to heart the lessons the war has taught us and permit the continuance of the regimentation which some so earnestly desire, we shall fail."

Our Strength at Home

Planless Planners

A COMPLICATED VEST

Springfield, Ill. — Federal Judge Charles Briggle recently took material for a vest to his tailor. The tailor said he could not make a vest because of a War Production Board order. The Judge wrote a polite letter to WPB concluding with, "Please, may I have a vest?"

Ponderous WPB machinery was then set in motion. The case was referred to the appeal branch of the textile, clothing and leather bureau of the New Deal agency. Eventually, Judge Briggle received a stern letter asking him to explain more in detail his need for a vest.

Wrote the Judge: "My reason for requesting permission to have a vest made was purely on a common sense basis. I own the goods and have enough to make a vest. I thought this situation might appeal to one's ordinary common sense."

WPB replied: "Based on your representations and on the recommendations of the textile and leather bureau and pursuant to paragraph F of Order L 224, the provisions of the above specified paragraph are hereby relaxed to the extent required to permit you to have a vest made from the material you own."

Walls covered with a light-colored flat or semi-gloss paint reflect light most satisfactorily. Gloss paint reflects light strongly and results in a harsh glare.

Keep reamed-out lemon or orange halves wrapped in waxed paper in the refrigerator. Grate the skin to flavor soups, sauces and desserts.

Former Klemme Youth Now In Watch Repair Business

Chester Ward, son of Mr. and Mrs. Frank Ward of Klemme, is another former Klemme youth who has gone into business for himself.

Chester has opened a watch repair shop in Los Angeles, California, and from reports, Chester is doing all right in business.

Chester is a graduate of Klemme high school, after which he took up watch repairing and graduated as an expert from a large company of watch makers. He has worked at the bench repairing watches and clocks and has worked on secret precision instruments for the army and navy.

He recently opened his own repair shop in Los Angeles.

NEW SHOE STAMP TO BE VALIDATED NOVEMBER 1

BASEBALL
Ed. Butenbach, Reporter

The Klemme baseball team under the leadership of A. L. Kingery, has shown improvement since the beginning of the season. The only lettermen back from last year are Nuehring, Peck, Buntenbach, and Brinkman.

The positions are as follows:

Brinkman and Peck, pitchers, Buntenbach, catcher; Mueller, 1b; Ed Grosshuesch, 2b; Nuehring 3b; Buckley, lf; E. Grosshuesch cf; Cosgriff rf, Brinkman and Peck, alternating at short stop.

Substitutes are Finders, Ridder, Beier, Lewis

Scores of the games played are as follows:

Kanawha 27	Klemme 1
Ventura 12	Klemme 7
Thornton 10	Klemme 0
Hayfield 3	Klemme 9
Kanawha 11	Klemme 1
Ventura 7	Klemme 3

SENIOR CLASS NEWS
Patricia Kudje, Reporter

Even after a month of school some of us haven't got used to the idea of being still. We have been better than usual though, because we are trying to set a good example for the Freshmen.

Our brains are spinning from Algebra III. We master one type of problem and then the next day up comes another kind twice as hard as the first. We are all hoping for the day when we understand our x's and y's.

As for Literature we are reading "The Tradegy of Mac Beth" by Shakespeare. Mac Beth has already murdered the king, and Mrs. Turgesen says that he commits murders as the story continues. We did not realize that Shakespeare wrote detective stories; we thought all of his stories were like "Romeo and Juliet."

In American History we are relearning "The Beginning of Our United States." We know the explorers that came here, Cortez, Cabat, Cartier and of course many more. We are getting the colonizers straight now: who settled each of the original thirteen colonies; when it happened and the motives for settling.

JUNIOR CLASS NEWS
Jeanne Trumbull, Reporter

In English Literature we are reading the play, "The Tradegy of Macbeth," writen by Wm. Shakespeare. It is very good, although most of the class wish it was written in prose rather than poetry.

We are studying the chapters pertaining to "Consumption in Economics.

In Business Law we discussed the difference between real estate and private property. The definition we received was: "Real estate is property that is not moveable, and is attached to land; while personal property is that which can be moved and taken with you." Which prompted this question: "Is a balking mule real estate?" What do you think the question got for an answer?

We are now studying contracts.

We are making very good progress in Typing Class.

FRESHMAN CLASS NEWS
Catherine Velau, Reporter

The Freshman Class is the largest in the school. There are 21 girls and 13 boys in the class.

The subjects we take are English, Algebra, General Science and Home Economics or Manual Training.

The girls are sewing in Home Economics, while the boys are studying Mechanical Drawing.

We are glad to have Donald Franklin with us again. He has been absent two weeks.

JUNIOR HIGH SCHOOL
GRADES 7 AND 8

Tuesday we got out of school at 2:00 o'clock as there was a teachers' meeting in the school house.

The Eighth Graders all had perfect Spelling scores this week.

Wednesday of this week was the day set for bringing in bundles of clothing for Russia All who brot in clothing or shoes received tickets for the Saturday matinee at Garner.

We have been drawing maps and learning more about latitude and longitude in Eighth Grade Science.

We completed our unit on "Water" in Seventh Grade Science and wrote our test Friday.

Larry Ramsay, Reporter.

GRADES 5 AND 6

Last week Tuesday afternoon we had as our guests the rural teachers near Klemme, County Superintendent Whitney from Garner, and Mr Cram from Iowa State Teachers College. Mr Cram talked to the teachers on the use of the dictionary We helped him in his demonstration. We enjoyed doing this very much and feel as if we too learned something.

Some members of our room brought clothing to school Wednesday for the Russian Clothing drive. There were interesting discussions on this topic and in doing this giving, even though it seems a small thing, we feel as if we are doing something to make others happy. Several of the children enclosed notes in their packages and are now wondering if they will receive a reply from the person getting the clothing.

GRADES 4 AND 5

The boys and girls of the Third and Fourth grades planned a very pleasant surprise for Miss Holm.

On Tuesday of last week there seemed to be a great many secrets and at noon it was noticed that a great many of the boys and girls brought small packages to school. By 1:00 o'clock the secret was out. There had been a peanut shower! Since then we have all been enjoying peanuts before school and at recesses.

GRADES 1 AND 2

In our Weekly Readers, the first grade read about strange pets which our soldiers have in other lands. Some of them are monkeys, goats, birds and bears.

Second grade read about the Superfortress. It is the largest air plane and can fly the farthest of any plane in the world. It has four motors, large wings, and can fly high.

NEW GASOLINE COUPONS SHOULD BE ENDORSED NOW

All coupons in the new "A" gasoline books now being issued for use during the remainder of this year and most of 1945 should be endorsed immediately upon receipt by motorists with the name of the state and the number on their 1942 license plates, the last metal plates distributed in Iowa, it was declared by Walter D. Kline, director of the Des Moines OPA district.

In making this announcement, Kline said he had been advised one new metal plate for rear display and a windshield stamp will be issued in Iowa for renewal licensing beginning December 1. However, the 1942 license plate number corresponding to the ration coupon endorsement will appear on the registration certificates, permitting any necessary checks of ownership of "A" coupons, he explained.

LIBERTY TOWNSHIP NEWS

Mr. and Mrs. Howard Spitler and Doris were Mason City visitors Thursday.

Mrs. Albert Lange, Mrs. Clifford Eliason and Mrs. Glenn Lange were Mason City callers Thursday.

Mr. and Mrs. Henry Wade visited at the John Spitler home at Belmond Sunday evening.

Mr. and Mrs. Kenneth Gast assisted with silo filling at the Herman Gast farm Monday and Tuesday.

Miss Pearl Wade and Seaman Russel Wade visited the for part of the week at the home of Mr. and Mrs. Richard Ulrich.

Robert Wade returned to his home at Clinton, Ill., Monday, after visiting at the home of his brother Henry for ten days.

Mr. and Mrs. Edward Coyle and daughter Judith Ann, of Miller, were visitors at the Howard Spitler home Wednesday evening.

Mr. and Mrs. Henry Wade and Pearl took Seaman Russel Wade to Garner Thursday evening where he took a train back to San Pedro, California.

Mr. and Mrs. Howard Spitler and Doris, and Mr. and Mrs. Edward Coyle and daughter Judith Ann, were Sunday dinner guests at the Ed. Coyle home at Rockford.

U-DELT-EM BRIDGE CLUB HELD FIRST FALL MEETING

The U-Delt-Em Bridge Club held their first meeting of the fall and winter season at the home of Mrs P. M. Wilson, Thursday afternoon.

High scores in contract for the afternoon of play were in the following order: Mrs. Art Kudje, Mrs. George Lawhorn, and Mrs. W. F. Missman.

HELLO,, FOLKS!

Mr. and Mrs. Levi Klotzbach are grand parents again as a baby girl was born to their son-in-law and daughter, Mr. and Mrs. Leslie Smock at Kanawha on Tuesday, October 3rd.

WEE HUGHIE

He's gone to school, wee Hughie,
An' him not four,
Sure I saw the fright was in him
When he left the door.

But he took a hand o' Denny,
An' a hand o' Dan,
Wi' Joe's ould coat upon him—
Och, the poor wee man!

He cut the quarest firgure,
More stout nor thin;
An' trottin' right an' steady
Wi' his toes turned in.

I watched him to the corner
O' the big turf stack,
An' the more his feet went forrit,
Still his head turned back.

He was lookin', would I cal him—
Och, my heart was woe—
Sure it's lost I am without him,
But he be to go.

I followed to the turnin'
When they passed it by,
God help him, he was cryin',
An', maybe, so was I.

—Elizabeth Shane.

Loyal Workers Had Dinner And Election Of Officers

The Loyal Workers Class of the Klemme Methodist Church met at noon on Sunday for a covered dish dinner.

After a program of variety numbers the election was called for and the class officers were named. Mr. Elmer J. Arnold was elected president; Echard Zeidler, vice-president and Mrs. E. J. Arnold, sercetary and treasurer.

Somebody writes in to ask what has become of Henry Wallace. Henry is at present playing smart politics. He is keeping quiet.

THE POSTWAR FURNACE

The postwar world is going to give break to the man who tends a rnace. The job is going to be no ore trouble than switching the dial a radio.

—*—

The furnace of tomorrow will not ke up much more room than an ectric toaster.

—*—

Science and engineering, with all eir wonders, have neglected the rnace. It is what it has always en, a huge, cumbersome, awe-me, space-hogging apparatus full temperament. That frustrated, oken look on the faces of countless mericans is due to furnace respon-bilities.

—*—

Shaking it down and removing the hes has made many a man hate llars, northern winters and the scoverer of coal.

—*—

But at last something has been ne about it, and a furnace per-cted that will be a thing of beauty d joy all winter. It is heralded as robot-heatwave, a jet-heater, a ep furnace.

—*—

You can carry it home under your m.

—*—

Its special appeal is that it leaves ashes, has no grate, requires no aking and is as self-operating as oil burner.

—*—

It is, in fact, the coal industry's swer to the oil furnace. The l industry has been battering the al industry around for years with-t getting much opposition, but a ttle is ahead.

—*—

The Anthracite Industries incor-rated is the popper of the new mi tasse self-operating furnace. only takes up a space two feet by o feet and is a simple device con-sting of a couple of gears, a blow-, a water pump and some blades hich chop up the coal as it is tomatically fed into the fire box.

—*—

It produces a terrific flame in a w seconds and is guaranteed to ve mom yelling "Turn off that at'" instead of squawking "Hor-e, you'd better look at the fur-ace again. You opened the drafts o hours ago and nothing's hap-ened yet."

—*—

There is practially no cleaning to e done The old man can give it an nual renovating with an old tooth rush, a nail file and an eye drop-er.

—*—

It will be in production as soon as itler and Tojo are disposed of.

—*—

Swell! Now we have the furnace the future all attended to.

—*—

But how can we get the coal of e present?

Private Purkey Nears the Reich

ear Harriet—

Well, I am not sure where I am ow on account of the armies in rance don't stop long enough even look at the signposts, but if I in't in Germany I am close Uncle am has got a new secret weapon. is a jet-propelled G. I. We are oving so fast, Harriet, that wind-nields should now be compulsory quipment for foot soldiers.

—*—

I would not be able to write this tter except we have just slowed own to 30 miles an hour. I don't now what we slowed down for but ergeant Mooney says it was on ac-ount of we had to send some scouts bout 100 miles to locate General atton.

—*—

It has been almost like a sightsee-g tour with me the last few weeks nd I seen a thousand places where itler once slept and most of the owns where the Nazi supermen nce stood. It looks to me like the raut is the fastest folding soldier history.

—*—

I seen thousands of captured azis in the last couple of weeks nd I ain't seen a goosestep in a carload. Anybody who says Ger-nany will never surrender on our erms is nuts. The ones I been see-g will surrender for a drink of wa-r and a cool place to lay down.

—*—

This liberation business is nice ut it is too fast for comfort. I ould rather of liberated a little ower so we could get time to buy t least a postcard in some of them amous French and Belgium places. ut if a G. I. stops to tie his shoe ace here he becomes AWOL.

All my love, Oscar.

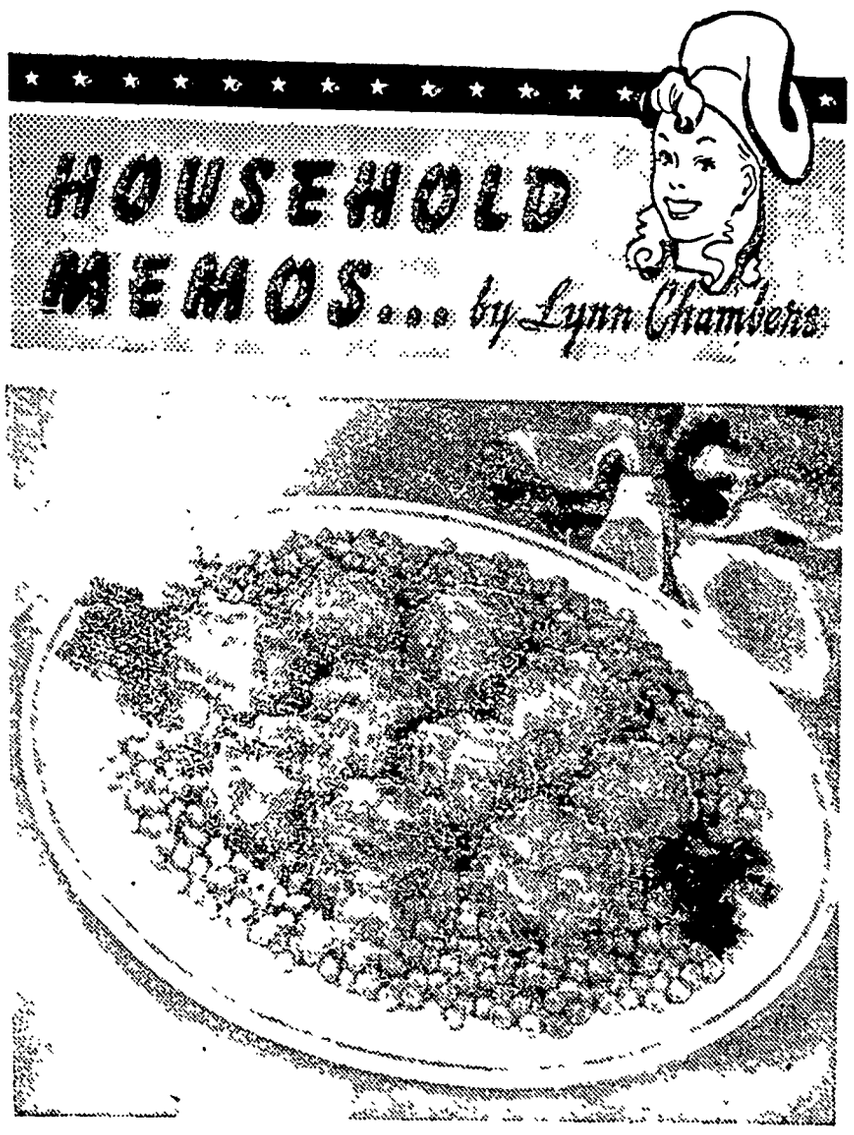
"Officials of the New York stock xchange announce that the spread-ng of rumors about stocks must be topped."—News item.

—*—

Wanna bet?

—*—

Imagine stopping rumors on the tock exchange! Lots of people on't buy a stock unless a few umors are thrown in with it. "It's ll I ever get for my money," com-lained Elmer Twitchell today. "If must choose between stocks and umors, gimme rumors."



Meat Point Pointers . . . Rice Balls in Mushroom Sauce
(See Recipes Below)

Flavorful Meats

You'll be using more of the lower grades of beef as time goes by. Most of the AA and A, top grades of beef, are going to armed forces and utility or lower grade beef will be more available for civilian consumption.

That calls for pulling out the old-fashioned, flavorful recipes that will really make this beef taste good. We used to do, and can still do it as long as we pull the bunny of ingenuity out of the proverbial hat, or cookbook, as the case may be.

Inexpensive cuts of meat can be made tender by several methods. Round steak can be pounded with a small hammer or mallet to break down the tissues, then braised with liquids and seasonings to savory goodness. Stewing is another good method for cooking this type of meat. Adding tomato juice, spices, mushroom soup and other liquids gives peak flavor.

Here are recipes which may be made with utility beef, but which will have just as much flavor as the more expensive cuts:

Swiss Steak.
(Serves 6)

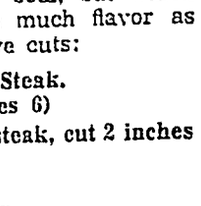
Round or Arm steak, cut 2 inches thick
Flour
Salt and pepper
1 onion, thinly sliced
2 tablespoons lard
2 cups tomatoes
1 carrot, diced
½ cup corn
1 small green pepper, sliced
½ cup water

Mix flour, salt and pepper; pound into steak. Brown steak in lard. Add vegetables and water. Cover pan and cook in slow oven (300 degrees) for 2½ hours. Add more water if needed. Serve with vegetables poured over steak.

Short Ribs With Vegetables.
(Serves 6)

5 pounds short ribs of beef
3 teaspoons salt
¼ teaspoon pepper
2 tablespoons lard
8 medium-sized potatoes
8 small onions
4 parsnips
4 carrots

Wipe meat with damp cloth, sprinkle with salt and pepper and brown in hot fat. Add water, cover and allow to simmer an hour. Prepare vegetables. Add whole potatoes, onions, parsnips and carrots cut in half. Season vegetables, cover and continue cooking until vegetables are tender. Serve meat on platter garnished with vegetables.



Lynn Says

Point Pointers: Use low temperatures in cooking meat, regardless of the method. High temperatures shrink meat unnecessarily.

Save all the meat you buy. If a roast is boned at the butchers, bring the bones home and use them for soup.

Different seasonings add interest to meats. Try onion gravy with beef. Mushroom soup, diluted and heated, goes well with lamb. Horseradish adds pep to pot roast or short ribs gravy.

Pork gravy is good with a dash of sage, lamb gravy with a bit of curry.

Leftover vegetables such as peas, carrots, celery, lima beans and green beans added to gravy make it colorful, different and more nourishing.

*Rice Balls with Mushroom Sauce
Baked Squash Green Lima Beans
Jellied Fruit Salad
Bread Butter
Lemon Souffle
Beverage
*Recipe Given

Spiced Beef.

3 pounds chuck steak
½ teaspoon cloves
6 medium-sized onions
½ teaspoon peppercorns
2 tablespoons salt
1 teaspoon allspice
6 bay leaves
12 gingersnaps

Wipe meat with damp cloth. Place in a saucepan and cover with a mixture of half water and half vinegar. Add 2 tablespoons salt, sliced onions, bay leaves and spices. Let stand at least 24 hours. Place on stove and simmer gently until meat is tender. Take meat out and let drain. Strain broth through a sieve and let it come to a boil. Then add gingersnaps which have been softened into a paste with cold water. This will thicken broth so that it will have to be stirred about 3 minutes. Return meat to gravy and let stand for about 15 minutes before serving.

The favorite combination of ham and sweet potatoes takes a new turn in this following recipe:

Ham and Sweet Potato Roll.
(Serves 6)

¾ pound ground ham
½ pound ground pork
½ cup cracker crumbs
1 egg
¾ cup milk
Pepper
2 cups mashed sweet potatoes

Combine all ingredients except potatoes. Spread on waxed paper to ½-inch thickness, making a rectangle about 6 by 10 inches. Spread with seasoned potatoes and spread like a jelly roll. Place in dripping pan and bake 1½ hours in a moderate (350-degree) oven.

Potted Veal With Dumplings.

2 pounds veal shoulder
1 onion
1 quart water
2 teaspoons salt
¼ teaspoon pepper
½ teaspoon Worcestershire sauce
2 cups diced potatoes
6 carrots
4 tablespoons flour
¼ cup cold water

Remove fat and cut meat into 1-inch cubes. Simmer veal and sliced onion for 1 hour. Add salt, pepper, sauce, potatoes and sliced carrots. Continue cooking for 15 minutes longer. Thicken mixture with flour and water. Prepare dumplings and drop by spoonfuls on top of meat. Cover closely and steam 12 minutes.

Dumplings: 1½ cups flour, 3 teaspoons baking powder, ¾ teaspoon salt, 2 tablespoons lard, ¾ cup milk. Sift flour, measure and sift again with baking powder and salt. Cut in fat and mix to a fine crumb. Add milk and mix to a soft dough.

Many dishes are made better by the addition of mushrooms, or by a mushroom soup that combines both the goodness of the mushroom and a well-blended white sauce. Try:

***Rice Balls With Mushroom Sauce.**
(Serves 6)

1 pound hamburger
⅓ cup rice
1 10½-ounce can condensed mushroom soup
1 teaspoon salt

Mix together meat, salt and rice which has been washed and drained. Shape into small balls. Brown them in hot fat. Add mushroom soup which has been diluted with an equal amount of water. Cover. Simmer for 1 hour.

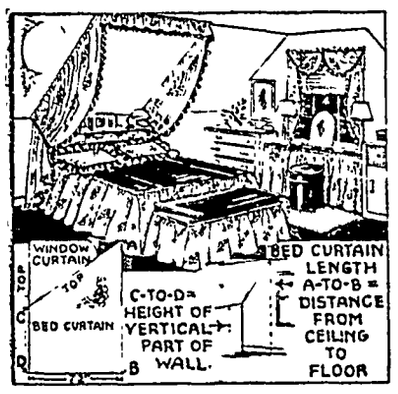
Bright Coloring Lures Birds, Beasts Into Eating

The motives for the food fancies of certain birds and beasts are undiscoverable. At the London zoo it has been found that humming birds can be lured to eat simply by coloring the receptacles containing their food red.

In the reptile-house, the Iguana lizard has a positive mania for yellow or orange fruit, flowers or vegetables, while the giant lizard, the so-called Komodo dragon, will select a white fowl, pigeon or rabbit to one of a grey, brown or black hue.

It's Simple Furniture With Quaint Ruffles and Frills for the Home

By Ruth Wyeth Spears



WINDOW CURTAIN
TOP
BED CURTAIN
C-TO-D = HEIGHT OF VERTICAL PART OF WALL.
BED CURTAIN LENGTH A-TO-B = DISTANCE FROM CEILING TO FLOOR

IF YOU have been wondering if quaintness, frills and ruffles were going into the decorating ash can after the war, the answer is—NO!

Period themes and quaintness will be stepped up to have a dramatic quality. Modern ideas will creep in and add to this effect. Simple furniture will be built in and fabrics will be cut and sewn especially to fit the spaces they are to fill. The bed curtains for the slanting wall in the sketch are an example—and the triangular shaped window curtains to give extra fullness. Frills will be even fuller than those of our dreams, and many a homemaker who never before used her sewing machine attachments will be learning the mysteries of the ruffler and hemmer.

* * *

NOTE—Why not start your dream room now with a skirted blanket chest like the one in this sketch? It is grand to have extra covers handy on chilly nights and the padded top makes a comfortable seat. Pattern 259 gives complete and fully illustrated directions with detailed list of materials needed for making the chest, full skirt and top cushion. SNAPPY FACTS ABOUT RUBBER

Consumption of reclaimed rubber in the United States increased more than 50 per cent from 1940 to 1943. Reclaimed rubber may frequently be used in the manufacture of the same articles from which it was reclaimed.

In 1943 gasoline and motor vehicle tax revenues combined accounted for nearly 30 per cent of the total state revenues.

Next year will mark the thirtieth anniversary of the use of motor vehicles in the rural free delivery mail service. Rubber-tired mail cars had a bearing on the passing of the first federal aid highway law in 1916.

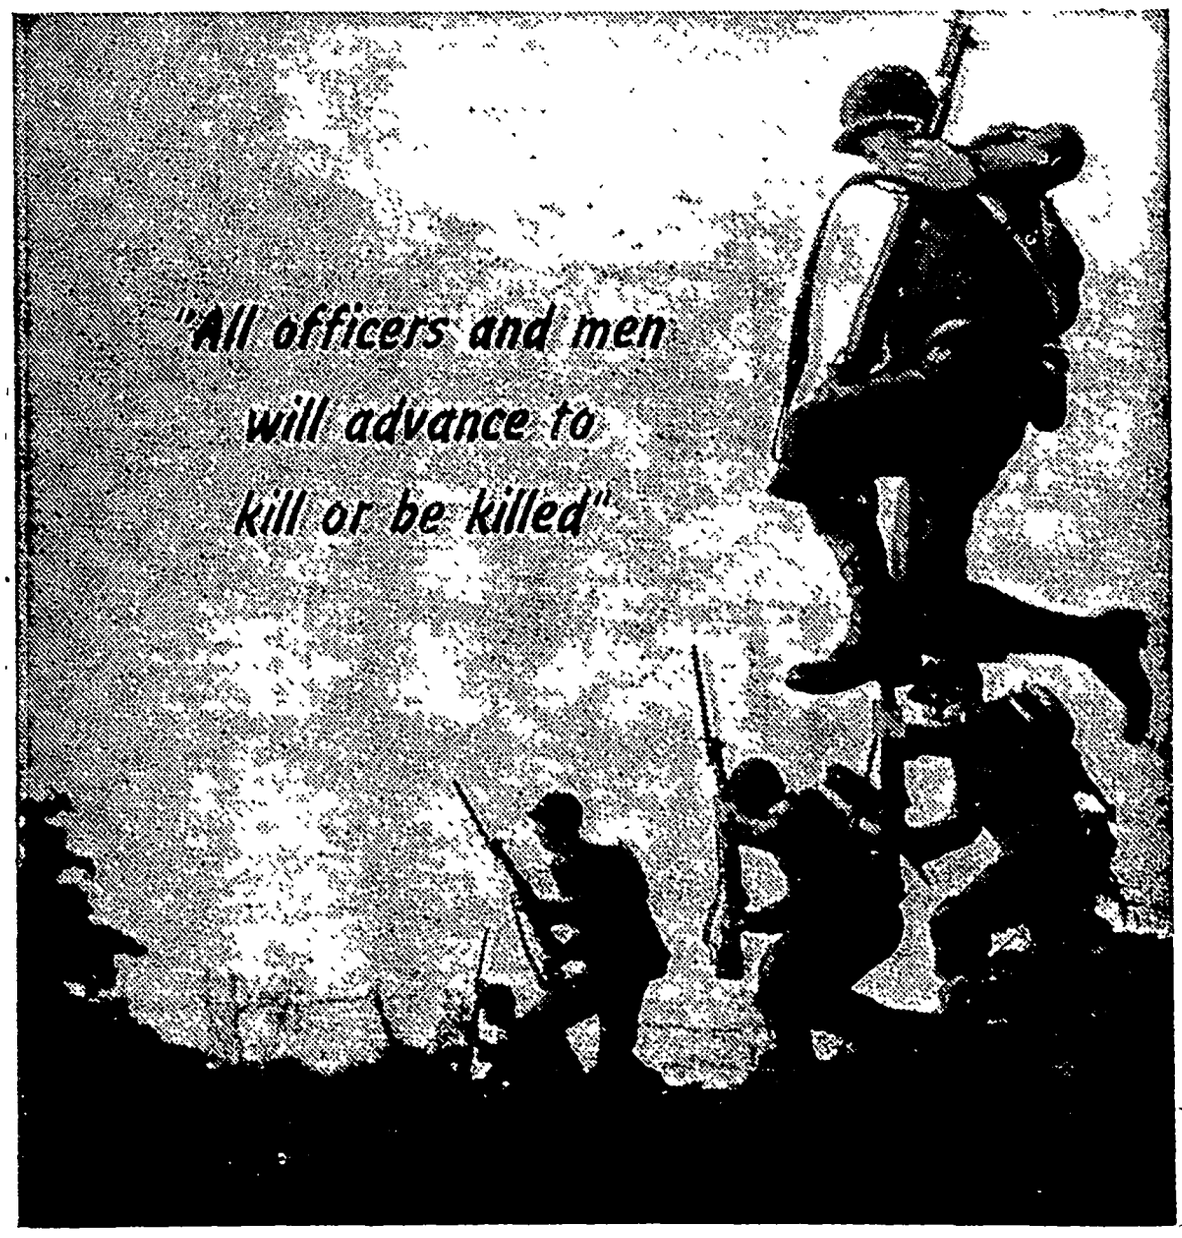
RATS CARRY THE FLEAS THAT SPREAD DISEASE!
KILL 'EM with Stearns Electric RAT & ROACH Paste
35¢ AT DRUGGISTS FOR 60 Years



THIS IS NO DREAMED-UP HEADLINE—no "tone poem" conceived on an inspired typewriter. It's the way the army explains the command "Fix bayonets—charge!" Only the Infantry has it put to them in these words. As one doughboy said:

"I'll remember those eleven words the rest of my life."

Remember? How can he forget them? They describe the climax of the Infantryman's assault—they describe the most cold-blooded action on a battlefield. Yet Infantry officers and men have advanced, countless times, to kill or be killed . . . at Saratoga . . . at New Orleans . . . the Argonne . . . New Guinea . . . Salerno. There's no rescinding of this order—no retreating—no nothing but *plain killing.*

Right now, the men of the Infantry are closing in for the final kill. They're advancing every day—advancing to the order of "kill or be killed." Remember this the next time you see a doughboy on furlough. Remember this the next time you almost forget to write that letter. Remember it till your dying day. You can't pay the doughboy back—but at least you can be forever mindful of *his* role in this fight for freedom.

"Keep your eye on the Infantry—THE DOUGHBOY DOES IT!"

THE POSTWAR FURNACE

The postwar world is going to give break to the man who tends a rnace. The job is going to be no ore trouble than switching the dial a radio.

—*—

The furnace of tomorrow will not ke up much more room than an ectric toaster.

—*—

Science and engineering, with all eir wonders, have neglected the rnace. It is what it has always en, a huge, cumbersome, awe-me, space-hogging apparatus full temperament. That frustrated, oken look on the faces of countless mericans is due to furnace respon-bilities.

—*—

Shaking it down and removing the hes has made many a man hate llars, northern winters and the scoverer of coal.

—*—

But at last something has been ne about it, and a furnace per-cted that will be a thing of beauty d joy all winter. It is heralded as robot-heatwave, a jet-heater, a ep furnace.

—*—

You can carry it home under your m.

—*—

Its special appeal is that it leaves ashes, has no grate, requires no aking and is as self-operating as oil burner.

—*—

It is, in fact, the coal industry's nswer to the oil furnace. The l industry has been battering the al industry around for years with-t getting much opposition, but a ttle is ahead.

—*—

The Anthracite Industries incor-rated is the popper of the new emi tasse self-operating furnace. only takes up a space two feet by o feet and is a simple device con-sting of a couple of gears, a blow-, a water pump and some blades hich chop up the coal as it is tomatically fed into the fire box.

—*—

It produces a terrific flame in a w seconds and is guaranteed to ve mom yelling "Turn off that eat!" instead of squawking "Hor-e, you'd better look at the fur-ace again. You opened the drafts o hours ago and nothing's hap-ened yet."

—*—

There is practially no cleaning to e done. The old man can give it an nual renovating with an old tooth rush, a nail file and an eye drop-er.

—*—

It will be in production as soon as itler and Tojo are disposed of.

—*—

Swell! Now we have the furnace the future all attended to.

—*—

But how can we get the coal of e present?

Private Purkey Nears the Reich

ear Harriet—

Well, I am not sure where I am w on account of the armies in rance don't stop long enough even look at the signposts, but if I in't in Germany I am close. Uncle am has got a new secret weapon. is a jet-propelled G. I. We are oving so fast, Harriet, that wind-hields should now be compulsory quipment for foot soldiers.

—*—

I would not be able to write this tter except we have just slowed own to 30 miles an hour. I don't now what we slowed down for but ergeant Mooney says it was on ac-ount of we had to send some scouts bout 100 miles to locate General atton.

—*—

It has been almost like a sightsee-ng tour with me the last few weeks nd I seen a thousand places where itler once slept and most of the wns where the Nazi supermen nce stood. It looks to me like the raut is the fastest folding soldier history.

Meat Point Pointers . . . Rice Balls in Mushroom Sauce
(See Recipes Below)

Flavorful Meats

You'll be using more of the lower grades of beef as time goes by. Most of the AA and A, top grades of beef, are going to armed forces and utility or lower grade beef will be more available for civilian consumption.

That calls for pulling out the old-fashioned, flavorful recipes that will really make this beef taste good. We used to do, and can still do it as long as we pull the bunny of ingenuity out of the proverbial hat, or cookbook, as the case may be.

Inexpensive cuts of meat can be made tender by several methods. Round steak can be pounded with a small hammer or mallet to break down the tissues, then braised with liquids and seasonings to savory goodness. Stewing is another good method for cooking this type of meat. Adding tomato juice, spices, mushroom soup and other liquids gives peak flavor.

Here are recipes which may be made with utility beef, but which will have just as much flavor as the more expensive cuts:

Swiss Steak.
(Serves 6)

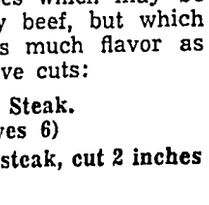
Round or Arm steak, cut 2 inches thick
Flour
Salt and pepper
1 onion, thinly sliced
2 tablespoons lard
2 cups tomatoes
1 carrot, diced
½ cup corn
1 small green pepper, sliced
½ cup water

Mix flour, salt and pepper; pound into steak. Brown steak in lard. Add vegetables and water. Cover pan and cook in slow oven (300 degrees) for 2½ hours. Add more water if needed. Serve with vegetables poured over steak.

Short Ribs With Vegetables.
(Serves 6)

5 pounds short ribs of beef
3 teaspoons salt
¼ teaspoon pepper
2 tablespoons lard
8 medium-sized potatoes
8 small onions
4 parsnips
4 carrots

Wipe meat with damp cloth, sprinkle with salt and pepper and brown in hot fat. Add water, cover and allow to simmer an hour. Prepare vegetables. Add whole potatoes, onions, parsnips and carrots cut in half. Season vegetables, cover and continue cooking until vegetables are tender. Serve meat on platter garnished with vegetables.



Lynn Says

Point Pointers: Use low temperatures in cooking meat, regardless of the method. High temperatures shrink meat unnecessarily.

Save all the meat you buy. If a roast is boned at the butchers, bring the bones home and use them for soup.

Different seasonings add interest to meats. Try onion gravy with beef. Mushroom soup, diluted and heated, goes well with lamb. Horseradish adds pep to pot roast or short ribs gravy.

Pork gravy is good with a dash of sage, lamb gravy with a bit of curry.

Leftover vegetables such as peas, carrots, celery, lima beans and green beans added to gravy make it colorful, different and more nourishing.

*Recipe Given

Spiced Beef.
3 pounds chuck steak
½ teaspoon cloves
6 medium-sized onions
½ teaspoon peppercorns
2 tablespoons salt
1 teaspoon allspice
6 bay leaves
12 gingersnaps

Wipe meat with damp cloth. Place in a saucepan and cover with a mixture of half water and half vinegar. Add 2 tablespoons salt, sliced onions, bay leaves and spices. Let stand at least 24 hours. Place on stove and simmer gently until meat is tender. Take meat out and let drain. Strain broth through a sieve and let it come to a boil. Then add gingersnaps which have been softened into a paste with cold water. This will thicken broth so that it will have to be stirred about 3 minutes. Return meat to gravy and let stand for about 15 minutes before serving.

The favorite combination of ham and sweet potatoes takes a new turn in this following recipe:

Ham and Sweet Potato Roll.
(Serves 6)

¾ pound ground ham
½ pound ground pork
½ cup cracker crumbs
1 egg
¾ cup milk
Pepper
2 cups mashed sweet potatoes

Combine all ingredients except potatoes. Spread on waxed paper to ½-inch thickness, making a rectangle about 6 by 10 inches. Spread with seasoned potatoes and spread like a jelly roll. Place in dripping pan and bake 1½ hours in a moderate (350-degree) oven.

Potted Veal With Dumplings.
2 pounds veal shoulder
1 onion
1 quart water
2 teaspoons salt
¼ teaspoon pepper
½ teaspoon Worcestershire sauce
2 cups diced potatoes
6 carrots
4 tablespoons flour
¼ cup cold water

Remove fat and cut meat into 1-inch cubes. Simmer veal and sliced onion for 1 hour. Add salt, pepper, sauce, potatoes and sliced carrots. Continue cooking for 15 minutes longer. Thicken mixture with flour and water. Prepare dumplings and drop by spoonfuls on top of meat. Cover closely and steam 12 minutes.

Dumplings: 1½ cups flour, 3 teaspoons baking powder, ¾ teaspoon salt, 2 tablespoons lard, ¾ cup milk. Sift flour, measure and sift again with baking powder and salt. Cut in fat and mix to a fine crumb. Add milk and mix to a soft dough.

Many dishes are made better by the addition of mushrooms, or by a mushroom soup that combines both the goodness of the mushroom and a well-blended white sauce. Try:

***Rice Balls With Mushroom Sauce.**
(Serves 6)

1 pound hamburger
⅓ cup rice
1 10½-ounce can condensed mushroom soup
1 teaspoon salt

Mix together meat, salt and rice which has been washed and drained. Shape into small balls. Brown them in hot fat. Add mushroom soup which has been diluted with an equal amount of water. Cover. Simmer for 1 hour.

SNAPPY FACTS ABOUT RUBBER

Consumption of reclaimed rubber in the United States increased more than 50 per cent from 1940 to 1943. Reclaimed rubber may frequently be used in the manufacture of the same articles from which it was reclaimed.

In 1943 gasoline and motor vehicle tax revenues combined accounted for nearly 30 per cent of the total state revenues.

Next year will mark the thirtieth anniversary of the use of motor vehicles in the rural free delivery mail service. Rubber-tired mail cars had a bearing on the passing of the first federal aid highway law in 1916.

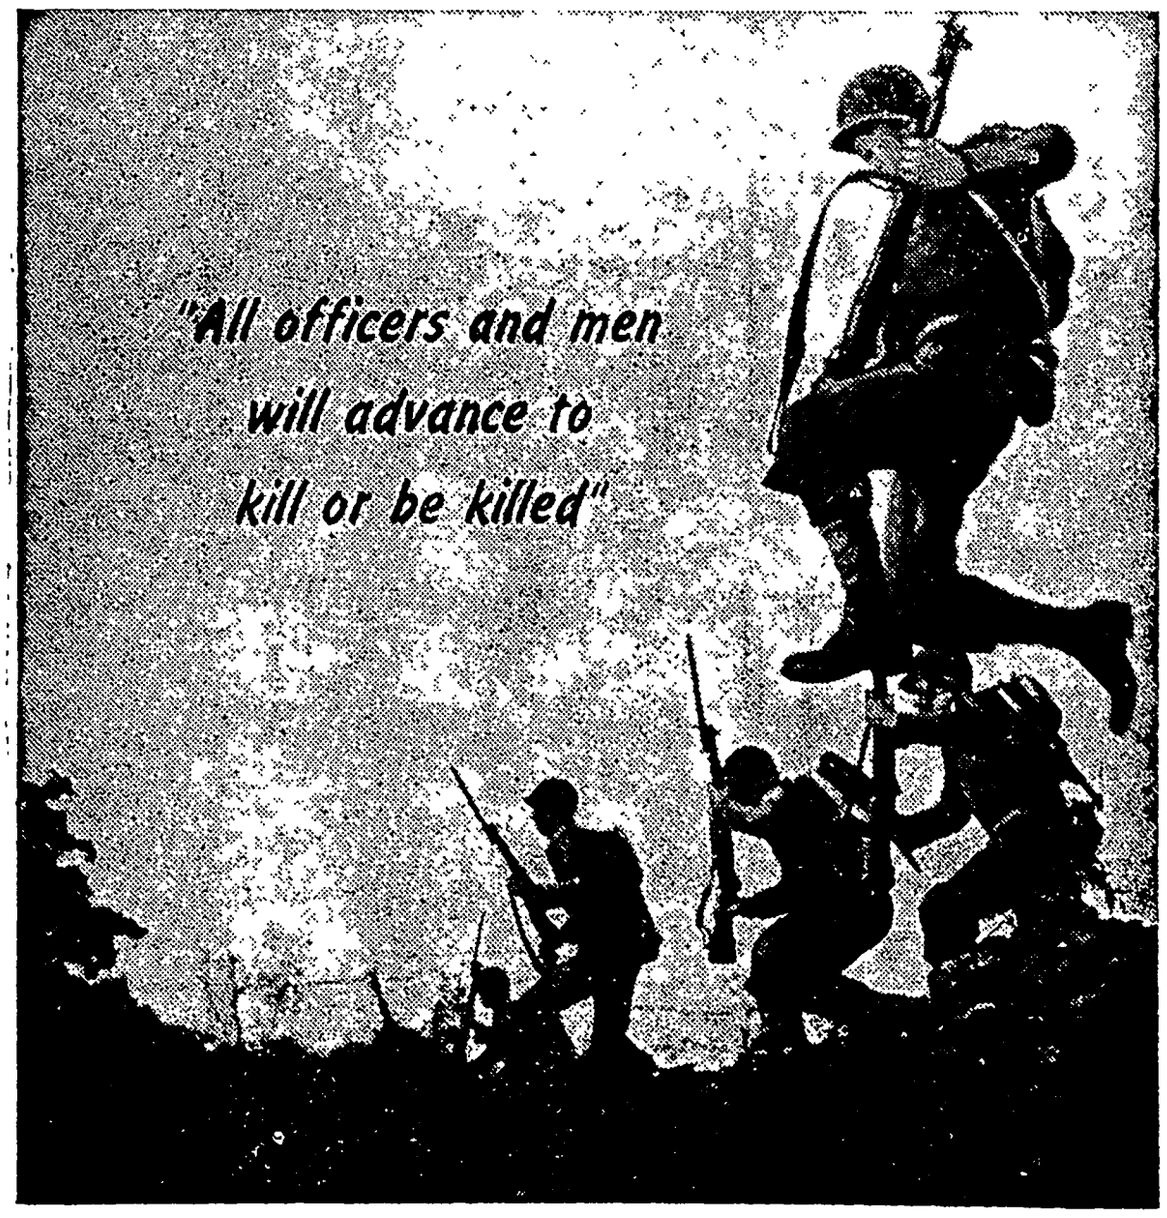
FOR 60 Years
35¢ AT DRUGGISTS



THIS IS NO DREAMED-UP HEADLINE—no "tone poem" conceived on an inspired typewriter. It's the way the army explains the command "Fix bayonets—charge!" Only the Infantry has it put to them in these words. As one doughboy said:

"I'll remember those eleven words the rest of my life."

Remember? How can he forget them? They describe the climax of the Infantryman's assault—they describe the most cold-blooded action on a battlefield. Yet Infantry officers and men have advanced, countless times, to kill or be killed . . . at Saratoga . . . at New Orleans . . . the Argonne . . . New Guinea . . . Salerno. There's no rescinding of this order—no retreating—no nothing but *plain killing.*

Right now, the men of the Infantry are closing in for the final kill. They're advancing every day—advancing to the order of "kill or be killed." Remember this the next time you see a doughboy on furlough. Remember this the next time you almost forget to write that letter. Remember it till your dying day. You can't pay the doughboy back—but at least you can be forever mindful of *his* role in this fight for freedom.

"Keep your eye on the Infantry—THE DOUGHBOY DOES IT!"

February and March farrowed pigs should be crowded for late August and September markets.

HANCOCK COUNTY BOARD PROCEEDINGS

3RD ADJOURNED SEPTEMBER MEETING

Garner, Iowa,
September 25,1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read.

This being the 25th day of September, A. D., 1944, a date heretofore set for a letting on the cleanout of DD No. 9, petitioned for by John P. Christians et al, the hour for said letting having arrived and the Board being fully advised, said letting was held as scheduled.

The bid of Carl H. Peterson and Company of Minneapolis, Minnesota, was found to be the lowest and best bid for said cleanout.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of DD No. 9, and lateral No 6 of DD No 9, that the bid of the Carl H. Peterson and Company of Minneapolis, Minnesota be and the same is hereby accepted as the lowest and best bid for said cleanout. All other bids are hereby rejected

Chairman F J Schoun is hereby authorized and ordered to execute a contract in behalf of Hancock County, Iowa, with the Carl H Peterson and Company of Minneapolis, Minnesota.

Wm. Henschen is hereby appointed construction Engineer and his bond as such Engineer is hereby fixed at 600.00

The foregoing resolution was offered and read by Supervisor John Chambers who moved its adoption, was seconded by Supervisor Penn Eckels, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J. Schoun, Penn Eckls and John Chambers, aye. Nays, none.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in DD No 63.

This being the 25th day of September, A. D., 1944, a date heretofore set for the letting on the crushing and stock piling of 35,000 cubic yards of rock and gravel, the hour for said letting having arrived, the proof of publication being on file and the Board being fully advised said letting was held as scheduled The chairman proceeded to open all bids on file and after duly considering all bids on file, the bid of the Maudlin Construction Company of Webster City is found to be the lowest and best bid therefor.

BE AND IT IS THEREFOR RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the bid of the Maudlin Construction Company of Webster City, Iowa, is hereby accepted as the lowest and best bid for the crushing and stock piling of 35,000 cubic yards of rock and gravel. All other bids are hereby rejected.

Chairman F J Schoun is hereby authorized and ordered to execute a contract with the Maudlin Construction Company of Webster City in behalf of Hancock County, Iowa All as by law provided

The foregoing resolution was offered and read by Supervisor Penn Eckels, who moved its adoption, was seconded by Supervisor John Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, aye. Nays, none.

Whereupon the resolution was declared adopted.

On motion and second the assessment on DD No. 137, Hancock County, Iowa, in the sum of $3,100.00, is hereby approved as corrected and the County Auditor is hereby ordered to carry the same on the special drainage tax list to be collected with the regular tax of 1944 payable in 1945. All as provided for by law.

On motion and second the Board adjourned to October 3rd, 1944, at 9:00 o'clock A. M.

ATTEST:
Fred C. Missal, County Auditor.
F. J. Schoun, Chairman.

COUNCIL PROCEEDINGS

Klemme, Iowa,
September 11, 1944

The Town Council, Klemme, Iowa, met in regular session with J E. Stille, Mayor, and Councilmen E. J Thompson, Herman Priebe, Art Wellemeyer and J C Thomas, present.

Minutes of the previous meeting were read and approved

COMBINERS AND PICKERS TO RECEIVE CERTIFICATES

Hancock county combine and corn picker owners will be given special recognition for participation in the 1945 War Harvest Program, it was announced today by V. A. Cook, President of the Hancock County Farm Bureau.

Every combine owner who harvests 100 acres or more of beans in addition to his own crop will be presented with a framed certificate of merit and likewise all farmers who pick 150 acres of corn for other farmers will be given a certificate, according to Mr. Cook.

The man who combines the largest number of acres of beans for his neighbors in the county will receive a framed picture of "Our Flag" and the person who picks the greatest number of acres of corn will receive a copy of the same picture

In case the same man wins the certificate or award as won last year, a gold seal will be presented indicating the two-year achievement.

State Contest

The champion corn picker and the champion bean harvester in the State will receive a $100 War Bond from the Iowa Farm Bureau Second place winners will each receive a $50 War Bond and the third place winners will receive a $25 bond.

The awards are being made by the State Farm Bureau which is working with the Extension Service of Iowa State College in an effort to make full use of all combines and pickers in the county in the 1944 harvest.

IOWA TRAPPING SEASON WILL OPEN NOVEMBER 10

The trapping season on muskrat, mink, raccoon, skunk, opposum, civet catt and badger will open at noon November 10, and continue through January 10, in Iowa, the State Conservation Commission has announced.

The Commission said the entire state would be open except that muskrat and mink could not be trapped along the Mississippi river east of the Chicago Milwaukee and St. Paul railroad line from north of the city limits of Muscatine to the state line.

There is a continuous open season on the red and gray fox, weasel, ground hog, wolf and coyote. The season on beaver is closed except under special permit.

The commission said the 1944-45 season was expected to yield a good fur crop although it might not reach the proportions of last year's bumper returns.

A total of 979,315 fur-bearing animals were trapped by Iowa trappers last year and sold for $2,961,462.55.

Evangelical & Reformed Church Scene Of Wedding Ceremony

MASON CITY GIRL BRIDE OF T-SGT. RAYMOND J. KEEPER

Ceremony Performed Friday Afternoon At Reformed Church

Miss Irene Peck of Mason City, and T-Sgt. Raymond J Keeper of Klemme were married at 2:00 o'clock Friday afternoon, October 6, 1944 at the Klemme Evangelical and Reformed Church, with the Rev. Calvin Grosshuesch officiating, using the single-ring ritual.

The couple were attended at the altar by Miss Ivanell Schriver, of Mason City, as bridesmaid, and S-Sgt. Bernie McLeod as best man.

The bride wore a gold wool dress with brown accessories and a corsage of gardenias and roses. The bridesmaid wore a black dress and white accessories. Her corsage was of orchids and roses.

The groom and best man wore their military uniforms.

The groom is a son of Mr. and Mrs Henry Keeper of Klemme. He is a graduate of Klemme high school and was employed by the Northern Lumber Co. until he enlisted in the army air corps. He saw service in the Pacific several months as engineer on a bomber.

Mrs. Keeper is a graduate of the Alexander high school. She lived in Klemme several years ago when her parents were in the restaurant business here.

The young couple left for Chicago to spend their honeymoon, after which T-Sgt. Keeper will return to Camp Lawrenceville, Illinois.

PLAN DISTIRCT COURT OF HONOR FOR SCOUTS

Boy Scout Event Will Be Held In Klemme Evening Of Oct. 18

Plans for a district-wide Court of Honor for Boy Scouts to be held October 18, were completed at a meeting of district Scout leaders at Garner last Wednesday evening.

Dr J L. Pauley of Mason City, president of the council was a guest at the meeting attended by scout leaders from Britt, Klemme and Garner. Dr. E. H. Phillips, Garner, district chairman, presided.

The Boy Scout Court of Honor which was planned, will be held in the Klemme high school gymnasium beginning at 8:00 o'clock. The public is invited and parents of Scouts are especially urged to attend this Court of Honor.

Will Install New Furnace

A new heating plant will be installed at the U. B. Church at Goodell. Work is expected to begin next week.

GRANDMA KLUCKHOHN HAS BIRTHDAY DINNER PARTY

Grandma G. W. Kluckhohn was 84 years old Friday, October 6th, and she received many birthday greetings and letters.

However, she was pleasantly surprised Sunday when a dinner was held in her honor at the Carold Larson home and her children and grand children and families came with well-filled baskets for a family gathering in her honor and to spend the evening with her.

Grandma had two decorated birthday cakes for the occasion. One represented her great grandchildren and had eight candles on it.

Those present besides Grandma Kluckhohn were Frank Kluckhohn and son, Franklin; Sadie Turgasen; Mr. and Mrs. Fred Kluckhohn; Mr and Mrs. C. E. Kluckhohn; Mr. and Mrs. Lynford Back and family; Mrs. Donald Turgasen; Mr. and Mrs. Carold Larson and children; Mr. and Mrs. Verle Keraus and children; Mr. and Mrs. Wm. C. Keraus; Mr. and Mrs. Aug. Larson.

Grandma Kluckhohn is very proud of the fact that four generations are represented through each one of her children.

GAST TWINS HONORED AT PARTY FRIDAY EVENING

The Misses Lois and Lola Gast, twin sisters, were pleasantly surprised on their birthday when 28 young people gathered at their home Friday evening to help celebrate the event.

Those present besides the honored twins were: Marie Perkins, Wava Schoenwetter, Doris Spitler, Pearl Wade, Verna Pringnitz, Doris Pringnitz, Hilda Abele, Lorraine Bredlow, Neva Kropp, Ardis Polsdofer, Lois Riemer, Naomi Neiman, Darlene Schultz, Laurice Lemke, LeRoy Bredlow, Ronald Gibbs, Elwyn Ridder, Lawrence Polsdofer, Ronald Bredlow, Junior Pringnitz,, Ronald Pringnitz, Raymond Schoenwetter, Ben Nieman, Lavern Velau, Harry Abele, Wavel Schaefer, Lester Kropp.

Mr. and Mrs. Kenneth Gast and Roger, and Mr. and Mrs. Kenneth Zwald and family were also present.

The evening was spent in playing games after which a delicious lunch was served, consisting of cake, ice cream, sandwiches and coffee.

The twin sisters received a variety of nice gifts.

One-eighth of a ton of coal is needed to make a barrel of gasoline.

Schuberts Surprised On Their 30th Wedding Anniversary

MORE CONTRIBUTIONS TO NATIONAL WAR FUND CHEST

J. C. Thomas, chairman of the National War Fund Drive for this community reports several more contributions to the fund since the list was published last week.

Two more names should have appeared on the list last week: Mrs Clara Barz, $4.00; and Joe E. Johnson, $2 00. The Times regrets that these two names did not appear in the list of contributors last week If there should be any others we will gladly make a correction.

New names turned in by Chairman Thomas are: Mrs. Katherine Howel, $1.00; Miss Doris Johnson, $1.00; Dean Merkel, $1.00; Miss Mavis Nuehring, $1 00; Quentin Stille, $1.00; Klemme American Legion, $10 00; Franklyn Kluckhohn, $1.00; Burt Jones, $2.00; Central States Electric Co., $10.00; Orville Stokesbary, $2.00; Klemme American Legion Auxiliary, $5.00; Mrs. Clara Stille, $2.00.

FIRST KILLING FROST OF THE SEASON SUNDAY NIGHT

The first killing frost of the season came Sunday night, October 8 this year. The temperature dropped to freezing during the night and at 8:00 o'clock Monday morning the thermometer read 33 degrees.

An earlier frost on the morning of Friday, September 29th, was the first frost of the season but was so light that no damage was done in this part of the state.

Frost held off long enough here this year to mature most of the corn and soy beans.

HERE'S ONE FOR RIPLEY'S BELIEVE IT OR NOT

Several years ago Henry Ward living south of Klemme, planted some seeding apple trees and five of them grew up and have been bearing a crop of luscious bright red apples for the past five or six years.

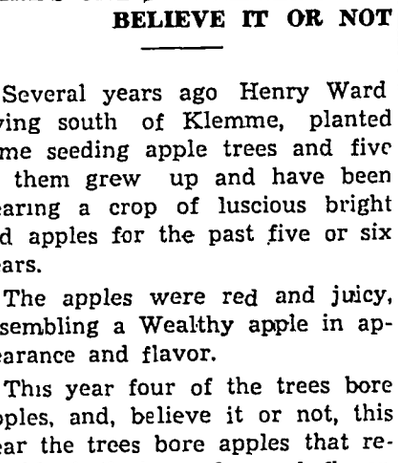
The apples were red and juicy, resembling a Wealthy apple in appearance and flavor.

This year four of the trees bore apples, and, believe it or not, this year the trees bore apples that resemble both in color and flavor, Grecning apples!

Why this freak of nature displayed by all four trees is a real puzzler.

Anything can happen now and Mr. Ward would not be surprised if the trees bore pears or peaches next year.

PROMOTED AND CITED



CPL. DUANE JOSTEN

Duane B. Josten, son of Alfred V. Josten of near Klemme, was recently promoted to Corporal in a tank destroyer battalion in New Guinea.. He had previously been in Australia. His unit was cited by Gen. Douglas MacArthur for its fine performance, willingness to accept a difficult job and determination to see it through.

ONE HUNDRED FIFTY GATHER AT COMMUNITY HALL FOR DINNER

Fine Program Feature Of Gathering After Big Dinner

Mr. and Mrs. William Schubert were greatly surprised Sunday, October 8th, when a large group of relatives gathered at the Klemme Community Hall to help them celebrate their 30th wedding anniversary.

All brought well-filled baskets of food and a cafeteria dinner was served at noon. A beautiful decorated cake was the center-piece at the honored guests' table.

At 2:15 a short program was presented under the direction of Mrs. Howard Baack and consisted of a duet by Mrs. Howard Baack and Cpl. Herbert Schubert; a mock wedding by several men; a marimba solo by Marcelle Josten accompanied by Mrs. Cecil Katter; Brief History of the Bride and Groom, read by Ewalt Schubert; a solo by Cpl. Schubert, accompanied by Miss Juanita Wetter; and a talk by Rev. Calvin Grosshuesch in which he presented the couple with a gift of money from the group. The program closed with a marimba solo by Marcelle Josten.

About 150 people attended the affair and included the following:

Rev. Calvin Grosshuesch and family and Rev. J. W. Grosshuesch of Klemme; Mr. and Mrs. Will Schubert and Wilbert of Rockwell; Miss Lena Schubert and Miss Juanita Wetter of Mason City; Cpl. Herbert Schubert of Douglas, Arizona; Ewald Schubert of Omaha, Nebraska; Mr. and Mrs. Howard Baack and children, Mrs. August Baack and Dorance of Klemme; Mrs. Herbert Schubert and Roland, Mr. and Mrs. Will Vesculies, Mrs. Thoro Schubert, Mrs. Albert Sorenson and family, all of Britt; Mr. and Mrs. Albert Schmidt and Calvin, Mr. and Mrs. Luther Schmidt, Fred Schmidt and family, Herman Schmidt and family, Emil Lau and family, Mr. and Mrs. Paul Lau.

Mr. and Mrs. Irving Haupt, Fred Nuehring and family, Erwin Nuehring and family, Mr. and Mrs. Geo. Thieman, Mrs. Clara Barz and family, Raymond Barz and family, Edwin Josten and family, Mr. and Mrs. Fred Becker, Mrs. Cecil Katter, Mr. and Mrs. Julius Priebe, Paul Goll and family, Mr. and Mrs Henry Josten.

Ewald Josten and family, Aug. Josten and family, Mr. and Mrs. Herman Priebe, Albert Priebe and family, Verner Priebe and family, Mrs. Fred Ridder, Mr. and Mrs. Wes Schuldt, Lee Ridder and family, Mr. and Mrs. Albert Koerner, Orville Stokesbary and family, Glenn Bridges and family, Elmer Arnold and family, Mrs. Martha Bredbenner, Mrs. Daisy Lemke and Donald, Albert Etchen and family Carl Swanson and family, all of Klemme and vicinity.

All of Mr. and Mrs. Schubert's children were present except Walter who is a Seaman 2-c at Norman, Dakota, and Mrs. Walter Schubert Oklahoma; Norma at Madison, So. Dakota, and Mrs. Walter Schubert of Omaha, Nebraska.

RUMMAGE SALE WILL BE HELD SATURDAY, OCT. 14

The United Service Women will hold their rummage sale all day and evening, Saturday, Oct. 14th at the Gruetzmacher building.

Coffee and doughnuts will be served all day and evening, and at supper home-made vegetable soup, and apple pie will be added to the menu.

The ladies invite visitors to their regular meeting the second Wednesday afternoon of each month at 2:00 o'clcok. Women having a husband, son, father or brother in the armed service are eligible to become members.

WEEKLY NEWS ANALYSIS

Western Front Aflame as Nazis Strive to Hold Allied Advance; Congress Shapes Postwar Aid

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

As war comes to their soil, German civilians pack belongings and move from battered villages in war zone to safety.

EUROPE:

Battles Rage

In some of the bloodiest fighting since D-Day, the whole western front from Holland down to Switzerland was aflame, with Allied forces slugging through stubborn enemy defenses and then holding their own against German counter-attacks.

Especially bitter fighting occurred on Lieut. Gen. George S. Patton's Third army front, where U. S. tanks spearheaded a drive on Germany's famed coal and industrial Saar basin, and the enemy lashed back with strong armored forces. As Patton's men edged forward, the enemy fell back on the rugged and wooded slopes of the Vosges mountains, where they were expected to make a stand before retiring to the Siegfried line to their rear.

Stiff German resistance and repeated armored counter-attacks also slowed progress of Lieut. Gen. Courtney Hodges' First army to the north of Patton's Third. In this sector, enemy strength concentrated about Trier and Stolberg in an effort to throttle Hodges' drives to the great Rhineland industrial cities of Cologne and Coblenz.

In Holland, an estimated 100,000 Germans fought against entrapment by Allied ground forces driving up the eastern border of the country toward the Zuider Zee, and paratroopers dropped in their rear.

Effect of the Allies' drive not only was to threaten the pocketing of these six divisions in western Holland, but also to put them into position to drive around the Siegfried line ending to the south of this sector and burst out into the Ruhr valley.

Clawing through the battered "Gothic line" under the cover of the rolling barrage of their massed artillery, Allied forces looked out onto the rich Po valley in northern Italy, as German armored formations sought to stem their rolling advance in this great agricultural and industrial region.

Russ Break-Through

Heaviest fighting on the eastern front centered in the north, where the Germans claimed more than 600,000 Russian troops were attacking to clear out the Baltic states of Estonia, Latvia and Lithuania.

Despite the Germans' hard defense of their lines, built up in the swampy lake country of Estonia and Latvia, the Reds punched out sizeable gains.

The old Polish capital of Warsaw was a fiery inferno as the Reds pumped shells into the German defenses of the city, and Red troops surging across the Vistula river came to grips with enemy units.

Armistice Terms

Calling on the nation to ". . . stick to reality and try to build up . . . existence with the opportunities that are left to us," Finnish Acting Prime Minister Ernst von Born disclosed Russian armistice terms to a heavy-hearted people.

Including restoration of the 1940 Russo-Finnish border; cession of Petsamo to the Reds; leasing of the Porkkala peninsula on the Gulf of Finland for a Russian naval base, and reparations payments of $300,000,000, the armistice terms were described as "the hardest . . . in our history" by Von Born.

Restoration of the 1940 border meant Finland's surrender of its most highly developed industrial region containing 10 per cent of its population, and cession of Petsamo meant the country's surrender of rich nickel mines.

GAS TEST

Five hundred officers and enlisted men have been commended by the chemical warfare service of the army services forces for voluntarily exposing themselves to lethal gases in order to test a new anti-gas protective ointment.

As a result of the tests, during which men entered gas-filled chambers and contaminated areas, medical officers and research scientists have conclusive evidence that the M5 protective ointment will be effective against gas warfare.

PACIFIC:

No Pause

Even as U. S. marines and doughboys cleaned up resistance in the Pala islands, 600 miles east of the Philippines, American airmen were on the go softening up other enemy strong-points.

Again the Philippines were the principal targets. Hopping off from New Guinea, army bombers blasted the southern port of Davao, shuttle point for enemy troops and supplies in the area, and carrier planes operating in the Third fleet hammered shipping, airfields and military installations around Manila bay, nerve center of the islands.

In striking the southern Palaus, whose conquest placed U. S. forces closer to the vital enemy water route from the Indies to Japan, American troops encountered fanatical resistance, more than 7,000 Nipponese soldiers out of a force of 10,500 fighting to the death on the main island of Peleliu.

FIGHTING SHIPS:

Allied Might

Recognized naval manual of the world, the 1943-'44 edition of "Jane's Fighting Ships" noted the increasing strength of Allied might on the high seas and the continued decline of Axis strength.

Indicative of the growing power of the U. S. navy, "Jane's" revealed that it numbered 4,167 ships last January, exclusive of thousands of landing craft, with high watermarks including the scheduled launching of two new 45,000-ton battleships this year, the development of a fleet of 100 aircraft carriers, and the construction of new 2,200-ton flotilla leaders.

Referring to Axis naval strength, "Jane's" reported that disablement of Germany's Tirpitz and Gneisenau removed its last big capital ships from service, and despite the launching of two new 45,000-ton battleships, Japanese shipbuilding facilities were running behind demands.

CONGRESS:

Charts Reconversion

With the fall elections rapidly approaching and congressional leaders pressed to assemble sufficient quorums, the house and senate made preparations for handling the post-war economic crisis and then moved toward a recess until November.

First bill to get an O.K. and be sent up to the White House for the President's signature was the one providing for a three-man administrative board to supervise the disposal of an estimated 100 billion dollars of surplus war goods, with no discrimination to be shown against little business and sale of all war plants over $5,000,000 subject to congressional approval.

As the first major step to enable the automobile industry to prepare for peacetime manufacture, the War Production Board authorized Chrysler, Ford and General Motors to permit technicians to plan correction of weaknesses in 1942 models; bring material specifications to date; map plant layout, and design minor changes in 1942 models. None of the companies are permitted to spend more than $25,000 monthly for labor or material in this work.

The second bill passed called for establishment of an office of reconversion, which would coordinate the work of all government agencies in the switch-back to peacetime conditions, and also authorized the lending of funds to states if needed to meet unemployment compensation payments.

MISCELLANY

NELSON: Having concluded conferences in China looking toward the reorganization of the rickety Chinese industrial machine, Donald Nelson was scheduled to head for home to work out America's participation in the project.

BULLETS: Army ordnance experts have developed a new incendiary bullet capable of penetrating self-sealing gas tanks.

GREAT BRITAIN:

Building Needs

That rebuilding will provide the base for Great Britain's postwar economy was indicated by the government's recent announcement that 1,250,000 workers would be needed in the construction industry to repair bomb damage.

Contributing to the tremendous damage wrought by the war have been the deadly German robots, some of which have individually wrecked as many as 1,500 houses, with the average being 400. About 200,000 square yards of board, 500,000 window frames and 400,000 doors have been ordered to help repair buildings damaged by the flying bombs.

At the present time, 380,000 people are engaged in the construction industry, it was revealed, with many thousands of these women.

Postwar Wages

That British labor will put up a battle to retain its wartime wage increases in the postwar world was indicated by the strike of 14,000 auto workers in Birmingham, England, over assignment of employees to the assembly of a reputed peacetime product at lower wages than those being paid in the munitions department.

Under the stimulus of wartime conditions, with manufacturers bidding for labor, British wages shot up from about $15 a week to $25 for men, and from about $6.50 weekly to $13 for women.

Because of the competition between themselves and foreign countries, however, British industrialists are expected to resist present high wages unless production costs are chopped through an increase in labor efficiency or greater use of machinery.

AMERICAN LEGION:

Wants Strong U. S.

American cooperation with other nations to keep the peace, forceful occupation of Germany and Italy to bring the lessons of war home to their populations, and compulsory military training for youth, were among the resolutions adopted by the American Legion at its 26th annual convention in Chicago.

Also advocated was retention of necessary bases, maintenance of the navy at full strength; preservation of free enterprise within the U. S.; stoppage of all immigration until unemployment should fall to around 1,000,000, and deportation of all subversive aliens to their native countries.

Legion hi-jinks sees Claude Duzick posed as Mae West, escorted by Hap Gordenson.

Active in Legion affairs in his home state, where he was credited with bringing Legion membership up to 85,000, Edward N. Scheiberling of Albany, N. Y., was elected national commander. Mrs. Charles B. Gilbert of Norwich, Conn., mother of two sons in service, was elected president of the Legion Auxiliary.

RAIL TRAFFIC:

Safety Problem

Answering Sen. Burton K. Wheeler's charges that railroads have failed to heed congress' direction for the installation of safety equipment which might prevent fatal train wrecks, company officials declared that many wartime accidents could be attributed to inexperienced help. Because human failings more often than not have been shown to be the cause of many accidents, a large number of the roads have broad educational programs, it was said.

In addition to a reliance on new help and inability to obtain materials for safety devices because of priority restrictions, rail officials said, the vast increase in wartime freight and passanger traffic has multiplied the chances of mishaps.

Pointing out that congress empowered the Interstate Commerce commission to order the railroads to install safety equipment 24 years ago, Senator Wheeler said the government may be compelled to force such action if the ICC failed to press for action.

STARS TO TOUR

Eleven active players and six managers will form five troupes of major league baseball stars who will visit front line battle areas to entertain troops under the auspices of the U. S. O. camp shows.

Managers lined up to make the trip include Mel Ott of the New York Giants; Leo Durocher of the Brooklyn Dodgers; Frank Frisch of the Pittsburgh Pirates; Luke Sewell of the St. Louis Browns and Steve O'Neill of the Detroit Tigers.

The Washington Merry-Go-Round

By Drew Pearson

Washington, D. C.

OCCUPATION OF REICH

The war department isn't advertising the details but it has completed plans for the occupation of Germany by American forces.

The Allies have agreed the occupation should be shared in roughly equal numbers by U. S., British and Soviet forces. This will permit the return to the U. S. A. of a maximum number of units, will also free thousands of trained men if necessary for polishing off the war against Japan.

The chief problem involved is getting enough transports to rush the men home, plus sorting out those entitled to go home first. The latter will be decided by the army's "point demobilization system," and millions of forms for computing each GI's service are being printed and shipped overseas.

In 1918, American soldiers in France, deliriously overjoyed at victory, almost threw away their weapons, went wild for weeks and months. Officers, equally happy, suspended regulations, and permitted their men to overrun the big cities of France, having a gay time.

After this armistice, things will be different. The whole plan has been charted to the last detail. Discipline will be maintained, but the war department demobilization plan calls for the elimination of all "harrassing details not essential to the health and welfare of the troops."

GI Tours of Europe.

Most of the troops will be excused from drill, will be given ample opportunity to see Europe while awaiting transports for home. Men who desire it will be taken on tours of the continent under army auspices.

A "Guided Tours of Europe" program is being worked out as a result of the experience, after the last war, of American doughboys who returned home having seen only the battle fronts plus the gay side of Paris. This time officials are anxious to let the boys learn something more of the people and places they have been fighting for.

Some GIs will be given an opportunity to go to school in Europe, attend universities such as the Sorbonne, Oxford, and Cambridge. The army will also organize classes for the younger GIs who want to pick up their studies during the brief period after the armistice before they return home.

The war department recognizes it will be no easy job to get the army home all at once. However, both have emphasized the need for speeding discharges and, with no submarine warfare to cope with and no necessity for sailing in slow convoys, officials are confident that all except the army of occupation in Germany will be back within a few months.

Note—Greatest complaint against the army point system is that it makes no allowance for men over 35, who apparently have to sweat it out until the end of the Japanese war, unless the war department makes new allowances for them.

* * *

INSIDE GERMANY

Allied leaders, after surveying effects of intelligence work inside the Reich, are now finally convinced there is no chance of an honest anti-Hitler revolt by the German people. What's more, efforts to spawn a pro-Allied underground in Germany have met with failure.

Principal reason is that the Gestapo controls everything — including the army hierarchy. The communist underground has been completely liquidated; also all remnants of the socialist and social-democratic parties.

The only real hope Allied military leaders have is that the 11 million slave laborers brought to Germany by Hitler from Poland, Russia, France, Belgium, Holland and Norway, will conduct an increasing campaign of sabotage, perhaps giving heart to large groups of Germans to join them.

A year ago, Hitler and his henchmen kicked these slave laborers around at will, fed them poorly, worked them brutally under a whip lash. Of late, this pressure has been eased. In some instances, Nazis have reportedly given special treatment to their captives on the chance that they themselves will not be too badly punished by the Allies when German falls.

It is now even possible for a few of these captives to escape from Germany — for a price in foreign money—as petty Nazi police try to accumulate enough foreign currency to live safely during the Allied occupation.

CAPITAL CHAFF

Whenever Sen. Bennett Clark of Missouri (soon to be an ex) meets Mrs. A. Mitchell Palmer, he says: "I should hate you — but I can't." . . . He refers to the fact that, at the Baltimore Democratic convention of 1912, A. Mitchell Palmer received a telegram from Woodrow Wilson, then governor of New Jersey, releasing his delegates to Bennett's father, Speaker Champ Clark. But Palmer refused to show any one the telegram and, in the end, Wilson, not Clark, was nominated.

Walter Winchell

(WNU Service)

Memos of a Newspaperman:

Time echoed the oddity-in-the-news about the soldier overseas who was hit by a shell fragment which contained the number on his own dog-tag . . . The newspapers fell for it, too, a week earlier when a Canadian Press dispatch said an RCAF batman was named as the one it actually happened to in Normandy . . . The report stated that his name was George McMillan of Nova Scotia. The number on the fragment was 26750—the number on his identity card . . . The Herald Tribune carried it, too, a week after it published an article (Aug. 13th) in its magazine section titled: "Lucky Shot" by Gen. Patton's wife. She said it happened in the last war!

Lou Holtz and some others were reminiscing about Ziegfeld and how the master-showman always "had class" even when he couldn't afford it.

There was the time, frixample, when Ziegfeld was in Hollywood after squandering another fortune on a failure in New York. He wired his old friend Ed Wynn . . . "I know I owe you $65,000," it said, "but I need $7,500 desperately. Will you help me out again?"

Wynn instructed his bankers to rush Ziegfeld the $7,500 . . . Ziegfeld used it to return to N. Y. in a private Pullman!

Max Herzberg, who collected a bookful of anecdotes which he christened: "Insults," considers this his favorite. . . . Once Disraeli and Gladstone collided verbally in the House and as Gladstone came out after adjournment he was still shaking with rage. . . . He glimpsed Disraeli chatting with other members and he shouted: "Sir, you will come to your end either on the gallows or by some terrible plague!"

Disraeli adjusted his monocle and softly intoned: "I should say, Mr. Gladstone, that depends upon whether I embrace your principles or your mistress."

The G-Men follow through on every tip, of course. . . . You never can tell. . . . Several of them were assigned to a real hot one last week. . . . A woman, reported the informant, had many signs in her bathroom reading: "Good morning, Mein Fuehrer." . . . "Heil Hitler!" and "What have you done today to improve the Master Race?" . . . FBI agents, disguised as plumbers, investigated and confirmed the tip. . . . "You bet I put them up!" she boasted. "But I'm not a Nazi!" . . . It took hours before they broke her down. . . . She was fed up with her husband's dictatorial attitude, and he had stopped speaking to her. . . . She hoped to insult him by comparing him with Hitler!

Add capsule criticisms that will live: Don Herold's: "The dogs in 'Uncle Tom's Cabin' are poorly supported by the cast." . . . Robert Benchley: " 'Perfectly Scandalous' was one of those plays in which all of the actors unfortunately enunciated very clearly." . . . Anon: "The trouble with Katharine Hepburn in 'The Lake' is that she didn't throw herself into it enough."

Notes of an Innocent Bystander:

The Magazines: Newsweek's good word-wedding. Its drama critic, describing a singer portraying a hammy actress, wrote: "She plays the role of a Mae Westphalian prima donna." . . . The same mag reminds Russian-baiters that the Soviet casualties are almost five times greater than the U. S. and British combined. . . . "Seventeen," a new mag for the junior-miss set, has a refreshing slant. . . . Earl Wilson is represented in Everybody's Digest, a mag with zing. . . . Pic rolls out the silver lining for scientists who insist civilization can attain Utopia. Meanwhile we'll be content with the closest thing to it—America. . . . American Mercury's circulation is climbing steadily and for good reason. It makes sense. . . . John Roy Carlson, the "Under Cover" author, does another excellent job in The Woman magazine. . . . In a few weeks the same mag offers his "Daughters of Dissension and Defeat," which undresses the various phony "Mother Patriotic Clubs."

Navy Sec'y Forrestal got a huge howl at the Waldorf dinner in his honor with this: "There are two wars. We are winning the first one and we are going to win the second. But there are too many experts! That reminds me of the expert engineer who knew what it was all about. You know what an expert is. He's a mechanic away from home!"

Capt. J. Farra, 51, has been in the Army 35 years. . . . He was asked to fill out another questionnaire. The first question was: "Civilian occupation?" . . . To which Farrar jotted down: "Child!" . . . In Indianapolis a man was nabbed climbing over the wall of the Indiana women's prison. The police learned he was the prison engineer and had forgotten his keys. . . . A certain prima donna complained to a newspaper man that she was getting nervous and irritable and just didn't want to see people. "Give a concert," he suggested.

When Your "Innards" are Crying the Blues

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

DR. CALDWELL'S SENNA LAXATIVE
CONTAINED IN SYRUP PEPSIN

QUICK RELIEF FOR HEAD COLD MISERY

When nostrils are clogged, nose feels raw, membranes swollen, reach for cooling Mentholatum. Speedily it (1) Helps thin out thick, stubborn mucus; (2) Soothes irritated membranes; (3) Helps reduce swollen passages; (4) Stimulates local blood supply, right to "sick" area. *Every breath brings relief!* Jars, tubes, 30¢.

MENTHOLATUM

Kidneys Must Work Well For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how kidneys must constantly remove excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*? You may be using a medicine recommended the country over. *Doan's* stimulate the function of the kidneys and help them flush out poisonous waste from the blood. They contain nothing harsh. Get *Doan's* today. Use with confidence. At all drug stores.

DOAN'S PILLS

tel Caters Exclusively to Servicemen and Their Families

e of the most unusual hotels e nation is located in Wash-ni, D. C., where, despite ly sellouts, accommoda-are provided far below ceiling prices!

is the United Nations Service r, formerly the Capitol Park now under the exclusive man-ent of the Recreation Services e War Hospitality committee. nly hotel in the United States over completely for this pur-it is perhaps the largest Can-in the world for servicemen of he United Nations, and is op-d as a voluntary community ct along modern health and ation lines.

e United Nations Service center verything—from its own news-, Flags Abreast, to a free nurs-or children of traveling service-Washington, D. C., is such a for the armed services that the een, despite the hotel's size, was d to take over an adjoining l house, converting it into room 45 more beds, a total of 570 able sleeping accommodations ly.

e huge center was officially ed October 27, 1943, and there een a virtual sell-out of accom-tions since. It is the only Can-that accepts the wives and fam-of servicemen, as well as those iform. No reservations are ac-ed—first come, first served. This ue of both officers and enlisted

st recently, the 1,000,000th visit-serviceman was honored. He Petty Officer 3/c Stanley Wick-of Boston, Mass., stationed at naval air base, Patuxent River,

Has Own 'Police Force.'

tually it looks like the head-ters of the general staff, except 74 former employees of the tol Park hotel are still working as members of the Canteen . Everything that occurs at the een must be approved by the ary district of Washington and Potomac River naval command. -hour duty is maintained by the e Patrol—the Canteen's own po-force!

ough much of the Canteen's va-accommodations are free, some ces are rendered on a cost ba-which astounds the average

Typical guests at the Center are Petty Officer 3/c Stanley Wicklund of Boston, and his wife. When Wicklund came in the door he was told that he was the one-millionth serviceman to register at the hotel. The Wicklunds are shown resting in a corner of the nursery, where they have put seven-months-old Bobby to bed.

Washington civilian. This is true of laundry service, clothes dryers, washing machines, valet shops, barber shops and the impressive cafeterias.

The cafeterias are tremendous projects in themselves. There are two—one each for officers and enlisted men. Miss Rochelle Z. Kendall of Dallas, Texas, is the Canteen's food expert and nutritionist. Pointing out that the most modern and sanitary methods of food catering had been employed there, she said: "Every governmental stress on basic, nutritious foods has been observed by us, as has the general governmental theme of utmost sanitation during this wartime crisis. We have, for example, employed single-service paper eating and drinking utensils almost exclusively, in place of obsolete and sanitarily inadequate dishwashing equipment, thus avoiding the possible danger of transmission of disease from mouth-to-mouth via poorly washed common eating and drinking utensils. More than 50,000 paper cups weekly are used."

Nursery Is 'God-Send to Mothers.'

The free nursery at the Canteen, according to Mrs. Luther Gulick, the nursery chairman, is a "God-send to mothers and children traveling through Washington."

Employing two registered nurses on an eight-hour shift each, and one child educator or psychologist, the nursery operates 24 hours a day. There are 60 volunteers in this department alone, all having passed an intensive course in child care before acceptance. Since its opening, 2,568 children have been cared for, with the average between 9 and 12 months of age. The youngest guest of the nursery was a 16-day-old infant!

But most unusual is the nursery's "Baby Ferry Command." This is a group of uniformed AWVS women who roam the city's Union station a block away, and route weary mothers and children to the Canteen. Should a child or mother be ill, both army and navy dispensaries in the city are on call for emergencies.

Apparently nothing has been left to chance in this greatest of all Canteens. It is a mighty institution that has grown out of this war, and is a living testimonial of the home front's contribution to the war effort in general, and to the serviceman and his family in particular.

nd-Lubbers ecome Seamen In Six Months

All right fellows. Line up on er side of the walk and open your gear for inspection. No es, guns, cameras or radios mitted aboard the base."

at's the first order "boots" en-g the U. S. Maritime Service ning station at Sheepshead Bay rooklyn, N. Y., hear when they d" at the world's largest mer-t marine training station. Taken w by an MA (Master at arms), in 24 hours the new recruits are essed through the station and r equipment issued.

rom three to six months later e same "boots" emerge as thor-hly trained merchant seamen, dy to take their place as radio rators, deck or engine seamen, s, or assistant purser-hospital smen aboard one of Uncle Sam's dern merchant vessels. Recruits n Nebraska, Indiana, Alabama, higan—all across the country re-in six days a week at U. S. itime Service training stations earn to sail aboard a wartime go vessel to "Deliver the Goods."

or his first few days at Sheeps-d Bay, the new trainee is under supervision of the indoctrination er. His orientation includes rea-s for and proper method of salut-proper stowing of gear and in-uctions in rules and regulations he station. A section instructor igned to each 50-man section then es over and continues with the ly formed section through the four weeks of preliminary or ot" training.

"boot" training, the new train-receives instruction in 20 subjects ging from gunnery to mental hy-e. He attends classes eight hours ay, five days a week.

uring his "boot" period, the new ruit uses a wide variety of train-aids. He sees motion pictures, actical demonstrations of fire ipment, breathing devices, eches buoys and line-throwing s. Wall charts on a variety of

Outdoor steering trainers are used to teach apprentice seamen the proper method of standing a wheel watch, relieving the helmsman, and following a course. The trainers are circular metal platforms floating in concrete basins. They are equipped with a ship's wheel, binnacle, and compass. As the trainee turns the wheel in accordance with directions of the instructor, the platform rotates.

topics are kept in view on classroom "bulkheads."

Completing four weeks of boot training, the new recruits move into work week. A variety of duty including "kp" is assigned each individual to teach discipline and to attend to necessary station tasks.

Next the apprentice is ready to move into the course of advanced instruction for which his preference and tested capabilities qualify him.

Deck trainees, at the end of their training, receive three final weeks of practical duty aboard one of the U. S. Maritime Service training ships which operate on Long Island sound and Chesapeake bay. Ashore they use ingenious equipment to learn. In one of the large indoor buildings a mockup of a complete ship's bridge is constructed so that men may see the equipment and understand the inter-relation.

Engine trainees receive instruction in a wide variety of technical subjects in addition to continuing courses in boats, gunnery, physical training and swimming. In the station powerhouse which provides steam for cooking and heating, a Liberty ship engine is installed.

Men for the cooks and bakers schools are selected after a series of special examinations. In addition to standard seamanship courses these men learn butchering, cooking and baking. They are provided with two Liberty ship galleys and two Victory ship galleys exact to the final pot and pan.

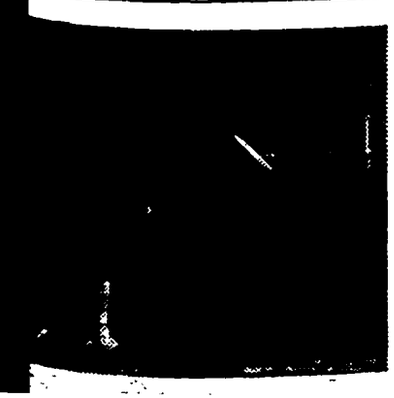
Fifty men are admitted to the Maritime Service hospital corps school each week, selected by competitive examination. Trained to double as pursers and hospital corpsmen aboard merchant vessels, this is one of the hardest courses of instruction. The men are not doctors but skilled and competent medical men able to treat ordinary ailments of seamen and, most important, how to utilize most modern medical methods and drugs to keep alive and comfortable a dangerously ill man until the services of a medical officer become available.

Founded by a provision of the Merchant Marine Act of 1936, the U. S. Maritime Service came into being as the training organization for men to man America's merchant marine. In addition to the Maritime Service which trains both apprentice seamen and men for officers who have had 14 months sea time, the Merchant Marine Cadet Corps trains young cadet-midshipmen for duty in the merchant marine. The parent organization, the War Shipping administration, comes under the jurisdiction of the U. S. Maritime Commission.

Under recent age limit changes youths 16 to 17½ can enroll for merchant seaman training by the U. S. Maritime Service provided they have their parents' consent. Men between 26 to 35½ can still volunteer for all branches of Maritime Service training, provided they secure a referral card from the U. S. Employment Service. Men up to 50 years of age can volunteer for cooks and bakers training only.

Expenses of recruits are paid to one of the four major training stations of the Maritime Service. In addition to a 10,000-man station at Sheepshead Bay are schools at Hoffman Island, N. Y., St. Petersburg, Fla., and Avalon, Calif.

Pay during training is $50 per month with increases for the more advanced schools. Uniforms and quarters are furnished trainees. Upon completing training, the men are assigned aboard a merchant vessel to begin "Delivering the Goods" all over the world.



Left, trainees practice fire-fighting on flaming oil in the aft hold of the S. S. Sheepshead Bay. Three men on the bridge play a stream of water on the sides of the hold to cool off the plates and confine the fire. The man in the foreground stands ready with new foam extinguishers.

Right, apprentice seamen are shown the use of the breeches buoy, which has saved many sailors from drowning on sinking ships. All other methods of life-saving are also taught.

GENERAL "IKE" IS ONE, ALSO

General Eisenhower is a golfer. This is revealed by Mrs. Eisenhower who says it is his favorite game. This explains the distance he is getting with his drives.

—*—

We understand the General, while not a trick golfer, has an ambition to do some fancy shooting. He wants to place a ball on Hitler's forehead and try blasting it with a No. 1 iron.

—*—

It's good to know that our top general is a golfer. We should have known it. He has the eyes of a golfer, revealing impatience to get going, a yen for socking, a sort of "I-know - I - can - take - four - strokes-off-today" expression.

—*—

Ike looks like a fellow who would be especially tough around the greens. He doesn't strike us as one of those fussbudgets who take an hour to line up a putt and who demand the silence of the tomb. We are sure the General walks up to the ball, takes a squint at the pin, addresses the pellet and—bingo—it's in the cup.

—*—

He looks like a man who is never afraid to tee up a brand new dollar ball for the drive across the water hole.

—*—

He is the type who knows that the grip, stance and swing are important and who gets them right before he goes after the loving cups.

—*—

Summing up, we would say of the General as a golfer:

A tough opponent anywhere. Has smooth flow of power and never presses. Coordination perfect. Uses overlapping grip and is seldom off fairway. Hits crisply with irons.

Is rarely in traps (despite many Axis attempts to get him into 'em); when he gets into one he is a wonder with his blast shots.

Rarely loses temper; never breaks a club or blames defeat on boy carrying the bag.

Takes strokes from nobody. Likes to concede the other fellow a couple.

Always puts down right score and adds correctly.

—*—

Is proud of Hole-in-one in Italy and France and is approaching Berlin with "the look of eagles in his eyes."

Is soul of confidence, as illustrated by fact he is already studying layout of Berlin country clubs, with special attention to type of grass on fairways and texture of sand in sandtraps.

Thinks Hitler is a hacker who cheats on his score, kicks ball around in rough, always improves his lie, lacks rhythm, accuses other fellow of upsetting him, steals soap from the locker room and purges golf club steward who reminds him that he still owes for last month's lunches and drinks.

—*—

Mrs. Eisenhower says Ike also loves fishing. He must be enjoying himself at present. So far he hasn't had to admit that any "big one got away" in Normandy or Brittany.

Conversion Joys

("Donald Nelson plans to permit manufacture of many non-essential goods."—News item).

Now I know the Hun is done
Now I know he is in bad:
Mr. Nelson tells me I
Soon can buy a heating pad!

Hitler's sunk beyond all doubt—
Daily he is going deeper:
Mr. Nelson told the wife
She can get a carpet sweeper!

Adolf's finish must be near
Doomed for certain is "that man":
Washington has cleared the way
For a brand new garbage can!

Nazis high and Nazis low,
How the tide of battle changes!
Here's the tipoff on the end:
We can now make kitchen ranges!

Egg beaters and bicycles
Frying pans, machines for sewing,
Couches, screens and floor-lamp plugs—
They show how the war is going!

Bathroom scales and basting spoons,
Hairpins, scales and things quite tinnish,
Icebox parts and mattresses . . .
Clearly point the Nazi's finish.

Thanks, Don Nelson, for the news—
You have cheered us greatly, baby;
Oh, to ask "Is that in stock?"
And to get at least a "Maybe"!

The oyster season is with us again. And at present rates you can get a half dozen on the half-shell almost anywhere if you can complete arrangements with a financing company.

—*—

It seems there is an oyster shortage. We asked few questions because we were afraid an oysterman would fix his eye on us and ask "Doncher realize the oyster has gone to war?" It seems it is due to man shortage. That makes us feel better about the whole thing.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

JESUS' UNDERSTANDING OF MAN

LESSON TEXT—Matthew 12:9-21.
GOLDEN TEXT—And needed not that any should testify of man; for he knew what was in man.—John 2:25.

What is a man worth? That depends on your point of view. In a museum stands a collection of small jars containing minerals, water, etc., which make up the body of a man, and which are valued at less than a dollar. But there is more to man than his body.

And that "more"—intellectual and spiritual—is what determines his real value. Jesus understood (yes, and now He understands) man, and places a high valuation on him. That is worth knowing in a world where the price of humanity is often figured on the basis of his usefulness in warfare or the factory.

Jesus really understands man. He knows his

I. Need (v. 9).

The first thing Jesus saw in the synagogue was not the leaders, or the beautifully appareled rich, or the learned scribes. He saw a man with a withered hand, one who needed His help. The enemies of Christ complimented Him by expecting Him to see the crippled one—and they "watched him" (Mark 3:2), for it was the Sabbath.

Do we see the real need of humanity? Does it speak to us and prompt us to helpful action? If not, are we like our Lord and Master?

II. Value (vv. 10-12).

They who would not hesitate to save a sheep in distress on the Sabbath did not want the man to receive help. Thus they put property above the person of man, and showed their low valuation of man.

The dignity of man's personality, the fact that he is made in the likeness and image of God, the great potentialities which exist in every man—all these should urge upon the Christian church the need of a new and higher estimate of the worth of a man—or a boy or a girl. Let us look at them with God's eyes, and seek to win them for Him.

III. Faith (v. 13).

No doubt this man had tried countless times to straighten out that withered arm. It was the very thing he most wanted to do, but it was quite impossible. Is Jesus then charging him with the impossible, asking him to do what cannot be done?

No, for He saw in this man the desire to be whole and faith in God's ability to make him whole. Dr. G. Campbell Morgan puts it well: "We turn from a contemplation of a withered hand and look at the face of Jesus. The moment we do this, we know that the command is possible because He commands it, however impossible it may appear. To look into that face must inevitably have meant to be certain that He was not there to reveal disability, save as He was also there to put an end to it."

IV. Enmity (vv. 14, 15a).

Jesus saw the good in man. He also saw the evil. He was not unaware of the hatred and the dark devices of His enemies. Until the day when He was to permit them to take Him captive in the garden, He withdrew from them, leaving them to their evil designs and their wicked unbelief.

Sometimes when we see how the wicked seem to flourish in our day, how they appear to go on without let or hindrance, we are prone to forget that there is One who "sits in the shadows," and who knows and notes not only their ungodly deeds, but also their sinful thoughts.

He knows, and that is enough for us. Let us not be seeking vengeance, nor fretting ourselves because of evil doers. God knows, and He will care for it all.

V. Weakness (vv. 15b-21).

Men hesitate to admit their weakness to one another, always trying to keep up the appearance of strength and success. Well, there is no need of that kind of subterfuge with God. "He knoweth our frame; he remembereth that we are dust" (Ps. 103: 14).

Jesus sympathized with those who were physically ill and He healed them (v. 15). What comfort there is in knowing that He is present at the sick bed of every believer, and that He is able to heal as it may be His will and purpose. Only He can do it.

But there is something even more precious here. Man is weak not only physically but spiritually. His spiritual light may at times be nearly out, just a smoldering wick instead of a brightly shining lamp. We might be tempted to say that it is so weak, so disagreeable, so smoky—let's put it entirely out. But not Jesus. He will, if permitted, fan it into flame again.

Then, too, man is like a broken reed. The picture is that of a stick cut to use for support as one walks. And then it breaks—what shall we do? Break it into smaller pieces and throw it away? Yes, that is what we will do if we have not the spirit of Jesus.

SNAPPY FACTS ABOUT RUBBER

Rationing of tires and gas has its headaches, but government agencies estimate that it has been responsible for cutting in half the annual scrapping of used cars.

In 1941 the U. S. consumed some 766,000 long tons of *natural* rubber, an all-time peak, but in 1944 the country is expected to use only 164,000 long tons. Added to that, of course, is an enormous tonnage of synthetic rubber.

Talking of tire conservation, city driving, with "stop and go" conditions, causes seven times as much wear on tires as 25-mile-per-hour driving in rural sections. Also misalignment of wheels may cause 10 times normal tire wear.

ANNUAL HANCOCK COUNTY FARM BUREAU MEETING AT GARNER, OCTOBER 19

V. B. Hamilton, past Secretary-Treasurer of the Iowa Farm Bureau Federation will be the featured speaker for the 1944 annual meeting of the membership of the Hancock County Farm Bureau. The date for this important event is October 19 at 8:00 p. m. at Garner high school.

Resolutions will be presented and discussed for approval of the group. This is one of the main cogs in the Farm Bureau program that is getting the views and ideas of its members. All members are urged to be present to present their views and ideas in important issues.

NEARLY TWO TONS OF CLOTHING FOR RUSSIAN RELIEF

G. B. Kirchner, chairman of the Clothing For Russia drive, reports that 3,980 pounds of clothing, shoes and other items were shipped out Saturday, direct to the Russian warehouse on the west coast, where it will be loaded into ships.

He considers the drive was very successful in Hancock County.

KLEMME LADIES ENTERTAIN AT ONE O'CLOCK LUNCHEON

Mrs. Keith Albertson and Mrs. Sumner Trumbell entertained several ladies at a one o'clock luncheon, followed by bridge at 3 tables at the Trumbell home Friday.

The high score for bridge was won by Mrs A J. Kudje, second high by Mrs. C G Waterman, and third high by Mrs. Geo. Lawhorn

Mrs. Verle Keraus of Garner was an out-of-town guest.

Hitch-hiking Horse

Mrs. Laura Spencer of Sioux City has added a new twist to the method of hitch-hiking. Rcently she started on a horseback ride from her home to the Ray Dale farm near Hawarden, a distance of more than 40 miles As she was still some distance from her destination, Mr. Blankenburg, a trucker, stopped to chat with her. The horse was beginning to tire so Mrs Spencer asked for a ride The truck was backed into a ditch, the horse walked into the truck and both the horse and rider rode merrily on for some distance. At Akron, the horse and rider disembarked from the truck and finished the trip the way they had started, with Mrs Spencer astride the horse.

Build Rolfe

People wanting to see the town of Rolfe at a single glance should go to the parking of the Bill Phillips home. Roger and Billy Phillips, 10 and 13 years old, Donald Ferden and Alfred Miller, both 10, have built the town in miniature The miniature town is complete with stores, houses, depot and railroad tracks, streets and a temporaries. The boys have added one feature, with an eye to the future, and that is an airport.

HELLO, FOLKS!

Sgt. and Mrs. Asa R. Arnold are the parents of a 5 lbs. 12 oz. baby daughter born to them at a Waterloo, Iowa hospital on Saturday, October 7, 1944. Sgt. Arnold is over-seas with the U. S. Army. Mrs Arnold is staying at the home of her parents at Dysart, Iowa, for the duration.

SEAMAN BARZ AND FAMILY HONORED AT PARTY

Monday evening Mr. and Mrs. Eugene Greiman entertained the following at a party in honor of Ronald Barz, Fireman 3-c and his family:

Mr. and Mrs. Fred Barz; Mr. and Mrs. Walter Rosendahl; Mr. and Mrs. Glenn Terhufen and sons; Mr. and Mrs. Marvin Barz and daughter; Mr. and Mrs. Raymond Barz son; Mr. and Mrs. Edmund Josten; Milvern Barz; Doris Rueben; Mr. and Mrs. Clarence Brouwer of Garner; Mr. and Mrs. Harvey E. Barz; Mrs. Henry Voetberg; Mrs. Martin Barz; Mrs. Evert Barz and daughter; Mr. and Mrs. Ed. Thiemann; Mr. and Mrs. Melvin Neuberger.

Seaman Barz leaves Thursday to take up duties at a west coast navy base.

The Babylonian law code was assembled largely from older sources, by Hammurabi about 2,100 B. C.

HUNTERS FAIL TO SHOOT WILD GEESE ON RIVER

Local duck hunters might have had a couple of wild Canadian geese if they had only hunted a little better along the Iowa River, as there were two nice ones along the river, but evidently hunters failed to see them.

It all happened like this. Henry Ward, farmer south of town, raises Canadian geese as a hobby. Last July he clipped the wings of the several geese in his flock so that they would not fly away.

Two of the geese didn't like the way "Hank" ruffed up their plummage so they left home and Ward never saw them again until last week when he found them at the river and ran them down and took them back home.

"Hank" is still puzzled that none of the hunters had taken a shot at them.

SCHOOL NEWS

SCHOOL CALENDAR

Oct. 13. End of Six Weeks.
Oct. 27. Junior Class Play.
Nov. 2, 3, 4. Iowa State Teachers Convention at Des Moines.

HIGH SCHOOL PARTY HELD FRIDAY EVENING

Last Friday evening the High School held the first party of the year in the gymnasium.

One side of the floor was reserved for dancing and the other part for playing ping pong and other games. A phonograph was used for the music so we had a choice of both swing and slow music

During a short intermission, a nice lunch was served We all enjoyed the "hot dogs" and pop very much. We would like to thank the Committee that prepared it for their help

The Freshmen were the life of the party Most of them were dancing for the first time, but they were all being good sports and kept at it. That's what we like!

BAND NEWS
Ruth Bell, Reporter

Due to the illness of Mr. Sucher, we had no band rehearsal Tuesday evening

Thursday afternoon the Music schedule ran as usual, with band rehearsal at two o'clock.

We are now practicing for a concert which we plan to give later on in connection with the War Bond Drive

SOPHOMORE CLASS NEWS
Lois Ann Lau, Reporter

The fifth week of school has already ended Next week will be our six weeks tests Most of us are going to have to study harder

In Geometry we are proving that corresponding parts of congruent triangles are equal. It seems to be quite easy to most of the class.

Our World History class has been very interesting We have been studying the early Civilization of the Greeks, their home-life; the government they had, some of the famous men of Greece and many other interesting things about the country Every Friday for World History class we have a test over our weekly news reviews

In English we have been reading short stories in our Literature books Friday we had to read any short story in the library and give a report on it before the class All of them were very interesting

SENIOR CLASS NEWS
Patricia Kudjc, Reporter

We have been looking back through our notes and trying to remember what we had six weeks ago, because soon we will be having six weeks tests. Not a pleasant thought, but then the teachers don't like to correct all those papers either.

We hope to be getting our class rings soon. The thought of it gets us quite excited!

GRADES 1 AND 2

In Language class the First graders talked about things we do in Autumn and how plants and animals get ready for Winter They made the following group composition:

SIGNS OF FALL

"The days are cool.
The birds are flying south.
The leaves are turning brown, red and yellow. They are falling from the trees."

The Second Grade children have been telling stories from pictures. They learned that one must talk so that all the others can hear you, to tell the whole story, and to tell things in the order in which they happened.

GRADES 4 AND 5

In Third Grade Language we have been studying a unit about letters. This week we had an opportunity to put our letter writing to practice. Thomas Waddingham has been absent from school for several days so we wrote a letter to him. We had a great deal of fun deciding what we should tell him.

In Fourth Grade Language we have been working on a unit in which we study reports. Thursday we each gave a report in class. The reports were very nicely given and were also very interesting Most of the boys and girls told of some interesting inccident about their pets.

GRADES 5 AND 6

The Sixth Grade were sorry to have Sondra Bridges absent several days last week. We hope she will be able to return to school soon.

The Fifth Grade in Geography have just completed their study of the Pacific States. We have enjoyed making and coloring maps during this study.

Reports, both written and oral, have been what the Sixth Grade Language class has been busy on the past week Friday afternoon the Fifth Grade listened to us.

JUNIOR HIGH SCHOOL GRADES 7 AND 8
Alice Meyers, Reporter

Robert Baack and Larry Ramsay of the Eighth Grade put on an experiment in the Science Room. They invited the Seventh Grade to see it.

The Seventh Grade have been making graphs in their Arithmetic class. Some of the graphs have been put up Jerry Finders, Luella Priebe, John Wilson and Dorance Baack have their graphs up.

The pupils of the Eighth and the Seventh Grades that have not been absent nor tardy are:

Dorance Baack — Jerry Finders
Willie Beck — Larry Ramsay
Marjorie Lau — Alice Meyer

Good Treatment Valuable In Controlling Mastitis

Treatment of mastitis presents special problems. The cow's udder consists of a highly complicated structure including thousands of ducts and blind passages where bacteria may lodge. In successful treatment every disease-producing germ must be destroyed or the survivors multiply and serve as a new source of infection. Complete sterilization of a structure so complex is difficult under the most favorable conditions and may be impossible to accomplish in advanced cases where the germs are deeply established. Nevertheless, proper treatment has proved of definite value in the control of mastitis.

Ordinarily treatment is most successful and less damaging when administered during the dry period. No quarter or udder in good milk flow should be subjected to treatment because of possible temporary or permanent damage with resulting loss in production. A good rule to remember is that a quarter in good milk flow, regardless of the presence of mastitis streptococci, is not suffering severely from mastitis, and treatment can profitably be delayed until the cow goes dry or production has at least declined. A damaged or poor-producing udder of a high-producing animal should, of course, be treated without delay.

Treatment is administered most successfully to cases of recent infection. Many veterinarians are adopting a policy of treating every cow in mastitis-infected herds as she goes dry. Provided a wise choice is made in the selection of the treatment, this policy has obvious advantages.

Paint Mixtures Furnish Many Attractive Tints

A very attractive tint can be obtained using cobalt blue, tinted with medium chrome green in the proportion of eight parts of cobalt to one part green, with one-half part English vermilion, to which white can be added until a pale tint of blue is obtained.

For a chartreuse color, use two-thirds white paint mixed with one-third lemon yellow. Into the yellow mix chrome green in the proportions of one part to ten. With jade green, the body of the tint is again white paint colored with chrome green, grayed with a bit of Venetian red and further cooled by a dab of Prussian blue.

If your brown paint does not have "life" enough to suit you, and you want it rich and warm, you can use burnt umber for the base paint. Then, if reddish brown is preferred, add Venetian red until the desired depth of color is obtained. For a lighter yellowish color, mix chrome yellow and burnt umber with white. A cinnamon brown can be made with a mixture of raw sienna, golden ochre and white with proportionately more sienna than ochre. You can "gray" a shade by adding a little of its complementary color—red to green, for example, orange to blue, violet to yellow.

Gem and Abrasive

The garnet is a member of the mineral family that varies in use from a gem, worn for personal decoration, to an abrasive, utilized in industry. Although widely distributed, garnets are found in only a few places in sufficient quantities to make their commercial recovery profitable.

Best known are the wine-red gems, others ranging from light browns and red through the darker shades to black. Some specimens have measured over two feet in diameter, and 6- to 12-inch crystals are commonly found.

Because garnet is very hard and can be broken into angular grains with sharp chisel-like edges, it is well adapted for use as an abrasive. Abrasive cloth or paper made from crushed garnet is excellent for smoothing wood surfaces before applying varnish or shellac, also for finishing boots, shoes and many articles made of rubber, leather and plastics.

Astrologist Says Three Stars Brighter Than Sun

Three stars of our galactic system are more luminous than the sun, Dr. Peter van de Kamp of Swarthmore, Pa., director of the Sproul observatory at Swarthmore college, declares.

"The brightest is the well-known Dogstar Sirius, the fifth nearest star, at a distance of 8 light years and a candlepower 30 times that of the sun," said Dr. van de Kamp. "Next comes Procyon, the little Dogstar, at a distance of 11 light years and a candlepower 7 times that of the sun; Altair, at 16 light years, is 10 times as bright as the sun.

"Vying in brilliance with the sun is the brightest component of the triple star Centauri, the nearest stellar object, at a distance of only 4⅓ light years, or 26 trillion miles. The other stars represent various degrees of candlepower, the faintest one, 8 light years away, having a luminosity of only one 50,000th times the sun."

With few exceptions these nearby stars show a remarkable behavior, according to Dr. van de Kamp. With decreasing candlepower the size decreases and the color becomes redder. Most of the stars are red and much smaller than the sun; they are called "red dwarfs." Dr. van de Kamp said that all stars, including our sun, are huge spheres of incandescent dense gases, sending out light whose spectral proportions are determined by the surface temperature, just as for molten metal.

Dried Packaged Corn Provides Good Serving

Properly dried corn is hard, brittle, and semi-transparent. A kernel will shatter when hit with a hammer. When the test for dryness is reached, turn off the heat and open the oven door; allow the corn to remain in the oven for another hour—one damp kernel may ruin an entire lot.

Store in moisture-proof containers—airtight screw-top jars, paraffined cartons or bags, or tin cans with tight fitting lids. It pays to package in fairly small quantities, enough for a family serving. Roughly, one to two cups serve six people. Dried food is best when used soon after opening, and, if packaged in small quantities, the lot is not exposed to air and dampness each time some is used.

In preparing dried corn for serving, it should first be soaked in cold water until the kernels are plump—but not too long, for excess soaking will rob it of its sweet corn flavor and aroma. Cook kernels until tender in the soaking water, and serve as fresh or canned corn.

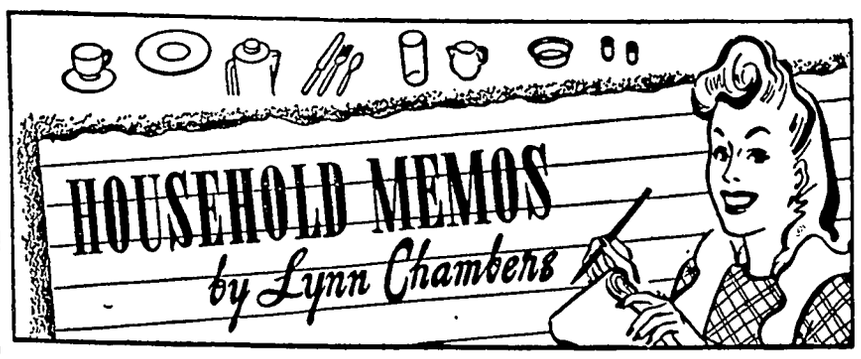
Find Eagle Formidable But Not Heroic Bird

Results of long study of eagles, and compilation of the studies of other scientists, presented in a new Smithsonian institution book, deflate the accounts that the eagle is a fierce, courageous and noble bird.

True, the bald eagle is a bird of prey. But he is also not fond of the hard work involved in preying, and lives mostly on fish cast ashore dying or dead, or taken away from a smaller fish-catching hawk, the osprey. He can do his own fishing, but not so cleverly as the osprey, so he prefers to rob him.

When fish are scantily available, as in winter, the eagle does turn to true bird-of-prey tactics. He takes any bird or mammal that he can handle, and that runs up as big as Canada goose. Despite his size, he is an athlete in the air, often turning upside down and diving under his victim to strike from beneath.

He does not build his home on a cliff nearly as often as on top of a tall tree, even in the Rockies. And there are far more bald eagles in Florida, least cliffy of states, than anywhere else in the Union. Eagles have even been known to build their nests right at ground level.



Soup Makes the Main Dish of This Meal
(See Recipes Below)

Soup Suppers

When cooler weather arrives, there's nothing better than a hot bowlful of soup to satisfy the appetite. If the soup is hearty enough, it can even make the main dish for the meal.

Chowders, bean soup, pea soups flavored with a ham hock or ham bone, cream soups rich and satisfying—all these can provide appetite satisfaction for hearty appetites. Make enough of the soup while you're about it to last for several meals. That will solve quickie lunch problems or provide the hot food for many a school lunch box.

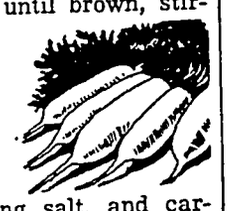
If soup is the mainstay of the meal, build a salad and a substantial dessert around it. All are easy fixing, and won't take too much time on a busy wash day or a time when you need to do something equally important.

An old-fashioned beef and vegetable chowder, fortified additionally by the perfect food, milk, is excellent eating:

***Beef-Vegetable Chowder**

½ pound round steak
2 tablespoons shortening
2 teaspoons salt
¼ teaspoon pepper
3 cups boiling water
2 tablespoons chopped onion
1 cup cubed potatoes
1 cup cubed carrots
2 tablespoons flour
1 quart milk
1 cup cooked or canned peas

Cut the meat in ½ inch cubes and fry in shortening until brown, stirring frequently. Add 1 teaspoon salt and the pepper, water and onion. Cover and cook slowly for one hour. Add potatoes, remaining salt, and carrots and cook 20 minutes longer. Mix flour with 2 tablespoons milk to a paste. Add remaining milk and pour into the meat and vegetable mixture. Cook, stirring constantly until thickened. Add peas. Serve very hot.



If you can't get along without the taste of potatoes for a meal, you'll enjoy this recipe:

Potato Chowder
(Serves 6)

3 large potatoes, pared and diced
1 cup onions, sliced thin
2¾ cups water
2 teaspoons salt
¼ teaspoon pepper
1¼ cups evaporated milk
3 slices bacon, cut in ½ inch pieces
2 teaspoons chopped parsley
Dash of paprika

Cook potatoes and onions in water until tender. Do not drain. Mash thoroughly or put through a sieve. Stir in milk slowly, add bacon pieces, and heat thoroughly. Add chopped parsley and paprika.

If you're doubling as chief cook and war worker, then cut down soup making time by using quick frozen vegetables. Try this chowder:

Corn and Tomato Chowder
(Serves 6)

2 tablespoons chopped onion
1 tablespoon chopped green pepper
¼ cup celery
2 tablespoons fat
2 cups canned or stewed tomatoes
1 box quick frozen golden sweet corn
¼ teaspoon soda
1¾ teaspoon salt
⅛ teaspoon pepper
1 teaspoon sugar
3 cups milk, scalded

Saute onion, green pepper and celery in fat until golden brown. Add tomatoes, frozen corn and cook 5 minutes. Then add soda, salt, pepper and sugar. Add hot milk and serve at once.

Hearty Bean Soup
(Serves 6-8)

½ cup dried navy beans
3 cups cold water
2 tablespoons shortening
1 clove garlic
3 tablespoons chopped onion
1 tablespoon chopped parsley
1 cup chopped celery
½ cup shredded cabbage
2½ teaspoons salt
⅛ teaspoon pepper
1 cup canned tomatoes
¾ cup cooked noodles

Wash and soak the beans in water overnight. In the morning, bring the beans to a boil in the same water and then simmer until tender, adding a little more hot water, if necessary. Melt shortening in a skillet and saute finely minced garlic, onion, parsley, celery and cabbage until lightly browned. Add to beans with salt, pepper and canned tomatoes. Simmer 30 minutes longer. Add cooked noodles and serve.

Dried split peas with the flavor of salt pork, ham hock or ham bone puts together one of the favorite soups of all times:

Split Pea Soup

2 cups dried split peas
3 stalks celery
3 quarts water
½ cup flour
4 tablespoons butter
1 teaspoon sugar
2 teaspoons salt
½ teaspoon pepper
¼ pound salt pork, or ham hock or ham bone

In the evening, place peas to soak in cold water. In the morning, bring them to a boil with the same water, celery, salt pork or ham hock and cook until tender. Remove celery and pork, and put peas through a sieve. Add seasonings to soup. Melt butter and blend in flour. Add 3 cups of strained soup, stirring constantly. When this is smooth, add rest of soup.

Do you have recipes or entertaining suggestions which you'd like to pass on to other readers? Send them to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill.

Released by Western Newspaper Union.

Lynn Chambers' Point-Saving Menu

*Beef-Vegetable Chowder
Toasted Rye Bread Butter
Jellied Grapefruit Salad
Custard with Chocolate Sauce
Beverage
*Recipe Given

Lynn Says:

Soup Fixings: Save all celery leaves, bits of parsley and spinach leaves and use them when making soup to give good, all-vegetable flavor.

Brown meat first when making soup so that it will have good, brown color. Be sure that it is well seasoned before serving.

When meat is cut up into small pieces, soup making time can be cut down considerably.

Use leftover meat bones from roast and chicken as a base for making soup.

When the butcher trims off bones and pieces of meat from the roast, make sure he gives them to you. They can be used for soup.

Toasted rye bread, rusk, rolls are good accompaniments for soup.

Salad suggestions for soup main dishes: fresh fruit salad, cheese sprinkled toast, shredded carrots with chopped greens with chopped hard-cooked eggs and bacon dressing, molded grapefruit and carrot salad, sliced tomatoes on crisp lettuce or other greens and fruity cole slaw.

AROUND THE HOUSE

Rooms subject to unusual dampness will dry rapidly if blocks of camphor ice are placed in the corners.

—•—

Place artificial flowers in a paper sack together with a handful of salt. Shake well to clean flowers.

—•—

When storing tennis rackets for the winter, coat the strings with vaseline.

Windows will look bright and shining if they are wiped off occasionally with a cloth moistened in vinegar.

—•—

To eliminate unpleasant odors in the house, burn several sulphur matches. This will clear up the odors.

—•—

When blacking the kitchen range, protect your hand by putting a paper bag over it.

Donald R Johnson	Britt
Henry B Fikse	Britt
William S Hughes	Britt
Ralph A Ch dur	Britt
Fritz Bussen	Woden
Lloyd K. Ax	Garner
William A. Mallard	Garner
Arthur L. Juhl	Garner
Wesley J Suckow	Klemme

The following two boys have requested to be transferred here for our Induction Call and requests have been approved:

Thomas Francis Roths, Jr., of Klemme, Iowa, formerly of Vancouver, Washington; and Orville Leroy Tomson, Woden, Iowa. formerly of Los Angeles, California.

STATE THAT CEILING PRICES ON HOGS TO REMAIN

Present Swine Levels Have Been O. K.'d By O. P. A. Office

The Office of Price Administration and the War Food Administration, with the approval of the director of the Office of Economic Stabilization, has announced that ceiling prices on live hogs will not be reduced from the present levels prior to June 30, 1945.

Ceiling prices are $14.75 per hundredweight, Chicago basis, for hogs weighing 240 pounds or less. and $14.00 per hundredweight for hogs weighing more than 240 lbs.

The War Food Administration also stated the support price of $12.50 per hundredweight, Chicago basis, for good to choice butcher hogs weighing 200 to 240 pounds. which became effective on October 1, 1944, as heretofore announced for the period ending March 31, 1945, will be continued until June 30, 1945.

He Made Third, But He'll Never Steal Home

Klemme Lumberman Moving To Atlantic As Cement Salesman

KEITH ALBERTSON RESIGNS AS NORTHERN'S MANAGER

Has Accepted Position As Salesman For Cement Company

Keith Albertson, who has been manager of the Northern Lumber Company here for the past three and a half years, has resigned to accept a position as salesman for the Hawkeye Cement Company of Des Moines

Mr Albertson and family will move to Atlantic, Iowa, the first of November as that city is more centrally located in the territory in which Mr. Albertson will travel. He will have twenty-two counties in his territory, in southern and in southwestern Iowa

Mr. Albertson came to Klemme from Swea City, where he was the manager of the lumber yard there for the Northern Lumber Co. He succeeded Paul Grange as manager here when Mr. Grange was transferred to the Mason City yard.

As we go to press Mr. Albertson's sucessor as manager of the Northern Lumber Company here has not been annouced.

YOUTH RALLY AT LIBERTY WAS WELL ATTENDED

Over one hundred attended the Youth Fellowship Rally last Sunday afternoon and evening at the Liberty Methodist Church Young people came from the neighboring towns to hear the four and a half hour program that lasted through the supper hour.

Groups met to discuss the theme "What Can Christian Youth Believe About The Church?" The Reverends F. F. Robinson of Britt, and Alvin T. Maberry of Buffalo Center were the discussion leaders. The later also gave the address of the evening.

Lola Gast was elected vice president for the year; Miss Maxine Ott of Clear Lake is the president. The Rev. Warner M. Hubbard, Clear Lake was elected as the pastor advisor to the youth group of the sub-district. The next rally will be held at Britt sometime in November.

KLEMME SEAMAN NOW HAS PETTY OFFICER RANK

Seaman Norman Lau, son of Mr. and Mrs. August Lau of Liberty township, was recently given another and higher rating by the War Department. Norman is now a Petty Officer First Class, Aviation Metal Smith.

He is at present stationed at Alameda, California.

REMIND CARBON MONOXIDE TIME IS APPROACHING

Tell That Three Iowans Have Died From This Gas During 1944

With a reminder that the threat of carbon monoxide will tend to increase as the weather becomes colder, the state health department reported today that at least three and "perhaps more" Iowans have already lost their lives during 1944 as a result of accidental poisoning by this gas.

The department qualified its statement with the word "perhaps" because mortality statistics are provisional and extend only through July. It was brought out that additional deaths may have occurred which have not yet been reported.

The deaths this year, all of which were recorded during the winter and early spring months, represents a decline of five over the corresponding period a year ago, and it is believed that the storage of automobiles following gasoline rationing may have had a part in the reduction.

"Motor cars," vital statistics records indicate, "present the greatest hazard. People continue to be careless about starting their cars in closed garages or driving with all windows closed and carbon monoxide poisoning is sometimes the result.

"Fewer cars have been in service during the period of gasoline rationing, and this factor may have contributed to the decline in monoxide poisoning deaths."

Cautioning that the exhaust gases of automobiles contain the colorless and odorless carbon monoxide, the department said that motor cars figured in 60 per cent of the Iowa fatalities from this cause during the five year period 1938-1943. There were 40 deaths in this category during the period and the remainder, 23, resulted from carbon monoxide leaks in open gas heaters, coal stoves, and similar types of burners in which incomplete combustion may occur.

CHURCH WOMEN MAIL OUT BOXES TO SERVICE MEN

The ladies of both the Klemme Evangelical & Reformed Church. and the Klemme Methodsit church have mailed out Christmas boxes to men over seas. The Reformed ladies mailed their boxes sometime ago and the Methodist ladies sent out thirty-two boxes to boys over-seas Thursday.

Other boxes will be mailed out later for Christmas to the boys in the states.

Mr. And Mrs. George Albers Married Forty.seven Years

ATTEND SPECIAL V-DAY SERVICE

You are invited to join the members of the churches of Klemme in a special service of praise and thanksgiving on the day that Peace is declared.

The day that victory comes there will be services in both our churches at 8:00 p m.

We have earnestly prayed for victory and peace. Let us show our gratitude for answered prayers.

If the news of victory comes before 6:00 p. m. the services will be held the same evening. If after 6:00 p m., the services will be held on the following evening.

Attend Church on V-Day.

Rev. Calvin Grosshuesch.
Rev. H. E Harvey.

MR. AND MRS. JOHN HEGINGER OBSERVED BIRTHDAY

Mr. and Mrs. John Heginger celebrated their birthdays Sunday, October 15th, when their children and families came to their home to spend the day with them.

Those present were: Mr. and Mrs. William Tiggeman and family; Mr. and Mrs. John Pannhoff and family; Mr. and Mrs. Carl Heginger and family; Mr. and Mrs. Jacob Blumer and family; Margaret and Adeline Medaus; and Mr. and Mrs. Roy Halfpop of Goodell.

Mr. and Mrs. Heginger received many nice gifts in remembrance of the day.

LITTLE GIRL CELEBRATED HER FOURTH BIRTHDAY

Ruth Ann, daughter of Mr. and Mrs Walter Lauster, celebrated her 4th birthday last week Tuesday.

Those who helped her celebrate the occasion were her grand parents, Mr. and Mrs. George Albers, and Helen; Mr. and Mrs. Lubbe Albers and daughter, Phyllis; Mr. and Mrs. Menno Albers; Mr. and Mrs. Edgar Buss, and Mr. and Mrs. Fred Pringnitz.

Home made ice cream and cake was served.

Ruth Ann received some nice birthday gifts.

FAMILY DINNER IN HONOR OF EVENT HELD SUNDAY AT ABLERS HOME HERE

Albers Children And Families All Home To Help Parents Celebrate Rare Anniversary

Friday, October 13th, 1944, was the forty-seventh wedding anniversary of Mr and Mrs. George Albers of Klemme However the event was celebrated Sunday at the Albers home when Mr and Mrs. Albers children and their families all gathered to have dinner together.

October 13 is also the birthday of their son, Ted Albers of Swaledale, so that event was also included in the day's festivities.

Dinner was enjoyed at noon and a three-tired angel food cake served as the center piece. The cake was baked by Mrs. Walter Lauster of Meservey.

Late in the afternoon a lunch of angel food cake and ice cream was enjoyed by all.

Those present to help Mr. and Mrs Albers observe their wedding anniversary were: Mr. and Mrs. William Reuben and daughters of Kanawha; Mr. and Mrs. John Albers and sons; Mr. and Mrs. Ted Albers and children of Swaledale; Mr. and Mrs. George Albers, Jr. and children of Clear Lake; Mr. and Mrs. Menno Albers; Mr. and Mrs Edgar Buss; Mr. and Mrs. Fred Pringnitz; Mr. and Mrs. Lubbe Albers and daughter. Phyllis; Mr. and Mrs. Walter Lauster and daughter, Ruth Ann; and Miss Helen Albers.

AVERY 4-H GIRLS MET AT MRS. RAYMOND WILLE'S HOME

The Avery 4-H Club met at the home of Mrs. Raymond Wille Oct. 14th with 13 girls present.

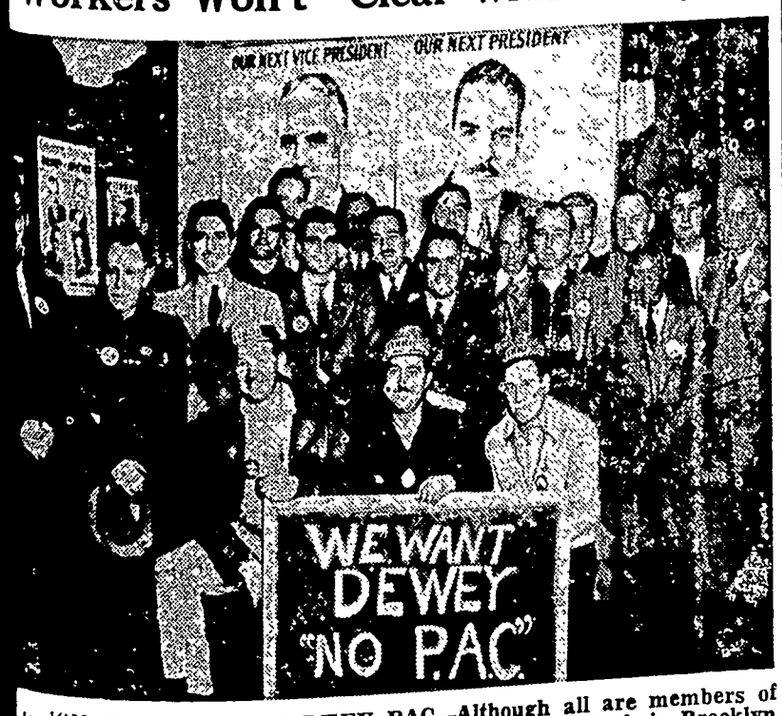
Lillian Wille and Iris Rosendahl are new members of the club.

Officers were elected as follows: Lois Ann Lau, President; Betty Lacey, Vice President; Arlene Wille, Secretary and Treasurer; Isabell Gibbs, Historian.

During the recreation period the girls played indoor games, followed by a delicious lunch served by the hostess.

Reporter, Ruth Lacey.

Workers Won't "Clear With Sidney"



...ION SHIPBUILDERS DEFY PAC—Although all are members of C.I.O., these workers at the Todd Erie Basin Drydock in Brooklyn e no use for C.I.O's political action committee and resent pressure to them into the Roosevelt camp. Holding the sign which states their ion here are (L. to R.) Stanley Jensen, leader; Joe Romano and Jack ers. Jensen said that a majority of the 20,000 Todd workers are in of Dewey but fear a purge if they defy P.A.C.

Arrange For Pheasant Hunting Now

Two Pheasant Hunters Seeking Landowner's Permission To Hunt

With the 1944 pheasant season opening at 9:00 a. m. October 28 in 64 counties, many pheasant hunters have not yet decided where they will hunt.

Farmers, as a group, want to know beforehand who is going to hunt on their land. They want to know that whoever hunts on the farm will be careful about shooting near livestock, that gates will be closed. and that property will be protected against damage. They also want to know how much game is killed so that they will be able to curtail hunting while seedstock still remains for next year. They want to have the assurance that the hunter is sincere and honest and is concerned about perpetuation of game.

Go now and talk to the farmer on whose land you would like to hunt. Make arrangements with him now. It is to your advantage, for he is the custodian of all game on his farm. He helps protect and produce game so that you and I may have an open season. The least that any hunter can do is to make arrangements in advance for the privilege to hunt. Let us make the '44 hunting season orderly and enjoyable for everyone.

WEEKLY NEWS ANALYSIS

Germans Counterattack to Slow Allies' Smash Into Rhineland; OWI Warns of Hard Pacific War

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

As Holland became a flaming battleground, civilians are shown fleeing from battle zone near Kerkrade to safety.

EUROPE:
'Greatest Battles'

In what the Germans said was ". . . the greatest battle of material in the world's history . . ." with 2,500,000 men facing each other on a 460-mile front, Allied forces moved slowly on the Siegfried line against stubborn enemy resistance.

All along the curving battle-line the Germans launched extensive counterattacks, throwing in large numbers of tanks to stem the Allied drive on their all important industrial belt along the Rhine.

Bearing the brunt of the enemy's aggressiveness were Lieut. Gen. Miles Dempsey's British Second army driving northward in Holland and Lieut. Gen. George S. Patton's American Third army lunging for the coal-laden Saar basin beyond Metz and Nancy. In Holland, strong German counterattacks were aimed at thwarting General Dempsey's Tommies from pressing past the northern anchor of the Siegfried line at Kleve, and of throwing an arm to the great water basin of the Zuider Zee to the northwest to cut off an estimated 200,000 Nazis still engaged in the lower extremity of the country.

Gen. Dempsey

In addition to employing masses of tanks against General Patton's men before the Saar, the enemy also made good use of the hilly and wooded terrain in the sector to reduce the valiant doughboys' advances to yards.

As the fighting raged to the north and south, Lieut. Gen. Courtney Hodges' First American army launched a heavy attack between those two sectors east of Aachen, fighting its way through thick woods to draw up within 27 miles of the great industrial center of Cologne.

Having smashed through the upper reaches of the Germans' vaunted "Gothic line" in northern Italy, Allied troops fought toward the leveling plains of the great Po valley, cradling the majority of the country's population, and its most highly developed resources. Despite desperate German attempts to stem their drive, the Allies pushed on, with Lieut. Gen. Mark Clark's American Fifth army threatening to close an escape route for stubborn enemy troops ringed between it and the British Eighth army to the east.

Gen. Clark

As the remnants of Germany's Baltic armies pulled out of Latvia, the spotlight on the eastern front swung back to East Prussia in the north and Hungary on the south, where the Reds pushed offensives to crack these anchors of the Nazis' eastern front.

While the Germans could fall back on swampy, wooded lake country in East Prussia to slow the Russian drive, they had no such advantage in Hungary, where the Reds pressed for the broad open plains to the southeast of Budapest.

Having landed on the western coast of Jugoslavia, strong Allied forces worked inland to cut off the retreat of an estimated 200,000 Germans moving northward from the lower Balkans.

LOANS DOWN

Index of economic conditions, loans on life insurance policies outstanding in midyear approximated $2,100,000,000, lowest in 15 years. During the critical depression period of 1932, loans reached $3,800,000,000, almost double present figures.

Offsetting a decline in civilian mortality, increased deaths among policy holders in military service resulted in an 18 per cent rise in insurance benefits paid out so far this year.

PACIFIC:
Airpower

Long is the reach of America's famed B-29 Superfortresses, which have flown to the wars to hamstring the flow of enemy supplies to his widespread Asiatic front by striking at principal Japanese industrial centers.

With recent improvements permitting the carrying of heavier bomb loads, no less than 100 of the B-29s flew the equivalent of from Atlanta, Ga., to the Arctic circle in attacking manufacturing plants in Anshan, Manchuria, second largest steelmaking center in the Japanese empire.

While the B-29s were on the wing, other U. S. army and navy planes struck at Jap positions along the whole Pacific front in attempts to soften the enemy against further advances.

Jap Resistance

With Japan possessing many strategic materials in the home islands and Korea enabling her to increase war production; with the country capable of putting 8,000,000 men in the field, and with American supply lines stretched, U. S. victory in the Pacific may require from 1½ to 2 years after Germany's defeat, the Office of War Information said.

To America's advantage in pressing for victory, OWI said, was its own tremendous war output, capable of turning out 8,000 planes a month to Japan's 1,500; the threat to cut the enemy's supply lines from the Indies area and blockade the homeland, and the overrunning of his outer defenses which has brought U. S. forces close to the inner ramparts.

Far from slaking the Japs' fervor, Germany's fall might strengthen the enemy's determination to resist, OWI said.

POSTWAR GERMANY:
Allied Plans

With Secretary of the Treasury Morgenthau's proposal for stripping Germany of all of its manufactories and reducing the country to an agricultural basis rejected, Allied postwar plans looked forward to the maintenance of the Reich's industrial machine under close supervision.

Challenging Morgenthau's position, Secretary of State Hull and Secretary of War Stimson declared that not only did Germany turn out certain essential industrial products for the rest of Europe, but that its business also put it in the market to purchase other countries' goods.

In order to check German industry's war-making capacity, Allied plans call for control over all strategic materials, with possible elimination of factories adapted to arms production.

BUTTER:
Tight Supply

With only 12,000,000 pounds of butter in storage earmarked for civilians and consumption on a day-to-day basis, the point value on the product was raised from 16 to 20 points per pound, OPA officials said.

Despite the government's plans for withdrawing from the butter market in October until production climbs in the spring, no immediate relief in the tight supply was seen. Said OPA Administrator Chester Bowles: " . . . We civilians are going to have to get along with less butter than formerly, at least during the next 90 days or so. . . ."

Besides reserving 126,000,000 pounds of the present stocks of 138,000,000 pounds, the government has been purchasing great quantities of butter fat from producers for powdered milk and other uses.

Cars

Thinking in terms of a utilization in space and weight, Ford Motor company officials are working on plans for large-scale production of the lowest priced automobile since Ford's model A.

Declaring that the vehicle would not be of a miniature doodlebug type, Henry Ford II declared: "Such a car would be in addition to our regular line. What it will sell for, what it will look like, are matters of conjecture at the moment. The logical result . . . would be a better automobile for the American family."

PRICE CONTROL:
Must Stay—Byrnes

Until total victory is achieved in the Pacific, price and wage controls must be maintained to prevent an under supply of goods and overly stuffed pocketbooks to set off a dangerous inflationary cycle, War Mobilization Director James F. Byrnes declared.

Stating that figures of the bureau of labor statistics showed only an increase of 25 per cent since January, 1941, Byrnes said that farm income rose 81 per cent and the average weekly pay of workers 51 per cent during the same period.

"The stabilization program has hurt neither the farmer nor the worker," Byrnes asserted. "The white collar workers and the people with small fixed incomes have fared less well during the war, but the only way to help them is to continue to hold the line against inflation."

Seek Higher Wages

Even while Byrnes spoke, organized labor pressed for revision of the government's stabilization program, urging that the formula for limiting wage increases to 15 per cent over January, 1941, levels be junked.

In appearing before the War Labor board, CIO Chieftain Philip Murray argued that public members of a WLB panel had found living costs increased almost 30 per cent since January, 1941, rather than 25 per cent as claimed by the bureau of labor statistics.

Declaring that both labor and management were entitled to a quick settlement of the wage question so as to be able to solve immediate and reconversion problems.

AFL leaders joined the CIO in the assault upon present wage stabilization.

Early Start

To beaming parents Mr. and Mrs. Joseph Walls of Los Angeles, Calif., tiny six-weeks-old Evelyn is a constant delight. Pictures proves parents' boast little Evelyn can stand up. In addition, she can raise herself while lying on her tummy and take three steps while holding her mother's hand.

RADIO TUBES:
Small Surplus

With such scarce radio tubes as the 12SA7 and 12A8 commanding as much as $10 in black markets, army release of 1,000,000 surplus tubes for civilian use will tend to only slightly ease the tight supply situation.

To be returned to manufacturers for testing and packing before distribution to customers on an "equitable basis," the 1,000,000 tubes will not even approximate the production of 1,754,000 in July, which met only a fraction of the demand.

Because of the services' extensive use of radio equipment for communications between units on the fighting fronts, trade circles saw little hope for increased civilian supplies until Germany's defeat permitted a cutback in military orders.

FOOD STOCKS:
Orderly Disposal

With the War Food administration already feeding the government's excess stocks of food to civilian outlets without disrupting the markets, U. S. officials will make every effort to maintain orderly disposal of surpluses with the war's end, WFA distribution director Lee Marshall said.

"We must maintain specified war reserves no matter how favorable the war may be going," he said, "but I, for one, don't think it necessary to build a separate stockpile of the same foods for postwar relief feeding."

In disposing of surpluses, Marshall said, salable goods would first be offered to companies which furnished the government with the products. Others in the same business would be given second choice.

WOMEN WORKERS

Tasting well the fruits of boomtime employment, with many adjusting themselves to industry since 1941, seven out of ten women war workers intend to stay at work after hostilities cease, a survey by the Northwestern National Life Insurance company revealed.

Nearly two-thirds of the married women and four-fifths of the single women declared their intention to remain in industry, the survey showed. Only 19 per cent planned to return to housework

CLOTHES RATIONING AVERTED

Few people know how close the country was to clothes rationing a few months ago, at the peak of the war. The key figure who helped prevent it was shrewd Pittsburgh department store wizard Irwin Wolf.

Wolf and WPB boss Donald Nelson held several conferences on the problem, at which Wolf pointed out that retailers, worried about shortages, were buying all the clothes in sight, and hoarding huge amounts of one item while having no stocks of other goods.

Finally, Nelson asked Wolf to sit down with Joseph Weiner, head of the civilian supply section of WPB, John Davidson, representing the wholesalers, and Earl Reed, another key WPB official. After going over several involved proposals, they retired from the conference room and drafted a simple order which limited all retailers to the same amount of stock they had during the previous year. The proposal was immediately adopted by Nelson, and clothes rationing was avoided.

Nelson now calls Wolf's plan "one of the saviours of the civilian supply situation in the U. S."

NOTE—One effect of Wolf's program is that merchants will carry over only small amounts of "ersatz" merchandise in the postwar period, will not be stuck with poor-quality merchandise to unload on the money-flushed public.

* * *

AFTERMATH OF V-DAY

The White House has just received a confidential report showing that 66.4 per cent of American families have saved only 11.6 per cent of the money put aside by the nation during war time. In other words, the upper one-third bracket of the people tucked away 88.4 per cent.

The same report points out that, immediately after V-day in Europe, most plants which continue operating will cut overtime, thus dropping wages from 15 to 25 per cent. One of the problems officials face is a wild rush to cash war bonds, not for lush spending, but for bare necessities of workers in middle and lower-income brackets.

All these figures now have President Roosevelt concerned about what will happen in the first weeks immediately after the war. The president's economic advisers are telling him that continued prosperity in the postwar period will require his greater personal attention to domestic problems.

They figure that, if the nation can successfully come through the first few weeks after the armistice, then the demand for peacetime goods, long denied the public, will pick up national prosperity. However, the first weeks of readjustment are going to be tough.

* * *

DOLLAR-A-YEAR MEN

The full effect hasn't yet percolated down from the top but, before he left for China, Donald Nelson signed a new set of rules governing the appointment of — and the continued employment of—WPB dollar-a-year men. It has been felt first in the textile, clothing and leather divisions but gradually is beginning to result in changes elsewhere in the agency.

Dollar-a-year appointments for the war emergency period were okayed by the White House four years ago, the appointments to be made at the discretion of the agency chiefs without regard to existing law. Criticism of the early dollar-a-year appointments gradually resulted in a tightening of the policy, but Nelson never really put his foot down until last month.

Major dynamite in the order is Nelson's pronouncement that "No person may be employed on a dollar-a-year basis who would be required by his position on the War Production board to make decisions directly affecting his own company or its competitors." The same section bans dollar-a-year employment of all lawyers, all trade association officials, members of WPB industry advisory committees, or any individuals convicted of anti-trust violations.

Dozens of dollar-a-year men within WPB are daily called upon to formulate policy affecting their own industries, and consequently their own companies and competitors. At the same time, Nelson's order does not reach the even more serious problem of salaried employees in a position to make decisions affecting the companies from which they came to the government — or to which they will go when they leave Washington.

MERRY-GO-ROUND

¶ Jesse Jones, at the age of 70, has just come through a major operation, now appears to be in better health.

¶ Maury Maverick, who spent a lot of time in France during World War I but saw little of its culture, can be given credit for the army's plan to supply competent guides to conduct servicemen on tours of historic monuments not only in France but in Egypt, Greece and every part of the world immediately after the armistice.

Walter Winchell

(WNU Service)

Notes of a Newspaperman:

Sir William Beveridge, the British plan man, has cooked up a new one to be announced after the Armistice. . . . The gamblers who bought big property in Miami Beach for the de luxe season will get an awful shock. There'll be no gambling, vows the chief of gendarmes. . . . CBS is grooming Johnny Morgan to replace Fred Allen until the latter resumes. . . . The American Fed. of Musicians is dickering with the Institute of Public Relations to woo the press back for its president, James C. Petrillo. The fee involved is reported at $100,000. . . . Eileen Stafford and G. Ross are betrothed. . . . A nobleman in town has a juicy racket. He charges social climbers $100 a night to be seen with him in the better places.

Those who sneer at foreign-born Americans were given a whacking across their derrierres by colyumist Lowell Mellett, formerly of the White House staff. Colyumed Mellett: "I am also an immigrant; not a first generation immigrant, to be sure, since the first of the family came over during the Revolutionary War, but an immigrant just the same. I can't claim any credit for being an American. Sidney Hillman can. It was his own idea, not the idea of a great-great-grandparent!"

James W. Miller of Muskogee, Okla., corrects our observation that F. Sinatra will net about $25,000 from his annual "take" this year of $1,450,000. Mr. Miller, a public accountant, says Frank will make more than 25 Gs. He will net a little more than $75,000. Hot diggitty! . . . Ernest Hemingway will start another war if he isn't careful. He writes: "I think any writer, especially a war correspondent, is dull in conversation. It's only the phonies that are personally colorful" . . . The Broadwayites, for the 11th year, visited the grave of Variety's founder, Sime. . . . Abbott and Costello, who send cartons of ciggies to troops overseas, happily wrap each carton in "the funnies." . . . While overseas Frances Langford never drank the hot tea, which has a medicinal taste. The torrid South Pacific, strangely enough, has no hot water. So she used the tea to wash her face.

The Writer's War Board devised a subway and trolley car card showing babies (of all color) which read: "Must They Die in World War III?" . . . The text continues: "Yes! Unless you work now for lasting peace after victory." . . . The cards are distributed by Americans United for World Organization, Inc. . . . Transit companies in several cities are displaying them. . . . Mayor LaGuardia hoped N. Y. subway trains would do the same. . . . In reporting the refusal of John H. Delaney (chairman of the Board of Transportation) the N. Y. Times said in part: "Mr. Delaney says he turned down this particular poster 'because it was not of local interest. . . . I don't intend to give away free publicity to any organization seeking to promote peace on its own. Our Government is well equipped to do that!' "

Not of local interest!

Income tax sleuths are following the columns closely to check on the reports of cafe society playgirls and their "incomes." . . . The Windsors have been plagued by crank letters. Too much publicity plus their address. . . . Bill Tilden, one-time world's tennis champ, tried acting some years ago. He has taken an option on a play which will be produced soon. . . . Vogue feature editor, Ruth Portugal, is in Martha Foley's "Best Short Stories" annual this time. . . . Another fashion mag editor, Dorothy Wheelock of Harper's Bazaar, relaxes all night by writing detective thrillers.

New York Novelette: You've read about the case in the papers. But not this angle. . . . It was at a society party several years ago. The hostess' jewels disappeared. . . . Suspicion pointed to a pretty young girl. . . . The detectives had the goods on her and pressed the hostess to let them make the arrest. . . . Another guest volunteered to help the crying suspect. . . . He was a lawyer. . . . His skillful plea won the hostess over. She didn't press the charge. . . . The girl was let go and married him! . . . Many times thereafter he had to do his best legal work getting his bride out of similar jams. . . . Recently she was arrested again—for allegedly stealing jewels. . . . But he can't help her now. . . . He has a bigger case. . . . Fighting for his country.

Madeleine Carroll, the actress, rates your salute. She shelved a successful career to join the Red Cross overseas without trumpeting or fanfare. . . . Our pet answer to those who use the "He's a foreigner!" routine is to remind them the Statue of Liberty is also an immigrant. . . . Oh, that Winchell!

Washington hears that General H. Miller, demoted in London by Eisenhower for allegedly revealing the invasion date, will be retired as general after the war.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis

Since 30 years ago, its PAZO for Simple PILES Relieves pain and soreness

For relief from the torture of simple Piles, PAZO ointment has been famous for more than thirty years. Here's why: First, PAZO ointment soothes inflamed areas, relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

Get PAZO Now! At Your Druggists

Gas on Stomach

Relieved in 5 minutes or double money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

...es Forest Conservation Need:

...ast Areas of Spent Timberland Attest to Careless Practices

By LYLE F. WATTS
(Chief U. S. Forest Service)

...Recently, in an address before ...ection of the Society of Amer... ...n Foresters at Milwaukee, ...s., I discussed the nation's ...rest situation and presented ...e need for reasonable public ...ntrol of the treatment of pri... ...te forest lands. In comment... ...g on that paper, a friend of ...ne alleged that, "In normal ...riods the basic American for... ...try problem is not one of ...arcities but of surpluses, not ...timber famine but of timber ...undance." I want to explore ...t philosophy because, if it is ...e, there is really no occasion ...much concern about forest ...nservation.

...n discussing this question of scar... ...y versus abundance, I want to ...ke it clear that forestry is some... ...g more than boards, ties, cord... ...od and other forest products. To ...forestry has a human side. It ...ompasses permanent communi... ...s with prosperous industries and ...stable tax base. It means good ...ools, public health and attractive ...mes. It means security for the ...rker to invest in a home and for ...butcher, the baker, and beauty ...p keeper to invest in a business.

...eventy per cent of New England ...orest land, but 75 per cent of all ...wood products consumed in New ...gland comes from outside the re... ...n. The only evidence of surplus, ...far as I know, is in small low... ...de material which cannot be ...rketed even under the intense de... ...nd of the huge industrial popu... ...on.

...he hurricane of 1938, followed by ...ormal wartime requirements for ...boards, has left only scattered ...nants of merchantable white ...e in central New England. Scar... ...of stumpage forced several of ...leading operators in Massachu... ...s to move out of that state re... ...tly. Even in the wild lands of ...ine, most of which have been ...e over several times by logging ...rations since colonial times, the ...rage cut of pulpwood, taking all ...is considered merchantable ...m the ground, is estimated at ...four cords per acre. Such an ...rage certainly implies no ...blesome surplus of available ...ber.

...ot so many generations ago ...nsylvania was the leading source ...the nation's lumber supply. In ...it ranked 23rd among the states ...an output of less than 1 per ...of the total. The original pine ...sts have been largely replaced ...scrub oak and other hardwoods ...a result of fire following logging.

...he forest survey for Virginia ...wed sawtimber growth in 1940 ...e 25 per cent in excess of drain ...cutting. So perhaps we should ...a timber surplus here. But of ...t significance is an excess of ...th over drain when lumber out... ...is only about half of what it was ...ears earlier? The decline in Vir... ...a's lumber output is a reflection ...awtimber scarcity. Stands with ...much as 8,000 board feet per acre ...upy less than 4 per cent of the ...l forest area. More wood was ...umed by non-lumber use than ...lumber in 1940.

...The coastal plain and Pied... ...ont regions of the Deep South ...ntain over 150 million acres of ...d wonderfully adapted to tree ...wth but not well suited for ...er purposes. All but a small ...ction of the old-growth timber ...s been cut so that any surplus ...st be in second growth.

...most three-fourths of this great ...age is in thrifty second growth, ...the growing stock is rated at ...than half of what it should be. ...e 10 million acres, mostly in the ...leaf pine belt of the coastal ...n, lie denuded. Only one-fourth ...he total cubic volume of pine is ...log material and almost three... ...ths of that is in trees less ...16 inches in diameter. In spite ...he ease of reproduction and the ...ptionally rapid growth of the ...e valuable pines, hardwoods now ...unt for almost 60 per cent of the ...c volume of all trees.

...e timber supply is vital to the ...t agricultural states of the Mid... ...West. The situation became so ...e in 1942 that two large farm ...eratives bought sawmills in dis... ...forest regions in order to be ...of having the lumber they ...ed.

...d the forests of this region been ...n proper care from the begin..., farmers might still be able ...eet many of their needs from ...l timber. Most of the older barns ...outhern Ohio and Indiana, for example, were built of yellow poplar. Yellow poplar grows almost as fast as any of our softwoods and is just as easily worked. But today it is far too precious to put into barns. It is no longer a significant part of the stock of the local lumber yards.

All the big pine operations are now gone from the Missouri Ozarks. Output of softwood lumber in Missouri in 1942 was only 30 million board feet. Yet in 1899 most of the three-fourths billion board feet of lumber cut in that state was softwood.

Throughout the hill country from eastern Ohio to western Missouri, millions of acres of once magnificent hardwood forests have degenerated into mere brush cover. Many of the

Even in New England, where this huge red oak towering 130 feet up and measuring almost 20 feet in circumference was cut, there is no real timber surplus.

hardwood industries of the Ohio and Mississippi valleys must now pay heavy transportation charges for raw material from other regions in order to continue operation. Some of them face extinction.

The lake states affords one of the most serious chapters of our forest history. Here are some 52 million acres of generally level forest land, favorably located with reference to important industrial and agricultural sections. Extensive clear cutting and uncontrolled forest fire have made a large part of this area an economic liability.

The white pine and red pine which contributed so bountifully to the development of the Middle West are now little more than memories. Although some old growth—chiefly hardwood — still remains, the most significant aspect is the large proportion of inferior species, notably jack pine and aspen, in the second growth.

Having looked in vain for timber surpluses in other important forest regions, we turn at last to the West coast.

The timber of Idaho and Montana was almost untouched up to 1900. But the wave of depletion is rolling through this country with startling speed. In Idaho the five northern counties were opened up first and were soon pretty thoroughly exploited. Output reached a peak of 705 million board feet in 1925. In 1937 it was only 292 million. Obviously payrolls in these northern counties declined in about the same ration as lumber production. Towns like Sandpoint and Coeur d'Alene were hard hit — and Spokane turned its eyes from the panhandle of Idaho to the Grand Coulee dam.

The increased output now coming from the five counties farther south rests on a precarious base. Only one-tenth of the 10 million acres of forest in North Idaho is in white pine sawtimber—yet this tenth is bearing the brunt of current cut. White pine output is now 2½ times what the forests can sustain.

But even within this region, the apparent surplus is local in character. The only area still largely undeveloped is a portion of southern Oregon. In the older districts, notably around Puget Sound, the bulk of the readily accessible sawtimber has been removed. Sawmills have shut down and pulp mills have assumed greater importance. The available stand is no longer as large as the growing stock needed to sustain a cut commensurate with the growth capacity of the land.

The lower Columbia river district with 170 large mills and 40 billion feet of sawtimber is already feeling the pinch of scarcity. About half of the private sawtimber belongs to two large companies. Most of the other mills face difficulty in getting the timber they need for long-time operation.

I want to close by stating my conviction that a comprehensive legislative charter is needed to give effect to a well-rounded national forest policy and to strengthen the foundation for timely postwar action in the forestry field.

National War Fund Drive:

Almost Half of Money to Go Toward Cheering U. S. Fighters

A "home front" army four million strong went into action October 1 in every city and county of the United States to back up the fighting fronts in providing essential wartime services for our own and our Allies.

In a single united appeal in some 10,000 communities throughout the United States, this army of volunteer workers, enlisted under the aegis of the national war fund and united war chests, is seeking contributions for the support of local welfare services and to provide for the needs of the men and women of our own armed forces, American prisoners of war, the men of our merchant marine and civilian war victims among the United Nations.

The combined objective of the volunteers in this army is contributions in excess of $250,000,000. Beneficiaries of this vast fund will be an estimated 60,000,000 people who, in some way, will be touched by the services of the federated war chests and the 22 member agencies of the national war fund.

When the operations of this vast army have been concluded, it is believed that approximately 35,000,000 individuals and family groups will have contributed to the vital work of the various organizations, both at home and in some 91 major geographical areas on six continents.

Out of every dollar contributed for the national war fund agencies, 46½ cents will be spent to provide comfort, entertainment and relaxation for our own armed forces.

The expenditure of this proportion of contributions will finance the activities of the following organizations: USO, which brings a touch of home to our fighting forces in some 3,000 units from Alaska to Brazil and from Newfoundland to Hawaii; USO camp shows, which carry professional entertainment around the globe to our servicemen and women in combat zones, in base stations and hospitals; United Seaman's service, which maintains a chain of hotels on six continents and rest centers in this country for the men of our merchant marine who see that the vital cargoes of munitions and materials of war get through to the fighting fronts; War Prisoners aid, which provides recreational, educational and cultural materials for prisoners of war to afford an antidote for the boredom so aptly termed "barbed wire disease."

Approximately 32 cents out of every national war fund dollar will be spent to provide emergency relief for civilian victims of war in the nations of our Allies, overrun and occupied by the Nazi invaders.

Assistance for the peoples of the Axis - dominated nations includes: food and clothing for Chinese war orphans; medical kits and medicine for the Yugoslavs; subsistence rations for millions of starving Greeks; seeds to replant the scorched earth of Russia; dried milk for undernourished Norwegian school children; food packages for Belgian refugees; seed packets for British Victory gardens to ease the critical food shortage; aid for millions of Polish refugees scattered throughout the world; care in this country for child evacuees from Europe; food and clothing for needy people of France; and aid of various kinds for war victims of Czechoslovakia, Luxembourg, Denmark, Holland and Italy.

The remainder of the war fund dollar, including two-thirds for administration, will be held in a contingent fund for emergency needs and unforeseen developments resulting from the liberation of occupied nations.

The "home-front" army will take to its task with the following message of inspiration from Gen. Dwight D. Eisenhower, supreme commander of the Allied expeditionary force: "All Americans know it is a privilege to contribute to the national and community war funds in this year of liberation. Complementing our military campaigns, the services which flow from these funds reach out to friends and neighbors at home and abroad and to the oppressed peoples of the world.
(Signed) Dwight D. Eisenhower."

SAVE GOOD TIMBER IN WOODLOT BY BURNING POORER STANDS

...od from poorly formed trees ...s just as well as wood from ...e saw-log trees. Wood from ...weed trees as ironwood, shad... ...and even beech, has a high ...ing value.

...e temptation is to strip the ...lot when firewood is cut, there... ...estroying local and national re... ...ces for the future. "The Winter ...and A Better Woodlot," is one ...n that has been used by many ...land owners in this state. Usually, the cut in the woodlot should be no more than 30 per cent in any one year, and the sooner another cut can be made from the same woodland. Cutters should keep in mind that a well-formed hardwood tree 10 inches on the stump is probably 50 years old, but would yield only a six-inch log containing four board feet, Doyle scale, or 0.09 standard cord of wood. In eight years more this tree would be 12 inches, would contain 16 board feet (four times as much lumber), or 0.17 cord of wood. If left fifteen years this tree would be 14 inches on the stump, would contain 36 board feet in the first log and 8 in the second log, or one-quarter cord of wood.

Green wood will burn, but seasoned wood is preferred, as it is lighter to handle, has more heat value, and forms less creosote in the chimney. Most of the seasoning takes place during the first six months after the tree is cut.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for October 22

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

RELIGION IN EDUCATION

LESSON TEXT—Matthew 7:7-12; Luke 6: 39-45.

GOLDEN TEXT—Ye shall know the truth, and the truth shall make you free.—John 8:32.

Education without religion will make America a pagan nation in a generation or two. Even worldly-minded educators are concerned about the neglect of and opposition to Christianity in many branches of our country's educational system.

Christians will want to be informed and to act as they have opportunity to bring Christian influence to bear on the education of children. They will want to give their hearty support to real Christian education.

I. Seek Wisdom from God (Matt. 7:7-11).

We have made great progress in the improvement of educational equipment, in the construction of fine school buildings, and in the provision of trained teachers. There have been earnest efforts to develop the most effective courses of study adapted to the needs of our day.

All this is commendable—except for one thing, and that is really a foundational error. We have given little, if any, attention to the development of character, without which the skills of hand and of head may be actually dangerous. Theodore Roosevelt is said to have observed that "to educate a man's mind without educating his conscience is to make him not a social asset, but a social liability" (Douglass).

The teaching in our schools of the evolutionary theory as though it were fact when it has never been proved has provided a foundation for all manner of denial of God and of the truth of His Word.

What shall we do? Surrender? Not at all. Let us look to God for His wisdom and grace. The promise is that the one who asks, receives, when he asks in faith and for God's glory (cf. James 1:5-8 and 4:3). Prayer is vital in real education.

II. Use Wisdom with Men (Matt. 7:12).

Education has as one of its important goals the ability to get along with our fellow men. As the Lord enables us to grow in wisdom and knowledge, it should show in our treatment of those who look to us for guidance and help.

This so-called Golden Rule is a high standard of conduct which many profess, but which only the grace of God can accomplish in a man's life. To always be positively doing for and to others what we would have them do for us is far more than the negative thing which most people assume it to be. They reverse it and are trying to avoid doing things to others that they would not have done to themselves.

Note again that this is on the positive and the active side. We are to go about doing good, such as we would desire for ourselves.

III. Follow Wisdom in Humility (Luke 6:39-42).

If the teacher is spiritually blind he will lead his equally blind pupil into the ditch. That is exactly what is happening in many schools and colleges. No pupil will rise higher than his teacher (v. 40).

Real education makes a man humble. He is not ready to destroy his brother's eye because it has a speck in it, for he recognizes his own weakness and sin. He needs the grace of God in his own life first; then he is ready to give help to others.

There is something fine about the genuine sweet humility of a man who is really educated. He is not pompous and proud, parading his learning so that the populace may be impressed. He is humble and teachable. Real scholarship calls for genuine faith in God.

IV. Find Wisdom in Godliness (Luke 6:43-45).

Every tree brings forth its own kind of fruit. Christian character is a fruit which grows only on the tree of Christian doctrine. The fear of the Lord is the beginning of wisdom (Prov. 9:10). That means that to be truly educated a man must be a Christian.

That which is good and noble and upright can be brought forth only from a mind and heart of which the same things are true (v. 45). An evil man will teach others evil, a good man will teach them that which is good. Hence, the folly of thinking that if a teacher only has a brilliant mind, and is versed in the technical learning of his profession, it makes no difference what his morals are nor how he lives.

That theory has brought ruin to thousands of young lives, and it is high time that all who have to do with educational work demanded godly character as the first requisite of the teacher and made it the leading subject in the curriculum. "The fear of the Lord is the beginning of wisdom."

SEWING CIRCLE PATTERNS

Suit for the Matronly Woman Crisp, Practical House Dress

Jumper Jacket Suit

FOR the older or more matronly woman who wants a neat jumper jacket suit which will be slimly flattering, comfortable to wear and can be made up in almost any sort of material.

* * *

Barbara Bell Pattern No. 1224 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36, jumper, requires 3¼ yards of 39-inch material, short-sleeved jacket, 1⅞ yards.

Ever a Favorite

THE sort of house dress which is a perennial favorite—it's so crisp looking, so easy to get into, so easy to launder! Make it of gay flowered percales or seersucker and trim it with three rows of bright ric-rac on the notched collar and pocket top.

Barbara Bell Pattern No. 1205 is designed for sizes 14, 16, 18, 20; 40, 42 and 44. Size 16, short sleeves, requires 3⅝ yards of 39-inch material; 2½ yards ric-rac trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

HANCOCK COUNTY BOARD PROCEEDINGS

4TH ADJOURNED SEPT. MEETING
Garner, Iowa, October 3, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, John Chambers and Penn Eckels present.

The minutes of the last meeting were read and approved as read.

In the matter of the petition for the cleanout of the main open ditch of D. D. No. 3 and 4 petitioned for by E. E. Bonar et al, Wm Henschen is hereby appointed an Engineer to make an investigation and report on the necessity and feasibility of said cleanout.

WHEREAS, there is now in the hands of the treasurer the sum of $455 57, credited to the Bang's Disease Eradication fund, and

WHEREAS, there is now in the hands of the treasurer the sum of $6,411 13, credited to the T B Eradication fund, and

WHEREAS, it is desired to transfer $1500 00 from the T. B. Eradication fund, for the following reasons:

1942—A transfer of $1500 00 from the Bang's Disease Fund to the T B. Eradication Fund, and

WHEREAS, said transfer is to be permanent in accordance with section 388, code of 1939, and

WHEREAS, there is sufficient money in the T B. Eradication Fund to meet all demands thereon, and

WHEREAS, all laws relating to municipalities have been complied with

NOW THEREFORE, be it resolved by the Board of Supervisors of Hancock County, Iowa, subject to the approval of the State Comptroller, that said sum of $1500.-00, be and the same is hereby transferred from the T B Eradication fund to the Bang's Disease fund, and the County Auditor (Secretarial Officer) is directed to correct his books accordingly and to notify the treasurer of this transfer, accompanying the notification with a copy of this resolution and the record of its adoption. The vote thereon was as follows: Ayes: F J. Schoun, Penn Eckels, J. A. Chambers, Nays: none.

Fred C. Missal, County Auditor.

F. J. Schoun, presiding officer.

On motion and second the contract of Carl H. Peterson & Co. for the cleanout of D. D. No. 9 and lateral No. 6 of D. D. No. 9 is approved.

On motion and second the quarterly reports of Elmer Raw, County Clerk, Fern Peck Katter, County Recorder, and Fred C. Missal, County Auditor, are approved.

Supervisor F. J. Schoun is hereby appointed a committee to investigate and cause repairs to be made in D. D. No. 1 and 2, lateral No. 42 and D. D. No. 7 Main.

On motion and second F. J. Schoun, Chairman and Fred C. Missal, County Auditor, are hereby authorized to execute a contract Sale of Town property in behalf of Hancock County, Iowa, conveying lots 4 and 5, in Block 4, Maple Hill addition to the town of Britt, Iowa, to Irwin W. Reichert of Britt, Iowa, Said contract to be for the sum of $900.00 payable at the rate of $20 00 per month together with interest at the rate of 4% on the unpaid balance payable annually until total purchase price and interest is satisfied in full at which time a deed executed in full by Hancock County, Iowa, shall be delivered to the purchaser

WHEREAS, there are outstanding warrants on D. D. No. 14, lower main, upper main and lateral No. 1, thereof, which were issued in payment of a recent cleanout.

WHEREAS, hearing on said cleanout petitioned for by J H Corzine et al, was held as directed by law, and it is deemed for the best interests of the taxpayers of said district that a levy be made at this time.

BE AND IT IS THEREFORE RESOLVED by the Hancock County, Iowa Board of Supervisors acting for and in behalf of D D No. 9 and laterals thereof that a levy of $5,000 00 be made on the lower main, a levy of $2800 00 be made on the upper main and $2700.00 be levied on lateral No 1 of D D. No. 9, Hancock County Iowa

Said levy to be extended against all lands, tracts, parcels, highways and railroads in the district in accordance with the reclassificiation of said district and when so extended to be collected with the regular tax of 1944, payable in 1945 All as provided for by law.

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption, seconded by Supervisor Penn Eckels whereupon the Chairman F J Schoun placed the motion for adoption and upon roll call, the vote thereon is F J. Schoun, Penn Eckels and John Chamber aye. Nays, none.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

DOUBLE FOUR CLUB MET WITH MRS. BARZ

The Double Four Club met Friday afternoon at the home of Mrs. [illegible]n Barz where the group of ladies enjoyed an afternoon of bridge.

Mrs H D Ramsay held the high score for the afternoon, while Mrs. Orville Bridges was second high.

Jacobs Stars For Simpson

Indianola—Elwyn Jacobs, right end for the Simpson College Redmen, played the full sixty minutes against Central College at Pella last Friday night. Jacobs furnished considerable opposition for the Centralites, and to him goes a big share of the 6-0 Redmen victory.

EDITORIAL COMMENT

HUNT SAFELY THIS YEAR

Iowans are assured of the best hunting year for a long time. Rabbit, squirrel, and duck seasons are now open, and the upland game bird season opens shortly. Some 200,000 licensed shooters will take to the fields to enjoy the sport and excitement of the chase in 1944. Because of their own or someone else's carelessness, some of these hunters will be killed, and some will be crippled. This statement is a cold-blooded fact, and everyone who hunts must use extreme care that he is not one of the actors in an outdoor tragedy. The most important principle of safe gun handling is: "Always point the firearm so that, in case of accidental discharge, there is no danger of injury to anyone."

In the interest of making and keeping shooting a safe sport, the Sporting Arms and Ammunition Manufacturers' Institute has published the Ten Commandments of Safety:

"Safety First—Always"
Make That Your Motto

1. Treat every gun lith the respect due a loaded gun. This is the cardinal rule of gun saftey.

2. Carry only empty guns, taken down or encased, into your automobile, camp, and home.

3. Always be sure that the barrel and action are clear of obstruction.

4. Always carry your gun so that you can control the direction of the muzzle even if you stumble.

5. Be sure of your target before you pull the trigger.

6. Never point a gun at anything you do not want to shoot.

7. Never leave your gun u[illegible] tended unless you unload it fi[illegible]

8. Never climb a tree or a f[illegible] with a loaded gun.

9. Never shoot at a flat, h[illegible] surface or the surface of water.

10. Do not mix gunpowder alcohol.

C. K. FINDERS, MANAGER — KLEMME, IOWA

Each progressive step of the ROCK ISLAND LINES is part and parcel of the Program of Planned Progress inaugurated in 1937. Under this Program is a solid foundation of fine railroading tradition reaching back 92 years...to 1852 when the ROCK ISLAND LINES were established.

Only upon such a foundation could such a Program be built.

With fine modern equipment and 8000 miles of well-maintained right-of-way stretching through 14 middle western states, the war found this railroad system ready. It was equal to the kind of wartime job which is justifying America's patronage and admiration.

In 1944...still keeping ahead of its war job...ROCK ISLAND introduced a fleet of powerful, fast Diesel freight locomotives and a fleet of the latest type steam freight locomotives. Preliminary installations of radio communication between dispatcher, engineers and freight conductors were made. Centralized train control—the miracle of modern railroading—was proved and further developed.

ROCK ISLAND is continuing to move onward and upward...*still* planning. With the coming of peace, you will find ROCK ISLAND ready for that glorious era, too.

As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation

Petunia, Southern Mammy cook, Ella Marie Buckley.

Uncle Isaac Zimmerman, Andrew's uncle, Ivan Blumer.

The rest of the cast include Delbert Bachman, Leonard Anderson, and Lorence Polsdofer.

The play is a modern farce in 3 acts.

SENIOR CLASS NEWS
Patricia Kudjc, Reporter

Many of the latest books are now in our library, such as "Paris Underground," by Etta Shiber, 'How Green is My Valley," "Tomorrow Is Forever," and others We are glad to have a chance to read these books that are on the top of the list. We also have books from the Traveling Library to furnish entertainment, and magazines and papers Quite a wide selection to read from for our spare moments.

Our News Review in Literature helps us keep up with the world Many of us don't take time to read the newspapers (except the funnies) and we should know what is happening. We are kept posted on the presidential election, on the war front and on other important events.

I Advance Home Economics we have started making our dresses. We have been learning how to knit and crochet, too, so we have been kept busy

JUNIOR HIGH SCHOOL
GRADES 7 AND 8
Norma Early, Reporter

Six weeks tests are over and we are very glad. We hope that most of us got pretty good grades.

Two seventh grade boys put on an experiment Thursday. They were Donald Finders and Marvin Schmidt The whole room was invited to see it Some more experiments will be given next week.

The Eighth Grade had their first Self Testing Drill in Arithmetic this week. The average grade made was a "Good" on the chart

Alice Meyer, Marjorie Lau, Luella Priebe and Jerry Finders all had 100% in Spelling in the six weeks test.

GRADES 5 AND 6

This Friday completes the first six weeks period of the year. We have been taking six weeks tests and all made a resolution to work harder the next six weeks.

Honor Roll

Those people in the Fifth Grade being neither absent or tardy for this period are:

Janice Carpenter
Richard Tiggeman.

Those people in the Sixth Grade being neither absent or tardy this period are:

Darlene Bachman
JoAnn Carpenter
LaNelle Harvey
Beverly Pringnitz.

Delores Thiemann in the Fifth Grade and JoAnn Carpenter and LaNelle Harvey in the Sixth Grade have missed no Spelling words this six weeks. We think this is a very fine record.

GRADES 4 AND 5

The Third Grade Geograhpy class has just finished a unit called "Some Neighbors of Long Ago." In this we learned that many, many years ago the people did not have houses, but lived in caves. After that period of "Cave-people" they began grouping together in villages. These villages were still different from ours. These villages were built on a platform over the water. That is why they are called "Lake-people." Gradually thru the years the people kept progressing until now we have the type of houses that we do We enjoyed reading about these things very much

The Fourth Grade Science class has just completed "How Are The Things of the World Put Into Groups" We learned that everything in the world is either living, or non-living. And that every living thing is either a plant or an animal. Some of us were indeed surprised to learn that we are animals.

GRADES 1 AND 2

The First Grade finished reading in the pre-primer. "We Work And Play" We enjoyed reading about how Dick, Jane and Baby Sally helped Mother and Father Now we are reading the pre-primer "We Come and Go"

Second Grade have finished in reading the unit "Our Story Book Friends" We read about animals which acted and talked like people do We hade pictures of these friends.

Honor Roll

In Spelling, Terry Koerner had a perfect record this six weeks.

Those who had a perfect record of attendance are:

Roger Bachman
Carol Bridges
Lois Heginger
Douglas Jones
Graydon Barz
Lyle Heginger
Adeline Medaus
Carole Montgomery

SEND IN YOUR SEED SAMPLES EARLY FOR TESTING

Seed samples to be tested for purity and germination by the State Seed Laboratory at Iowa State College, Ames, should be sent in as soon as possible this year, according to word received this week by County Extension Director Paul Henderson.

The laboratory will be able to furnish better service if seed owners send in at least part of their samples during October and November, rather than delaying until mid-winter, states R. H Porter, head of the laboratory.

A testing fee of 50 cents should accompany each sample. Samples may be brought to the county extension office or mailed direct to the laboratory. Amounts of seed needed for a good test are: Clovers and timothy, 2 ounces; corn and small grain, 1 pound; sorghums, millet or brome grass, four ounces. Each sample should be placed in a container that will not be broken open easily.

Henderson says testing for purity and germination leads to use of beter seed. Such tests also may be the basis for adjusting seeding rate according to germination.

Porter says the laboratory can test samples now of clover, small grains and grasses.

That Nagging Backache
May Warn of Disordered Kidney Action
Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the kidneys. They are apt to become over-taxed and fail to filter excess acids and other impurities from the life-giving blood.
You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!
DOAN'S PILLS

Household Hints

The bottom part of a funnel may be used as an apple corer in a pinch.

—•—

Some homemakers serve raw turnips in strips to be eaten with salt, like celery.

—•—

For a well-seasoned roast, add a few gingersnaps to the juice in the pan.

—•—

To reheat bread, place in a paper sack, fasten tightly and warm for five minutes in a moderate oven.

—•—

A medium-sized gold fish bowl is excellent for use in whipping cream. Does away with splattering.

—•—

If you have difficulty in getting sonny boy to wash his neck and behind the ears, try giving him an old shaving brush and let him apply the soap.

—•—

Wax the metal wastepaper basket inside and out to prevent rusting.

easy way to

MENTHOLATUM

SNAPPY FACTS ABOUT RUBBER

John L. Collyer, president of The B. F. Goodrich Co., believes that it will be at least two years after the first recapture of Far East rubber-producing territories before normal operations can be restored. Meanwhile, synthetic and the constantly decreasing amount of natural rubber in the U. S. will have to take care of our requirements.

Every time an escort of 1,000 fighter planes goes into action on the battle front or on bombing raids, some 50 tons of rubber are being carried into the air. The U. S. War Department figures show that the average fighter plane has 105 pounds of rubber somewhere in its construction.

ONE OF THESE DAYS

MISSING: Schickelgruber, Adolf; 54, five feet 10; weighs 167; color: extra white. Last seen with both feet off ground looking for a secret airport from which to take off to a secret destination, but lacked secret running shoes. Once known as "Fuehrer" but now answers to the name of "Fido."

Wears funny mustache, has wild look in eyes, has passion for microphone and might be found in vicinity of amplifiers. Has illusions of grandeur; labors under impression he is Napoleon Bonaparte and always acts on hunches. Proof that he has just acted on a hunch is usually furnished by the fact he is eating rugs.

Is pasty faced and suffers from halitosis, double vision, battered chins, dandruff, hardening of the outlook, inflammation of the intelligence and bunions at base of spine due to recent travel on his posterior.

—*—

Formerly had a swastika engraved on left chest but recently had it transferred elsewhere. Large heads of Churchill, Stalin and Roosevelt tatooed on his right chest and can't understand how they got there. Across his back is inscription: "Available for paperhanging at old rates." Several scars on abdomen due to Patton operation.

—*—

Three toes on right foot missing; may have had them removed to conceal ancestry. All teeth missing except one on lower jaw which Axis failed to kick out through carelessness. Limp gives him the appearance of being crippled, but is due to fact he has been walking around in two left-footed shoes most of life without knowing it.

—*—

Is of highly nervous temperament; subject to fits of violence at mention of Yanks, RAF, etc., or renditions of "The Last Time I Saw Paris," "Russian Lullaby" and "God Save the King."

This man is wanted for trying to subjugate Europe, giving the planet its greatest headache, committing untold brutalities, being a general nuisance and trying to make a frankfurter, a loaf of pumpernickle and a plate of saurkraut take the place of Magna Charta, the Statue of Liberty and the Ten Commandments.

Is noisy, irrational and altogether unpleasant. Boasted he would never remove military uniform until he had licked the world, but will probably be found in a costume no better than that of similar bums. Can dance a jig but there is hardly a chance he will care to now.

Is a vegetarian which explains that cauliflower odor.

—*—

Spent early years as a housepainter and paperhanger and may frequent stores selling short stepladders and new soaps for cleansing overalls.

This man may be traveling with others of his type, as many are known to be in similar flight. If they are traveling in one group their detection should be simple: they will be trying to alibi their flight to one another.

Liberal reward, dead or alive. Notify Moscow - London - Washington International Posse.

General Patton Up!

"Just chase the Heinies up a hill
And knock 'em down another!"—
That is the Patton recipe
To save a lot of bother;
Old "Blood and Guts" is in again—
No more a doghouse doggie—
He's slugging Nazis all around,
And knocking Adolf groggy.

He isn't any diplomat,
His manner isn't tender;
He goes into a battle like
A wildman on a bender;
He's fussy over leggings and
He can't stand neckties shoddy;
But when he tackles Adolf—wow!
The cry is, "Where's the body?"

He's not the dinner-party type,
He says it not with flowers;
He gets so violent at times
They send him to the showers;
His manner is obstreperous,
His talk is even louder
But he can toss these overalls
In Mrs. Murphy's chowder!

He's not the soothing, restful sort,
His language could be finer;
He is an awful pal inside
A shop chock-full of "chiner";
But he can pitch and field and hit—
The toughest spots he weathers—
So let us merely wink an eye
And watch the flying feathers!

"Mr. Krug said that the WPB would keep its brakes and steering gear in good shape."—News item.

—*—

What you need when you have a job as head man of WPB, Mr. Krug, is to keep your windshield mirrors in good shape so you can see if anything is bearing down on you from the rear.

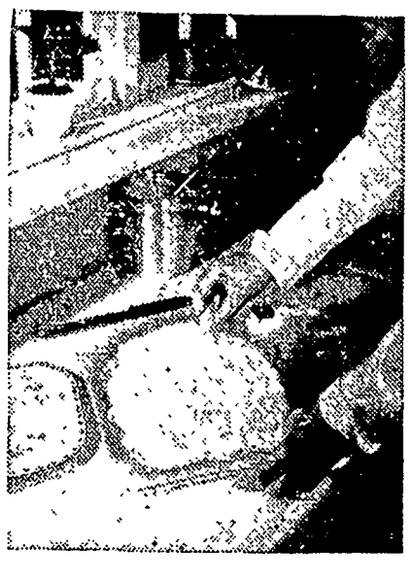
It's the goosestep short-circuited.

Cake Bazaars, Cookie Sales Boost Funds



Spice cake is hard to resist when it has a fluffy seven minute or marshmallow icing and is sprinkled lightly with coconut.

Church groups and women's clubs know that one of the best ways of raising funds for their activities and philanthropic purposes is by having cake bazaars or bakery sales.

Few can resist the appeal of home-made cakes and cookies at such sales, and it is truly an ideal way of meeting the year's budget. It is here where the good ladies bring their best wares, and finance committees really have their day.

For displaying the goodies, a well set table is necessary. It's a good idea to have a good looking table cloth and flowers. The cakes and cookies will do the rest.

You will find today's recipes just as delicious as they sound, and not too expensive to make. I'm giving different types of recipes in case you want to clip the sheet and pass the recipes among the members of your particular group.

***Lady Baltimore Cake**
½ cup shortening
1¼ cups granulated sugar
2 cups cake flour, sifted
2½ teaspoons baking powder
½ teaspoon salt
1 teaspoon almond extract
⅔ cup milk
5 egg whites

Cream shortening and sugar until light. Add sifted dry ingredients and milk alternately. Last fold in stiffly beaten egg whites and flavoring. Bake in three eight-inch layers in a moderate (375-degree) oven for 25 minutes.

Frosting
1½ cups sugar
⅓ cup boiling water
⅓ cup hot maraschino cherry juice
½ teaspoon light corn syrup
1 tablespoon lemon juice
2 egg whites beaten stiff
¾ cup chopped blanched almonds, toasted
¼ teaspoon grated orange rind
15-20 maraschino cherries, cut in eighths

Combine sugar, water, fruit juices and syrup and bring to a boil quickly, stirring only until sugar is dissolved. Boil rapidly without stirring until syrup spins a thread when dropped from spoon and forms soft ball in cold water (238 degrees). Pour syrup into a stream over egg whites, beating constantly. Continue beating until of a consistency to spread. Fold in remaining ingredients and spread in between and top of layers of Lady Baltimore Cake.

***Red Devil's Food**
2 cups pastry flour
½ cup cocoa
¾ cup shortening
1½ cups sugar

What Makes It So? If cake batter runs out of the pan when baking, it may be due to too small a pan, too slow an oven, too much sugar or shortening, or too much leavening.

If the cake has a moist sticky crust, it is due to too much sugar in the recipe. If the crust is thick and heavy, the recipe may have too much flour, too long baking, too hot an oven, or not enough sugar or shortening.

If a cake humps or cracks on top it may be because it has too much flour or was baked in too hot an oven.

Coarse texture is due to too much leavening, not enough liquid, insufficient creaming of shortening and sugar, or too slow an oven.

Cake Bazaar

*Lady Baltimore Cake
*Spice Cake *Red Devil's Food
Ice Box Cookies
*Pop Corn Nuggets
*Recipes Given

2 eggs
1 teaspoon soda
½ cup buttermilk
1 teaspoon vanilla
½ cup boiling water

Sift flour once, measure and resift twice with cocoa. Cream shortening and sugar thoroughly. Add well beaten eggs and beat until light and fluffy. Add soda to buttermilk. Add dry ingredients alternately with buttermilk to creamed mixture, beating hard after each addition. Add vanilla, pour in boiling water and beat until smooth. Bake in two eight-inch greased tins in a moderate (350-degree) oven for 30-35 minutes. Spread between layers and top with Seven Minute Icing.

Of all the cakes that have been developed, the one which is always ready to go over with a bang is this Graham Cracker Cake with a delicate orange topping:

Graham Cracker Cake
½ cup butter or shortening
1 cup sugar
3 eggs
¾ cup milk
½ cup coconut or chopped nutmeats
28 graham crackers, rolled fine
2 teaspoons baking powder

Cream butter and sugar until light and fluffy. Add egg yolks which have been beaten until light and lemon colored. Add milk and rolled, sifted crackers alternately, then fold in stiffly beaten egg whites and baking powder. Bake in two greased eight-inch pans in a moderate (350-degree) oven for 30 minutes.

Orange icing can be made in a flash for it's uncooked. Cream two tablespoons of butter with 1¾ cups powdered sugar. Add the grated rind of one orange and enough orange juice to make a spreading consistency. Place in between the layers and ice top and sides.

Platters of assorted cookies are just the thing for your cake and cookie bazaar. You can expect lots of requests for recipes at such events.

For that melt-in-your-mouth quality, there's a spice cake that will fill the bill and then some. But this is not an ordinary spice cake, by any means. In addition to fine spices, it has the subtle flavor of bananas:

***Spice Cake**
½ cup butter or substitute
2 cups brown sugar
4 eggs
3 bananas, mashed fine
1 cup milk
2 teaspoons cinnamon
1 teaspoon each, cloves, nutmeg and allspice
2½ cups flour
3 teaspoons baking powder

Cream together sugar and butter, add beaten egg yolks and mashed bananas. Add alternately the sifted dry ingredients and milk. Fold in the egg whites. Bake in a large square pan which has been well greased, in a moderate (350-degree) oven 35 minutes. Ice with marshmallow icing.

Pop corn nuggets are an interesting addition to your money-raising bazaar. They will go over with the ladies who don't like to be caught munching a big mouthful of popcorn:

***Pop Corn Nuggets**
2 cups sugar
⅔ cup water
¼ teaspoon cream of tartar
2 tablespoons molasses
1 tablespoon butter
Few grains of salt
5 quarts pop corn

Place sugar, water and cream of tartar in a saucepan and bring to the boiling point and boil without stirring to 280 degrees or until syrup will crack when tried in cold water. Add molasses, butter and salt, and boil, stirring constantly until candy becomes brittle, being careful not to let it burn. Have ready a pan of freshly popped corn; pour candy over it, mixing thoroughly. Spread lightly on a buttered slab or platter and when firm, cut into pieces or break up into little bunches of three to six kernels.

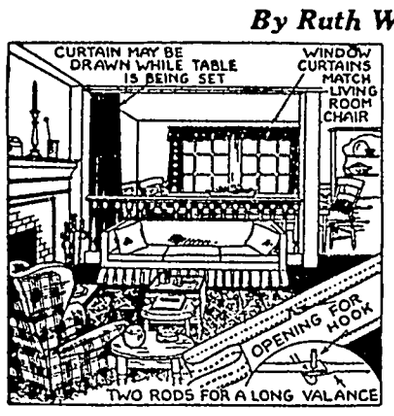
How to Remove Partition Between Rooms, Yet Have Separate Units

By Ruth Wyeth Spears



CURTAIN MAY BE DRAWN WHILE TABLE IS BEING SET
WINDOW CURTAINS MATCH LIVING ROOM CHAIR
OPENING FOR HOOK
TWO RODS FOR A LONG VALANCE

HAVE you ever thought of removing the partition between your living and dining room but feared the ceiling would sag if supports were removed? Or, perhaps you have considered the idea and decided that after all it might not always be convenient to have the two rooms in one? Here is an answer to both of these questions.

The sketch shows the partition removed to give a greater feeling of space but the main supports have been left in. A balustrade between the two rooms makes a division without spoiling the light airy effect and a draw curtain matching the living room draperies make it possible to shut the dining room off when desired.

• • •

NOTE—Here is news for homemakers. This sketch is from a new booklet by Mrs. Spears called MAKE YOUR OWN CURTAINS. This 32-page book is full of smart new curtain and drapery ideas with illustrated step-by-step directions for measuring, cutting, making and hanging all types from the simplest sash curtain to the most complicated lined overdrapery or stiffened valance. Whatever your curtain problem here is the answer. Order book by name and enclose 15 cents. Address:

MRS. RUTH WYETH SPEARS

Thada's

A GOOD STORE IN A GOOD TOWN KLEMME, IOWA

BEANS

AND BOOK ACCOUNTS

THE COMBINES ARE BUSY every bright day in the soya bean fields, and the beans are coming to town in trucks, trailers and in wagons pulled by tractors.

OUR ELEVATOR MEN ARE BUSY loading out the carloads of beans which are shipped to the processing plants.

BEANS ARE A "CASH CROP" and this money comes handy to pay off the little store debts which the farmer may be owing about town.

ONE FARMER WAS JUST IN today; paid up in full and said he had called on every business place in town and paid up every debt, didn't owe a cent in town. He said he felt fine about it, so did we.

LET'S KEEP THIS IN MIND when we cash our bean checks and pay up all the little debts around town. I am sure there are beans enough this year to do a complete job of paying up all the store bills in Klemme.

ASK PERMISSION TO HUNT

The 1944 pheasant season opens at 9 00 a. m October 28 in Hancock and 63 other Iowa counties. Some 200,000 licensed hunters will take to the fields thereafter to begin the annual upland game bird harvest.

The recent pheasant census indicates one of the greatest pheasant populations in the history of the state, and most farmers are glad to have the surplus birds harvested Nevertheless, many "No Hunting" signs will be posted throughout the territory Most of these signs have been erected because at one time or another the lack of sportsmanship and fair play on the part of some hunter has necessitated them. Many of these posted properties are open to hunters in whom the landowner has confidence It is therefore the responsibility of the individual sportsman to make himself welcome on these farms It is a mistake and a violation of Iowa statutes to trespass with dog or gun on any enclosed or cultivated lands, other than public shooting grounds, without first securing permission from the owner. Hunters cannot be urged too strongly to contact the owner of the property on which they expect to hunt and secure his permission. One careless or malicious act by a single hunter may close a given area to all for a long period of time. If every hunter conducts himself as a true sportsman, the "No Hunting" signs will soon disappear.

Lloyd Ax, son of Mr and Mrs Wm. Ax, northeast of Klemme, enlisted in the army and left Sunday evening for Ft. Snelling, Minn.

One of the feature attractions at the Klemme High School for the coming year, and the first on the schedule of major events, will be the annual Junior class play "The Antics of Andrew."

The part of Andrew, a college Senior, will be played by Ronald Brinkman. The opposite part, Andrew's girl friend, Althea Thorne, will be played by Miss Ruth Bell A number of other members of the Junior class will make up the supporting cast.

The three act play is directed by Miss Esther Ellen Crabtree, one of our teachers Instrumental music between acts will be provided by the High School Music Department

Reserved seats are now on sale at the Wilson Pharmacy.

The curtain is scheduled to open on the first act at 8:00 o'clock p m

KLEMME YOUTH IN BATTLE OF GUAM AND SAIPAN

Mrs. Emory Weaver recently received word from her brother Calvin Schaefer of the U. S Navy in which he stated that his outfit took part in the battles at Guam and Saipan in the Pacific.

Another brother, Donald, has evidently gone to sea as his address has changed to a Fleet Post Office number.

Both boys are sons of Mr. and Mrs. Roy Schaefer of Klemme.

HANCOCK COUNTY SCHOOLS AID IN WEED POD COLLECTION

County Supt. Chas. S. Whtiney received a preliminary report that indicates that 2,100 bags of milkweed pods wil be collected by the school pupils of Hancock County for the use of the government in providing equipment for the armed forces

Originally 1,200 bags were shipped to this county and the keen interest by boys and girls in Hancock County schools made it necessary to order another supply of bags to hold the milkweed pods.

Klemme Soldier Marries

Monday Mrs Henry Medaus received a telegram from her grandson. Pvt. Eugene Johnson, stating that he was married to Miss Marcela Coyer of Clear Lake.

Pvt. Johnson is stationed at Camp Van Dorn, Mississippi.

Malek's Accordian Band will furnish the music for the dance.

Everybody invited to Duncan on Tuesday night.

NINETY HEAR HAMILTON SPEAK AT ANNUAL MEETING

Other Officers Are Chosen For The Coming Year

Ninety people took time away from their soybean harvest to hear V B. Hamilton, past Secretary of the Iowa Farm Bureau Federation, point out many of the issues facing farmers and all agriculture now and during the post-war period. Mr Hamilton said, "We are one of the few peoples that have a chance to pick our government leaders." He says, "Vote."

Wilbur Chandler, district organization leader for the Iowa Farm Bureau Federation mentioned some of the legislative issues that will come up before the State legislature during the next session. Two issues of importance to farmers and all other people of the state are. The School Code and the State Income Tax. The importance of the farmers having a voice in these matters is the part the Iowa Farm Bureau has in representing agriculture.

Reports were given by Miss Hazel Grimes, County Extension Home Economist; Charles Jackson, County Organization director; and Paul Henderson, County Extension Director.

Community singing was led by Fred Missal. Kathryn Raw of the Garner high school played two piano solos.

Cook Re-elected President

Virgil A. Cook of Klemme, was re-elected President; Erwin Kahl, of Britt elected Vice-President; C. A. Bird of Woden, Secretary; Geo. Urich, Treasurer; and C. J Wille of Klemme, Alternate Voting Director; Mrs Harold Oxley, County Chairman Women's Committee of the Farm Bureau; Mrs. Ray Baker, Vice-Chairman and Secretary; Mrs. C. J. Wille, 4-H Girls Chairmna; Mrs Harold Oxley, Voting Delegate, and Mrs. Ray Baker, Voting Alternate.

Directors Approved

The following directors were approved: John Eenhuis, Amsterdam; Walter Koehler, Avery; James Fitzpatrick, Bingham; Jack Dethmers, Concord; Jennings Andersno, Ell; Harvey Sorenson, Ellington; Fern Huling, Boone; L. S. Fisher, Britt; Clarence Trenary, Magor; Henry H. Stoltenberg, Madison; Frank Bredlow, Liberty; and Everett Sheets, Oorthel.

Resolutions were presented and approved.

SCHOOL NEWS

SCHOOL CALENDAR

Oct. 27. Junior Class Play.
Nov. 2, 3, 4. Iowa State Teachers Convention at Des Moines.

SOPHOMORE CLASS NEWS
Lois Ann Lau, Reporter

Now that report cards are out for the first time this year, we all know how we stand. and of course, we've got a special little box on our report cards for conduct. Don't some of us think we're good little boys and girls now?

Our Biology Class has been interesting For our class Tuesday we went out to the West River and got some minnows, a few small bull-heads and a number of frogs to put in our aquarium. We started our aquarium with a large water beetle brought by one of the Sophomore boys. We have fun watching the frogs eat flies as they drop into the water. We have also started a new chapter "The Four Great Groups of Plants"

In World History we finished the Civilization of the Greeks and have started on the Romans.

In English we are on the chapter 'Expressing Your Opinion." We have been writing essays, reports on essays and Character Sketches.

GRADES 1 AND 2

We decorated our room with Hallowe'en cats, jack-o-lanterns, bats, and witches.

In Art we made owls and jack-o-lanterns. Some of our jack-o-lanterns look happy and some of them look sad.

The Second grade began reading in the book, "Friends And Neighbors." We enjoy reading in our new books very much.

GRADES 3 AND 4

The following Third and Fourth graders have been neither absent or tardy the first six weeks:

Honor Roll

Lois Ann Jacobs
Bonnie Jean Mau
Eric Meyer
LuVerne Heginger
Gary Smith

The Science classes have started several experiments. We planted flower seeds, grass seeds, and soy beans. We were all surprised to see how quickly the soy beans sprouted.

GRADES 5 AND 6

Last week we had two birthdays in our room, Janice Carpenter in the Fifth grade and Beverly Pringnitz in the Sixth grade.

Each brought treats to school which were enjoyed very much. We sang "Happy Birthday" for them.

Our room has the appearance of Hallowe'en. On our windows we have pumpkins, bats and witches, and as a border around our room we have cat and moon posters.

In Fifth grade History we read the story of the life of Francis Scott Key and how he happened to write "The Star Spangled Banner."

In Sixth grade Arithmetic we are reviewing additions and subtraction of fractions. During the summer some of us forgot a few of our rules we learned last year, but feel it won't require too much work for us to be able to get them.

7th and 8th grades m....

JUNIOR HIGH SCHOOL
GRADES 7 AND 8
Isabell Gibbs, Reporter

This week in Art some of us made Chalk Drawings. Others in the class made drawings with crayons

The Seventh grade finished the unit on "Air," in Science. The 8th grade is working on the unit of "Water." Several interesting experiments were given by pupils in the 8th grade.

The Seventh graders wrote reports on the products of the A, B, C countries of South America.

KINDERGARTEN TO START OCTOBER 30

Supt. A. L. Kingery announces that Kindergarten will start Monday, October 30. Any child who will be five years old before January 1, 1945 is eligible to enroll. Pupils will attend only in the afternoon. Miss Bugh will be in her room after 3:00 p. m. October 20 and parents may bring the children to get acquainted and to enroll. This, however, is not necessary. Pupils may enter October 30 without previous enrollment.

MEAL PLANNING, PREPARATION AND PRESERVATION STUDIED BY 4-H GIRLS

Planning will help Hancock County 4-H Girls meet daily food requirements and adapt the family meals to the wartime food situation. At the first training meeting of the season held in the Hayfield schoolhouse, Mrs. Miriam Williams, extension 4-H nutritionist from the Iowa State College, stressed the part 4-H girls may play in the War effort.

Methods of food preservation are an important part of the 4-H project. Planning and meat preservation were emphasized at the first lesson.

Nineteen club leaders, county committee members, and older 4-H girls attending the meeting prepared and served the noon meal as a group demonstration of desirable cookery methods and a well-balanced meal.

Well - planned and prepared meals will be stressed at the second training meeting which will be held in January. Special emphasis will be given protein cookery.

Down To Forth Generation

Gary Hanna, son of Captain and Mrs. Burdette Hana of Marion, started to school this fall. He is of the fourth generation to get his education in Marion schools. The firs was Ida Kemp Lillie who graduated in 1875. Both the boy's father and mother graduated from the Marion schools.

THE METHODIST CHURCH

Worship Service 11:15 a. m.
Wednesday:
W. S. C. S. next Wednesday, November 1 at 2:00 .p m. Mrs. Albert Lange, hostess.

MEMORIUM

In Memory of My Husband, Melvin C. Peterson, Who Passed Away November First. Nineteen Hundred And Forty-Three.

The mystery of life is Death; the mystery of Death is Life. In Life—Death haunts the mortal mind; yet when we leave the world behind, with all its stress and storm and strife—Death proves to be the gate of Life.

Our loved ones go—and yet they stay. and walk beside us on the way. O sweet and secret paradox! In vain the seeker stands and knocks, and never finds the hidden key that will unlock the mystery.

They pass, and yet they do not die. What use to probe with "How?" and "Why?" We need no proofs. God made It so. We who have loved and lost—we know; we who have watched the last faint breath—we know the truth—there is no death.

ETHEL PETERSON.

Limited tests with penicillin in threating mastitis in cows indicates that when it become available after the war it may be an effective drug for livestock as well as humans.

We want your news. Phone 12.

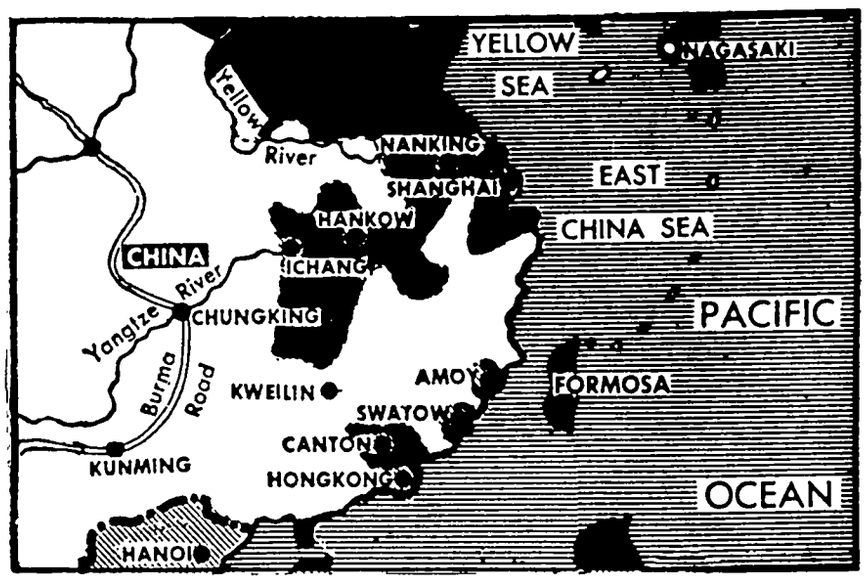
WEEKLY NEWS ANALYSIS

Nazi Resistance Grows in West; Chinese War in Critical Stage; Strong Cattle Markets Forecast

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



Dark shaded areas on map show extent of Japanese occupation of China, and progress of drive along east coast to seal it off to counteract possible U. S. landings.

EUROPE:
Nazis Fight Back

Long famed for artillery fire, U. S. army units brought their big guns into full play as dogged doughboys slugged their way through the Siegfried line above Aachen in the face of mounting German resistance.

Although the main fighting focused above Aachen, action remained heavy along the whole 460 mile front, with the Germans seeking to unsettle Allied advances with strong armored counterattacks.

With an array of 75 to 240-mm. field pieces laying a creeping barrage before advancing doughboys, and with squads of tanks rumbling over the countryside to blast enemy strongpoints at short range, Lieut. Gen. Courtney Hodges' Third American army tore a big hole through the vaunted Siegfried line, finding stationary defenses manned by inferior German troops, with the best saved as reserves for counterattacking.

Equally bitter fighting raged on either side of the Third army sector, with the Nazis counterattacking strongly around Nijmegen in Holland to blunt the British Second army's end run around the Siegfried line in the north, and elite enemy troops putting up stiff resistance to doughboys flushing them out of the great underground fortifications guarding Metz, key to the coal-laden Saar basin.

On the southern anchor of the western front, the enemy fought back viciously from prepared defenses in the rolling countryside in an effort to stop the U. S. Seventh army's thrust toward passes in the Vosges mountains and the wide Belfort Gap leading into southern Germany.

In Italy, the U. S. Fifth army pushed closer to the great communications center of Bologna, through which the enemy has been routing reinforcements to his sagging Po valley front.

As the Russians increased their pressure against Hungary, and other Red forces drove across Yugoslavia for a junction with U. S. and British units, the Germans were put to it to plug up the Balkan gateway to southern Germany.

Although the Nazis reportedly succeeded in withdrawing the bulk of 200,000 men from the southern Balkans before the British invasion of Greece and the Russian drive to sever communication lines along their escape route, the Reds pressed to nip off the straggling remnants.

In driving across eastern Yugoslavia, the Russians overran rich metal deposits around Bor, which the Germans had been working extensively, and enveloped the capital of Belgrade. With Romanian troops fighting by their side, the Reds advanced to within 135 miles of Budapest, heart of Hungary.

CATTLE MARKET:
Prices Strong

Large government purchases of low-grade beef, and decreased hog shipments in the face of big demand, will tend to keep market prices at a high level this fall and winter, the department of agriculture reported.

Because of the sale of more range cattle than last year, however, and the relatively smaller marketings of finished grades, overall prices may average lower than in 1943. With a much larger prospective supply, calves are also expected to fall below last year's prices.

At ceiling prices throughout midsummer, hog prices are expected to remain high through the next six months, with the government in the market for the smaller pork supplies reflecting the 24 per cent reduction in the spring pig crop.

MISCELLANY

The first B-29 Superfortress cost $3,392,396.90. Current production models are costing $600,000.

Into the cost of the first model of any warplane go all the years of engineering, experiments, tests and changes. The very time it takes costs money—and the minimum time from the first design of a new plane to the completion of the first production model is about three years. Sometimes it takes five years.

POSTWAR INDUSTRY:
Fear Concentration

To prevent the concentration of industry in 11 northern and eastern states in the postwar period, a senate committee recommended that the government stand against the reconversion of its war plants in these states to civilian production.

Indicating the possibilities of such concentration, the committee pointed out that before the war these 11 states produced 65 per cent of the nation's manufactured goods and received 51 per cent of all plants and facilities erected by the government for the war effort.

Besides calling for a shifting of war production to the south and west after Germany's downfall, the committee recommended an adjustment of freight rates, attention to patents, and technological aid to small industrialists as part of a long range program for stabilizing business in these areas.

CHINA:
In Crisis

News from China recently has been none too rosy, with the country's armies falling back before the Japs' drive to seal off the whole eastern coast to counter an attempted American landing, and the U. S. air force compelled to abandon four advanced bases before the enemy's push.

In an effort to help China help herself, President Roosevelt dispatched ex-War Production Board Czar Donald Nelson to confer with Generalissimo Chiang Kai-shek in the building of an integrated industry to exploit the country's vast resources.

Maj.-Gen. Patrick Hurley (left) and Donald Nelson (right) confer with Chiang Kai-shek (center).

With Chinese industry largely undeveloped, the Japs blockading the eastern ports, and mountainous terrain and primitive roads handicapping the overland route from Burma, valiant Chinese armies have been sorely ill-equipped.

With Chiang's regime losing much face as a result of successive military defeats, the Chinese political situation also has been blurred, with the Communists pressing for greater power in government.

PACIFIC:
Jap Ship Shortage

Effect of the heavy U. S. aerial and naval campaign against Japanese shipping in far Pacific waters was reflected in the Tokyo radio's announcement that a shortage in ocean tonnage had contributed to a food crises. Flood and drought were other factors mentioned.

Tokyo admitted the critical shipping situation as the destruction of planes and subs was revealed, and as army fliers intensified their attacks on enemy craft plying in the Philippine area.

One of the principal U. S. targets was the great oil storage center of Balikpapan on Bornea.

EXPORTS

Best customers for U. S. goods in 1941 were Great Britain, which took 31.8 per cent of our total exports of $5,147,000,000 including lend-lease; Canada, 19.3 per cent; Egypt, 4.9 per cent; and South Africa, 3.6 per cent.

With 16.5 per cent, Canada sold U. S. the greatest percentage of foreign goods, with British Malaya second with 10.3 per cent, and the Netherlands Indies third with 7.2 per cent. Brazil followed with 5.5 per cent and Cuba with 5.4 per cent.

FARM INCOME:
High Level

With an increased volume of crops marketed as the harvesting season advanced, September farm income jumped up 24 per cent from the preceding month to approximate $1,880,000,000 and total $13,848,000,000 since the first of the year, 6 per cent over 1943.

The 6 per cent increase in income for the first nine months of the year approximated the boost in farm production, with crops up 7 per cent and livestock 6 per cent.

Gains in cash receipts from tobacco and cotton were especially pronounced while substantial increases also were shown in oil-bearing crops, with only flaxseed failing to keep pace. With greater sales of meat animals anticipated, the seasonal decreases in marketings of dairy products was expected to be offset.

Reflecting a boost in valuations of real estate arising from higher prices, farmers' equities have increased by $30,000,000,000 since the start of the war, according to H. R. Tolley of the U. S. bureau of agricultural economics.

At the same time, Tolley said, the accumulation of $12,000,000,000 of cash or liquid assets gives the farmers a sizable nest-egg with which to readjust operations in the postwar period.

Future equities will be greatly influenced by prevailing price levels, the amount of debt incurred and the uses made of accumulated wartime assets, Tolley asserted.

Under the impetus of wartime conditions, Tolley said, agriculture grew into a $70,000,000,000 industry in 1944 from $49,000,000,000 in 1940. If cash, deposits and savings bonds were added, the total value of the farm plant would approximate $83,000,000,000, he said.

Battle Royal

Even in the excitement of wartime, this year's presidential election promises to develop into an old-fashioned political dogfight.

President Roosevelt

As both candidates warmed up, President Roosevelt declared: ". . . "Some political propagandists are now dragging red herrings across the trail of this national election. For example, labor baiters and bigots and some politicians use the term "communism" loosely, and apply it to every progressive social measure and to the views of every foreign born citizen with whom they disagree . . ."

The same week, Governor Dewey proposed to ". . . Revise the personal exemption so that the man who makes $11 a week no longer has an income tax taken out of his envelope . . . Reduce personal income tax rates . . . Change and lower the income tax on incorporated business companies so that it no longer acts as a drag upon production . . . Shorten the present endless list of nuisance taxes.

Gov. Dewey

WAR PRODUCTION:
Labor Shortages

As a result of the War Manpower commission's system of referring job applicants to important war industries, employment problems in the heavy-tire, artillery, ammunition, rayon, aviation gas, rockets and mica plants throughout the country have been relieved.

On the other hand, the WMC reported, radar, tire cord, explosives and ammunition loading plants, and certain critical shipyards, lost workers despite the need for additional numbers.

WMC reported smaller labor turnover in recent months in essential industries, with 4.9 per cent of the total now quitting compared with 5.6 per cent last June.

With employment in the nation's mines falling to the lowest level in years, domestic and industrial coal consumers were warned to continue fuel conservation and buy whatever kind of coal was available instead of waiting for preferred grades.

With one man out of every six having left the mines since Pearl Harbor, employment in the industry has dropped from 558,000 to 463,000, with a shortage of 32,500 men expected by the end of the present coal year.

As a result of labor losses, employment in anthracite mines is the lowest since the 1870s, while the number of workers in the bituminous pits is the smallest since 1902.

Useful Crop

Coconut is the only great crop which from a common source supplies man's needs for food, clothes, and housing. With the possible exception of rubber and timber no other harvest meets so great a variety of mortal needs.

Throughout Middle America, both green and mature coconuts are an essential food providing an invaluable vegetable milk as well as a staple protein and oil.

IMAGINARY INTERVIEWS— ADOLF AND THE KAISER

Wilhelm—Yoo hoo, Adolf! How's you doing?

Adolf—Keep quiet! Don't you know you're dead and done for?

Wilhelm—Yes. Do you?

—*—

Adolf—If I never hear another word from you it will be great.

Wilhelm—I can't help laughing. You harped so much about me not knowing how to lick the world!

Adolf—Forget it; I've got troubles enough.

Wilhelm—You'd better get yourself a bucksaw.

Adolf—Nobody will ever see me using a bucksaw.

Wilhelm—What's good enough for me will be good enough for you.

Adolf—That's ridiculous. I gave the German people a leadership it will never be able to forget.

Wilhelm—You said it!

—*—

Adolf—Be sarcastic if you wish, but history will prove you were never in the same class with me as a warrior.

Wilhelm—I hope so!

Adolf—As leader of Germany I had a much bigger program than you ever dreamed of.

Wilhelm—I'll give you no argument on that. But look what happened to it.

Adolf—I had a lot of bad luck.

Wilhelm—Yah, and it came from the same places mine came from, England and the United States. It always puzzled me that you didn't profit from my mistake in drawing in America.

Adolf—If it puzzled you think what it does to me. I had the English as good as knocked out early in the war.

Wilhelm—The English are never dangerous except in the final rounds. I could have warned you.

Adolf—Why didn't you?

Wilhelm—Every time I tried to reach you you were climbing into a microphone. They didn't have mikes in my day.

Adolf—What a break that was! I think maybe I went too far on the radio.

Wilhelm—Why the "maybe"?

—*—

Adolf—Don't rub it in. We both made big mistakes.

Wilhelm—You took all my mistakes and did them over in technicolor!

—*—

Adolf—I still can't see how it happened. It all seemed so easy. France was a pushover, England was an old fogey, America was just a decadent race of softies.

Wilhelm—You sound like one of my old phonograph recordings. Save time. Grab a saw and get busy!

Adolf—The Allies won't let me saw wood. And no country will let me set up a woodpile.

Wilhelm—Are you sure?

Adolf—I have it in writing!

Wilhelm—Well, I'm sorry, old man. The world isn't what it used to be.

Adolf—You're telling me!

* * *

WPB and the National Housing agency have decided to permit the release of materials for alterations and remodelings of buildings to provide more flats where extreme housing crises exist. "But first a community must be declared a critical area," the announcement says. Watch for the rush of politicians in cities all over the country to have their towns declared critical areas. Oh, man!

* * *

It was bound to happen!

We talked to a Miami Beach man by phone yesterday and asked why he didn't make his proposed trip north this year.

"I ain't up to it," he replied, "Those northern hurricanes have me scared."

* * *

NICE GOING

John Kieran Jr., was given the bronze medal for meritorious achievement the other day. In the cold language of army awards the medal was for "outstanding leadership and ingenuity in efficiently using enemy materials against its former owners in North Africa from July 10th to August 16th, 1943." In simpler language, the younger Mr. Kieran, facing a tough question, answered it even more rapidly than his old man.

PRIVATE PURKEY MAKES A DISCOVERY

Dear Ed!

I just had a close call inside Germany. I noticed so soon as I invaded the place that nobody run out to shower me with kisses, and at first I get sore. Well, know what happens?

A good-looking Nazi girl throws a kiss at me, and the next thing I know I am in a ambulance.

Them Germans even mine their kisses.

—Oscar

CLASSIFIED DEPARTMENT

SNAPPY FACTS ABOUT RUBBER

Economic conditions in the Latin-American countries have been greatly influenced by the demand for natural rubber. This is evidenced by the report that Nicaragua shipped to the U. S. 1,267 tons of rubber in 1943 as compared with only 60 tons sent us in 1941.

The B-29 Super fortress, our largest aerial weapon, has built into it some 5,000 pounds of rubber, covering more than 200 items. Thirty bullet-sealing fuel tanks alone account for nearly two tons of rubber.

Rubber Director Dewey is authority for the statement that heavy-duty military tires made with 70 per cent synthetic rubber and rayon cord are better than the best military tires made before the war.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

DOAN'S PILLS

AMERICAN FARMERS SURPASS THEIR OWN MARK TO PRODUCE ANOTHER RECORD FOOD CROP IN 1944

153 Million Ton Grain Harvest Second Best.

25 Billion Pound Output of Meat All-High.

America's soil and America's farmers are an unbeatable combination.

That's the belief of N. E. Dodd, chief of the agricultural adjustment agency of the U. S. department of agriculture, as he points to the eighth successive record food production soon to be completed, and the all-time high for total farm production that is also being entered on the books for 1944.

In all the history of the world, says Dodd, no country has before provided from its own farms enough food for all its civilians and all its fighting men, and had some to share with its allies. Proof, he says, can be found in a review of the record.

The 1944 harvest, according to department of agriculture figures, is estimated at 4 per cent more crops reaped and threshed than last year, while food production is up 5 per cent over 1943's record and 29 per cent over the pre-Pearl Harbor average for 1937-41.

Beginning in 1939, when war engulfed the European continent and America began to receive calls for supplies of all kinds, both food and total agricultural production have increased each year, building up to the 1944 records that top anything in the nation's history.

Yield of crops appears generally excellent, despite the hard use the soil has had of necessity during the war years. It is pointed out that only seven major crops show a lower yield than the average for 1933-42, which includes 1942's phenomenal yields. These crops are buckwheat, rice, dry beans and peas, peanuts, soybeans and sweet potatoes.

Leading crop this season is wheat. It is the second billion-bushel harvest in U. S. history, exceeding by 10 per cent the previous record set in 1915. Estimates are for some 1,115,402,000 bushels in 1944, 33 per cent more than last season and 47 per cent more than the average for the 1933-42 decade. Yield per acre exceeds 1943 by 10 per cent, and the earlier decade by 30 per cent. Biggest average acre yield for winter wheat is reported from Nevada, with 30 bushels per acre, compared with the national average of 18 8 bushels. Idaho is next with 29 bushels, followed by Washington with 28.5 bushels and Utah with 27 bushels per acre. Idaho and Utah lead in acre yield of spring wheat other than durum, with an average of 33 bushels per acre, compared with the national average of 17.5 bushels.

Bumper Corn Harvest.

If the anticipated corn harvest of 3,101,000,000 bushels is realized, it will top last year by about 25,000,000 bushels and exceed the 1933-42 average by 732 million bushels, or nearly one-third. This is only a little below the all-time record set in 1942. The acre yield this year is slightly under 1943, but 23 per cent more than the average for 1933-42. Iowa heads the list for acre yield among the states with 52 bushels, compared with the national average of 31.8 bushels. Idaho takes second place with 47 bushels, followed by Illinois with 45 bushels, and New Hampshire, Vermont and Wisconsin tied with 40 bushels per acre.

Hybrid seed corn has played no small part in increasing corn production, according to the department of agriculture. Hybrids have been found to raise yield as much as 20 per cent, and in 1943 it was estimated that 669,000,000 bushels more corn were produced than would have been possible without the hybrids. Nearly 52 per cent of the corn acreage last year was planted to hybrid varieties, government figures show.

A third more sorghums for grain than in any previous season is anticipated with the harvest of about 150,000,000 bushels compared with 112,000,000 bushels in 1941, the highest production to date. The acre yield is 15 per cent more than in 1943, and 33 per cent greater than the 1933-42 average. California sets the pace for acre yield with 36 bushels per acre compared with a 17.9 national average, followed closely by Arizona with 32 bushels, Illinois with 26 bushels and Missouri with 21 bushels per acre.

The oats crop is estimated at 1,190,540,000 bushels, 4 per cent more than last year and 16 per cent more than the 1933-42 average. Acre yield is only slightly higher than last season and about 5 per cent above the 1933-42 average. Washington and Wisconsin have the highest acre yield among the states, probably influenced by the new Vicland variety which is hardier and particularly adapted to those areas. Washington's 46 bushels per acre and Wisconsin's 42.5 bushels compare with the national average of 30 bushels. Utah with 41 bushels, and Nevada and Idaho with 40 bushels per acre also report good years.

Good crops of buckwheat and barley, and a near-record rice crop, when added to the other grains, indicate a total grain harvest of 153,000,000 tons. This would be slightly less than the peak year of 1942, but 10,000,000 tons more than in 1943 and ranging from 12 to 28 per cent in excess of the harvest during the five years before 1942.

Busy with harvest on farm near Trappe, Md., William Eason and crew leave field with four bushels of tomatoes, infinitesimal part of estimated crop of 3,173,800 tons.

Hay production of some 98,000,000 tons in 1944 would mean a harvest of this important feed greater than in any years but 1916, 1927, 1942 and 1943. Acre yield of all tame hay is estimated at 1.39 tons, with California's average reaching 2.84 tons per acre, and Arizona's 2.40 tons. California also leads in acre yield of alfalfa hay with 4.20 tons compared with the national figure of 2.21 tons per acre. Arizona is again second, with 2.75 tons per acre. The state of Washington tops California for clover and timothy hay with 2.10 tons per acre compared with the national acre yield of 1.32 tons, and 1.85 tons per acre in California.

Peanut production may set a new record. The anticipated 1944 harvest is 2,365,630,000 pounds picked and threshed, 7 per cent more than in 1943 and 76 per cent more than the 1933-42 average production. Acre yield is up 13 per cent over 1943, although it is 6 per cent less than the average for 1933-42.

Fred Marshall of Minnesota epitomizes the American farmer, whose estimated 1,115,402,000 bushels of wheat for 1944 represent an all-time high for the U. S.

Dry beans, dry peas and flaxseed are considerably below the large 1943 production, although compared with prewar harvests the production is of good size on all three crops.

Production of white potatoes is expected to be down substantially below the 1943 record harvest, although exceeding the 1933-42 average by about 4 per cent with a production of 377,589,000 bushels. Acre yield is down about 11 per cent this year, although some 4 per cent above the 1933-42 average yield per acre. The crop of sweet potatoes is estimated at about 2 per cent above average, although some 5 per cent below 1943's high.

Banner Vegetable Output.

Housewives interested in supplies of fresh fruits and vegetables are expected to look with favor upon the record or near-record fruit and vegetable harvests indicated for 1944. Fruit supplies for the 1944-45 season are estimated to be 10 to 15 per cent greater than in 1943-44. Tonnage of citrus from the 1944 bloom is expected to be as large or larger than the record 1943-44 production from the bloom of 1943. The eight major deciduous fruits, including apples, peaches, pears and grapes, will probably be 21 per cent greater than last season, and 10 per cent more than the 1933-42 average. Apples, for example, are expected to exceed the 1943 pick by 38 per cent, with 33,583,000 more bushels than last year, or about the same as the average for 1933-42.

The peach harvest probably will total 30,092,000 bushels, 71 per cent more than 1943, and 25 per cent above the 1933-42 average. Some 4,640,000 bushels more pears are indicated, exceeding 1943 by 19 per cent and 1933-42 by 2 per cent. The condition of most fruits is reported greatly improved over the condition at the same period last year.

Commercial vegetables for fresh market are up over the 1943 tonnage by approximately 18 per cent, and exceed 1933-42 by 22 per cent. They are expected to top the 1942 record of 7 million tons by 11 per cent. New highs are indicated for cabbage, lettuce and onions, with the harvest of the latter crop reported as some 52 per cent greater than last year and 45 per cent more than the 1933-42 average.

Tonnage of vegetables for processing is reported as about 10 per cent more than in 1943 and 51 per cent above the 1933-42 average. These crops include snap beans, green peas, sweet corn, tomatoes, beets, lima beans, kraut cabbage and pimientos. The tomato harvest is estimated as 19 per cent in excess of 1943's total of 2,659,100 tons for a new high of 3,173,800 tons.

High acre yield of cotton, partly influenced by dry weather that held the boll weevil in check, has resulted in the picking of slightly more than last year's 11,427,000 bales, for a total of 11,483,000 bales from a million and a half fewer harvested acres.

Tobacco production is expected to be the second largest on record, with a total of 1,730,680,000 pounds, all types combined, compared with the 1939 record crop of 1,880,793,000 pounds. This year's tobacco harvest is estimated at 24 per cent in excess of 1943.

Another record egg production on farms is indicated. During the first eight months of 1944 total production is reported as up 6 per cent over the same period last year, and 48 per cent over the 1933-42 average. Although chickens for market dropped substantially below last year's high, about 3,500,000,000 pounds of chicken meat, or 42 per cent more than the 1933-42 average, are expected to be produced in 1944.

An increase of some 4 per cent in the production of all meats is indicated for 1944, compared with the 1943 record. A total of 25,000,000,000 pounds is expected this year, of which 10,790,000,000 pounds will be beef and veal. Beef production is estimated at about 10 per cent more than in 1943, with veal possibly 20 per cent more. An indicated 13,250,000,000 pounds of pork would be a little less than the large production in 1943, due to lighter market weights, but lard production will probably total about 3,390,000,000 pounds, or 11 per cent more than last year's peak. Lamb and mutton production of about 970,000,000 pounds compares favorably with prewar years, although it would be 12 per cent below the 1943 record.

With manpower shortages one of the farmer's pressing problems during the war years, with many men drafted and others seeking employment at higher wages in industry, many women took to the fields beside the menfolks to help in the production of record food crops. Picture shows young women on farm near York, Pa., assisting in hay harvest, which was expected to approximate 98 million tons, fifth largest on record.

SEWING CIRCLE NEEDLEWORK

A Popular Large-Sized Vestee

5640

Snug and Warm

SO MANY readers have asked that I design a "large-size" vestee which could be easily knitted that I've done this one specially for sizes 38, 40, 42 and 44. Made in maroon or wine-colored yarn it's just the sort of winter vestee which is most popular. Button the lapel over for added warmth under your coat—wear the vestee for comfort in a too chilly house. And it will make a wonderful Christmas gift for the woman who is too busy to do her own knitting!

* * *

To obtain complete knitting instructions for the large sized vestee (sizes 38, 40, 42, 44 included) (Pattern No. 5640).

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Propaganda Distribution

Bundles of propaganda material dropped by Allied airmen on Germany no longer open at great heights and have their leaflets scattered over vast rural areas by the wind.

Each bundle now carries a new, inexpensive gadget, about the size of a shoe-polish can and operated by barometric pressure, which holds the sheets together until reaching a low predetermined height, so they will not scatter outside of the intended area.

To Relieve Bad Cough, Mix This Recipe, at Home

Big Saving. No Cooking. So Easy.

You'll be surprised how quickly and easily you can relieve coughs due to colds, when you try this splendid recipe. It gives you about four times as much cough medicine for your money, and you'll find it truly wonderful.

Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking needed—it's no trouble at all. (Or you can use corn syrup or liquid honey, instead of sugar syrup.) Then put 2½ ounces of Pinex (obtained from any druggist) into a pint bottle. Add your syrup and you have a full pint of medicine that will amaze you by its quick action. It never spoils, and tastes fine.

This simple mixture takes right hold of a cough. For real results, you've never seen anything better. It loosens the phlegm, soothes the irritated membranes, and eases the soreness.

Pinex is a special compound of proven ingredients, in concentrated form, well-known for its prompt action in coughs and bronchial irritations. Money refunded if it doesn't please you in every way.

OUTLINES NEED OF AID TO SCHOOLS FROM STATE

State suport for public schools is being promoted to lift part of the school tax load from the property tax and as a way to equalize educational costs and opportunities among school districts. Points in favor of a state-wide program have been voiced by Edward D. Allen, in the current issue of the Iowa Farm Economist, a free publication of the college.

Allen hails a state support program as a much-needed improvement over Iowa's present system of school support, which depends almost entirely on local property taxation. He is in accord with the School Code Commission report which recommends a 12 milion dollar annual school support program.

The economist regards the present basis of school aid as a major problem, since he believes it both unfair and inadequate. He points out that local conditions and the school populations vary so widely throughout the state that some districts, even with higher than average local tax rates, have been unable to provide state-average amounts for education.

A second major problem, in Allen's estimation, is that of school transportation. He protests the practice that requires certain districts to pay the cost of getting the pupils to school, as well as operating the school. Consolidated schools are the ones forced to bear this burden mainly and would be the ones to whom Allen would particularly direct the benefits of state aid for transportation.

Moved Bridge

Donald Schroeder of Sheffield, while driving a car, struck a bridge with such force that a heavy channel iron was broken and the bridge was moved off its foundation. The car overturned but Schroeder was uninjured. Donald stated he had been blinded by lights of an approaching car and was unable to see the side of the arrow bridge.

Blackout

Emmetsburg got a taste of what blackouts are like in Europe but without all the danger attached thereto when the street lighting failed one day. The system is so set up that when there is a defect in the wiring all the lights are affected. The odd part of the incident is that during all the recent wind, rain and other storms, the lights had not blacked out but on a very normal night everything was covered with darkness.

Just A Mere Button

Billy Parrish, 10 year old son of Mr. and Mrs Tom Parrish of Charlton, had suffered from what was thought a severe case of sinus trouble. Recently, his mother was in Chicago with her son and had a doctor investigate the cause of the trouble of her son. The doctor, following the examination, decided it might not be sinus trouble at all and other doctors were called in. Necessary instruments for full examination were flown from New York. The nasal passage was expanded and three inches from the lungs a metal button was located. The button was removed and Billy has no trouble with sinus infection. Some 30 doctors in Chicago examined the patient and the button, so unusual was the case. All declared that the button had been there for five or six years.

Still Smith

Evelyn G. Smith of Crystal Lake changed her title from Miss to Mrs., but did not change her last name. She was recently married to Calvin L. Smith of Kanawha.

Worked For Nothing

Evidently working several hours to break into the safe of the former Percy Savings Bank, burglars gave it up as a bad job. The former cashier now wishes to advise everyone who might want to see the inside of the safe that it is empty and he will gladly give the combination to save trouble and inconvenience. The burglars took the screws out holding the plate of the safe door, then took out a bolt that held the ratchet to keep the door from turning but quit at that point.

Good Fisherman

Pete English is a very good fisherman when he goes alone so his Belmond friends report. He recenly returned from a fishing trip with five and six-pound northern pike which he caught somewhere along the Iowa river near Belmond. His friends have decided it might be a good idea to trail him sometime to his favorite fishing hole.

Perhaps, Never Again

Malvern residents have seen a sight that not every one gets a chance to see. The water tower caught afire and Malvern people rushed to see the sight. Some welders were repairing a leak in the bottom plates near the outlet when a torch got too near the pipe and the packing around it caught fire.

Saved By Flat Tire

Flat tires are often the cause of badly strained tempers but Joe Oberbreckling of Dyersville has one to thank for perhaps saving his life. An explosion in a steam pressure cooking tank at the Dubuque Packing Company plant caused injuries to several men and killed 2. Oberbreckling's body was searched for in the ruins. However, happily for everyone, he walked into the building a few minutes later, reporting to work after being delayed by a flat tire.

Cooked Seeds

Tomatoes growing from seeds left in the pulp of the tomatoes remaining after making preserves have been seen in the garden at the Peter Engel home in Reinbeck. Mr Engel buried the pulp in a hole in the garden so as not to attract flies A short time later hundreds of tomato plants growing in the mound from the seeds were visible.

Patriotic Vacation

Emil Anderson of Mediapolis took a 2,000 mile vacation trip this year but did not take anyone's space on train or bus, nor use extra gasoline. He traveled with Earl Honson and son, Lowell, in their truck. The first city visited was Chicago where they took a load of stock.. From Chicago they took a load of vegetables to Memphis, Mo., and Greenfield, Miss. A load of sweet potatoes was taken from the south to Chicago and then to Davenport. The trip took about a week and Emil was well pleased with his "vacation."

Return Visit

"Flash," a horse on the Marion Dairy route, likes his own particular friends. Recently, his owner rode him to make a call on friends. The lady of the house asked permission to ride Flash around the block and rewarded him with some lumps of sugar. The next morning, the delivery boy was on the same street and left the wagon to deliver milk to nearby houses. Flash was supposed to stand but wanted to see his new friend so moved on down the street to where she lived. He pulled off the road, across the lawn and up to the front door. However, it was too early in the morning for the lady to be downstairs to greet Flash with the lump of sugar he expected.

Reunion

Schoolmates of 63 years ago visited together one evening. In 1881 Mae McNeil of Postville and Alonzo Harvey of near Ossian attended school together. Again in 1890 and 1891 the two were classmates at a business college in Decorah. Recently, the Misses Mae and Rose McNeil visited in the home of Mr. and Mrs. Harvey.

Bell Sold

The church bell that summoned people to the Christ Lutheran church in Remsen for 45 years has been sold. Now it will call people to the Lutheran church at Grand Mound, Iowa. The selling price was $75.00. The bell was first used when the old frame church at Remsen was built in 1895. It was used continuously until 1942 when it was used the last time on Easter Sunday at the church. However, it has been used since that time during the first war loan drive to note the purchase of each war bond at the post office.

Corn Grows Well

John Hall of Hamburg has been displaying two ears of corn growing from the same joint. Both ears are perfect specimens of what good ears of corn should be. Many who have seen the corn have stated they do not remember seeing two fully developed ears coming from one joint.

First To Arrive

In response to a call for small duffle bags for American soldiers in hospitals in England. the Creston Salvation Army corps was first in the nation to fulfill the quota. Capt. R. McCalip, officer in charge, has been notified that the Creston shipment was the first to arrive in England. Recently a box containing soap, wash cloths, razor blades and other toilet articles donated by people of Creston has been forwarded by the Salvation Army to hospitals in England.

New Deal Has Destroyed Democratic Party, Gov. John Bricker Declares

Governor John W. Bricker, Republican vice-presidential nominee, delivered vigorous indictment of the New Deal Administration as he carried his speech-a-day campaign tour west of the Mississippi.

Speaking in St. Louis, on October 4th, over a nationwide network, Governor Bricker accused the New Deal of dividing the people of the nation in order to hold its power.

"It has set class against class," he said. "It has played minority groups for their political support. It has attacked not only the actions, but the motives of all who dared to oppose it. Never before have we had the bitterness, engendered by selfish political interests, that we have experienced in this administration."

Governor Bricker condemned the New Deal for "its vicious and persistent attacks upon business," and for using its extraordinary wartime power "to suppress the rights of the American People and to subordinate them to constant bureaucratic domination."

"I do not condemn the Administration for its legitimate efforts on behalf of the workers of this country," Governor Bricker continued. "But I do condemn the New Deal for its favoritism among labor groups, for playing one against another for political purposes, for bad administration of labor laws and for political adjudication of disputes between labor and management Such tactics have resulted in strife and strikes, they have actually lessened war production."

Charging that the New Deal "is leading this nation away from American principles of government," Governor Bricker said that the Roosevelt Administration had destroyed the traditional Democratic party.

"Instead the reins of power have been turned over to such White House agents as Hopkins, Frankfurter, Rosenman, Pepper, Ickes, Kelly, Hague and the temporarily inactive Pendergast," he said. "They know little of the real life of America and they care less. They want power and jobs. Patronage is their meat and drink. Power is their passion. The American people are their victims.

"But there is now a more dangerous influence than these. As the New Deal took over the Democratic party—so now the Communists and the radicals have taken over the New Deal. The New Deal Convention in Chicago raised to the pedestal of power a man whose ideas of government are alien to the Constitution and free representative government. His name is Sidney Hillman.

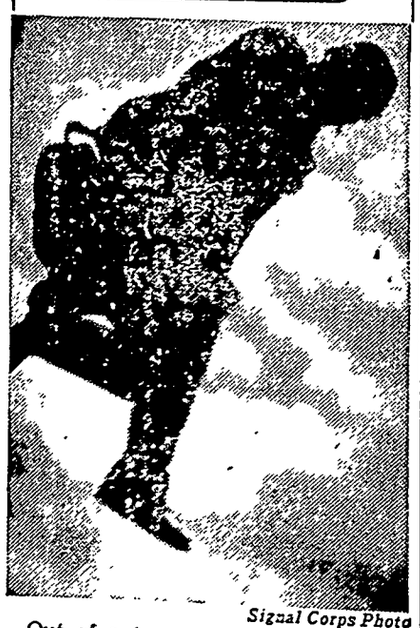
"The millions of dollars collected by Hillman and his PAC, often from unwilling and intimidated hard working people of America, were too much for the New Deal leaders to pass by. They saw the opportunity to evade the Hatch Act—to defy the corrupt practices act—indeed to buy this election. A supine and political-minded attorney general helped pave the way by a purely political opinion."

Governor Bricker added that the Communists under Earl Browder had joined forces with Hillman in control of the New Deal Party.

"They are seeking to tie the noose of Communism not only around the New Deal but around the whole American people," he concluded.

Governor Bricker also scored the New Deal in speeches at Bowling Green, Kentucky; Nashville, Tenn.; Minneapolis, Minn.; Centralia, Ill.; Ottumwa, Iowa; a Tri-City Meeting (Rock Island, Ill. and Davenport, Iowa); and Milwaukee.

WAR BONDS *In Action*



Signal Corps Photo

Out of a transport, into the early grey dawn and down behind the enemy lines in France goes this paratrooper. An American boy, willing to give his all that freedom may remain ours. Support him and his buddies by doing all you can at home—by buying War Bonds regularly.
U. S. Treasury Department

Plant Food

The best time to make application of plant food is just as the frost is coming out of the ground. Then the soil is spongy and honeycombed, and will allow the plant food easy access to the soil, so that the plant food is readily available to the grass roots the moment active growth begins.

Early application, before the grass has made any top growth, will save labor too, because the plant food need not be watered in if application is made before top growth begins. Simply apply 4 pounds of complete balanced plant food per 100 square feet of lawn, scattering over the surface as evenly as possible. Early spring rains will wash the plant food into the soil.

While one group of men operated a mole tiling machine in a field at the Bert Johnson farm near Greenfield another group operated a pick-up baler in the same field. Three other men were hauling the loose and baled hay to a nearby barn.

lott Township Trustee for five years

arried—Three sons and three daughters. Two sons in Service, both overseas.

STAND ON MY RECORD—If elected, will continue to strive for Honesty in Government and a Square Deal to all.

FARM MACHINERY OUTLOOK IS NOW BETTER

But Supply Still Will Not Meet Farmers' Demand Coming Year

While prospects for new farm machinery appear to be slightly more favorable for next year, the supply will still fall short of needs. Repair work must play an increasingly important role if sufficient machines are to be kept rolling for 1945 food production.

Repair Important

That's how J. B. Davidson, head of the Agricultural Engineering Department at Iowa State College, sums up the farm machinery outlook for next year. He points out that repair stocks are expected to be ample to meet needs. A shortage of repairmen. however, may bottleneck production unless much of the repair work is done during the winter

Some small repair jobs might be done by farmers at home during the winter if a heated shop is provided. Much labor-saving equipment, such as trailers, hay sweeps. rakes, manure loaders, small grain elevators and hay hoists, if built by local blacksmiths or mechanics before spring, could help to alleviate the labor situation.

Buy Only Needed

Lifting of rationing restrictions on all farm machines except corn binders should not be taken as a signal that machines wil be available to meet all demands, Davidson says. The necessity for buying only what is needed and for maintaining old equipment continues vital.

Farmers haven't been able to make normal replacements of farm machines for 3 years. They have more money now with which to buy machinery and a greater appreciation of the increased production they can get from them. Those factors must be overcome by the realization that manufacture of new machinery is still below normal levels, Davidson concludes.

CARLOAD OF ROUGH BOARDS

JUST ARRIVED

Polls Show Mexicans Prefer Spanish People

Mexico has its own public opinion poll, closely resembling the Gallup Poll in the United States. And its latest sampling of what typical cross-sections of the population are thinking would indicate that most Mexicans prefer Spanish, French and Italian immigration to any other non-American immigration after the war.

The two weeks' survey, limited to this city, was conducted by the Instituto Cientifico de la Opinion Publica under the supervision of Dr. Laszlo Radvany, former director of the University in Exile of Paris. Of 2,237 residents polled on the type of European or Asiatic immigration which would benefit the country most after the war, about 35 per cent favored Spaniards and 33 per cent voted for the French. England and other American republics were not included in the survey.

Other results gave 13 per cent of the votes to Italian immigrants; 4.5 per cent to the Chinese and about 3 per cent to the Russians. Less than 2 per cent of those polled favored postwar German immigration and less than 1 per cent indicated a willingness to see Japanese set foot in Mexico in the future.

Wood Coated With Wax Will Check Warping

When the front door swells, the bureau drawers stick, the dining table warps, and the ironing board bulges, blame the weather, say wood experts. Wood, especially unfinished wood, absorbs moisture from the air in warm, humid weather and swells. While the wood is swollen, not much can be done except to ease tight places by rubbing with wax. But later when heat has dried out the house and brought the wood back to normal size, coat the underside of tables and other unfinished wood surfaces with varnish or wax to prevent the wood from taking in so much moisture again.

The bulged board that adds to home ironing difficulties is a problem to many homemakers. Ironing boards are usually unfinished, and kept in damp laundries or kitchens. In ironing, steam from damp clothes is driven down into the wood. Wood experts advise buying a thoroughly seasoned board at least an inch and a half thick, because thick wood warps less than thin, and giving it several all-over coats of good spar varnish. Cleats of hard wood nailed to the underside of the board help to hold it flat. Keep the board in a dry place.

Women's Activity a "Must"

"I prize American liberty" is a basic reason why one American woman, Mrs. Grace B. Reynolds of Cambridge City, and Indiana's former state treasurer, advocates political activity as a 1944 "must" for American women.

In this, Mrs. Reynolds herself gives more than passing "lip service." She gives daily evidence of her strong beliefs in active political

MRS. GRACE B. REYNOLDS

service, as a campaign assistant to Miss Marion E. Martin, in charge of women's activities for the Republican presidential campaign.

"I believe the Republican candidates, Governors Dewey and Bricker, offer us the true leadership of liberty we must have to help this nation go forward," Mrs. Reynolds says. "That is why I am doing all I can to bestir American women in their political thinking, and to direct some straight-thinking on the 1944 issues."

At the New York campaign headquarters, Mrs. Reynolds is applying her knowledge of practical politics. She learned "the hard way," first as a precinct worker back in 1920, then through county and state work, and finally on the Republican National committee, of which she is a former vice-chairman.

As Indiana's state treasurer for five years, she had the distinction of being the first woman elected to a major state office.

No Two Pants Suits

With 1,900,000,000 pounds of surplus wool piled up in this country, 600,000,000 pounds of it imported from Australia, it remains utterly impossible for thrifty Americans to follow the economical policy of buying two pairs of trousers with a suit of clothes.

In Idaho, Governor Thomas E. Dewey, after conferences with leading sheepmen of the western area, found that this uneconomic condition is bound to react to the damage if not the utter ruin of American sheepraisers who have been urged by the New Deal administration to increase their flocks.

EDITORIAL COMMENT

FARMERS AFTER THE WAR

While a great deal is being planned about reconversion of our war plants when the fighting is over comparatively little time is given to agriculture. Yet if we can judge by the things which followed World War I, the American farmer may be in a worse plight after peace comes than the manufacturer and his employees who have been in war production. The older people of the country remember what happened after the Armistice was declared in 1918 In a short time the prices of agricultural commodities went tumbling precipitating the panic which came a year or two later. The farmers had been urged to increase their production. They did so, but there was a great surplus after the war was over.

Conditions are somewhat similar now. Farmers have patriotically responded, in spite of great handicaps to the Government's plea to increase production. The Government now has huge stores of certain kinds of food. What will happen if the war in Europe ends suddenly as now seems more than possible?

It may be argued that the food will be used abroad. Perhaps some of it will. But it is to be remembered that Canada and Australia have surpluses and England is obligated to buy this. When the war ends and shipping is released she will undoubtedly do so.

It is also likely that much of the soil in Europe can be put back in production rather rapidly. The Russians are already busy in the huge farm regions they have reclaimed from the Nazis. When peace comes each nation will try to become as self sufficient as possible in order to conserve what gold it has. The only things it will feel free to import are those which we give them. We know what happened a generation ago when we gave great surpluses to France only to have the French sell some of them back to us later at prices below the competitive level.

In the meantime the procedure of strict rationing of food continues in the United States. Perhaps this is the thing to do, especially if the war is to continue for a considerable time, and there is a place for our surplus food commodities. But the situation is one which calls for some careful thinking lest the American farmer be left out on the limb again.

A priority shipment of Argentine frogs arrived in the United States recently to combat insects pests that have been destroying Florida's sugarcane crop.

It is said that the Sultan of Solo, in Java, has a household of 15,000 persons including wives, sweethearts, dancing girls, relatives, priests, soldiers and servants—and, we presume, a reasonable number of traffic cops for the palace corridors.

A man who has a good memory is apt to be successful but the fellow is able to forget things is more apt to be happy.

Says Radio Reception Varies With Moon's Phases

Radio reception has now been found to vary with the phases of the moon, it was disclosed by Dr. Harlan True Stetson of Cambridge, Mass., director of the laboratory for cosmic terrestrial research, Massachusetts Institute of Technology.

Citing the results obtained from data after more than 20,000 hours of observation over two periods of four years each, Dr. Stetson said:

"From the study of our data, made on those nights when the moon was overhead, we found radio reception definitely improved from the time of the moon's first quarter to shortly before full moon. After full moon, radio reception deteriorated, but began to improve again from about the last quarter until a few days before new moon. This, of course, is true for a certain particular frequency over a certain path we were measuring."

However, in observations made when "the moon was below the horizon" — observations made in the dark of the moon, "we found no such effect, where no radiation from the moon's surface could reach the radio waves over the path we were studying," Dr. Stetson pointed out. The same thing happened in both series of data, except that the lunar effect was more pronounced during the second four years of our data than during the first four years, he declared.

Lice and Mites Cause Poultry Production Drop

Two noted thieves are robbing farmers of their opportunity for poultry profits, one of these thieves being a louse and the other is a mite. They cause a decline in egg production and lower the vigor and vitality of pullets. Body lice and tropical mites remain on the bird's body while the red mites stay in the poultry house and are usually on or around the perch poles.

Poultry specialists recommend that birds be dusted with sodium fluoride to eradicate body lice or that birds be dipped in slightly warm water to which has been added one ounce of sodium fluoride to each gallon of water used. Perch poles should be treated with nicotine sulphate and the treatment repeated in 7 to 10 days.

Since red mites suck blood from the birds, it is necessary to use a material that will kill by contact. The recommended practice is to treat perch poles and supports with used motor oil to which has been added one-third or more kerosene. The house should be thoroughly cleaned and all litter and nesting material should be burned prior to the treatment.

Fine Fix

To most people who ride through the Holland traffic tunnel under the Hudson river between New York City and Jersey City, the experience is thrilling. But having a flat tire or break-down in the tunnel is an experience which every driver hopes to avoid. Breakdowns and flats, however, occur daily. The moment a car stops in one of the twin tubes, guards flash word by telephone and instantly a wrecker is on the way. If the trouble can't be corrected on the spot, the offending car is yanked out in a matter of three or four minutes. Only by quick action can costly, delaying traffic snarls be avoided.

Bless Fleet

In a colorful ceremony which originated centuries ago in Brittany, the shrimp fishery, largest seafood industry of the south observes the traditional blessing of the fleet in Berwick Bay, La., at the start of the season. In addition to the Berwick Bay fleet, fishing boats from the surrounding sections come in some numbers to receive the blessings of the clergy as the new shrimp season gets well under way. The blessing of the fishing boats probably dates back to the ancient Breton custom of asking the benediction of the church on any vessel about to make its maiden voyage. Later, many Bretons emigrated to Canada and then to Louisiana, bringing the tradition with them. This year's ceremony in Berwick Bay is the ninth annual celebration of the blessing of the shrimp fleet.

Experts Guide Amateurs In Cleaning of Furnace

Solid Fuels administration conservation experts say these pointers will help guide the amateur in the furnace cleaning job.

1. Clean the inside surfaces. Open the "clean-out door," usually located above the fire door. With a long-handled wire flue brush, rub all inside surfaces to scrape off accumulated soot. If a flue brush isn't obtainable at the local hardware store, a scraping tool (putty knife or paint scraper, for example) attached firmly to a long handle may be used. 2. Detach the smoke-pipe and clean. (The smoke-pipe is the one going from the furnace to the chimney.) On some heating units, the smoke-pipe is only a foot long and can be reached for cleaning through the clean-out door. 3. Clean out soot in the bottom of the chimney through chimney clean-out door—the cast iron door in the cellar wall on the chimney side.

4. Clean grates with brisk brushing. Examine them closely to see that they turn freely, are not cracked or sagging. 5. Examine the whole unit for air leaks, most often found around the smoke box, smoke-pipe joints, the base of the heater, the doors, and around chimney connections. Cover all joints, fill up all noticeable cracks with asbestos furnace cement. (This applies like putty and can be purchased at hardware stores.) 6. Paint all metal surfaces of the unit with any good black paint to prevent rust.

Buccaneers Had Own Code of Compensation

For 150 years the buccaneers of the Caribbean harried the Spaniards on land and sea, gradually whittling Spanish military strength down to the point where it could no longer interpose an insurmountable barrier to the stirrings of the colonies for independence.

The growth of the buccaneer navy and the enthusiasm with which the buccaneers closed in on their enemy was due in no small part to the "workman's compensation" which was included in their reward. Each buccaneer ship had its own articles of employment, subscribed to by every member of the crew before beginning a voyage. The articles fixed the share of spoils to be received by each officer and man, and made due allowance for additional compensation to the injured.

Thus, loss of a good right arm, or sword arm, entitled its loser to a compensation of six slaves and 600 pieces of eight, about $582 in present-day currency. Loss of a left arm or right leg netted the loser five slaves and 500 pieces of eight, or about $485; loss of a left leg was valued at four slaves and 400 pieces of eight, or approximately $388, and loss of a finger or eye netted their former owner one slave and 100 pieces of eight, or $97.

Fluorescent Lighting

Although the principle of fluorescent lighting was discovered in 1852 by the English scientist Sir George Stokes, lights utilizing the principle were not developed until recent years, points out the Better Vision institute. Stokes discovered that when light with short wave-lengths is transformed into other light rays, invariably the re-emitted light is of longer wave-lengths. By means of felspar and uranium glass, Stokes transformed short invisible light rays into longer visible rays.

Fire Prevention

A first and "must" step to prevent fires at home is the cleaning of chimneys, flues, fireplaces, and pipes to guard against a disaster when the first warming fires are lighted in the fall. In addition, all electric and gas equipment should be inspected thoroughly and the necessary repairs made, or use of the article discontinued. Every year there has been loss of life and property because of faulty wiring, poor gas connections and worn electric cords.

When kerosene lamps are used, their location should be checked carefully. If a lamp must be placed near the wall an asbestos or metal plate should be used to protect the wall. Lamps should be kept away from curtains and draperies, and only those with broad bases should be used.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

THE CHRISTIAN MOTIVE FOR LIVING

International Temperance Sunday

LESSON TEXT—Psalm 4.5-8; Luke 4:4; John 6.35; Romans 12:1, 2; 13:12-14.

GOLDEN TEXT—Seek those things which are above.—Colossians 3 1.

Disciplined living should be the goal of each of us. Life is not to be lived carelessly, influenced by chance events or passing impulses. Such discipline of life would keep men from the temptations which lead them into intemperance and sin.

A life can be properly disciplined, only as it is controlled by Christian motives. Such a life has—

I. Spiritual Gladness (Ps. 4:5-8). The psalmist faced the distressing questioning of men who derided him for his faith. They were unbelievers who demanded of him what good his religion did (v. 6). He has an answer, and it is the testimony of his own experience.

Those around him sought gladness in the harvest of grain and in the wine which was supposed to give a lift to their spirits. This was their joy. Well, the man of God had something infinitely superior. He had gladness in his heart. It was not dependent on outward circumstances—it was within.

Then note, too, that it did not rest on something that happened, or on some fellow man. "Thou (God) hast put gladness in my heart." That means real joy and satisfaction.

II. Spiritual Food (Luke 4:4; John 6:35).

It is delightful to have true gladness, but man needs food if he is to grow and to work. That is true spiritually, for he must have the needed nourishment of life here also.

Jesus when tempted (Luke 4:4) because He was hungry saw beyond the temporal need, and declared that life should be controlled by a higher principle. The spiritual has a place of supremacy over the physical in the life of the Christian man or woman. The body with its desires is to be subject to the definite control of the spirit, which takes its orders from God.

The explanation of the awful alcoholic debauchery of our day is found right here. Men have given their bodies the supreme authority and they are driven by the lusts of their flesh. What they need more than legal reform or restriction of sale of liquor (and we believe in both) is the regeneration of their souls by the grace of God in Christ Jesus. Let us bring them the gospel.

John 6:35 makes known the fact that Jesus, the bread of life, satisfies every need of men. Every normal hunger and thirst finds full satisfaction in Him. Have you tried Him as the One to meet the need of your hungry heart?

III. Spiritual Service (Rom. 12:1, 2).

"Reasonable service," says the Authorized Version; "spiritual service," says the Revised Version. Both are right. The man who is really reasonable will be spiritual and will render to God a sacrificial service.

Note that it is a "living sacrifice" that is said to be "holy, acceptable to God." This is not a case of a single act of deep devotion (great as that may be), but a going on in the daily walk to live for Christ. That calls for grace and power, and He is ready and willing to give both to each of His children.

That experience with God means a non-conformity to the world, which is too little spoken of and less practiced in the church today. The one who professes to follow Christ is simply not to be conformed to the ways of this wicked world. There is to be a completely transforming experience of the grace of God, that takes you out of this world while you are still in it.

IV. Spiritual Walk (Rom. 13:12-14).

Christians are the children of the morning. They walk in the light (I John 1:7). This world walks in darkness. No one needs any argument to prove that point—just look about you.

The deeds of darkness are evil deeds, and men dwell in darkness because they love evil (John 3:19). That means that the children of light must walk circumspectly and "becomingly" (that's a good word!) in this world. Thus we may attract others out of the darkness into the light, so that they too may put aside "reveling and drunkenness," yes, and also "strife and jealousy." Those go together.

The way to victory is to be clothed with the Lord Jesus and His righteousness (v. 14). That is a real "armor of light" with which we may be protected.

Note also that we are studiously to avoid making any provision for the desires of the flesh. Put such things away, and with them will go the temptation to use them. Some professing Christians need to heed this word by destroying some beverages which they may have on hand—just to give one example.

SEWING CIRCLE PATTERNS

Young, Smart Princess Frock Slip, Panty Set Designed to Fit

It Has Everything

A PRINCESS frock has everything it takes to make you look your prettiest! An exceptionally smart and practical version is shown here—one that will be good for school, office, or good times afterward! Fabrics of warm colors and good weight will produce just the effect you want.

• • •

Pattern No. 8674 comes in sizes 11, 12, 13, 14, 16 and 18. Size 12, three-quarter sleeves, requires 2⅞ yards of 39-inch material. For trimming, 3½ yards of braid.

For this pattern, send 25 cents, in coins, your name, address, size desired, and the pattern number.

Well-Fitting Underwear

YOUR new fall suit deserves well-made underwear. Make up this slip and panty set—its nicely tucked waist assures a good figure line under your costume. It may be left plain or trimmed with lace. We're sure you'll want more than one set!

Pattern No. 8560 comes in sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38, slip with built-up shoulder and pantie requires 4⅛ yards of 39-inch material.

For this pattern, send 25 cents in coins, your name, address, size desired, and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

SEWING CIRCLE PATTERN DEPT.

ASK ME ANOTHER?

A General Quiz

The Questions

1. What is a milliard?
2. What is a lee tide?
3. What lake in the United States has no inlet or outlet?
4. What was Tokyo formerly called?
5. Is cement the same as concrete?
6. In South Africa what is a kraal?

The Answers

1. A thousand million.
2. One running in the same direction as the wind blows.
3. Crater Lake, Oregon.
4. Yeddo (up to 1869).
5. No. Cement is but one of the ingredients of concrete.
6. A village of natives.

In COLD WEATHER ARE YOU TROUBLED BY?

1. HEAD COLD STUFFINESS ☐
2. CHAPPED SKIN ☐
3. CLOGGED UP NOSTRILS ☐
4. CHEST COLD TIGHTNESS ☐
5. SPLIT, CRACKED LIPS ☐
6. NASAL IRRITATION ☐
7. SORE, ACHING MUSCLES ☐
8. WINDBURN ☐
9. NEURALGIC HEADACHE ☐
10. DRY NOSTRILS ☐

Mentholatum relieves not just one, but all ten of these discomforts. That's why so many thousands keep soothing Mentholatum always on hand. Get Mentholatum today. Jars, tubes 30¢.

Klemme Ladies Entertained At A One O'Clock Luncheon

Mrs A J Kudje and Mrs H. D Ramsay entertained a group of ladies at a one o'clock luncheon at the Ramsay home Friday afternoon

Following the luncheon contract bridge was played at three tables. Mrs. Ed Jacobs won high score; Mrs Keith Albertson, second high and Mrs Ed Buntenbach, third.

Mrs Verle Keraus of Garner was an out-of-town guest.

Klemme Girl In College Chorus

Miss Eunice Larsen, daughter of Mr. and Mrs. C A. Larsen of Klemme, was successful in trying out for the "Messiah Chorus" at the University of Iowa, and will sing sophrano in that organization.

Miss Larsen, who graduated from Klemme high school last spring, is a freshman at the University. She was active in music while attending high school and sang with the Methodist choir.

Mr. and Mrs. Dan Webner entertained at dinner Sunday in honor of Cpl. Willard Palmer and family and Pfc. Herbert Webner and family. Others present were Mr. and Mrs. Donald Webner and Earl of Corwith; Mike Kinsella and family of Ventura; Kenneth Schlawin and family; Miss Hilda Peterson of Ventura; Miss Etta Lou Webner, and Ted Webner.

Attended Democratic Dinner

Ed. J. Thompson, Klemme, who is Chairman of the Democratic Central Committee in Hancock county, and C. E. Proctor of Garner, attended a Democratic meeting at Algona last Wednesday and the dinner for Vice President Henry Wallace, Senator Gillette, and Judge Mitchell.

By WILLIAM MURDOCH

McClure Syndicate—WNU Features.

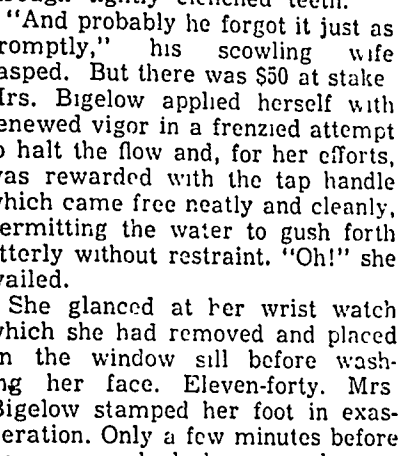
AT THE office, Henry Bigelow blinked as a sudden thought jolted his attention from his ledger Laying aside his pen he fumbled around in his coat pocket, his thin face flooded with unhappiness. "It slipped my mind completely . . ."

And at home Mrs Henry Bigelow vainly tugged at the handle of the gushing cold water faucet in the bathroom wash bowl. If that wasn't just like Henry! "I told him all along that some day this tap would stick for good!" she muttered through tightly clenched teeth.

"And probably he forgot it just as promptly," his scowling wife gasped. But there was $50 at stake Mrs. Bigelow applied herself with renewed vigor in a frenzied attempt to halt the flow and, for her efforts, was rewarded with the tap handle which came free neatly and cleanly, permitting the water to gush forth utterly without restraint. "Oh!" she wailed.

She glanced at her wrist watch which she had removed and placed on the window sill before washing her face. Eleven-forty. Mrs Bigelow stamped her foot in exasperation. Only a few minutes before her name had been read over the radio by the Fifty-Dollar-Man. Unless she called in person at the radio station at or before twelve-thirty sharp she would forfeit the fifty dollars which was awarded on the first day of every month to the lucky listener whose name was announced. But what about this water which threatened to overflow the stopped-up bowl at any minute?

Happily, forgetful Mr. Bigelow had neglected to remove from the bathroom the pan in which he had heated his shaving water that morning. Mrs Bigelow snatched it up and started bailing, transferring



He wondered what his wife was doing right about now.

water from the brimming bowl to the tub. Then it suddenly dawned on her. "Why, I'll have to keep this up until Henry comes home tonight and turns off the valve in the basement!" she exclaimed in a shocked voice. She couldn't leave even long enough to call for help, because the whole place would be flooded if she did. Mrs. Bigelow dashed a panful of water into the tub.

"Then I can't possibly get down to the radio station in time to collect the money!" she stormed at her outraged reflection in the medicine chest mirror. She bailed again and glared at her watch. Eleven-fifty Five minutes to finish dressing, and fifteen more to get to the radio station. Add fifteen minutes for the return trip . . . in that time the entire second floor and half the first might be washed away!

It was agonizing. Her feverish ladling gained a good three inches of clear porcelain bowl over the swirling water and she rushed out of the room. If she could only reach the basement in time! But she couldn't. For at the landing she was stopped by the sound of splashing water. Frantically she skipped up the stairs and resumed her task. Eleven fifty-nine. Her arms worked no more furiously than her mind. Someone would pay for this, and his initials were H. B.! If she could see him now, just for a minute. . . .

She would have seen him wince. For Henry, at the office, took an envelope from his pocket and grimaced when he saw the memorandum on the back. He had forgotten that, too. But this other remissness —He gave a sigh, which was closer to a groan, and pulled out the letter. It bore a week-old date.

"Dear Mr. Bigelow:" it read, "According to our records, your bill has not been paid in seven months and you have disregarded our previous notices of delinquency. While this is undoubtedly an oversight on your part, we must serve final notice that unless your account is brought up to date, water service to your home will be discontinued promptly at twelve o'clock noon on the first day of next month." It was signed, "Municipal Water Bureau."

Henry slowly raised his eyes and sneaked a troubled glance at the calendar on the office wall. The first. Then at the clock. Precisely twelve-thirty. He closed his mournful eyes and rested his aching head in his hands. The water had been shut off at his home for the last half-hour. He wondered what his wife was doing right about now.

Magic Words

~

By J. J. O'DONNELL

McClure Syndicate—WNU Features.

THE Coast Guard officer shook his head "The British are careful whom they hire."

Mark swung the launch to avoid the big ferryboat. "I get to know the crews better than the officials."

"Maybe I need training as a ship chandler," the officer grinned. "You're sure this cook is a spy?"

"No sir. I only told the commandant I was suspicious."

"And you also said the man knows it."

"Can't prove it, but those accidents came too fast"

The officer said: "Once a week some housewife in Norfolk reports a spy We're used to it."

Mark's nostrils flared. "So I'm crazy! But being gassed is no joke. When I jumped off that chain I went looking for the cook—all the way down to the hold. When I opened the bulkhead door I smelled gas. You know—they get rid of the rats that way. All of a sudden the door started to slam, and I had to hit it with my shoulder quick—or be locked in."

"That would have been curtains for you"

"Right—and my lad was on the other side of that door."

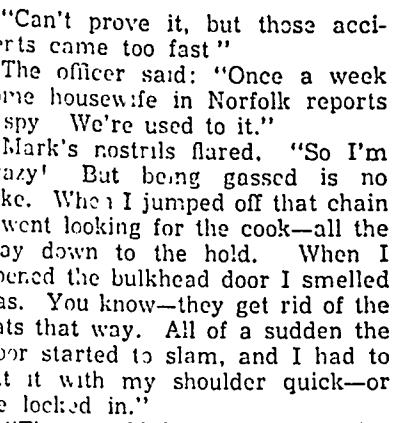
"What did he say?"

"Got kinda red and stammered something about the door should be closed."

"Listen, son, you haven't much to go on I'm doing this because I'm on assignment. Has he filled his order yet?"

"The captain has to O.K. it. I'm to pick it up today."

"All right. While you talk to him I'll ask the captain to help me search his cabin—and I hope you're right."



"You can see these flags from here."

The stocky, kindly captain shook his head. "Nothing there, boy," he said.

Mark's eyes were pleading. "But I know there's something wrong. Did you look well?"

"So well we didn't pass up so much as a tobacco crumb."

Earnestly Mark said: "Captain, do you know the skipper of that British tanker yonder?"

"Indeed. He served under me as first mate."

"Please, sir, we've got to make this man give himself away. A friend of mine in that crew has been all over the world. He'll be able to wigwag a message. If I'm wrong the signal won't mean anything."

"Mystery, eh? Come along then, we'll have a try."

When they returned to the freighter, Mark turned anxiously to the captain. "Is your mate still checking that list of provisions with the cook?"

"I fancy he's finished now."

"Good, that means he hasn't seen the Coast Guard officer. Will you please keep out of sight, sir?" He swung on his heel and hurried to the mate's cabin and met the cook at the door. He tried to appear casual, though the words began to trip over his tongue. "Oh, hello—say, while I was waiting, I saw somebody on that tanker wigwagging."

The cook sneered. "Kid games, eh?" He stalked up to the deck—then he froze. "Who is that man in uniform?"

Mark dropped his voice. "That's a Coast Guard officer. Said he had to see the captain right away."

The suspect slipped behind a ventilator. "Know what he wants?"

As if he hadn't heard, Mark said: "You can see those flags from here. Can you tell what they say?"

The man's black brows came together as he looked. Mark watched his body stiffen and his eyes shrink to pin points. He whirled to run and Mark sensed his purpose. He yelled breathlessly: "Captain—quick, grab him." But the wary skipper and two crewmen had him before he reached the companionway. Mark ran up excitedly. "Captain—his shoe. The sole's loose."

It took only a second to extract the telltale identification card. As they dragged the culprit away the Coast Guard officer turned to Mark. "Son, how did you trap him?"

Mark grinned expansively. "Just had my friend say, 'Officer coming to arrest you. Destroy your papers.'"

"But surely he didn't fall for that —anybody could read it."

The captain's eyes twinkled. "Not the way this lad did it. Seems his friend is something of a linguist. **He said it in German."**

PROCEEDINGS OF COUNTY SUPERVISORS

FOURTH ADJOURNED SEPTEMBER MEETING

Garner, Iowa, October 3, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, John Chambers and Penn Eckels, present

The minutes of the last meeting were read and approved as read

In the matter of the petition for the cleanout of the main open ditch of D. D. No. 3 & 4 petitioned for by E. L. Bonar et al, Wm. Henschen is hereby appointed as engineer to make an investigation and report on the necessity and feasibility of said cleanout.

WHEREAS, there is now in the hands of the treasurer the sum of $1,5[illegible], credited to the Bang's Disease Eradication fund, and

WHEREAS, there is now in the hands of the treasurer the sum of $6,111.13, credited to the T. B. Eradication fund, and

WHEREAS, it is desired to transfer $1,000.00 from the T. B. Eradication fund, for the following reasons

1942 A transfer of $1,000.00 from the Bang's Disease Fund to the T. B. Eradication Fund and

WHEREAS, said transfer is to be permanent in accordance with section [illegible], code of 1939, and

WHEREAS there is sufficient money in the T. B. Eradication Fund to meet all demands thereon, and

WHEREAS, all laws relating to municipalities have been complied with

NOW THEREFORE, be it resolved by the Board of Supervisors of Hancock County, Iowa, subject to the approval of the State Comptroller, that said sum of $1,000.00, be and the same is hereby transferred from the T. B. Eradication fund to the Bang's Disease fund and the County Auditor (Secretarial officer) is directed to correct his books accordingly and to notify the treasurer of this action, accompanying the notification with a copy of this resolution and the record of its adoption The vote thereon was as follows

AYES: F. J. Schoun NAYS None.
Penn Eckels
J. V. Chambers
F. J. Schoun (Presiding Officer) Fred C. Missal (Secretarial Officer) Co. Auditor.

On motion and second the contract of Carl H. Peterson & Co. for the cleanout of D. D. No. 9 and lateral No. 6 of D. D. No. 9 is approved.

On motion and second the quarterly reports of Elmer Raw, County Clerk, Fern Peck Katter, County Recorder, and Fred C. Missal, County Auditor, are approved

Supervisor F. J. Schoun is hereby appointed a committee to investigate and cause repairs to be made in D. D. No. 1 & 2, lateral No. 12 and D. D. No. 7 Main.

On motion and second F. J. Schoun, Chairman, and Fred C. Missal, County Auditor, are hereby authorized to execute a contract Sale of Town Property on behalf of Hancock County, Iowa conveying lots 1 and 2, in block 1, Maple Hill Addition to the town of Britt, Iowa to Irwin W. Peckett of Britt, Iowa. Said contract to be for the sum of $960.00 payable at the rate of $20.00 per month Sec. per with interest at the rate of 4% on the unpaid balance payable annually and total purchase price and interest is satisfied in full at which time a deed executed in full by Hancock County, Iowa, shall be delivered to the purchaser

WHEREAS there are outstanding warrants on D. D. No. 11, lower main, upper main and lateral No. 1, thereof, which were issued in payment of a recent cleanout.

WHEREAS, hearing on said cleanout petitioned for by J. H. Corzine et al was held as directed by law and it is deemed for the best interests of the owners of said district that a levy be made of [illegible]

IT IS THEREFORE BE SO ORDERED by the Hancock County Iowa Board of Supervisors acting for and in behalf of D. D. No. 9 and laterals thereof that a levy of $5,000.00 be made on the property from a levy of $800.00 be [illegible] per rod and $2700.00 be [illegible] for D. D. No. 9, [illegible] Court Levy

[illegible] to be extended against all [illegible] highways and roads in the district in accordance with the [illegible] location of said district and when so extended to be collected with the regular tax of 1944, payable in 1945 as provided for by law.

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption, seconded by Supervisor Penn Eckels, whereupon the Chairman F. J. Schoun placed the motion for adoption and upon roll call, the vote thereon is F. J. Schoun, Penn Eckels, and John Chambers aye. Nays none.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

THE PRIVATE PAPERS OF PRIVATE PURKEY

Dear Harriet:

Well, I just seen that list of magazines what has been approved by the army for GIs and I feel better now knowing what it is okay for me to be pretending I am reading. The list is twenty to one comics and this is the first time I ever knew there was so many published. Movie magazines is a bad second and I am glad to find National Geographic and House and Garden on the list on account of I do not want to laugh all the time.

—*—

Right between something called Blue Beetle and Big Shot Comics what do you think I find? Better Homes and Gardens! If that ain't a running broad jump in any library at home or at the front what have you? I think at first maybe Better Homes and Gardens has got in a funny supplement but it ain't.

—*—

Sandwitched in between a magazine called Gags which the army thinks we should read and Human Torch which Washington has a idea GIs can see without being done no harm is Good Housekeeping, which looks funny in that location. Well, I would like to see a GI concentrating on Good Housekeeping over here and get caught by his top sergeant.

—*—

Right in between Click, Captain Midnight and Dare Devil comics is Country Gentleman and I never seen no magazine looking so uncomfortable. Harper's is listed surrounded by Flash Comics, Funny Animals and Laff. The Saturday Evening Post is sandwitched in between Radio Hit Songs and the Scientific American which I started once but did not finish on account of there is not much sex interest.

—*—

You could knock me over with a V-mail postscript when I find Outdoor Life on the list. That is a fine magazine but if there is one thing a soldier does not need to look up it is the facts about living outdoors. Physical Culture is there, too, I guess in case I do not know what to do for exercise.

—*—

I see Field and Stream surrounded by Downbeat, Flash Comics and Famous Funnies but I forgot to bring my fishing rod to the war and I don't get much time off to dig bait. Fortune is listed in between Front Page Detective and Funny Animals.

—*—

But what mixes me up is that I find Ladies Home Journal and the Woman's Home Companion on the list sent to me. Maybe it is just a gag. I have been shifted around a lot in this war but I have not been made a WAC yet.

—*—

Well, I hope you are fine and you ain't no sorrier than me that the bomb missed Hitler.

All my love,
Oscar

P. S. — Send me copies of Wow Comics, Colliers, the American Medical Journal, Ten Story Western, Nifty and Harper's Bazaar I want a all around library.

Wake Up!

Mother — Billy! Billy, get up. Didn't you hear me call before?

Billy—No, not until you called the third time!

You Guessed It!

Maisie—Are you going to the dance tomorrow night?

Daisie—No, I have to go out of town for the week-end.

Maisie—I wasn't invited either!

Latest Step

Him—Can you dance [illegible]?

Her—What do you [illegible]?

Mrs. Ed. Buntenbach Entertained At Bridge Party Monday Eve

Mrs. Ed. Buntenbach entertained a group of ladies at two tables of bridge at her home Monday evening. Mrs. Orville Bridges won the high score and Mrs. P. M. Wilson held second highest score.

ATTEND SPECIAL V-DAY SERVICE

You are invited to join the members of the churches of Klemme in a special service of praise and thanksgiving on the day that Peace is declared.

The day that victory comes there will be services in both our churches at 8:00 p. m.

We have earnestly prayed for victory and peace. Let us show our gratitude for answered prayers.

If the news of victory comes before 6:00 p. m. the services will be held the same evening. If after 6:00 p. m., the services will be held on the following evening.

Attend Church on V-Day.

Rev. Calvin Grosshuesch.
Rev. H. E. Harvey.

HEAVY FINE

PENALTIES HEAVY FOR KILLING NON-GAME BIRDS IN IOWA

State Conservation Officer Displays Pelican Shot In Northwest Iowa By Irresponsible Hunters

With the peak number of hunters expected in the field during the next three weeks, the State Conservation Commission is again stressing the fact that practically all birds. except game birds, are protected the year around by state and federal laws Although practically all of the large and spectacular birds native to the state have increased tremendously in the past few years, there has been a noticeable increase in wanton destruction of them. The protected non-game birds, for the most part, are valuable for their beneficial food habits. The others are protected because of their esthetic value. There are now pending in federal courts in Iowa cases involving the illegal shooting of swans and bald eagles, the latter protected by a special Act of Congress known as the Bald Eagle Act. Penalties for indiscriminate destruction of non-game birds are heavy The only non-game birds which are unprotected by Iowa statute are the starling, English sparrow, blackbird, crow, sharp-shinned hawk, Cooper's hawk, and great horned owl.

Saturday evening Mr. and Mrs Verner Stromer entertained as their guests at a 7:00 o'clock dinner, Mr and Mrs Herman Stromer; Mr and Mrs. George Heald and daughter Joice of Rolfe; Mr. and Mrs Menard Johnson of Blooming Prairie, Minn.; and Mrs. Fred Williams of Watertown, Minn. The evening was spent in visiting and showing of home movies. Mr. and Mrs Johnson were also over-night guests at the Stromer home.

PVT. SCHWICHTENBERG IS B-24 AERIAL ENGINEER

Keesler Field, Biloxi, Miss. Oct. 30.—Pvt. John W Schwichtenberg, son of Mr. and Mrs. David Schwichtenberg, Klemme, Iowa, today completed the first leg of a training program that will qualify him for dual duties as a member of a combat air crew.

He was graduated from the Army Air Forces Training Command's B-24 Liberator bomber mechanics school at Keesler Field With 17 weeks of aircraft maintenance and emergency operations training behind him, he will complete his Air Forces schooling at another station.

During the last seven days of his course, he logged several hours in a B-24 Liberator bomber in the practice performance of the duties of an aerial engineer He previously had been skilled in the fundamentals of the Liberator's fuel, electrical, engine, hydraulic and propeller systems.

Pvt. Schwichtenberg is a graduate of the Klemme High School.

USING LIGHTS NOW WILL HELP FILL EGG BUCKET

Shorter days from October to January cause egg production to go into a seasonal slump on many farms.

This drop can be reduced by artificial lighting in the poultry house, says W. R. Whitfield, extension poultry specialist at Iowa State College. Artificial lighting stimulates the birds' egg organs to continue laying during this short-day period.

Whitfield indicates that pullets which have already dropped off in production and gone into a molt will start back into production when artificial light is used properly.

The most popular type of artificial lighting in the poultry house is the bright morning light, using a 50 or 60-watt bulb. The bulb should be fastened about 6 feet above the feeding floor, and a wide-angle reflector should be used to throw the light downward.

A 13-hour day. including the period of natural daylight, will give the birds about as much stimulation as light can produce, Whitfield asserts. The light should be turned on early enough in the morning to produce the desired length of day The time of turning on the light will vary with the length of day.

The poultryman who would avoid getting up to an alarm clock at unearthly hours to turn on the morning lights, or who is unable to rig up a switch mechanism at the house to turn the lights on at the proper time, can use an all-night light. For all-night lights use a 15 to 20-watt bulb with reflector.

KLEMME FARMER HAS RIPE STRAWBERRIES IN NOVEMBER

The Osborne Brothers on their farm east and north of Klemme go in for some real high powered strawberries, and to back his claim Fred Osborne brought to the Times office Friday afternoon a quart of nice, juicy strawberries he had just picked from his patch. The berries were all large and two berries were nearly 2 inches across!

Last spring Fred set out a patch of Everbearing Gems and they have been bearing steadily for the past three months. If this good weather keeps up, Osborn brothers will have fresh berries for both Thanksgiving and Christmas.

MRS. EDNA THADA ENTERTAINED BRIDGE CLUB

Mrs. Edna Thada was hostess to the U-Delt-Em Bridge Club at her home Thursday afternoon.

High score was won by Mrs. A. J. Kudje; second high, Mrs. Fred J. Arnold, and third high, Mrs. P. M. Wilson.

Beginning to Look Like a Gentleman

May Obtain Permit To Store Pheasants Until June 30

GAME STORAGE PERMITS ARE FREE

Each year a large number of prosecutions are made for illegal storage of wild game. Often at the hearings the plea is made that "I didn't know there was a time limit on possession of game that was legally taken"

The game possession law is one of the earliest game laws and has been enforced throughout the United States for a long time In recent years the establishment of cold storage lockers in almost every community has made the strict enforcement of this law more necessary than ever before With a shortage of domestic meat and the extended game season, plus a heavy game population, the need for understanding how game may be legally stored is more important than ever In cooperation with the Cold Storage Locker Association, the State Conservation Commission is making every effort to assist the hunters in the legal storage of their game, and at the same time every effort is being made to prevent illegal storage.

Under the statutes all game must be disposed of within 10 days after the close of the season; however, by permission of the Conservation Commission, game, except waterfowl, may be held until June 30 the following year. Permits may be issued to hold migratory waterfowl 45 days beyond the close of the season.

To store game beyond 10 days after the season's close, simply ask the locker operator for an application blank, fill it out, and mail it to the State Conservation Commission, 10th and Mulberry, Des Moines 8, Iowa. All locker plants have been supplied with permit applications. They cannot, however, grant the permit. It is issued directly from the State Conservation Commission office with no charge.

Game held in lockers may at no time exceed the legal possession limit, and permits will be granted for each license under which game was taken. a

November 6 Legal meeting date of Hancock County Agricultural Society at Farm Bureau Office at 8 p m

November 6. Fair Association Board and Boards of Commercial clubs of Hancock County at Farm Bureau Office at 8:00 p. m.

November 6. County Women's Committee of the Farm Bureau at Garner, 2 00 p. m.

November 7. 3:30 to 4:00 p. m. over WOI (640 on your radio dial) Discussion of the Standard Township plan and how one township won a superior rating.

November 8. F. F. A. Boar Sale at Kanawha Sale Barn at 1 p. m.

November 8. 10:30 to 4:00 p. m. Concord Sewing Machine Clinic at Garner Red Cross room.

November 9. Ell Township Farm Bureau meeting.

November 10. 10:30 to 4:00 p. m. Magor Sewing Machine Clinic at Mrs. Forrest Bennett.

November 11. Ellington - Concord 4-H Chums at Janet Wetterlings.

THANK YOU!

I wish to take this opportunity of thanking neighbors and friends for sending me cards, letters, flowers, and gifts while I was in the hospital.

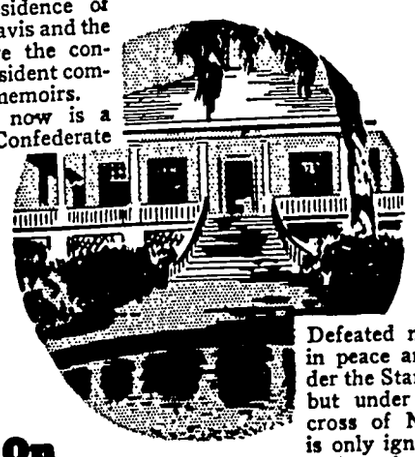
(1tp) —Mrs. John Velau.

BONDS OVER AMERICA ★ ★ ★

Confederate Home

Near Biloxi, on the Gulf of Mexico, stands the last residence of Jefferson Davis and the house where the confederate president completed his memoirs.

Beauvoir now is a home for Confederate veterans.



Defeated men may live in peace and honor under the Stars and Stripes, but under the crooked cross of Naziism there is only ignominy, persecution, death for those who will not bend the knee.

Keep On Backing the Attack With War Bonds

Body Of Farmer Found In Cornfield Saturday P. M.

When you enter the voting booth on November 7, no one will know—or can ever know—how you marked your ballot. Whether you are registered as a Republican or a Democrat, whether you are registered as an Independent voter or as a member of any other party, you may vote as you choose without fear.

Remember this on Election Day. The secrecy of the American ballot is an inviolable right and guarantees our system of free elections.

KEEP AMERICA FREE—VOTE AS YOU BELIEVE ON NOVEMBER 7.

KLEMME BOY HAS FOUR SETS OF GRAND PARENTS

Egon Weaver, son of Mr. and Mrs. Emery Weaver, was seven years old last Thursday, October 9, but that was not so important.

Egon has greater things to talk about, and can boast that he has four full sets of grand parents!

It's this way: on his mother's side is her parents, Mr. and Mrs. Roy Schaefer and his parents, Mr. and Mrs. Edw. Schafer, and Mrs Roy Schaefer's parents, Mr. and Mrs. Fred Gates of Clear Lake. That adds up to one set of grand parents and two sets of great grand parents.

Then on Egon's father's side are Mr. Weaver's parents, Mr. and Mrs. Louis Weaver, of Garner, Egon's other grand parents.

Egon would like to know if anyone can beat that record, as there are not many children who have 8 living grandparents, all four full sets.

W. S. C. S. MEETS THIS WEEK THURSDAY AT CHURCH

The W. S. C. S. of the Klemme Methodist Church will meet Thursday afternoon, November 2 at the church.

Mrs. C. A. Larsen is the Leader and the hostesses are Mrs. D. P. Anderson, Mrs. Lester Stille and Mrs H. E. Harvey.

Those who will work on the quilt are asked to come early.

Auxiliary Will Meet Nov. 6th

The Klemme American Legion Auxiliary will meet on Monday evening, November 6th, instead of the regular night, Tuesday, which is on election day.

Dr. and Mrs. D. P. Anderson and Mr. and Mrs. Benn Coobs are on the serving committee.

COUNTY OVER THE TOP IN WAR CHEST DRIVE

All reports are not yet in but Hancock County went well over the top in the recent War Chest drive. The quota was $11,428 and to date, with some towns and townships not giving a full report, the sum of $12,841.67 is the total.

All towns and townships met or exceeded their quota in the recent drive.

Will Meet

The United Service Women's Unit will meet Wednesday afternoon, November 8th in the room back of the post office.

MRS. JORGENSON HOSTESS AT BRIDGE PARTY

Mrs. R. A. Jorgenson was hostess at a desert luncheon and bridge at her home Friday afternoon to a group of ladies at four tables.

High score in contract bridge was won by Mrs. Fred J. Arnold; second high by Mrs. Martin Barz, and third high by Mrs. Art Kudje.

No "Bee Hive"

First hotel building in Madrid has been torn down. The building known as "The Bee Hive" was built in 1856 as a hotel when a stage line was operated in Madrid on a route from Des Moines to Ft. Dodge.

JOHN GRIFFEN WAS VICTIM OF STROKE NEAR HOME

Funeral Services Held Tuesday At Garner Methodist Church

The body of John A. Griffen, 63, was found by his son on his farm north of Klemme Saturday afternoon. Death was due to a heart attack.

Mr. Griffen had repaired his corn picker earlier in the day and had gone to the field to get his tools. When he did not return to the house in a reasonable length of time his son went to look for him and found the body.

Mr. Griffen was born near Garner June 12, 1881, son of Edward and Mary Griffen. He lived in this community all his life.

Surviving are the following children: Fred, Alden, Iowa; Mrs. John Schroeder, Garner, Iowa; Leon and Betty Lou at home. His wife died in 1938.

Also surviving are two brothers, Albert Lang and Louis Griffen, of Klemme; and 3 sisters, Mrs. Alva Chase, Mason City; Mrs. Ralph Upmeyer, Garner and Mrs. Ben F. Greiman, Klemme.

Funeral services were held Tuesday afternoon at 2:00 o'clock at the Garner Methodist Church, the Rev. E. F. Broberg, pastor, officiating, being assisted by the Rev. V. V. Schuldt of Morningside College.

Burial was in Concord Cemetery southeast of Garner.

KLEMME RED CROSS MAKING ONE HUNDRED KITS

The Klemme Red Cross ladies Tuesday were busy working on making one hundred kits for service men. In addition they also have sixteen more heavy bathrobes to make and are anxious to have more women come and help sew each Tuesday afternoon at the school house.

The ladies were entertained by Mrs. Voetberg's grade room who entertained by reciting a poem, "The Goblins Will Get You," which the ladies greatly enjoyed.

Mrs. Sumner Trumbell treated the ladies to a nice lunch.

METHODIST BAZAAR AND CHICKEN SUPPER, NOV. 16

The Klemme Methodist Church ladies will hold their annula Bazaar and Chicken Supper on Thursday, November 16th. Supper will be served adults for 60c and children 35c. The ladies will have on sale aprons, fancy work, rugs, etc. suitable for Christmas Gifts. Fish pond for the children. Remember the date Nov. 16. Plan to attend. 1tc

ELECTION NOTES

All election boards serving at the Primary Election will serve at the General Election except where changes have been made by the Hancock County Board of Supervisors and individuals have been notified.

Members of the counting boards will report at one o'clock P. M. on election day except in Britt, Concord, and Amsterdam Township Precincts where they will take charge of the ballot boxes at any hour after 9:00 o'clock A. M. and after 50 votes have been cast in such precincts.

All precincts are required to phone results that they may have available, as soon as polls close on election day and must phone in final returns to the office of the County Auditor as soon as the final count has been completed—this is required by law.

Vacancies that may occur on election boards on Election day will be filled by the various boards themselves on election day.

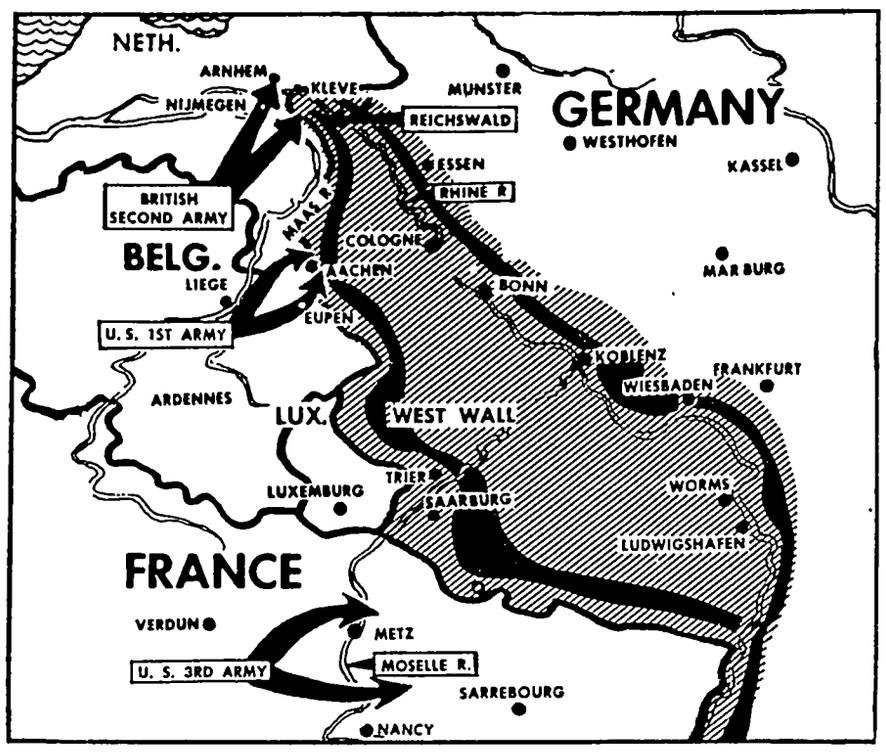
FRED C. MISSAL,
(1tc) County Auditor.

WEEKLY NEWS ANALYSIS

Nazis Fight From City's Ruins; Batter Gateway to China Coast; "Big Four" Chart Postwar Peace

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



Arrows indicate direction of Allied drive on Germany (See: Europe).

EUROPE:
City of Death

Black and pinkish smoke curled above the charred ruins of the once busy city of Aachen as massed U. S. artillery and fleets of bombing planes poured their volley of death into it to rout out the 1,500 defenders.

But hidden deep in underground shelters beneath the rubble like moles, their spirits reportedly bolstered by wine and brandy, the stubborn enemy stood up under the bombardment to come up with machine-gun and rifle fire to plague the stout-hearted doughboys, working their way through the rubble after the heavy salvos of the big guns.

Even as fighting went on inside of Aachen, the Nazis massed for counterattacks in an attempt to break the Americans' pincer closing on the city from the north and south, throwing in sizable armored formations in the teeth of withering U. S. artillery fire.

A smoking and deserted ruin, the Nazis fought desperately for Aachen to use it as a symbol of fanatical German resistance, and to delay its capture because its fall would give the Americans an important road hub, with a broad network of superhighways leading to the Rhineland, 20 miles away.

Fanatical as Nazi resistance was at Aachen, it was no more rabid than on the Third army front from Metz to Nancy, where the enemy

Lt.-Gen. Mark Clark (left) and Maj.-Gen Geoffrey Keyes study battle plans on Italian front.

continued to fight strongly to bar Lieut. Gen. George S. Patton's pathway to the Saar basin, and on the Seventh army front about the foothills of the Belfort Gap, 25 mile break in the mountains leading to Bavaria.

By landing behind enemy lines and outflanking their defensive positions, the Canadians steadily pushed the Nazis from southwestern Holland, while the British 2nd army threatened to close in on them from the north near Arnhem.

In Italy, heavy rains sent shallow, gravelled mountain creeks careening over their banks, and muddied up the hilly terrain, slowing the 5th and 8th armies advance on the Po valley.

As Allied troops knocked the Germans off of one slope, they bucked up against fresh opposition on the next, and occasionally the Germans threw in counterattacks in an attempt to exploit the difficulty of bringing up supplies over mushy roads or sagging mountain shoulders.

With most of its crack troops strung to the northeast and east, and no strong defensive system organized in the south where Russian troops were hammering forward after their dash through fallen Romania, Hungary's early collapse was expected by the Allies.

Massing 1,000,000 men, the Reds developed a three-pronged drive on East Prussia, aimed at slicing up the German province from the north, east and south.

Land at Harvest

British forces in the Peloponnesus who landed at Patras, fourth city of Greece, are on hand for the harvest of the No. 1 crop of the region.

The Greeks have a word for it, which we translate as currants. They grow profusely on the Ionian Islands and for many miles inland along the Gulf of Corinth shores. In fact, Corinth gives them their name. These currants of Corinth are small, seedless grapes. Harvested and dried, they become raisins of the same type that California produces.

PEACE MACHINERY:
Draw Blueprint

Having assumed the major share of defeating the Axis on the field of battle, the U. S., Britain, Russia and China, and later France, proposed to assume an equally major responsibility in maintaining the peace through a postwar security organization outlined at the Dumbarton Oaks conferences in Washington, D. C.

With other United Nations acting as an advisory assembly, the "Big Four", and later France, would hold permanent positions on an executive council, to which would be entrusted the task of maintaining order through peaceful settlements, or the use of force, if necessary.

To assist the permanent council, an economic and social committee would be organized to promote trade, and an international court of justice would be set up to settle cases which could be determined on legal grounds.

Points left unsettled by the Dumbarton Oaks conferences included:

1. Whether any of the nations represented on the permanent council shall be allowed to vote on the question of applying suppressive measures if charged with aggression;

2. Whether the U. S. representative's vote for such measures should be cast at the direction of the President or congress;

3. What forces or facilities should be placed at the disposal of the permanent council;

4. What constitutes aggression.

To Moscow flew Prime Minister Churchill and Foreign Minister Eden of Great Britain to confer with Marshall Stalin and Foreign Affairs Commissar Molotov on knotty Balkan problems posed by the Russian armies' lightning occupation of these countries.

Also on the conferees' agenda was discussion of the critical Polish situation, brought about by the exiled Polish regime's resistance to Russian claims to the country's eastern territory, and the soviet sponsored Polish Committee of National Liberation's demands for an important voice in the future government of the nation.

PACIFIC:
Strike China Coast

Even as Admiral Chester Nimitz declared that ". . . We must make landings on the China coast . . . to enable us to employ the air forces which will be at our disposal . . ." U. S. planes bombarded the Ryukyu islands and Formosa guarding that vital shoreline.

As hundreds of American planes sought to soften the enemy's defenses shielding the Chinese coast, the Japanese pressed their drive to seal off the whole eastern shoreline to prevent a juncture of U. S. and Chinese forces in the event of landings.

Recognizing the character of the enemy drive, Admiral Nimitz said: ". . . To the extent that the Japanese improve their situation in China, our task will become more difficult . . ."

Principal target of the U. S. aerial attacks was the glittering green island of Formosa, serving as a huge air base covering the sea lanes to China, and staging point for the enemy's South Pacific operations.

MISCELLANY

Milk is the largest single source of gross farm income and was 15 per cent of all farm income in 1943—larger than cattle or hogs, twice eggs, over twice cotton, four times wheat, six times tobacco. One out of every 15 U. S. families is dependent on milk for a livelihood.

Milk and its products comprise over 25 per cent of the 1700 pounds food consumed annually by individuals.

1944 HARVEST:
Record Seen

Only adverse weather during the remainder of the harvest season can crimp a record grain production for 1944, the U. S. department of agriculture reported, with the corn crop expected to total an all-time high of 3,196,977,000 bushels; wheat 1,108,881,000 bushels, and sorghum 152,000,000 bushels.

Estimated production of 1,192,000,000 bushels of oats and 287,000,000 bushels of barley would place the total harvest of the foregoing five grain crops well above 5,800,000,000 bushels, a gain of approximately 400,000,000 bushels over last year.

In addition to the flourishing grain harvest, record crops of rice, fruits, commercial vegetables, peanuts and tree nuts were anticipated, and tobacco production was expected to approach the 1939 high of 1,804,879,000 pounds. A 7 per cent increase in tonnage of citrus crops over 1943-'44 in all states was forecast.

Although below record levels, production of hay, beans, peas, soybeans, flaxseed, potatoes and sweet potatoes was estimated above prewar output. Marketing of livestock and livestock products was expected to reach a higher volume than in any year save 1943.

Canned Foods

With the army demanding increased supplies of canned fruits and vegetables, and packs of these products spotty, civilians may expect smaller stocks during the coming year, trade circles declared.

Unless army orders are cut in the event of Germany's downfall, it was said, civilians can expect less canned peas, corn, tomatoes, beets and carrots, with only asparagus supplies remaining about the same. Of fruits, only apricots will be in good supply, with smaller stocks of peaches, pears, fruit cocktails and pineapple available.

According to trade circles, canning was affected by the War Food administration's increase in the percentages of certain items set aside for military use, adverse weather, and manpower problems.

Star Farmer

Named as the Star Farmer of 1944 at the annual convention of the Future Farmers of America, 20-year-old Elton Ellison of Ralls, Tex., started off seven years ago with the purchase of a gilt with his own savings and the planting of 10 acres of cotton and milo on borrowed money.

"Star Farmer."

By the end of the 1942-43 season, Young Ellison was able to help his father buy a 260-acre farm, which he worked along with an additional 270 acres he rented before answering his army call in August.

Receiving a $500 award on behalf of Young Ellison, his comely 18-year-old wife chirped: ". . . My goodness. . . . This check will really help us on our farm. I'm going right back to Camp Roberts and tell Elton to hurry home as soon as he can . . ."

SOLDIER VOTE:
Estimate Total

Of 4,300,000 servicemen who have received absentee ballots, more than 2,300,000 will vote November 7, state officials estimated.

To date, more than 600,000 ballots have been returned, with the rate varying from 5 per cent in Wisconsin to 50 per cent in Ohio.

In New York, 375,000 out of 589,054 servicemen who received absentee ballots were expected to vote; in Pennsylvania, 180,000 out of 600,000; in New Jersey 300,000 out of 379,920; Tennessee 37,500 out of 50,000, and Montana 5,000 out of 13,000.

CHINA:
Relief Needs

Although supplies could not be delivered before 1946, and most of the United Nations Relief and Rehabilitation's funds of over $1,350,000,000 will be spent for locomotives, tobacco, clothing, food, etc., chiefly for Europe in 1945, China has requested aid totalling almost $1,000,000,000.

The sum, however, would represent less than a third of total Chinese relief costs, it was said, with the country planning to bear the remainder of the whole expense for feeding and clothing the people, restoring transportation, rebuilding industry and resettling millions driven from their homes.

In addition to nearly a $1,000,000,000 of supplies, China asked the UNRRA to furnish 885 doctors and nurses, 1,080 industrial experts, and 230 welfare workers.

Matching the U. S. contribution of $1,350,000,000, other United Nations are to furnish an additional $1,000,000,000.

FARM MORTGAGES

Farm mortgage totals declined nearly a billion dollars in the period from 1940 to 1944, according to U. S. department of agriculture reports. Of the $952,000,000 total reduction, $850,000,000 was in 1942 and 1943. Good income from record-breaking crops made this possible.

On January 1, 1944, the farm mortgage debt was almost 8 per cent below that for a year earlier, 14.4 per cent below the total for January 1, 1940, and almost 48 per cent below the peak-year of 1923.

Sugar Solutions Aid in Fighting Gladioli Thrips

Typical injury can also be noted on gladiolus foliage where thrips are present. In addition to this injury to the foliage, the gladiolus blossoms, when attacked, show distorted and discolored flower petals which later become withered and brown. Much the same type of injury also occurs on the flower petals of roses.

During the growing season, spray with a solution of brown sugar and tartar emetic. Where the thrips are exposed on the foliage to contact insecticides, any of the better known rotenone sprays will kill the active stages. The advantage in using the brown sugar-tartar emetic spray lies in the fact that in addition to killing specimens hit with the spray, additional thrips are killed by feeding on the sweetened bait. The brown sugar - tartar emetic spray is made up of one ounce of tartar emetic and four ounces of brown sugar to three gallons of water. In the case of gladiolus, this summer treatment is effective only when applied early in the season before the flower spikes appear. After the flower spikes appear, control is most difficult, since the majority of the thrips will be feeding on protected areas within the flower itself.

In the case of the gladiolus thrips, effective control can be obtained by preventive measures and by treating the corms in storage. In harvesting the corms, great care should be exercised to prevent migration of the thrips from the old tops to the corms themselves. In other words, when the tops are removed, the corms should be taken as far as possible from this source of infestation.

Rotterdam Lies Behind Complex Water System

Rotterdam, great port of the Netherlands lies behind a series of broad waterways like a medieval castle behind its moats.

The protective waters are supplied by two rivers: the Maas (which flows from France and through Belgium as the Meuse); and the Rhine, which frays out like a rope-end after it crosses the German-Netherlands border, sending one of its major streams by Rotterdam. The two systems are connected by cross channels so that their waters and names are hopelessly jumbled. Although it is mostly Rhine water that flows past Rotterdam the stream is called "The New Maas." A final complication was furnished by the digging of "The New Waterway," a broad, dike-protected ship-canal that gives Rotterdam a straight, 20-mile corridor to and from the North sea.

It is up this ship-canal that ocean steamers pass to reach the port—14,000 of them annually in the years just before the present war. Quays and wharves extend for miles along the banks of canal and river; and numerous basins, excavated from the low ground farther back are reached by broad channels. Scores of canals meet the river in the city and are used as berthing places for smaller craft.

Rocket Bombs Date Back to Early Chinese

Early forms of rocket bombs were recorded in 1232 when the Chinese used them against the Tartars. Other examples of early types, having either explosive or incendiary charges, are given in European history as well as in American wars. In 1806, the British attacked the city of Boulogne with a flight of rockets fired from small boats, and one historian quoted in Encyclopaedia Britannica attributes the surrender of Washington, D. C., to this weapon. Rocket bombs used by the British were said to have routed the American forces defending the capital, leaving the city unprotected.

Perhaps the most significant example of rocket bombs appearing in American history was the unsuccessful attack on Fort McHenry in Baltimore harbor in the War of 1812. "The rocket's red glare" mentioned in the Star Spangled Banner did not refer to signal flares as is popularly supposed. Francis Scott Key saw rocket bombs which carried heavy charges of explosives.

This battle during which the immortal Star Spangled Banner was composed took place on September 12, 1814.

Lice and Mites Cause Poultry Production Drop

Two noted thieves are robbing farmers of their opportunity for poultry profits, one of these thieves being a louse and the other is a mite. They cause a decline in egg production and lower the vigor and vitality of pullets. Body lice and tropical mites remain on the bird's body while the red mites stay in the poultry house and are usually on or around the perch poles.

Poultry specialists recommend that birds be dusted with sodium fluoride to eradicate body lice or that birds be dipped in slightly warm water to which has been added one ounce of sodium fluoride to each gallon of water used. Perch poles should be treated with nicotine sulphate and the treatment repeated in 7 to 10 days.

Since red mites suck blood from the birds, it is necessary to use a material that will kill by contact. The recommended practice is to treat perch poles and supports with used motor oil to which has been added one-third or more kerosene. The house should be thoroughly cleaned and all litter and nesting material should be burned prior to the treatment.

Lists Six Points for Preserving Healthy Feet

Six rules for preserving healthy feet are given by Lemuel C. McGee, M. D., Wilmington, Del. Experts in care of the feet, he says, advice that the following attention is useful in preserving healthy feet:

1. Wash the feet daily with soap and lukewarm water. Dry them thoroughly.

2. Brittle nails and callosities should be covered by lanolin or some other ointment to aid softening.

3. In the care of the nails, cleaning should be done with orangewood sticks. Cut the nails only in a good light and after a bath when the feet are clean. To avoid injury to the toes, the nails should be cut across and not too short.

4. Overlapping toes, and toes that press closely together, should be separated by lamb's wool or a similar soft material.

5. One should wear shoes of soft leather which fit properly—that is, not too tight. It is poor economy to wear ill-fitting shoes when only a little more time and attention in selection will procure well-fitting shoes.

6. Avoid strong, irritating antiseptics such as coal tar products.

Question Diabetes

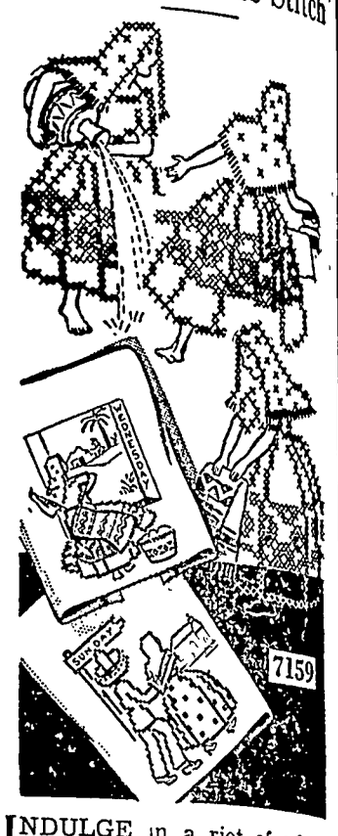
Diabetes may be a different kind of disease from what we now believe it to be. Doubt has been raised by two cases in which it was necessary to remove the entire pancreas in operations for cancer. It was expected that since the body was producing no insulin, high dosages of insulin would be required. Instead, the patients were very sensitive to insulin and when their situations became stabilized they were able to tolerate 50 units of insulin a day and received with it 150 to 200 grams of dextrose. The men required less insulin and were more sensitive to it than many diabetic patients who retain the insulin-producing organ, the pancreas. This situation has caused the Journal of the American Medical Association to raise the question as to whether in diabetes the cause may not be the lack of insulin but some factor may be operating in the body that may inactivate the insulin produced or inhibit its action.

Fall Transplants

If the gardener has been raising his own perennials in a frame during the summer, these may be set out into their permanent place in the border in September, provided they have made a good root system If the root system is slight, it is better to leave them undisturbed until spring, as then they will continue to develop during the winter. If set out with an inadequate root system in the fall, their chances of survival are slight.

Plants which bloom in the fall are best set out in the spring, and remember that evergreens should be given plenty of water during the fall months in order that they may go into the winter with a good root system. This is especially true if evergreens are set out in the fall, although as a class they are best set in the spring.

Mexican Tea Towels Gay in Cross Stitch



INDULGE in a riot of color in these "South of the Border" tea towels. Make gay caballeros and senoritas in cross-stitch.

* * *

Brighten your kitchen with cross-stitch towels. Pattern 7159 contains a transfer pattern of seven motifs, averaging 6¼ by 7 inches.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

He shall be restored without f seniority;

He shall be entitled to partici- in insurance or other benefits d by the employer pursuant to lished rules and practices re- to employees on furlough or of absence in effect with the yer at the time such person ed military or naval service,

He shall not be discharged from position without cause within year after such restoration.

e Selective Service local boards well-fitted to assume the task of an reemployment. In their files have a complete record of their rience with the veteran from ime he registered until the day as forwarded for induction. The rd includes details as to his bilities in civilian employment. service records also are turned to the board by whichever ch of the armed forces with h he was connected.

ese local boards, therefore, are acquainted with the veteran. In tion, they are familiar with the employment situation in their own communities.

The Congress, in the Selective Training and Service Act, instructed the Director of Selective Service to set up a personnel division to supervise veteran reemployment. Such a division was established, although to avoid confusion as to its specific functions, it was named the "Veterans' Personnel Division." This division determines the overall policies for operation of the Selective Service Veterans' Assistance Program.

The program in the states is under the direction of the governors, who have generally delegated to the State Directors of Selective Service the duties of administering it.

Local Boards Handle Program.

Actual operation of the program, however, will remain with the Selective Service Local Boards—some 6443 of them—in conformity with the decentralized procedure which has characterized the Selective Service System since its inception four years ago. At least one "reemployment committeeman" has been attached to each of the local boards to assist in the work of veteran reemployment.

These committeemen are individuals who are well qualified to know the labor situation within the community served by the local board; they are acquainted with industrial executives, civic organization leaders, labor leaders, county agents and others who will be in a position to assist in the reemployment program.

The program as now set up operates substantially as follows:

Upon his discharge the veteran is instructed to contact his local board within 10 days. Obviously, if he is certain he can return to work at his old job, no further assistance will be necessary. However, he must report to the local board, taking along with him his army papers (or Navy, Marine or Coast Guard, as the case may be) including the discharge certificate so his new status can be recorded by the board.

If there is some reason why his reinstatement in his former position may present difficulties, his local board and its reemployment committeemen are prepared to assist him.

After the veteran discusses his problem with the reemployment committeeman, the latter will make every effort to obtain the veteran's reinstatement. He may contact the employer to explain to him provisions of the law requiring the veteran's reinstatement, or he may contact any number of civic, local or labor agencies that will be in a position to help.

It is anticipated that in a majority of cases only minor difficulties will be experienced. But it is recognized that some differences of opinion, some disputes, are bound to arise in cases where employer's circumstances have changed, or where there is an honest question whether the veteran is now qualified to perform the job he formerly held.

In all of these eventualities, the local boards and the reemployment committeemen will attempt to work out a solution agreeable to both parties.

Law on Veteran's Side.

If all avenues of approach have been exhausted without success, and it still appears the veteran should be reinstated under provisions of the law, further measures will be taken. The veteran's case then will be taken by the local board to the State Director of Selective Service, who may forward it on to National Headquarters to be turned over to the Department of Justice.

Or, if the veteran desires, he may employ his own attorney and file suit in the United States District Court for the district in which the employer maintains his business.

Should he not wish to employ his own counsel, the veteran may bring the case to the attention of the United States District Attorney.

The discharged veteran who had no job when he entered the service, and who now wants one, or the veteran who had a job when he was inducted but now wants a new one rather than to return to his former position, also will find the Selective Service System ready to help him.

When the veteran who wants a new job is discharged, he should report to his local board and explain his desires. All of his qualifications will be considered and he will be turned over to one of the board's reemployment committeemen.

If the job desired is in an industry other than railroading, the committeeman will take the veteran personally, or will arrange an appointment for him, with the proper representatives of the Veterans' Employment Division of the United States Employment Service, an agency with some 1500 offices in the nation which has been planning this service for a number of months. The U.S.E.S. officials will carefully consider the veteran's desires and his qualifications. This agency maintains records of all different types of jobs that are open and is in a position to advise the veteran of the opportunities available in them.

A Job for Every Soldier.

The Selective Service Local Board, even then, will not consider that its responsibilities to the veteran have ended, but will keep following the case and using every effort to see that he is placed in a job.

In each state, the United States Employment Service, under the War Manpower Commission, has appointed a veterans' representative who is supervising the employment interests of the veterans at the local offices of the U.S.E.S. A local veterans' employment representative has been designated in each employment office to perform at the local level duties similar to those performed by the state veterans' employment representative at the state level. Since the United States Employment Service maintains contacts with employers throughout the country, it is in an advantageous position to assist the veteran.

Some returning veterans doubtless will prefer a job with the Federal Government. In such instances, the veteran's Selective Service Local Board will refer him to the nearest United States Civil Service office or any first or second-class postoffice where all necessary information may be obtained. A veteran is entitled to five points preference in an examination for appointment and a veteran with service-connected disability is entitled to 10 points.

Assistance to Farmers.

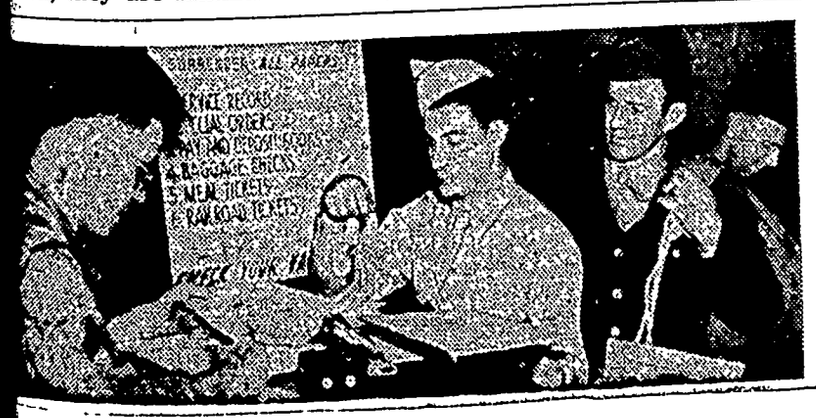
Whenever a veteran is interested in establishing himself in an agricultural activity, he will be referred to the County Agricultural Agent who is qualified to explain the benefits available to the veteran who desires to make a career of farming, or is interested in its associated job opportunities.

The War Food Administration, through the cooperative Agricultural Extension Service, has arranged for advisory groups in each agricultural county which will give advisory assistance to all veterans interested in agriculture, and who express a need for assistance.

Such assistance will include advice as to types of farming, amount of capital required, sources of credit, size of units necessary to maintain satisfactory standards of living, sound operating policies and similar matters as well as current job information.

In summary, good advice to the veteran, regardless of the nature of his problem, is this: Take it up first with your Selective Service Local Board.

IT'S GOODBYE TO THE ARMY for these soldiers who are entering the Fort Dix, N. J., separation center, where they will spend their last 48 hours of military life. This two day period is needed for the completion of mustering out routine, during which the men receive their discharge papers. The "separation center" is the reverse of the induction center.



FIRST STEP in leaving the army is this desk, where soldiers turn in their identification tags and such papers as their service records, special orders, pay and deposit books. All men to be discharged will go through this process, which will no doubt be a joyous experience to most of them. Forty-eight hours later, they will be free civilians again. As soon as they reach home, they report to their Selective Service local boards, where they will be assisted in getting their old jobs back, or in obtaining new ones.

PRIVATE PURKEY WORRIES ABOUT RECONVERSION

Dear Ed: Well, I am pretty tide up in the Eurprean war, but I get a couple of minutes now and then to think about my reconvertion plans. Reconverting me from the job of a foreign demonstrator for the arsenal of democracy back to a local filling station attendant is not going to be easy.

—*—

Two years in a global fracas like this make a man a new model. He gets to be a hard boiled, quick tempered guy with a hide like a ellaphunt, a disposition like a gorilla and a very itchy finger on a gun. Take me. I got all geared up for destruction and it is not going to be no cinch making me over for peaceful persuits.

—*—

Sometimes I wonder how long it will take to reconvert me so I will not want to end all arguments with a bazooka. Before the war I was a fine sample of a peaceful American. In my gas station job I was polite, I never got quarrelsome with nobody and was even teached to turn the other cheek. But in the war I got made over into a rough and tumble Dick Tracy fighting on a 24-hour basis and never remembering nothing about good manners.

—*—

As soon as the ump blows the whistle on this war me and the boys has got to get ourselves all retooled, regeared and refinished so we get fighting out of our systems and go all day without shooting nobody. We got to be able to come on strangers all of a sudden and not fire at 'em first. We got to get used to ordering breakfast, and sleeping late mornings.

—*—

I serpose when I get back to the gas station job I will not pay no attention to orders at first unless they is yelled at me in a rough voice and I guess the boss better wear stripes on his coat for a time. Also I will not be able to look at a hill, a mountain or a beach no place without feeling I got to take it. Every time I see a bridge I will want to blow it up from habit.

—*—

Just being back at the pumping station with no iron hat on and without a ton of equiperment on my back will seem funny in the first stages of my reconvertion and I gess maybe the boss should make it easy by letting me strap a couple of tires and 40 pounds of auto supplies on me for a while.

—*—

Reconverting myself to soft beds, light shoes and no k. p. duty is a big job, and I will need the help of Mr. Byrnes and Barney Baruch all right. But the big reconvertion task will be to get my stommick back on a basis where it can stand eggs that ain't never been took out of no cans.

—*—

Well I sure got a prublem but I am giving it plenty of thought and I hope for the best.

Yours az always,
OSCAR

* * *

RECONVERSION WORRIES

A Volunteer Shop Worker:

Oh, reconversion frightens me,
I fear the sudden step
That reconverts me to a girl
Who ends the day with pep;
That finds no wrenches in my hands
And not a clock to punch—
And makes me throw away those slacks
And take my time at lunch!
To have my nails look right again,
To wear once more a skirt,
To lack a pay check every week—
Ah, that, I fear, will hurt!

—*—

A Housewife:

How will I reconvert myself
From harassed, fretful days
And worries over ration points
And all those OPAs?
From living everything by points,
Not knowing where I'm at
To entering the butcher shop
And saying "Gimme THAT!"!!!

—*—

A Husband:

Oh, speed the reconversion days!
To war my wife did go;
And I've been keeping up the house
(or very nearly so);
Of drug-store food I'm pretty sick,
My stomach's on the bum;
The kitchen sink is full of plates,
I'm feeling extra glum;
So send the Missus home to me,
Without her life's a blur;
From everything in this damned war
I'll reconvert to HER.

* * *

YOO HOO, MR. HULL!

Sumner Welles, former assistant secretary of state, is the latest United States ex-official to accept a job as a radio commentator. He will be sponsored by a watch company. The author of "Time for Discussion" has made a decision for "time."

—*—

Those GI Joes may put a chain on the watch on the Rhine.

* * *

One thing this war is going to do is to cure Japan of the habit of calling all wars "incidents."

CLASSIFIED DEPARTMENT

A GOOD STORE IN A GOOD TOWN KLEMME, IOWA

KLEMME NEWS

The Misses Maxine Bachman and June Boleman of Mason City came Friday and visited until Saturday at the Clarence Bachman home.

Harm Aries of Waterloo, brother-in-law of Mrs. Clarence Bachman is spending this week at the Bachman farm southeast of town.

Mr. and Mrs. J. B. McHugh, Jimmie and Kathryn of Waterloo, visited several days last week at the parental August Lau home in Liberty township.

Mr. and Mrs. Tom Blank and daughter, Mrs. Earl Pringle, and Mr. and Mrs. Chester Geddes of Hayfield, visited Sunday with Mr. and Mrs. T. Blank here.

Miss Stella Thieman, who has been employed in a beauty parlor at Des Moines, is now employed in a beauty shop at Martin's Department Store in Cedar Rapids.

Mr. and Mrs. Fred Schmidt entertained to a pheasant dinner at their home Sunday: Mr. and Mrs. Julius Priebe, and Mr. and Mrs. Paul Goll and daughter Beulah.

Dean Jacobs went to Indianola Friday afternoon to spend Saturday visiting with his brother Elwyn, and to take in the Simpson-Cornell college football game.

Mr. and Mrs. Ray Donahey and sons, Jim and Bob of Des Moines, visited at the R. A. Jorgenson home Saturday. They came up to enjoy two days of pheasant hunting.

Hugh Chapman of Kansas City, spent Saturday visiting at the R. A. Jorgenson home. Mr. Chapman had been at Rochester, Minn., going through the Mayo Clinic.

Mr. and Mrs. Wayne Pavey and daughter Carol of Webster City came Saturday evening and visited until Sunday evening at the W F Pavey home.

Grandma Schroeder is still confined to her bed with illness. Mrs Henry Keeper is staying with her nights to relieve Mrs. Lena Schroeder in caring for her.

After spending three weeks visiting at the Carl Wille home, Mrs Caroline Schlawin has returned to Garner to the Rhine Schlawin home.

Mrs. Anna Wright and Mrs. Lois Martinas of Red Cloud, Minnesota, visited Thursday in the home of their nephew, Elmer Anderson and family of near Klemme.

Supervisor J A. Chambers took Jimmie Parker to the County Farm at Duncan Tuesday afternoon. Mr Parker had been ill for several days and was taken to the Farm for medical attention.

Elwood Harvey, who is a freshman student at Cornell College at Mt. Vernon, Iowa, spent the week end in Klemme visiting his parents, Rev. and Mrs. H. E. Harvey and daughter LaNelle.

Monday evening visitors at the Dan Webner home northeast of Klemme were Mr. and Mrs. Mike Kinsela and family of Ventura; Mr. and Mrs. Ed. Christians and family of Klemme; Mr. and Mrs. Henry Thomas of Ventura; and Pfc. Herb Webner and family of Madison, Wisconsin.

The Keith Albertson family moved Friday to Atlantic, Iowa and the Wm. Johnson house which they had occupied has been rented by Mrs Herman Bridges and daughter Mrs. Walter Drake and children, who also moved in Friday. They had resided with Mrs. Martin Barz in her home previously.

Kidnaped his own son. The culprit is a prosperous merchant who is determined that his boy shall not marry a shop-girl—and the police seem unable to punish him for his crime. Read this unusual story in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Wilbert Schubert of Rockford, and Juanita Weter of Mason City were Sunday dinner and supper guests at the home of Mr. and Mrs. Howard Baack. Gary, Harlan Lee, Marijane and Junior Baack visited with their grandparents, Mr. and Mrs. August Baack in town, while their parents and visitors went out pheasant hunting.

There were quite a few out-of-the-county hunters in this community Saturday and Sunday for the opening days of the pheasant hunting season. All got some birds but most hunters reported that it was hard to get the birds up. Hunting should be better after more corn fields have been picked as the cover at present is rather heavy and makes it easy for the birds to hide.

Sgt. Herbert Schubert of Douglas, Arizona, and Mrs. Herbert Schubert and son, Roland of Britt, spent Wednesday night and Thursday of last week visiting with the Howard Baack family. A week ago Sunday night Sgt. Schubert left by train from Mason City to a camp in Utah where he will receive instructions and be sent elsewhere. He had been at Douglas ever since his induction 3 years ago, Oct. 20.

SOPHOMORE CLASS NEWS
Lois Ann Lau, Reporter

This week in Geometry we finished the chapter on Congruent Triangles. Monday we started on the chapter about Parallel Lines. This will seem some different at first from Congruency.

In Biology we have started a new chapter, "The Simpler Animals." We have used the microscope to examine some of the smaller animals and plants such as the hydra and yeast cells.

"The Romans" is still the topic in History We are starting on a new chapter about the period in the history of the Roman Empire that it reached its highest peak.

In English we have started on a new chapter on "Practical Explanation"

JUNIOR HIGH SCHOOL GRADES 7 AND 8
Isabell Gibbs, Reporter

We began work on lettering in our Art class, Friday. Next week we plan to use what we have learned by making posters.

In Arithmetic the Eighth Grade have been learning about the third case in per cent. We think we can use all 3 of these cases now. At least we will find out how well we can apply them in our class tests next Monday.

We are beginning work on two-part singing in our music classes. We appreciate the new song books received last week.

In Seventh Grade English we are beginning the unit on Letter Writing.

Some of the Seventh Grade boys have started work on a large product map of South America during their spare time.

GRADES 5 AND 6

The Fifth Grade is very sorry o lose one of its members, Jimmy Albertson He has moved to Atlantic, Iowa Thursday afternoon ve had a party for him in our com. Much fun was had in playng games and hunting treats hid n various places in the room. We ll hope Jimmy enjoys his new chool and that he makes many new friends.

Mr. Kingery brought us some new Science books this week to be used with our basic text. They contain many excellent pictures which we can use not only in Science but other subjects as well. We thank him for bringing them to us.

Music on Wednesday seemed much more interesting than usual and everyone was more enthusiastic—the reason, we have some new Music books.

GRADES 1 AND 2

This week, in First Grade, we dramatized the story, "Something for Spot," which we had read. We selected the characters, reviewed what happened in the story and organized the ideas which we needed. We enjoyed dramatizing very much.

In Second Grade from our Weekly Reader, we discussed our Navy's aircraft carriers. We learned how they differ from other ships, what kind of airplanes they carry, what work these airplanes do, and about the decks on the ships. We also talked about PT boats and why they are important.

Phone your news to 12.

When Your Back Hurts—
And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. *Doan's* have been tried and tested many years. Are at all drug stores. Get *Doan's* today.

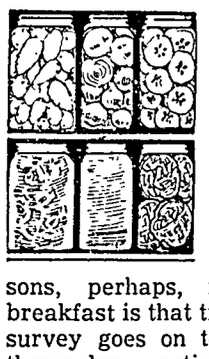
(See Recipes Below)

Breakfast Patterns

A recent survey made tells us that 65 per cent of the doctors and 88 per cent of the teachers say the average person eats too little for breakfast.

Other interesting facts reveal that most people believe they get about 20 per cent of their daily nourishment from breakfast. Doctors and teachers here again estimate they get about 28 per cent nourishment from breakfast.

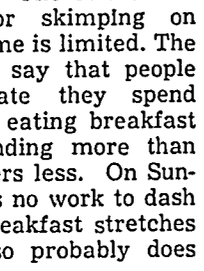


One of the reasons, perhaps, for skimping on breakfast is that time is limited. The survey goes on to say that people themselves estimate they spend around 12 minutes eating breakfast with farmers spending more than that, factory workers less. On Sundays, when there is no work to dash to, the time for breakfast stretches enormously, and so probably does the nourishment.

These, then, are the findings. Here are the facts: a breakfast is one of the three meals of the day and as such should provide a third of the day's food requirements—calories, vitamins, minerals, etc. In fact, planned correctly, the breakfast can take care of that serving of cereal, that citrus fruit or juice and the egg a day requirements. If the worker has a heavy schedule, the food can be made extra nourishing, such as cooking the cereal in milk, or at least serving with cream or rich milk and sugar. Have both eggs and cereal for breakfast if the calorie intake has to be upped, and serve jellies or jam with toast in addition to the butter.

Why Breakfast?

Breakfasts, good breakfasts, are important if we are to keep mental and physical energy at the highest level during morning hours. The time elapsing between dinner and breakfast is the longest interval between any meal. The stretch between the evening meal and the morning meal is usually as long as 12 hours. Sleep consumes energy, too, for the very process of living, while asleep requires approximately 65 calories for the average-sized adult.



Now here are some breakfast patterns that will fit nicely into your schedule even if you have only 12 to 15 minutes in which to take breakfast:

Pattern I.
Stewed Fruit
Cooked Cereal Milk and Sugar
Toast and Marmalade
Coffee or Milk

Pattern II.
Half Grapefruit
Ready-to-eat Cereal
Milk and Sugar
French Toast
Syrup
Coffee or Milk

Pattern III.
Orange Juice
Cooked Cereal with Milk and Sugar
Eggs or Bacon
Rolls and Jelly
Coffee

Pattern IV.
Fresh Applesauce
Wheat Flakes with Cream and Sugar
Fried Ham Slice
Muffins and Butter
Coffee or Milk

Company Breakfast
Fruits-in-Season
Cereal with Cream and Sugar
Scrambled Eggs with Chives
Bacon Curls
English Muffins with Butter
Jelly
Coffee

There need be no monotony in breakfasts with all the variety available in fruits, juices, cereals, and breads. Here are some top-of-the-morning recipes to give your family a grand send-off:

Flake Griddle Cakes.
(Makes 12 cakes, 4 inches in diameter)

1 cup sifted flour
2½ teaspoons baking powder
¾ teaspoon salt
1 tablespoon sugar
1 egg
1½ cups milk
1 cup slightly crushed bran, wheat or corn flakes
3 tablespoons melted shortening

Sift together flour, baking powder, salt and sugar. Combine well beaten egg and milk and add to dry ingredients. Beat until smooth. Add cereal flakes and shortening. Bake on hot, lightly greased griddle. Serve with syrup, honey or jelly.

Variation: Butter thin hot pancakes, spread with tart jelly and roll. Serve at once with additional jelly or thin syrup.

Coffee Cake.

1½ cups sifted flour
½ cup sugar
2 teaspoons baking powder
¾ teaspoon salt
1 egg
½ cup milk
3 tablespoons melted shortening

Sift together dry ingredients. Beat egg, add milk and shortening. Stir together with dry ingredients, mixing only enough to moisten flour. Pour into lightly greased 8-inch square pan. Sprinkle with streusel topping. Bake in a hot oven (400 degrees) 25-30 minutes.

Streusel Topping.

3 tablespoons melted butter
¼ cup brown sugar
1 cup crushed cereal flakes
1 teaspoon cinnamon

Combine all ingredients by rubbing between fingers until mixture crumbles. Sprinkle over coffee cake batter before baking.

Prune Bread.
(Makes 1 loaf)

½ cup shortening
1 cup sugar
2 eggs, beaten
¾ cup chopped cooked prunes
2 cups sifted enriched flour
3 teaspoons baking powder
1 teaspoon salt
1 teaspoon cinnamon
½ cup milk
½ cup chopped nuts (if desired)

Cream together shortening and sugar. Add beaten eggs to creamed mixture. Blend in prunes. Sift together flour, salt, baking powder and cinnamon. Add to creamed mixture alternately with milk. Add chopped nuts. Pour into greased loaf pan. Bake in moderate oven (350 degrees) 1 hour and 15 minutes.

Do you have recipes or entertaining suggestions which you'd like to pass on to other readers? Send them to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois.

Released by Western Newspaper Union.

LYNN SAYS

Color Notes: Use different colored dishes and pottery jugs for breakfast to make the morning as bright and gay as possible. Here's how:

Mix orange juice with cranberry juice for unusual effect.

Fleck scrambled eggs with bits of parsley, chopped chives or of bacon curls.

Add raisins to oatmeal and serve with yellow butter and sugar.

Apricot halves go well with wheat cereal; yellow peach halves complement brown bran flakes.

Contrast the crisp brown of sausages with fried red-skinned apples.

Splash grape jelly on golden fried cornmeal mush.

Princess Lines Flatter One Jumper Frock, Simple Blouse

Trim Morning Frock.

OUR idea—and yours too—of something pretty in a morning frock! Your favorite princess lines, so flattering and trim, will make you look nice and feel comfortable too. There's added interest in the little rolled collar and pocket design. You'll like it in all cheery cottons or ginghams.

* * *

Barbara Bell Pattern No. 1242 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 4⅜ yards of 39-inch material; for trimming, 4 yards of ric-rac.

With Puff Sleeves.

A GAY, pretty little jumper frock which has the easiest, simplest blouse to make, wear and launder you've ever encountered. Notice that the "puffs" of the sleeves and the gathers of the neckline are just pulled up by means of a ribbon drawstring.

* * *

Pattern No. 8690 is in sizes 3, 4, 5, 6, 7 and 8 years. Size 4 jumper requires 1½ yards of 39-inch material; blouse, ⅝ yard.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

SNAPPY FACTS ABOUT RUBBER

If you have any doubts about the shortage of new passenger car tires, a recent statement by a government agency that knows the situation should clear your mind. It points out that less than one new tire for each car on the road will be produced in 1944, even if the industry is able to achieve the goal of 22 million passenger car tires.

Tire care is imperative now, particularly with users of truck and bus casings. Stocks are low, and it is estimated that during the latter part of the year there will be a shortage of 25,000 tires a month to meet replacement requirements on vehicles using tires of the 8.25 size and over.

Soldier of the Soil

VICTORY begins with the American farmer, working from long before sunset until long after nightfall. Upon him falls the burden of feeding the fighting forces . . . the civilian population . . . and hungry mouths in war-torn countries.

To the challenge of producing more food than ever, American soldiers of the soil have responded with heroic effort. Despite shortages of help and equipment, they have established records. They have contributed mightily towards winning the war.

Now you are asked to help your fellowmen in another way . . . to contribute money to give men in the armed forces needed recreation, to give books and sports equipment to prisoners of war, to give nerve-shattered men in the merchant marine a chance to recuperate. To give unfortunate people abroad and at home a chance to have life, liberty, and happiness.

The dollars you can give are needed more than ever this year. Please give generously.

KLEMME NEWS

Don't forget to vote next Tuesday, November 7th.

Mrs. Mary Waterman was a dinner guest of Mrs. C. F. Keraus on Sunday.

Mrs. Kate Mauss of Rake, Iowa, came Sunday to spend a week visiting at the Tom Blank home.

Mr. George Cock and Phillip of Eagle Grove came Friday to attend the Junior Class play.

Mrs. Frances Ridder enjoyed a pheasant dinner at the Levi Ridder home Sunday.

Mr. and Mrs. George Schutjer of near Britt were visiting at the Lewis Mau home in Klemme Tuesday.

Mr. and Mrs. Bert Mathews of Clear Lake visited at the John N. Day home Tuesday afternoon.

Mrs. E. G. Schaefer, of Des Moines spent Tuesday visiting with Klemme friends.

Mary Ann, daughter of Mr. and Mrs. Walter Blumer celebrated her 11th birthday October 31st.

Mr and Mrs. Clifford Montgomery and Mr. and Mrs. Carl Finders visited at the Clarence Bachman home Sunday.

Mr. and Mrs. Herman Paul spent Sunday in Des Moines visiting with their daughter, Mrs. Eddy Epps and children.

Rosemary West of Des Moines came Sunday for a visit with her grandparents, Mr. and Mrs. Sumner Trumbell.

Mr. and Mrs. Fred Schlichting and daughter, Gladys, were dinner guests Sunday at the Ralph Ludeke home near Clear Lake.

Rev. Calvin Grosshuesch will conduct services at the Ackley Evangelical and Reformed Church this coming Sunday evening.

Miss Corrine Merkel, who is a freshman at State Teachers College, Cedar Falls this year, spent the week end in Klemme visiting with her parents, Mr. and Mrs. Alfred Merkel and son, Dean.

Mr. ad Mrs. R. A. Jorgenson entertained to a six o'clock pheasant dinner Saturday evening Mr. and Mrs. Lyle Liebendorfer of Forest City and Hugh Chapman of Kansas City, Missouri.

Mrs. George Schoenwetter and Mrs. Art Schoenwetter were setting outperennials at the Geo. Schoenwetter home in Klemme Thursday. This is the place they recently purchased from Paul Mueller.

Mr. and Mrs. Benn Coobs have received word that their son, Melvin has been promoted from Private to Private First Class. Melvin is with the U. S. Army somewhere in the Pacific area.

Pfc. Herb Webner and family left Tuesday morning for Madison, Wisconsin after spending a furlough with parents, Mr. and Mrs. Dan Webner of near Klemme, and Mrs. Webner's parents, Mr. and Mrs. N. C. Nelson at Wesley.

Mrs. John Velau returned home last week Tuesday from the Mercy Hospital at Mason City, where she had been a patient for eight weeks receiving treatment. Mrs. Velau is reported to be getting along fine at this writing.

Those from Klemme who went to Algona last week Wednesday to attend a Methodist District Meeting were Mr. and Mrs. J. A. Chambers, Mr. and Mrs. Emil Beier, Rev. H. E. Harvey, Mrs. Ben Coobs, and Mrs. E. J. Arnold.

More moving going on in town this week. The Roths Cafe is moving to the State Bank Building recently purchased by Mr. and Mrs. Roths, and the Lewis Radio Shop is moving to the Gibbs building vacated by the Roths Cafe.

C. E. Lau, T. A. Johnson, Earnie Reuter and Larry Lee, all of St. Louis, Mo. were week end visitors in the home of Mr. Lau's parents, Mr. and Mrs. A. G. Lau in Liberty township. The men enjoyed hunting and bagged a number of pheasants while here.

Mr. and Mrs. Dan Webner entertained to dinner Sunday at their home near Klemme the following: Mr. and Mrs. N. C. Nelson, Wesley; Mrs. Lloyd Brockman, Algona; Mr. and Mrs. Mike Kinsella and family of Ventura; Mr. and Mrs. Donald Webner and Earl of Corwith; Pfc. Herb Webner, wife and son Denny of Madison, Wis.; Kenneth Schlawin and son Bobby of Garner; Miss Hilda Peterson of Ventura; Mrs. Willard Palmer and daughters; Ted Webner and Etta Lou Webner.

DEWEY

BRING BOYS HOME SOON!

"THIS BASIC ISSUE was clearly revealed in the recent announcement by the Director of Selective Service in Washington. He said that when Germany and Japan have been defeated it will still be necessary to demobilize the armed forces very gradually. And why? Because, he said, 'We can keep people in the Army about as cheaply as we could create an agency for them when they are out.

"For six months we have been hearing statements from the New Deal underlings in Washington that this was the plan. Now it is out in the open. They have been working up to it. Because they are afraid of peace. They are afraid of a continuance of their own failures to get this country going again. They are afraid of America.

"I do not share that fear. I believe that our members of the armed forces should be transported home and released at the earliest practical moment after victory. I believe that the occupation of Germany and Japan should very soon be confined to those who voluntarily choose to remain in the Army when peace comes. I am not afraid of the future of America—either immediate or distant. I am sure of our future, if we get a national administration which believes in our country."

—THOMAS E. DEWEY
Address—Philadelphia, Pa., September 7, 1944.

It's time to change...
—before it's too late

VOTE FOR DEWEY AND BRICKER ON NOV. 7

LIARY LADIES SPONSOR RMISTICE DAY PROGRAM

am Will Be Held At The ommunity Hall At 10:45

Klemme American Legion iary Women are sponsoring nnual Armistice Day Program held at the Community Hall ing at 10:45 a. m. on Satur- November 11th. The pro- is published elsewhere in this of The Times.

in past years, it has ben requested that all business places in Klemme will be closed from 10:30 a. m. until noon, during the program at the hall.

The audience will take part in the singing and the following song will be sung during the program Clip it out and bring it with you:

GOD BLESS OUR BOYS
(Tune, "America")

God bless our soldier boys,
Keep them through battle's noise,
Conquering and true.
From the dark water's wave,
In trench and air them save,
Spare them from evil ways—
GOD BLESS OUR BOYS!

Oh, hasten, Lord, the day
When righteous peace shall sway
O'er this torn world
Keep our hearts strong to serve,
Ne'er from our tasks to swerve,
Till each Christ's love hath heard,
In this wide world.

God save our splendid men,
Bring them safe home again—
God save our men!
Keep them victorious,
Happy and glorious,
They are so dear to us—
God save our men!

COMMANDER

CAPT. R. A. JORGENSON, JR.

Captain Ray A Jorgenson, Jr. of Dodge City, Kansas, on October 1st was advanced by the Army Air Forces from Instructor to Squadron Commander Capt. Jorgenson, who has instructed pilots on twin motored training planes and B-26 bombers for the past two and one-half years, now has under his supervision as Squadron Commander, 15 instructors and about 36 students Capt. Jorgenson is also Assistant Public Relations Officer for the Dodge City Army Air Base.

WOUNDED

PFC. KERMIT SMITH

Pfc. Kermit Smith, son of Mr. and Mrs. Matt Smith of Klemme, who participated in the DDay invasion, was wounded for the second time July 6. He is again back on duty as an officer's orderly. He entered the service April 1, 1942, and landed in England about Mar. 1 this year.

AMERICAN HEROES

by JULIAN OLLENDORFF

Forced to leave the tank he was driving when water in the fuel line caused it to stall, Pvt. Abe Fortner of Livermore, Ky., later returned, cleaned the fuel sediment bowl and got the machine in operation while still under heavy fire. The tank, repeatedly hit, stalled and Fortner repeated his cleaning until it finally went up in a blaze. The private has a bronze medal for his feat but War Bonds must be sold to replace the tank. *U. S. Treasury Department*

Old Timer Of Klemme Vicinity Died At County Home

FUNERAL SERVICES HELD SUNDAY FOR J. PARKINSON

Resident Of Community For Past Forty-Five Years

Funeral services were held Sunday afternoon at the Klemme Methodist Church for James Parkinson, 69,, who died November 2nd at the County Home following a short illness. Rev. H E Harvey conducted the services and a quartette composed of Mrs C G Waterman, Mrs. Gerald Koerner, Emil Beier and Emil Patet, accompanied by Mrs Matt Smith, provided the music.

The Wellemeyer Funeral Service of Klemme was in charge of all arrangements. Burial was in the Ell Township Cemetery and Mr. Parkinson was carried to his final resting place by neighbors and friends: S. G Fuller, John Costello, John Lass, Tom C Nelson, Ernest Helps and Henry Busse.

The following obituary was provided by Arthur Wellemeyer. provided by Arthur Wellemeyer:

James Parkinson, for 45 years a continuous resident of this community, passed away at the County Home Thursday evening.

Mr. Parkinson was born in England, September 11, 1875. He came to America at the age of 24 with his uncle, George J. Waddingham.

Mr. Parkinson was not too well but in spite of this handicap he did his bit for our community by working as a farm hand. He had worked for several years on the Joe Johnson farm and had worked for Ernest Helps, Ted Dutheridge, Will Waddingham, Herb Marshall and others.

For the past 26 years he made his home more or less with the J. [illegible] family in Avery township. Mr. Johnson built him a one room cabin on the banks of the Iowa River, where Mr. Parkinson could come and go as he pleased, and fish a little between jobs.

Mr. Parkinson returned to England on a visit in 1915 and came back to Klemme the following spring

On Monday October 30th, the Will Johnson family discovered that Mr Parkinson was ill and confined to his bed in the cabin. Our Supervisor Mr. Chambers was called and he took him to the County Home where they gave him special care, but two days later he died. This was November 2, 1944.

He reached the age of 69 years, 1 month and 22 days.

His nearest surviving relatives are three cousins: Will Waddingham, Klemme; Charles Waddingham, Meservey, and Ralph Waddingham, Nashua. He has many friends among the families where he had been employed throughout these many years.

CITATION AWARD

M-SGT. WILLIAM SANDREY RECEIVES D. U. B. AWARD

15TH ARMY AIR FORCE — A communications section chief with a 15th Air Force Liberator bombardment group, M-Sgt. William H Sandrey, son of Mr. and Mrs. Frank Sandrey, Klemme, Iowa, was recently awarded the Distnguished Unit Badge when his veteran outfit was cited "for outstanding performance of duty in armed conflict with the enemy."

Commanded by Lt. Col. William L. Snowden, 43, of 20 South Elm St., Denver, Col., the cited unit was presented the official commendation of Maj. Gen. Nathan F. Twining, Commanding Geeral of the 15th Air Force, in a ceremony at the group's base.

Led by its former commander, Col. Kenneth E. Cool, 39, of 2924 Fairmont Blvd., Cleveland Heights, Ohio, the Liberator group, although handicapped by personnel shortages and operating with only 40 per cent of its maintenance equipment, took off on a vital mission to attack the Daimler-Puch Aircraft Factor at Steyr, Austria. Intense cloud cover obscured the target Using rockets, aerial flak, cannon and machine guns in an effort to scatter the American planes, approximately 75 German fighters attacked the formation.

Despite severe opposition, the group maintained its formation, shifted its bombing objective to the Styr Walzlagerwerke, an important German ball bearing plant, and inflicted "tremedous material damage." During the air battle, the unit destroyed 27 enemy fighters, probably destroyed 17 more and damaged three, balanced by a minimum loss of four of its own aircraft.

'By their grim determination, their outstanding skill and unhesitating courage, the officers and enlisted men of this unit have upheld the highest traditions of the Military Service, thereby reflecting great credit upon themselves and the Armed Forces of the United States of America," concluded the citation.

FUNERAL SERVICES FOR MRS. HERB BAILEY HELD MONDAY AT DOWS METHODIST

Had Been A Resident Of Klemme Community For Many Years

Funeral services were held in the Dows Methodist Church Monday afternoon at 2:00 o'clock for Mrs. Herbert Bailey, 63, of Belmond and former resident of the Klemme community. Rev. J. M. Howdeshell of the Morgan church, was in charge, with Rev. W. N Baker assisting. The remains were laid to rest in the Fairview Cemetery at Dows, Iowa.

The following obituary was read at the funeral services by Rev. J M. Howdeshell, a former minister of the English Methodist Church in Klemme:

Mrs. Herbert Hawe Bailey was born in Feaugh Nubliss, County Monaghan, Ireland. She was the daughter of Mr. and Mrs. George Hawe, and came with her parents to this country at the age of five years. The family settled in Dubuque county, Iowa, where they remained for the first ten years. After this they moved to Wright County near Dows where her parents remained to the end of their lives.

Mrs. Bailey was born November 14th, 1880, and passed away at her home in Belmond, Iowa, at 7:15 o'clock Saturday morning, November 4th, 1944. She was 63 years, 11 months and 20 days old.

Eliza Jane Hawe was united in marriage to Herbert J Bailey on January 20th, 1904 and to this union was born one daughter, Ruth.

Mr. and Mrs. Bailey began life together on a farm north of Dows where they remained eight years. From there they moved to Hancock County to a farm near Klemme where they farmed for many years. During that time their daughter Ruth had reached college age and the Bailey family moved to Sioux City where Ruth attended Morningside College After a few years there they returned to Klemme and again took up farming until in 1943 when they retired and moved to Belmond, their present home.

Mrs Bailey was baptized at the age of 8 years, and united with the Methodist Church in Dows, but was not converted until the year 1902, during a revival in the church in Dows During a revival at Klemme in 1912, she was blessedly sanctified and lived in that state of grace until she was called home. Any one who knew Mrs. Herbert Bailey, knew her as a beautiful Christian character. Her family who knew her better than anyone else say, "She lived what she professed." During my time as pastor of the Klemme Church, she taught a Sunday School class, and was very faithful as well as delighted to do so. She was a good Bible instructor

Her parents preceeded her in death in 1919, and passed away just 14 days apart.

These who remain to mourn her passing are her husband, and one daughter, Ruth (Mrs. Merril Willcutt) of Keokuk, Iowa; and three brothers as follows: William of Seattle, Washington; George of Sioux Falls, South Dakota, and John of Dows, Iowa. There are other relatives and a host of fine friends.

SON BORN TO SGT. AND MRS. TED W. KADUCE

A son weighing 7 pounds and 6 ounces was born to Sgt. and Mrs. Ted W. Kaduce on September 6th at the Highland Hospital at Loomis, California.

Sgt. Kaduce is serving with the United States Army in Panama.

The new arrival is the grandson of Mr. and Mrs. John Kaduce, Sr. of Klemme, Iowa, and Rev. and Mrs. Blakee Hadlow of Sacramento, California.

Mrs. Kaduce and son are at the home of her sister, Mrs. Floyd Woodworth at Loomis, where they will remain for the duration.

WEEKLY NEWS ANALYSIS

MacArthur's Forces Close In to Cut Off Japs' Pacific Empire; Set Up Military Rule for Reich

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

EUROPE:
Press Through Mud

As American forces extended their holdings about rubbled Aachen, and other Allied units pressed against the reich through fall mush, the U. S. and Britain laid down regulations for strict military government of occupied German territory and Adolf Hitler called on every able-bodied male between 16 and 60—and "if need be, women and girls"—for guerrilla warfare against the conquerors.

Focal point of fighting continued around Aachen, where Doughboys rooted out German defenders house by house in the once proud, now shattered, city of 165,000, and strong enemy units assembled to the east of the metropolis in an effort to prevent the Americans from bursting into the vital Rhineland.

Action also flared on the Dutch frontier to the north, where British troops pressed toward the German border below the pivotal Siegfried bastion of Kleve, gateway to the industrial Ruhr valley. So bitter was the fighting in this sector, that desperate Nazis made every house around the village of Venray a stronghold, with hand-to-hand struggles even carrying into the hallways framed with miniatures of Dutch masters.

Fighting was equally intense on the lower end of the 460-mile front, where the U. S. Seventh army edged up the foothills of the Vosges mountains guarding the Bavarian border, and lashed at approaches to the 25-mile-wide Belfort Gap to the south.

Strict Control

In extending military government to occupied German territory, the Allies demanded strict obedience to regulations, and decreed death for espionage, armed resistance, unauthorized possession of firearms or a

Churning through muddy roads, jeeps carry U. S. troops to rain-soaked battle-front.

wireless transmitting set, looting or pillage, destruction of records and sabotage. Further, travel within Germany will be forbidden except by special permission, and all political prisoners, Jews and foes of the Nazi regime will be released.

Pending establishment of Allied control, postal, telegraph and telephone service will be suspended. Radios will be permitted.

'By Every Bush'

In calling up the guerrilla army to operate behind Allied lines, Hitler said:

"Just as in 1939 we are facing the enemy alone. In a first enormous effort of our German people's strength, we succeeded then; Germany's second all-out effort must and will succeed. Relying on our own force, we will not only break the enemy's will of destruction, but we will throw him back again . . ."

Addressing the reich from a barracks in East Prussia, under siege of Russian forces driving in from the north, east and south, Home Front Commander and Gestapo Chief Himmler ordered the defense of Germany ". . . by every village, every house, every farm, every ditch, every forest and every bush. . . ."

Massed Attacks

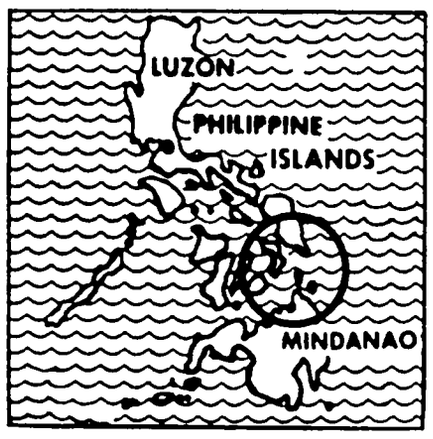
With the Russians attacking in force in East Prussia, driving into Czechoslovakia through the northern Carpathian mountain passes and battering enemy armored columns on the Hungarian plains, the Germans were hard pressed to hold their lines in the east.

Referring to the bitter fighting in East Prussia, where the Reds were employing upwards of 600 tanks, the Nazi radio exclaimed: ". . . The country is enveloped in smoke and belching flames and above it hangs the never ending din of battle. . . ."

PACIFIC:
Return to Philippines

Pursuing the tactics he employed in the Solomons, New Britain and New Guinea in separating enemy forces, General Douglas MacArthur struck at Leyte island in the center of the Philippines.

As the general's grand strategy shaped as the U. S. Sixth army, supported by the U. S. Third and Seventh fleets and carrier planes, not only were the Japanese on the main island of Luzon in the north divided from their units on Mindanao to the



Circle indicates region of U. S. invasion of Philippines.

south, but the Americans' foothold put them in position to threaten the enemy's supply lines farther to the west carrying vital raw materials from the Indies region up to the foe's home industries.

Under cover of an extensive air umbrella and the big guns of the U. S. warships, supplies were poured ashore to the American troops, who held a wide strip reaching southward from the principal port of Tacloban, and who girded for a showdown fight with an estimated 225,000 Japanese in the Philippines under Field Marshall Count Juichi Terauchi.

General MacArthur's invasion of the Philippines, fulfilling his pledge to return after the Japanese conquest of the islands less than three years ago, followed in the wake of the Third fleet's continued aerial attack on enemy shipping and aviation units in the Formosa and Manila regions, which prevented their free dispatch to counter the big invasion of Leyte.

The presence of substantial elements of the Third fleet in these waters, with warships as well as aircraft carriers in full array, also scared off the vaunted Japanese navy's incursion into the invasion waters, the enemy turning tail before large-scale action could develop.

General MacArthur's return to the Philippines was personal, the commander having directed the operation from a warship and then set up headquarters ashore.

FUEL:
Warm Winter

Due to a combination of high production of coal and efficient transportation, U. S. homes will be well warmed this winter, even though the government continues to advise conservation to assure orderly consumption to meet wartime needs.

With production having passed the 500,000,000 ton mark so far, soft-coal output is running 25,000,000 tons over last year. Not only are rail deliveries moving up to snuff, but careful planning has permitted the transport of great quantities of coal over the Great Lakes for distribution to adjacent territories.

How much foreign countries may draw on U. S. coal supplies remains undetermined, with British production lagging and miners threatening to strike for higher wages, and uncertainty existing as to what extent output may be resumed in liberated nations to help meet some of their own needs.

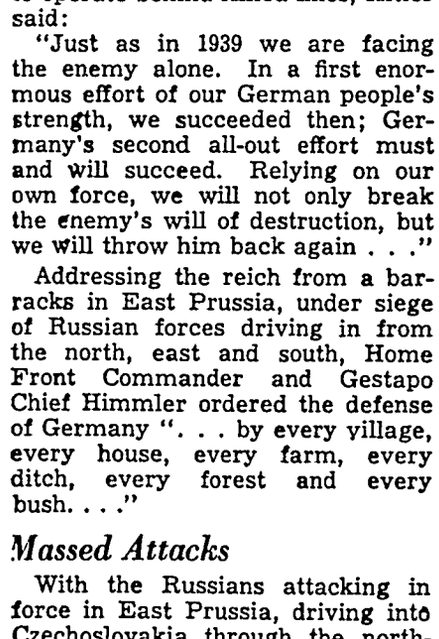
Oil Output

Rich in coal, the U. S. is equally rich in petroleum, with oil production estimated at approximately 5,500,000 barrels daily.

With its western and coastal fields alone yielding over 1,000,000 barrels daily, Texas, with its seven producing areas, leads the U. S. in output with over 2,000,000 barrels. With almost 900,000 barrels daily, California runs second.

Other big producers with their approximate daily output include Louisiana with 360,000 barrels; Oklahoma 340,000; Kansas 265,000; Illinois 200,000; New Mexico 100,000; Wyoming 98,000 and Arkansas 80,000.

With 50 barrels daily, Florida is at the bottom of the list.



While casting in the west fork of the Chippewa river near Hayward, Wis., Frank Shriner of Chicago, Ill., drew on a 3½ foot musky.

Twice the musky bumped into the spoon, then, enraged, really charged it a third time as Shriner pulled it in. Coming in hard, the musky crashed right into the flat side of Shriner's boat as he nailed the spoon and lay nearby belly up!

Then the musky rolled right side up, shook the spoon out of his jaws, and was off.

FARM EXPORTS:
Study Subsidies

Payment of subsidies to permit the American farmer to enter the foreign market at a profit was agreed upon by the Commodity Credit Corporation and cotton and wheat representatives, with details of the program still to be worked out and submitted to the state department and other government agencies for approval.

Under the proposals, the CCC would bear the difference in cost between domestic and foreign prices to enable American producers to meet cheap competition.

Where the CCC had cotton on hand, it would resell the commodity to exporters at markdowns. A similar procedure would be followed for wheat for export as bulk or flour, with the CCC reselling the commodity to shippers at an announced price.

RAIL TRAFFIC:
To Stay Heavy

As government agencies resisted increases in railroad freight and passenger rates, army officials predicted continued high traffic after the end of the European war as the emphasis on movement will shift to the west for acceleration of the struggle against the Japs.

In opposing the railroads' petitions for average freight rate increases of 6 per cent, and a retention of the 10 per cent boost in passenger fares, agricultural agencies declared heavy production assured the carriers of continued high tonnage.

Not only will the rails have to handle longer hauls to western ports for the Pacific war after Germany's surrender, army officials said, but rolling stock also will be needed for shipments to Atlantic ports, where some troops also will be sent out to fight the Japanese and supplies will have to be funneled for occupation forces and rehabilitation needs in Europe.

AIR TRAVEL:
Super-Liners

As the Civil Aeronautics board conducted hearings to determine costs and volume of traffic of future trans-Atlantic air travel to guide it in deciding how many companies should be allowed to operate over ocean routes, plans were presented for elaborate facilities to be used in such transport.

Listed for use by one airline was a new, and as yet undeveloped, combination passenger - cargo plane weighing 92 tons and capable of carrying 128 people by day and 119 by night 3,500 miles at a cruising speed of 288 miles per hour. Cargo capacity would be 2,082 cubic feet.

Also listed for use was Lockheed's famed Constellation, now in production as an army transport plane, with a passenger capacity of 40 by day and 30 by night and a cruising speed of 322 miles per hour. The Constellation holds an unofficial speed record of 6 hours and 58 minutes from Los Angeles to Washington, D. C.

May Ring Again

Repair of America's historic liberty bell so that it could ring out in full tone on V-day was proposed by W. J. Conley of the Lincoln Electric company of Cleveland, Ohio.

Housed in Independence Hall in Philadelphia where it was rung to summon citizens for a celebration of the Declaration of Independence, the bell cracked in 1835 while tolling out the death of Chief Justice John Marshall.

Of copper and tin structure, the liberty bell could be repaired by arc welding, Conley declared.

HURRICANE:
Sweeps Caribbean

Leaving unsecured dwellings uprooted, store windows smashed, power lines tangled and many persons killed and injured, a destructive hurricane swirled out of Havana, Cuba, and twisted across the Caribbean to lash along the western coast of Florida and then head over the mainland to the northeast.

As the hurricane moved northward at a rate of 15 miles per hour, with 60-mile-an-hour gales shifting in its path, residents of the thickly populated beach areas around Bradenton and Sarasota moved inland, with some seeking refuge in churches and schools. Residents of the low-lying coastal area on the Atlantic side of Florida were advised to retire to higher ground since abnormal tides were predicted.

Besides taking a toll of two lives in Florida, the hurricane blew virtually all of the state's record crop of oranges and grapefruit to the ground, causing damage estimated at $50,000,000.

FURNISHINGS:
Future Supplies

To housewives interested in the home furnishings market after the end of the European war, trade experts say:

"First to make their appearance on retail shelves will be such kitchenware items as can openers, dustpans, washtubs, scrubbing boards and pots and pans. Also . . . hand tools, shovels, nails and a wide variety of home repair articles. Speedy return of irons is also assured . . ."

The Washington MERRY-GO-ROUND

By DREW PEARSON

Washington, D. C.

NAZI MASS EXECUTIONS

Underground observers coming out of Germany have reported that the Nazis already have begun the systematic elimination of the vast army of slave labor imported from Russia, France, Czechoslovakia and various occupied countries.

Details of the story are so ghastly that they hardly can be believed. Yet the accuracy of the observers has stood up in the past; also the wholesale slaughter methods of the Germans at Lublin is already a matter of official record.

It is estimated that the imported slave labor inside Germany totals about 10,000,000. Either because Hitler fears their sabotage and rebellion, or else because they are a drain on Germany's food resources, machinery has been devised to kill them off. The number killed so far is estimated at around 1,500,000, though this is a very rough estimate. Absolutely definite, however, is the fact that mass execution depots, such as that at Lublin, already are set up in various parts of Germany. These have been witnessed.

Reason for the cold-blooded system of mass executions is explained as follows by underground observers who have come out of Germany: Originally, storm troopers were given a list of 15 to 20 persons and told to shoot them with their revolvers in the night. Sometimes this included whole families with children. So not even the S. S. men could take it. They suffered nervous collapses, had to be sent to sanitoriums.

As a result, the mass execution system was worked out at Lublin, and now at other places. It takes only a few men to handle the lethal chambers, and enough personnel can be found to perform the gruesome work without becoming insane.

* * *

LOST BATTALIONS

Of all soldiers in the U. S. army, the most distressed over the war department's demobilization plan are the men over 35 years of age. They get no extra retirement points because of age. In fact, some of them, because of bad health and inability to get overseas, may be among the last to leave the army following V day.

Stranded in camps throughout the U. S. A., they have become the "Army's Lost Battalions." Many were snapped up by selective service in the early days of the war despite deafness, blindness in one eye and shortage of fingers—all at a time when the army was in a rush to get almost anyone. Now many of these men are doing semimenial tasks.

At Fort Meyer, Va., one group is daily assigned to grave digging at the National Cemetery. Others count socks and shirts for the quartermaster corps, are now becoming psychological problems for the army. Some found that infirmities when they entered have become aggravated since, but will never be recognized as having received disabilities in service.

The war department points out that "theoretically" men over 38 had an opportunity to leave the army more than a year ago, if they had job opportunities in war industries. But the war department also admits that it had to stop somewhere, and that since the WAC recruiting program failed, it is now necessary to retain the 35-year-olds to make up for the scarcity of WACs.

* * *

ARKANSAS FARMER IN LONDON

What most impressed alert young Congressman Brooks Hays of Arkansas during his London trip was the farm miracle the British have performed during the war. Hays was Arkansas head of the Farm Security administration before coming to congress, so traveled widely in rural England, was amazed by the economy of land use.

"Here's an island about one-third as large as the state of Texas," Hays said, "but with 50,000,000 people. And it is growing two-thirds of all its food.

"The British won't keep on growing so much food after the war," Hays says, "but what they're doing with their land right now is miraculous. And they like it, even though most of them never worked in the fields before. I didn't talk to a single one who wasn't tickled that we had sent them less food and plenty of fertilizer and farm machinery. They're really proud of what they were able to do and glad they haven't had to eat nothing but handouts from this country."

* * *

CARTEL MYSTERY STORY

Last month, FDR wrote a letter to Secretary of State Hull, told him: "Keep your eyes on this whole subject of international cartels. . . ."

Now Wendell Berge, assistant attorney general in charge of trust-busting, has written quite a detective story of his own. It is a book entitled: "Cartels Challenge to a Free World." If you want to understand some of the major traps into which the coming peace may find itself ensnared, it's worth reading.

Walter Winchell

Notes of an Innocent Bystander:

This reporter couldn't believe his nose while reading a Variety report about the latest odious antics of blue-pencilers. But it happened in America, 1944. . . . Nonsensorship acts as if it were a candidate for the booby hatch. Frixample: NBCensors nixed a March of Time dramatization of M. Halsey's tome, "Some of My Best Friends Are Soldiers." The book's theme blasts intolerance. . . . The censor claimed the dramatization violated censorship policies (his own?), especially on the controversial subject angle, and was quoted: "You can say nothing about intolerance!" . . . That remark must make the Constitution shiver. The Bill of Rights has been stabbed with censorial scissors. . . . You can't say anything about intolerance in Germany. Opposing intolerance would only lead to a controversy with Hitler and his swastiskunks here. Does the censor fear offending them? . . . Our soldiers are shedding their blood while fighting intolerance—but an American can't oppose it with words. . . . It seems a censor in America desires to erect a concentration camp with a foundation of blue-pencils. Could anything be more arrogant and dangerous?

Wendell Willkie wrote these words a few years ago. They should be memorized by every American: "My creed, if I were asked to define it, would run something like this: I believe in America because in it we are free—free to choose our government, to speak our minds, to observe our different religions. . . . Because we are generous with our freedom — we share our rights with those who disagree with us. . . . Because we hate no people and covet no man's land. . . . Because we are blessed with a natural and varied abundance. . . . Because we set no limit to a man's achievement; in mine, factory, field, or service in business or the arts, an able man, regardless of class or creed, can realize his ambition. . . . Because we have great dreams—and because we have the opportunity to make those dreams come true."

In Fewer Words: It was easy for Willkie's enemies to hurt his heart—it was such a big target. . . . When we heard that Willkie passed away in his sleep it recalled the tribute that was once paid to another famed American: "Death had to take him in his sleep—it didn't have the courage to approach him while he was looking."

A short time ago this reporter made public evidence revealing the coddling of Axis war prisoners here. Our exposes were confirmed by many newspapers and magazines. . . . Now the House Military Affairs Committee announces that Axis war prisoners have not been coddled. . . . Eeeeekkkk!

A Federal Grand Jury's report on Philly's recent hate strike reveals that 1776 bigots refused to work with eight Negro workers. . . . In short: The 1776 Americans—didn't have its spirit.

Lovely Paulette Goddard told an interviewer: "You can always make money, and if you can't, it doesn't make any difference." . . . Paulette means it doesn't make any difference if you're rich.

Faces About Town: Donald Nelson, whose latest and best offer to return to private industry is $200,000. . . . Henry Kaiser building postwar world on a tablecloth at Henri's. . . . Myrna Loy stealing the show at the Stork. . . . Mrs. Roosevelt entering the enemy's battlelines (the News Bldg), where her syndicate is.

Manhattan Mural: He is a well-known star from Hollywood, recently here on an alcoholiday. . . . After a long day and night of making the joynts some pals defied the 4 a. m. curfew and took him to a speakeasy which never closes. . . . The pals introduced the star as "a police official." . . . On the way out the proprietor vigorously shook hands with the very drunk actor—and slipped $20 into his paw!

Sounds in the Night: At the Zanzibar: "He's the fair-haired boy of the foul-ball set." . . . At Versailles: "Her definition of a bachelor is a selfish, undeserving guy who has cheated some woman out of a divorce." . . . At the Onyx: "Hmf. They argue about what kind of a peace to give Germany, which has given the world no peace!"

Midtown Vignette: He had just been hired as new headwaiter at Reuben's. To show Arnold, the boss, that he was on the hustle, he suggested: "You should get different waiters. These men haven't much energy." . . . Reuben gave him the fishy eye and then said: "These men have been with me for 20 years. They know they can stay here as long as they live." . . . "Okay," said the newcomer, "that's your responsibility. But don't forget I tried to help." . . . Three weeks later he died from a stroke.

SNAPPY FACTS ABOUT RUBBER

Check your tire pressure before inflating and save tire mileage and troublesome flats, urges the Office of Defense Transportation. A passenger car tire that is 3 pounds below the lowest of its running mates can be suspected of having an undisclosed puncture. Five pounds' variation is allowed in truck tires.

Ordinarily statistics are dull, but here are some that are significant when you consider that a 6.00-16 passenger car tire weighs about 22 pounds: There are 60,000 pounds of rubber in a battleship; 55,195 pounds in an aircraft carrier without plane complements; 4,350 pounds in a destroyer; 65,000 pounds in a submarine.

Kidneys Must Work Well
For You To Feel Well
24 hours every day, 7 days a week, never stopping, the kidneys filter waste matter from the blood.
If more people were aware of how kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.
Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.
Why not try *Doan's Pills*? You'll be using a medicine recommended the country over. *Doan's* stimulate the function of the kidneys and help them flush out poisonous waste from the blood. They contain nothing harsh. Get *Doan's* today. Use with confidence. At all drug stores.
DOAN'S PILLS

169 Years U. S. Marines Have Been Fighting Their Country's Battles on Land and on the Sea

niversary Finds orps in Forefront Of War Against Japs

e United States marine s celebrates its 169th anni- ary this November 10th, out pause and with no fan- . For the relatively small ine corps this has been a of herculean tasks, never re equalled in the long and ic history of the corps. Over sands of miles of Pacific n, Leathernecks have leap- ged to within bomber-range apan itself. Behind them lay heaviest marine casualties history—but small when ghed beside one of the great- military sagas ever written in a period of twelve months. e November 10th, last, ma- s have advanced the front Japan by at least three thou- d miles, all the most difficult l of amphibious operations inst an enemy who did not w how to surrender except eath on the point of a ma- bayonet.

nce the year 1775 when Capt. ert Mullin recruited the first ines in the Tun Tavern at Phila- hia, Leathernecks have ex- ted as their share, the hardest of fighting. The first two bat- ons of marines were promised ing more than six dollars a th, a liberal daily ration of , and plenty of action. For the 169 years Leathernecks have action in virtually every er of the world.

the War of Independence the -born marines served creditably and and sea. Their first recorded on was a raid on New Provi- ce in the Bahamas. A detach- t fought with Washington in the tle of Princeton and in the sec- Battle of Trenton. Marines were present for the historic cross- of the Delaware and were part he force that surprised the Hes- garrison on Christmas Eve, . Among their earlier admirers John Paul Jones who saw them action and openly spoke his ad- ration.

Reorganized in 1798.

ith the coming of peace, the ines were disbanded, not to be med again until 1798. It was seven rs later that they set out on their t overseas venture—an opera- that was later to be recorded the Marine Corps hymn. This ion ("shores of Tripoli") was de notable by Lieutenant O'Ban- who led seven marines and a ndful of natives in one of the most ing raids in military history.

lways busy, the year 1812 found ines in action again. They fought many engagements, from Lake e with Commodore Perry to New eans with Andrew Jackson. It remarked even in those days t such a small force—numbering rcely more than a thousand — ld fight so effectively on so many nts.

he marines were still a very all force when they went into ion in 1845 in the War with Mexi- . But despite their numbers they k a major role in the attack on Fortress of Chapultepec, and, ning with a small force under ut. Ulysses S. Grant, marched to gates of Mexico City.

or the next 50 years the marines re relatively idle. They played an casional part in restoring order in ntral America, but they didn't get to action on a serious scale again til the Spanish-American war. In is contest they struck the first ows for American arms; they won e first victories; they electrified e nation with their skill and dar- g. Rarely has such a small group fighting men received so many corations for valor.

At Front in World War I.

World War I also demonstrated e high percentage of individual arine heroism. One thousand, six ndred and sixty-eight marines re- ived awards despite the fact the arine corps was still a relatively mall organization. The first Ameri- an to win the Congressional Medal Honor was a marine—Gunnery gt. Charles F. Hoffman who lenced five enemy machine guns Belleau Wood. Typical of marine pirit was this report: "5:30 a. m.— our officers and 78 prisoners ar- ived at brigade headquarters rought in by Marine Private eonard to whom they surrendered the Bois de Belleau."

Marines entered World War II on he firing line. "Send us more Japs" wired the beleaguered marines on

A weary machine gunner carries his gun on his shoulder and his rifle in his hand, as he trudges along a soggy trail on New Britain island. Another Marine slogs along behind him, with a can of lubricating oil in each hand, while a jeep bounces past. Marine units made their first landing on New Britain on Christmas, 1943. It took many bitter weeks to clean out the Japs.

Wake Island. On Bataan they fought with equal courage. At Midway they helped stem a major enemy invasion. Then on August 7, 1942 they were again chosen by their country to spearhead an offensive. Guadalcanal was the first offensive blow struck by the Allies against Japan. First Division marines fought ashore carrying with them the hopes and prayers of the entire civilized world.

Leathernecks, recently returned from overseas, often debate the relative fierceness of the battles in which they have engaged the enemy. All admit that Guadalcanal rates with the toughest. For weeks the marines fought on short rations and with the enemy fleet and air force in almost constant attendance. When the marines finally moved out for a rest, they had secured the first toehold on the Japanese perimeter of defense.

Bougainville, Makin, New Georgia followed. Then came Tarawa. Here the marine corps fought its costliest battle. Moving in on the shattered island the morning of November 20, 1943, marines found the preliminary shelling had failed to dislodge the Japanese. The first 24 hours saw the marines clinging to a beachhead 100 yards long and 10 yards deep. Surmounting almost certain catastrophe, the marines rallied the second day to drive inland. By the third day they had completely secured the island.

Leap to Marshalls.

Moving northward, the marines next invaded the Marshall Islands, meeting with less resistance because they had learned at Tarawa to land on flanking islands before assaulting the enemy's main positions.

Marines in this period also were fighting on New Britain Island, Cape Gloucester standing as their chief campaign. But they soon withdrew from this theater.

Weeks passed before the marines struck again. This time they leaped forward 1,700 miles — from the Marshalls to the Marianas. This, the world realized, was a blow to the Japanese stomach, for Saipan would bring U. S. bombers within range of Japan proper.

The ensuing battle was waged on land, sea and air. The Japanese fleet, drawn out to meet this threat, was turned back by long-range carrier - based bombers. Ashore the Second and Fourth marines, aided by an army division, ran into even harder fighting than they had met at Tarawa. Saipan, a large island with mountains, posed an entirely new kind of tactical problem to marines. But, versatile as ever, they soon had secured their beachhead and were moving across the island. The enemy fought to a suicidal end at Saipan. Even the native population joined in the battle and, when they saw their cause was lost, leaped into the sea.

Tinian and Guam followed soon after. In re-taking Guam the Leathernecks evened the score for the marine garrison which was overwhelmed on that island at the outbreak of war.

This series of successes—Saipan, Tinian, Guam—caused an upset in the Japanese government and led to a bad fright for Tokio. The Japs were not given much pause to swallow the implications of these victories. The marines struck next at Peleliu in the Palau group. The Japs quickly saw that this was a blow aimed at the Philippines.

Thus the Japanese tide of conquest ebbed. The past year has taught the Jap to dread the marine. In one important operation the fact that marines were involved was withheld as information of value to the enemy. The enemy who learned his lesson from the Leathernecks on Guadalcanal now may agree with Allied observers that the United States marine is "the most superb fighting man in the world."

First Hours Ashore On Peleliu Cost Marines Heavily

By T/Sgt. Benjamin Goldberg

PELELIU, PALAU ISLANDS (Delayed)—The island was covered with a pall of black smoke as the Marines landed.

Each wave of Leathernecks was met with intense enemy fire. Mortar shells knocked out amphibian tractors. From the rocks flanking the beach came machine gun fire. From the groves came rifle fire.

The Jap was everywhere. In caves, in pillboxes, in foxholes, under brush, concealed in palm trees, wrapped in fronds. And he took a heavy toll.

One marine reeled to the beach, arms dripping blood. As he was about to drop into a foxhole, he was slain by a Jap sniper.

A corporal led his machine-gun squad into action. In 20 paces, he lost six men.

An officer lay in a shallow foxhole speaking over the radio telephone. A mortar shell plopped nearby. The officer was killed instantly. A corporal beside him was chipped by shrapnel.

In the first four hours, the Leathernecks advanced only 150 yards. One unit found a cave with three openings. Twenty feet away was a marine, lying on his side. He had been wounded at the front line and was returning, alone, for treatment when a Jap shot at him from inside the cave. A sergeant raced to aid him while the other men of the unit covered him with rifle fire. The sergeant crept to the mouth of the cave, emptied his clip. A second later he was dead from a bullet between his eyes. A lieutenant inched forward. He too, was shot dead.

Flame-Throwers Flush Japs.

One Jap was flushed out of the cave by flame-throwers. He was shot. A second one charged out. He, too, was killed. Grenades were thrown into the hideaway and chased out a third enemy soldier. He was killed. There was one who refused to budge. Twenty pounds of explosive in one cave mouth and the flame-thrower in the other two accounted for him.

At dusk, the Japs counter-attacked. One of their tanks and some infantry broke through, almost —but not quite—to the beach itself. Two of our amphibs came up to meet the assault. They were knocked out. A third came up and put the Jap tank out of action. Two Japs leaped out and were filled with bullets before they reached the ground. The Japs lost 50 men and withdrew.

All night the marines stayed in their foxholes, while mortar shells fell about them. From the rear came sniper fire. These snipers criss-crossed our positions with rifle and light machine-gun fire.

The landing craft opens up, and fully equipped Leathernecks dash onto the beach at Bougainville in the northern Solomons. This scene was repeated thousands of times as the marines attack island after island, driving the Japs from the south Pacific. The third marine division, members of which are pictured here, bore the brunt of the savage fighting in the Bougainville invasion. They fought five engagements in the first month ashore, enduring all the misery of the rainy season.

THE CHURCH DURING WAR AND PEACE

LESSON TEXT—Matthew 5:43-48; Romans 13:1-7.

GOLDEN TEXT—Blessed are the peacemakers: for they shall be called sons of God.—Matthew 5:9.

Everywhere men are talking about the coming peace. They are concerned lest having won a war we may lose the peace through the selfishness or the indifference of men. It is a great problem and one about which we are rightly concerned.

Why is it then that the most important factor in assuring a just and friendly settlement of the problem is left out of men's deliberations? Why is there so little (if any) thought of God and prayer to Him for the needed guidance and wisdom?

We know that there can never be an abiding peace until Christ comes to establish His kingdom, but in the meantime, we should seek to bring Christian principles to bear on the relations of men and nations. We are to show:

I. A Higher Measure of Love (Matt. 5:43-48).

The world has established its own principle of conduct based on selfish advantage. It pays to be polite to those who can favor you, so cultivate their good will by acts of courtesy and kindness. Your neighbor may be able to help you in an hour of need, so do good to him as you have opportunity.

But an enemy—what can you gain from kindness to him? Hate him, and treat him like an enemy.

Christianity knows nothing of such a spirit. Even though it be necessary to fight against wicked men in order to hinder their evil plans, we need not lose our love for them. Even those who despitefully use us may be loved for Christ's sake. "Consider Him that endured such contradiction of sinners against Himself" (and went right on loving them), "lest ye be wearied" in your own love for those who bear the sad name of enemies (see Heb. 12:3).

This is admittedly a high standard, but it is not too high for those who know the love of Christ.

II. A Higher Degree of Loyalty (Rom. 13:1-4).

An intelligent Christian is the best citizen. He knows that all government is based on the power and authority of God, and hence he recognizes the legality and authority of duly constituted governmental agencies.

No matter how much man has perverted or degraded government, yet it is in essence the expression of a ministry of God (v. 4). How deeply ashamed that should make those who regard political office as a means of personal gain and advantage, or who use their authority to permit or promote that which is against God.

Every public official should recognize God as the giver of his authority and seek the Lord's special grace and guidance in the discharge of his duties. Every citizen should highly regard the one who rules as having a power ordained of God (v. 1), for the good of the nation (v. 4).

Here then is the solution of the political problems which are causing upheaval all over the world, namely, a revival of Christian testimony and faith, for it will lead to a loyalty on the part of the people which is quite unknown where Christianity does not bring its true influence to bear.

That kind of love for men and loyalty to government necessarily brings about:

III. A Higher Standard of Patriotism (Rom. 13:5-7).

There is more to real patriotism than flag waving and high-sounding oratory. There must be a conscientious willingness to serve the nation in willing obedience to the command or the request of proper authority.

The Christian gives just that kind of patriotic support to his country (v. 5). His enlightened conscience demands it, and he responds.

Then too, there must be support of the government by the payment of taxes. Think of the thousands who are engaged in the business of evading their just share of the cost of government.

The Christian has no share in such things, for he is ready to pay his share of the expense of government as a ministry of the Lord (v. 6).

No government can function properly nor long endure which does not have the respect and confidence of those governed. There can be nothing but criticism, discontent, and disobedience in such an atmosphere.

We have said it before, but we say it again—the best thing that could happen to America politically is a revival of Christianity. Our national leaders ought to set the example and encourage the people to follow in repentance, restitution and God's blessing. Read II Chronicles 7:14.

THE AUTO CRISIS

You'd never realize it when trying to cross the street, but America is running short of automobiles.

—*—

There are 4,000 fewer cars on the roads of the country every day. (Ed. Note—But the remaining ones all seem to get into the same street.)

—*—

OWI announces officially that autos are giving up the ghost at the rate of 120,000 a month and that the country is millions short of its prewar quota.

—*—

And the remaining cars are suffering from every auto disease in the book, due to the difficulty of getting replacements and repairs. A body squeak no longer bothers anybody, a rattle is accepted as part of the all-out war effort and a lack of paint is taken as proof of 100 per cent Americanism.

—*—

Mr. and Mrs. America now go blithely hither and thither (especially thither) in cars that only the ashman would have been seen in a few years ago. And you should see what the ashman is driving today!

—*—

In the prewar days it upset a man if the clock got out of order. Today he doesn't feel right if the entire mechanism isn't close to collapse.

—*—

Where a slight squeak in a rear spring used to worry dad, he now shows no uneasiness up to the point where he hears an axle dragging.

—*—

Mom used to go into a dither if she found a spot on the sedan upholstery. Now she remains calm when she finds mice nesting all over the old boiler.

—*—

Important items like carbon, worn cylinders, etc., have ceased to concern them. If there's a wheel on each corner of the old flivver and the gears mesh, they think everything is swell.

—*—

The main trouble is due to the fact it is almost impossible to get repairs made. The day when you could just drive into a garage and leave the jalopy with a "Give this a good going over; it knocks when doing over 60," are over for the time being.

—*—

You now approach the service station timidly, salaam courteously and in an imploring voice plead with the boss to bind up the flapping parts with adhesive tape.

—*—

And too often the answer is "You expect me to have a spare bolt around the place! Doncha know there's a war on?"

—*—

Uncle Sam had better start up a few auto factories soon. Americans can stand anything but walking.

* * *

After Listening to a Well-Known Radio Program

I

Mommer sometimes quarrels with daddy—
Daddy sometimes quarrels with her—
Little arguments are frequent—
Often lively tilts occur;
They are very unimportant,
But we think we'd better go
Down to Mr. Alexander
And get on the radio!

II

I'm a little girl of seven
And a most obnoxious brat,
(Father says I shouldn't marry
Till I know where I am at);
Mother says that popper's crazy,
And it's getting in my hair,
So I'm booking us for Sunday—
We'll confess all on the air!

III

I've a cousin who is married
To four women at one time
And he thinks it is old-fashioned
To call bigamy a crime;
But his last three wives are touchy-
His behavior they dislike,
So they've asked Doc Alexander
To present 'em on the mike.

IV

If a young girl lets a stranger
Hug and kiss her, is it nice?
Is it wrong to kill a parent
Who attempts to give advice?
If a schoolgirl chews tobacco
Should her pa and mommer care?
'Twill be settled on the airwaves
As a coast-to-coast affair!

V

Should my aunt who's nearly eighty
Wed a bus boy on a dare?
If my daddy takes in washing
Is it purely his affair?
Have you problems confidential,
Highly personal, you know? . . .
Let them help to sell cathartics
On the Sunday radio!

* * *

READY TO GO
There stands Adolf,
Super dud,
Poised for flight by
Super sub—

Sweating through a
Fearful urge
To give out the
Word "submerge!"

Master Race boy
Loses wish,
And becomes a
Super fish!

Sweetheart Apron, Organdie Ruffling

Party Apron

A HOSTESS apron which everyone, young and old, admires—it's a big 20-inch heart made of two thicknesses of red organdie and frilled with white organdie ruffling. Wear one at your next party and see what a "conversation piece" an apron really can be. Makes a delightful and unusual gift, too. Plan on giving your service wife friends a "sweetheart" apron. They'll love them!

* * *

To obtain complete cutting and finishing pattern for the Sweetheart Apron (Pattern No. 5783) send 16 cents in coin, your name, address, and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE NEEDLEWORK
530 South Wells St. Chicago.

Enclose 16 cents for Pattern.

Splendid Cough Relief Is Easily Mixed at Home

No Cooking. Makes Big Saving.

To get quick and satisfying relief from coughs due to colds, mix this recipe in your kitchen. Once tried, you'll never be without it.

First, make a syrup by stirring 2 cups granulated sugar and one cup of water a few moments, until dissolved. A child could do it. No cooking needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Then get 2½ ounces of Pinex from any druggist. This is a special compound of proven ingredients, in concentrated form, well-known for its prompt action on throat and bronchial membranes.

Put the Pinex into a pint bottle, and add your syrup. This makes a full pint of splendid medicine and you get about four times as much for your money. It never spoils, and tastes fine.

And for quick, blessed relief, it is amazing. You can feel it take hold in a way that means business. It loosens the phlegm, soothes the irritated membranes, and eases the soreness. Thus it makes breathing easy, and lets you sleep. Money refunded if not pleased in every way.

Happy Relief When You're Sluggish, Upset

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

EDITORIAL COMMENT

THE ELECTION IS OVER

The election is over. The majority of the people in the United States decided that Roosevelt was the man to lead our nation to victory and a lasting peace.

The majority rules and we are going to pitch right in and do our bit to support our government in winning the war and winning the peace to come. This writer voted a straight Republican ticket and we are proud of it.

But now the time has come to forget our politics and get into the harness and get back of our President, who is Commander-in-Chief of all our armed forces, here and abroad. The winning of the war and the winning of an ever-lasting peace must be our first job. After that we can go back into politics.

A good sportsman must be a good loser. We Republicans lost this big game, but let's be good losers and do all we can to support our President in the big job he has before him. This is no time for disunity.

Let's be true Americans.

Saddle Horse Classes To Be Added To 4-H Show For 1945

Saddle Horse classes will be added to the premium lists of the Hancock County 4-H Show in 1945.

They will include Suckling Colt, Yearling, 2 Year Olds, 3 Years Olds. Two other classes will also be added in the saddle horses: they are a Stock Horse class and the Pleasure Horse class. All of these classes will be strictly 4-H exhibits.

This announcement is made by County Extension Director, Paul Henderson, and the Achievement Show Association.

Marengo officers are endeavoring to put a stop to motorists parking too close to fire hydrants. One night recently fficers ordered a garage owner to pull three cars in—it cost the drivers $2.50 to regain possession of their machines. Another help to proper parking in the business section is the repainted yellow lines showing where to and where not to park.

IMPORTANT MESSAGE TO HANCOCK COUNTY FARMERS

Farmers Will Be Assured Of Ample Supplies Of Soy Bean Meal

With every possible pound of fats and oils needed to fill large military and civilian requirements during the coming year, Alfred Josten, chairman of the Hancock County Triple-A is urging all soybean growers to market their entire '44 crop for crushing and to depend upon meal rather than whole beans for livestock feed.

Mr. Josten declared that a procedure has been developed under which soybean producers who market their crop are assured sufficient meal to meet their feeding requirements. This procedure is now in operation in Iowa and all other central states.

The plan provides that soybean growers who have marketed their beans and are unable to buy meal for their livestock through regular trade channels will be furnished certificates entitling them to supplies of meal from Government set-aside stocks. The certificates are issued by local Triple-A offices.

Mr Josten pointed out that the U. S. soybean crop this year is about 5% below last year's and that supplies of fats and oils vitally needed for civilian, military, lend-lease and foreign relief purposes may be around 700 million pounds less than in 1943-44. The edible fat situation, he said, will be particularly tight.

By selling whole beans to crushers and feeding meal, Mr. Josten said, farmers will not only help to ease the fats and oils shortage, but will realize certain price and livestock feeding advantages as well Prices for soybeans are now supported by the Government at $2.04 per bushel. After the oil is extracted from a bushel of beans there is around 45 pounds of meal available for feed. This 45 pounds of meal can be purchased for about $1.35 on the basis of average current prices. This means a price advantage of about 69 cents per bushel to the grower who sells his beans to the processor and obtains meal for his feeding needs rather than feed whole or ground beans. According to Government livestock nutrition authorities, the oil when fed in whole beans contributes but little or nothing nutrionally to the animal's diet, ad is not as efficient a feed as meal. Furthermore, he added, the meal is properly toasted and cooked and approaches tankage in ease of digestibility and nutrition.

HERE IS A WORD FOR THE WISE— IT'S 'PNEUMONIA'

Health Department Says Annual Rise In Prevalence Is Due

The Iowa health department today had "a word to the wise" and the word was "pneumonia."

On the basis of past performances, pneumonia should start its annual winter rise this month, according to the department , and now is the time to take the offensive against it.

Two main lines of attack were suggested against this disease which during the first six months of 1944 took 626 lives compared with 566 during the same period a year ago. The methods given for fighting the disease were:

1. Try to prevent getting it by avoiding contact with persons who have respiratory infection, especially colds.

2. Don't wait to start treatment if you get it. Get under treatment immediately when you suspect that you might have the disease.

Symptoms Of Pneumonia

Typical symptoms which serve as clues to the presence of pneumonia include: A cold which usually precedes the disease, sudden chill, a sharp rise in temperature, pain in the side or chest, and cough with blood-tinged sputum.

"When these symptoms occur," the department said, "don't hesitate about starting treatment. You can't outwait pneumonia and if you are wise, you won't attempt it."

Iowa health records of the past three years show that during each of these years the pneumonia death trend was well on the way upward in November. There was a rise from 63 deaths in October 1941 to 75 in November that year, from 63 to 86 for the same months the following year, and from 64 to 71 in 1943. During each of these years the trend continued upward in December and held at a high level throughout the remainder of the winter.

We want your news. Phone 12.

In 1805, Robert Fulton demonstrated a method of destroying ships by exploding a charge of gunpower against the hull under water.

SCHOOL CHILDREN DID FINE JOB COLLECTING MILKWEED

Hancock County Children Gathered 2,448 Bags For Military Use

Chas. S. Whitney, county superintendent of schools reports that the school children of Hancock County collected a total of 2448 bags of milkweed pods. All bags have been collected from the schoolc by the county trucks and are stored in AAA bins at the Milwaukee tracks. The number of bags is about equally distributed between bin 202 in Britt and 488 in Garner.

Hancock County has over one-half a freight box carload of pods. The present plan calls for shipment to Petoskey, Michigan, about November 21, along with the pods from either Winnebago or Kossuth county.

Garfield School Leads

The rural school reporting the greatest number of bags collected is Garfield No. 5, Mrs. Maynard McFerrin, teacher, with 123 bags. Ellington No. 3, Mrs. Maxine Fender, teacher, is second with 73 bags. Both Garfield No. 5 and Ellington No. 3 have an enrollment of eleven or more. Twin Lake No. 9, enrollment of ten, Ann Nieman teacher, is third with 66 bags. Garfield No. 5 and Twin Lake No. 9 are eligible to receive an American Flag 3'x5' as a prize, according to rules of the contest.

The individual credited with collecting the greatest number of bags is Verne Hejlik, of Garfield No. 5, whose total is equivalent to 117 bags. Verne is the winner of the $25.00 War Bond offered by Mr. Earl Ruka of Klemme.

Goodell School Leads Towns

The independent school reporting the greatest collection is Goodell with 104 bags.

The children are being paid at the rate of 20 cents per bag. A check of $310.30 has been received and distributed to the various schools through the office of the county superintendent. A second check of $183.00 is still coming to make final and complete payment for all pods collected.

A preliminary report of the state shows Hancock county near the top in the number of bags of pods collected.

It takes about 1 3-4 pounds of either milkweed or kapok fiber to hold up a man in the water. On the basis of figures submitted by the War Hemp Industries, the pupils in the schools of Hancock county have collected enough floss to provide a life jacket for every man in the service from this county.

Good Cheer vs. Cold Feet...

Is the fuel problem burning us up these days? Not ex

We try to take it cheerfully—to remember that every we do to keep the home fires burning—and the home smiling, will help to scorch Herr Hitler!

He hates to think of Americans comfortable and conte He'd like for us all to freeze.

He found out, in the past winters in Russia, that fri means more than a mere headache.

We've had our headaches, too, but we've accepted the minor casualties—knowing that the headaches are les when we recall that we are the trustees of a certain am of morale in our community. It's our job to spread i as fairly as possible, and a portion of good nature with it.

Good Cheer has a lot of B.T.U.'s, too.

We do not forget that cold feet at home will retard vi

We like to think we've got at least a LITTLE of w takes, besides FUEL, to cure cold feet.

SCHOOL NEWS

BASKETBALL NEWS

Red Buntenbach, Reporter

Basketball practice began October 30th with about 25 boys out for training. There are eight lettermen who reported for practice: Terry Peck, Jim Thomas, Ewald Grosshuesch, Dean Jacobs, Ronald Brinkman, Harlan Nuehring, Edw. Barz and Red Buntenbach.

Coach Kingery annouced the following schedule:

Nov. 16. Hayfield, there.
Nov. 21. Garner here.
Dec. 5 Swaledale, there.
Dec. 7. Goodell, there.
Dec. 14. Kanawha, here.
Dec. 17 Gocdell, here.
Jan. 8. Britt, there.
Jan. 11. Thornton, there.
Jan. 15. Ventura, here.
Feb. 2. Kanawha, there.
Feb. 8. Hayfield, here.
Feb. 16. Garner, there.
Feb. 19. Britt, here.
Feb. 23. Swaledale, here.

Season tickets will be sold. Come out and support the team again this year.

SENIOR CLASS NEWS
Patricia Kudje, Reporter

Our first vacation of the year was for the Teachers Convention in Des Moines. We all made good use of the extra two days, I'm sure, and we hope the teachers enjoyed them, too

Monday morning we had an assembly Mrs Turgasen led us in singing some songs that we like We chose sides for a contest on the purchases of War Bonds and War Stamps Ronald Brinkman and Ivan Blumer are the leaders and we want a good fight for the honor of the highest investments.

We have some more new books, "Lost Island," "Pastoral, "% Postmaster" and others.

As for our classes, we are still studying hard. After all, we do want to graduate.

JUNIOR CLASS NEWS
Jeanne Trumbull, Reporter

The Typing classes are making very good progress. Some of the students can type more than 20 words a minute.

We study the News Review in Literature class and discuss events that are taking place at home and abroad.

The total receipts for the Junior Class play were $107 00

There was no school last Thursday and Friday as the teachers attended the Iowa State Teachers Convention at Des Moines.

The girls and boys have Physical Training class outdoors and some of the period is usually spent playing soft ball.

THIS CAFE WILL BE CLOSED

..For Several Days While we are moving and remodeling.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
Miss Bugh, Teacher

Those who enrolled in Kindergarten are:

Berleen Bridges
Martin Brinkman
Marlene Drake
Carl Heginger
Janice Stokesbary
Shirlene Swanson
Eva Thieman
Barbara Thompson
Ronald Trampel

On Tuesday afternoon we enjoyed a Hallowe'en Party. We brought Jack-O-Lanterns which were lighted. Miss Bugh told Hallowe'en stories to us and gave us treats.

THIRD AND FOURTH GRADE NEWS
Miss Holmes, Teacher

The Third and Fourth grades have been busy during art periods making decorations for the room

We have been making things for Hallowe'en, such as black cats, bats, ghosts, pumpkins, jack-o-lanterns and other things that would scare people.

Dennis Ridder added to the decorations of our room by bringing several paper pumpkins and lanterns. Several of the other boys and girls brought jack-o-lanterns which were lighted for our party Tuesday afternoon.

We were very happy to have the Sixth Grade read us a poem called "Little Orphan Annie." We enjoyed it very much and wish to thank them for coming in our room.

FIFTH AND SIXTH GRADE NEWS
Mrs. Voetberg, Teacher

On Tuesday afternoon the Fifth and Sixth Grades had a Hallowe'en party. Games were played and treats were had. Everyone enjoyed themselves.

In Sixth Grade Reading we have memorized James Whitcomb Riley's poem "Little Orphan Annie." On Tuesday afternoon we gave it before the Third and Fourth Grades, and the Seventh and Eighth Grades.

The Sixth Grade Geography Class has completed their study of Australia and New Zealand. Our new unit will be India.

The North West Central States is our next unit in Fifth Grade Geography. We are especially interested in this group of states because Iowa is included in them.

We are all happy over a two-day vacation this week. The teachers have gone to Des Moines to attend the Iowa State Teachers Convention.

SCHOOLMASTERS' CLUB MET TO NAME CHAIRMANSHIPS

The Hancock County Schoolmasters' Club met in the Garner Cafe Monday evening as dinner guests of the county superintendent.

Committee chairmen, appointed by the executive committee of the club, were approved as follows:

Athletics, McGowan, Kanawha; Music and Dramatics, Thies, Britt; Social, Executive Committee; Program, Brown, Hayfield; Legislative, Tweed, Garner; Publicity, Troupe, Corwith; County Council, Kingery, Klemme.

Government Projects:

Hot lunch, Cataldo, Crystal Lake; Fee, Goodell; Truesdell, Woden.

Tenative plans for a professional program for the remainder of the year were discussed. The plan includes meetings for all teachers and also for school board members. The next meeting will be held in Garner in December.

The Executive Committee: Chas. S Whitney, President of the Club; H. H. Brown, Vice President; Arlo McGowan, Secretary and Treasurer.

4-H COMMITTEES PLAN FUN NITE FOR NOVEMBER 25TH

A rip-roaring good 4-H and F. F. A. Fun Nite program was planned by committees of 4-H leaders and members Thursday evening, Nov. 2nd.

All 4-H and F. F. A. members and families in Hancock County are invited to attend and take part in the evenings festivities.

Awards will be given to 4-H members so be sure you are there to receive your award. Lunch will be served.

Invite the prospective members and their families. Make this event the high light of the 4-H club year. Send in your enrollment lists and cards so everyone will get an invitation.

England Tills Soil as War Cuts Food Imports

In the five years Britain has been at war, she has increased her food production, in terms of food value, over 70 per cent, and in terms of shipping space, over 120 per cent. The acreage of arable and permanent grass has been almost exactly reversed. In 1939 there were 13 million acres of arable, and about 19 million acres of permanent grass; in 1944 there were 19,200,000 acres of arable, and under 12 million of grass.

The area of land in Britain under crops increased during the five years by about 6 million acres. In Northern Ireland, increased tillage acres are about 80 per cent, compared with 70 per cent in England and Wales, and with 40 per cent in Scotland.

The wheat acreage increased from 1,018,000 in 1939 to over 3,200,000 in 1944; the potato acreage from 700,000 acres in 1939 to 1,400,000 in 1944.

Milk is priority number one. In England and Wales, sales of liquid consumption of milk totalled 363 million gallons in the year ending March, 1939; the total for the year ending March, 1944, was 1,040 million gallons. In Northern Ireland, sales for liquid consumption increased from 15 million to 34 million gallons.

Hocus-Pocus—This Outfit Detects Counterfeits

How an electric spark may quickly detect counterfeit coins is revealed in a patent granted to Hjalmar L. Petersson of Stockholm, Sweden, (Pat. No. 2,100,977). The invention not only detects counterfeits, but automatically separates them from the genuine coins.

As the coin drops down a chute it is momentarily held and an electric spark is caused to jump between the coin and an electrode. Light from the spark passes into a spectroscope, a device which breaks the light up into a spectrum.

The spectrum of light is then focused on a slit. If the coin is genuine, the focused beam of light will pass through the slit and strike a photoelectric cell. The cell converts the light into electric energy, which operates a relay. In turn, the relay swings a hopper over the genuine coin receiving box, into which the coin falls.

On the other hand, if the coin is a counterfeit, the electric spark gives a spectrum which, when focused, will not wholly enter the slit, but hits a blocking screen. In this case the relay is acuated to swing the hopper over the box which receives the counterfeit coins.

Young Inventors

Speaking of young inventors, Sir William Perkin invented aniline dyes at 18. Then comes William Siemens at 20 with the steam engine governor, Bessemer at 21 with electro-plating, Marconi at 21 with his first patent on radio, Edison at 24 patented the stock ticker, Howe at 26 the sewing machine, Whitney at 27 the cotton gin, Watt at 29 the steam engine, Bell at 29 the telephone, Mergenthaler at 30 the first linotype, Nobel at 34 dynamite, Eastman at 34 the kodak camera, the Wrights the airplane at 34 and 38, Fulton at 36 the submarine, Goodyear at 39 patented vulcanization of rubber.

Fulton at 42 patented his steamboat, Siemens at 44 the dynamo and open hearth process, Stephenson at 45 the first successful locomotive, Morse at 46 brought out the telegraph, Roentgen made his X-ray machine at 50, Daimler patented his gasoline vehicle at 52, and Harvey patented Harveyized steel at 67, the end of the list.

Work Garment

Here is a five-way test for a home work garment: It is comfortable—allows for free action, and for warm weather it is cool as can be; it has safety-first features, such as sleeves that won't catch on pan handles; it has time and energy-saving features—easy to make, to put on, and to launder; it is durable material and workmanship, and it is attractive because of good design, and not because of some outside decoration like an embroidered flowerpot or perky bow. Patterns for these garments are now being produced by a commercial company for the home seamstress.

Sedan, Old French War Ground, Set Auto Style

The panzer breakthrough that flanked the futile Maginot line in 1940 occurred at Sedan. Once before France's armies suffered decisive defeat at Sedan by aggressor Germany. On September 1, 1870, during the Franco-Prussian war, a French army of 81,000 found itself completely surrounded and was systematically cut to pieces in a bloody two-day battle. The invaders quickly pushed on to Paris.

In 1914 France drew the enemy on, allowing Sedan and other frontier forts to fall. The decisive, victorious battle was fought on the Marne and Paris was saved. Four years later, the American 1st and 42nd divisions were on the point of taking Sedan when the Armistice was signed. The Yanks had reached the suburbs across the Meuse river only one kilometer from Sedan on November 11, 1918.

During peace intervals Sedan developed a textile industry. Its 17,000 inhabitants were mill - workers, weavers, and shopkeepers serving the large garrison. The town has been credited with giving its name to the sedan-chair and to the sedan-type automobile body. Covered and sometimes enclosed man-carried sedan-chairs provided the fashionable means of city transport in the 16-18th centuries.

College Active Diagnosing State's Animal Diseases

During the fiscal year ending June, 1944, the department of animal pathology and hygiene at the University of Illinois college of agriculture examined a total of more than 94,000 specimens. Included in this total were 29,000 bovine blood samples for diagnosis of Bang's disease or contagious abortion, 27,000 turkey blood samples for pullorum diagnosis and 26,000 milk samples for mastitis testing.

In swine, necrotic enteritis was detected more than any other swine disease, there being 242 cases. Erysipelas was second with 206 cases and cholera third with 191.

Of the 29,000 bovine blood samples examined for Bang's disease, 2,524 or 8.6 per cent, were positive. This may be taken as a fair estimate of the prevalence of contagious abortion in Illinois cattle. Thirty-seven per cent of the 26,000 milk samples examined for mastitis were positive.

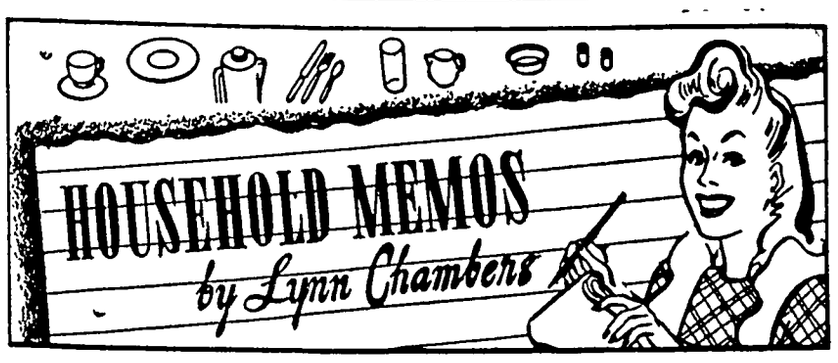
Pullorum is still the number one disease in chickens and turkeys. Coccidiosis and cholera are the second and third, respectively, most important infectious diseases in chickens. Turkeys are subject to cholera but rarely suffer from coccidiosis.

Modern Port

Before the war few of the major ports of the world were better supplied with machinery for cargo handling than Rotterdam. Cranes of various types on the wharves, floating cranes and floating grain elevators, loading bridges, and quayside railways. Huge warehouses stood in convenient locations. Rotterdam had become a great center for handling freight to and from the Netherlands and other extensive regions of western Europe. A large share of the 42 million tons which passed through the port in 1938 moved by water on ships through the New Waterway and on fleets of barges towed up and down the Rhine and Maas and over the intricate network of canals that joins them. In addition railways from Rotterdam connect with all parts of Europe.

Alaskan Rails

Postwar tourists to Alaska will disembark at a port which is so new that it doesn't appear on most maps and ride into the interior behind modern Diesel locomotives over a railroad that has been built since Pearl Harbor. This is the peacetime promise of a wartime development in transportation which has helped make Alaska secure against future invasion; and, which promises to aid the postwar economic development of the territory by the reduction of freight rates from Tide-water to Anchorage by 30 per cent and to Fairbanks by 7.8 per cent. Today the Diesels are hauling vital supplies to U. S. army bases along the strategic Alaska railroad, sole rail link between coastal points and the in-



Dress Up Vegetables, Serve Warm Dessert For Cool Weather

Vitamin-rich carrots are hidden in this lovely pudding along with nutritious cereal. It's inexpensive, point-wise and penny-wise when you're cooking on a limited food budget.

Hot Delicacies

As the weather becomes cool and blustery, we must shelve many of our warmer weather food favorites, but there are a host of other good cold weather recipes to take their place.

Nothing is quite so important to a person's well being as a good, substantial hot food served piping hot, and during the cooler months, everything at a meal may be served hot—soup, entree, vegetables and dessert.

First of all, let's look into the matter of substantial vegetable dishes you can make with home-canned produce. You probably have green beans, corn and tomatoes on hand. Here are ways to dress them up:

Scalloped Green Beans.
(Serves 5)

2 tablespoons butter
3 tablespoons flour
1 cup milk
½ cup liquid drained from beans
¼ cup finely cut cheese
½ teaspoon salt
⅛ teaspoon pepper
1 tablespoon prepared mustard
2 cups drained, canned green beans
¼ cup buttered crumbs

Melt butter, add flour and blend well. Add milk slowly and cook, stirring constantly until thickened. Add liquid from beans, mustard and cheese. Stir until cheese is melted. Add salt and pepper. Place alternate layers of beans and sauce in a buttered casserole, and top with crumbs. Bake in a pre-heated moderate (350-degree) oven for 30 minutes.

Fried Corn.
(Serves 5-6)

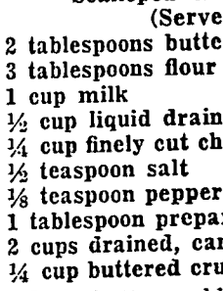
2 cups corn
1 tablespoon chopped onion
3 tablespoons chopped green pepper
2 tablespoons drippings
¾ teaspoon salt
⅛ teaspoon pepper
3 tablespoons water

Simmer onions and green pepper in melted drippings for 3 minutes. Add corn, water and seasonings. Mix well, cover and cook slowly about 10 minutes.

Savory Tomatoes.

½ cup diced bacon or salt pork
1 cup sliced onions
4 cups canned tomatoes
1 teaspoon salt
⅛ teaspoon pepper
4 tablespoons flour

Fry bacon or salt pork until nearly crisp. Add onions and cook until lightly browned. Add tomatoes, salt and pepper and simmer for about 10 minutes. Mix the flour with a small amount of cold water and stir into the tomatoes. Cook until thickened. This may be served as a sauce over meat, fish, cooked rice or spaghetti.



Lynn Chambers' Point-Saving Menu

Meat Balls in Mushroom Sauce
Snowflake Potatoes
*Scalloped Green Beans
Jellied Cabbage Salad
Pecan Rolls Butter
*Apple Crisp Pudding
*Recipes Given

Another hearty vegetable dish is this one made with potatoes and onions:

Scalloped Potatoes and Onions.
(Serves 6)

6 medium-sized potatoes
4 tablespoons butter
3 tablespoons flour
1 teaspoon salt
8-12 pearl onions
2 cups milk

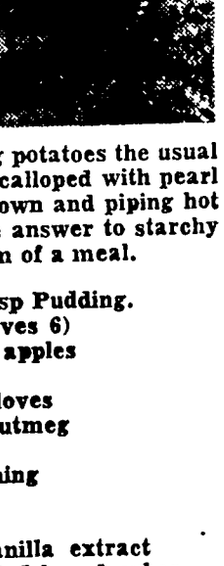
Pare and slice potatoes thin, with fancy cutter or paring knife. Butter casserole well. Place layer of potatoes at bottom of casserole, sprinkle with 1 tablespoon flour, ¼ teaspoon salt and dot with some butter. Cover with a layer of onions and repeat until all potatoes, onion and seasonings are used. Pour scalded milk over top and dot with remaining butter. Bake in a moderate (350-degree) oven until potatoes and onions are tender.

Hot desserts made with whole grain cereals add substantial vitamins and minerals to the diet:

Carrot Pudding.
(Serves 9)

½ cup shortening
1 cup sugar
2 eggs
1½ cups grated carrot
½ cup whole bran
1¼ cups flour
1 tablespoon baking powder
½ teaspoon salt
¼ cup milk
1 teaspoon lemon extract

Blend together sugar and shortening until light and fluffy. Add unbeaten egg yolks, one at a time, beating well after each addition. Stir in carrots and whole bran. Sift flour, baking powder and salt together. Stir into first mixture alternately with milk. Add flavoring and fold in stiffly beaten egg whites. Turn into greased baking dish and bake in a moderate oven (350 degrees) 55-60 minutes. Serve warm with desired sauce and top with maraschino cherries.



Tired of serving potatoes the usual way? Try them scalloped with pearl onions, golden brown and piping hot and you have the answer to starchy vegetable problem of a meal.

Apple Crisp Pudding.
(Serves 6)

4 cups sliced apples
¼ cup sugar
½ teaspoon cloves
½ teaspoon nutmeg
¼ cup honey
⅓ cup shortening
⅓ cup sugar
2 eggs
1 teaspoon vanilla extract
1½ cups toasted bread cubes
1½ cups corn flakes

Mix apples with combined sugar, spices and honey. Turn into shallow baking pan. Blend shortening and sugar thoroughly; add eggs and flavoring and beat well. Mix with bread cubes and corn flakes and spread over apples. Bake in a moderate oven (375 degrees) 40-45 minutes or until apples are tender and top is browned and crisp.

Peach Rice Pudding.
(Serves 4)

5 or 6 canned cling peach halves
2 cups cooked rice
¾ cup brown sugar
⅛ teaspoon cinnamon or nutmeg
1 teaspoon butter

Cut canned cling peach halves into cubelets with scissors to make 1½ cups chopped peaches. Alternate layers of chopped peaches and rice in an oiled casserole, starting with rice. Stir spice into brown sugar, and sprinkle some of mixture over each layer of rice. Make top layer rice and dot with bits of butter; cover casserole. Bake in moderate oven (350 degrees) for 25 minutes. Serve warm with cream, if desired, but no sauce or cream is actually necessary.

Do you have recipes or entertaining suggestions which you'd like to pass on to other readers? Send them to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois.

Released by Western Newspaper Union.

LYNN SAYS

Food Flashes: If a recipe calls for canned fruit, use stewed dried fruit if you don't have the home-canned product.

If you need whipped cream to dress up your favorite dessert, take top of the bottle milk, chill it well, combine with one of the whipped cream mixes and set in a bowl of cracked ice. Beat well.

Dip scissors in flour before cutting raisins or other dried fruit.

Make bread pudding of leftover cake, cookies, and bread. Serve with meringue, lightly browned to dress up the pudding, or orange marmalade, jam or jelly.

Use simple icings for cake or dust lightly with powdered sugar put through a lacy paper doily. This saves sugar!

AROUND THE HOUSE

Place brown sugar in a mason jar while it is still soft, and it will keep that way.

—•—

A bag of salt may be used in place of a hot water bottle in a pinch. Heat the salt on a skillet, then pour it back into the bag and use.

—•—

Low temperature is the secret of tender eggs. Too high temperature or extended cooking time toughens the protein in the egg.

When it is necessary to send small coins in an envelope, Scotch or adhesive tape is very convenient. Lay coin on paper and put tape over it both ways. Then it cannot slide around or wear its way out of the envelope.

—•—

A pair of tweezers is a wonderful help in ripping seams in garments. They will pull the shortest threads without hurting the fingers and the job can be done much more quickly.

GOAL OF JUNIOR RED CROSS IS 100 % ENROLLMENT

The Junior Red Cross is seeking 100% enrollment of all the schools in the east half of the county for participation in the Red Cross "in school" program this year. Mrs. Bud Pritchard, Junior Red Cross Chairman for the the local chapter, announced today.

November 6 to 11 is Hancock County Enrollment Week. Every child in the schools over our territory is invited to join in this War time service program of the world's largest youth organization. Our goal is 100%, the enviable record that was achieved last year.

The Joiunr Red Cross Program in our schools this year will include production of comfort and recreational articles for hospitalized figgting men, packing gift boxes for children in foreign lands, interational exchanges of information albums and Red Cross courses in nutrition, home nursing and first aid.

Aside from the specific 'in school" activities of the Junior Red Cross its membership provides the community with a reservoir of youth service to assist in civic projects.

Junior Red Cross members in our community have done a wonderful job of collecting waste fats, scrap metal salvage, milk weed pod collection, paper salvage, etc. Our children are receiving valuable training for their adult citizenship of tomorrow, through the channels of Junior Red Cross. Let us all back them and encourage them to join the Junior Red Cross this week 100%.

Fitzsimons General Hospital
Denver, Colorado
July 24, 1944.

Dear Junior Red Cross Chariman:

When school reconvenes please thank all the young people who had a part in making our July 4th celebration more interesting.

Our staff and military authorities join with the patients in sincere appreciation.

Truly Yours,
Elizabeth Roche,
Field Director.

(The details she mentions here includes several hundred July 4th nut cups made by the children in the rural schools of the county.)

What many of us need most is a vigorous kick in the seat of our can'ts.

Local Happenings

Klemme and Vicinity

Mr. and Mrs. Emil Patet were at Mason City Saturday.

Mrs. Fred Barz has been ill the past week, suffering with the flu.

Mrs. Harvey Barz was at Mason City Friday.

Mrs. Lyle Wilcox went to Minneapolis Tuesday noon for a visit with relatives.

Mrs. Harlan Helps, Merlin and Lois, were Belmond callers Saturday.

Mrs. Fred Ridder left Friday for Chicago for a visit with her daughters.

Mr. and Mrs Sumner Trumbell were at Mason City Tuesday afternoon.

Mrs. John Clements and Miss Lydia Bock were Belmond visitors Tuesday.

Mr. and Mrs. John Day were at Garner Sunday to visit with Walter Ross, who again is ill.

Mrs. Lena Schroeder and Mrs. Evert Barz and daughter Carol, were Mason City visitors Friday.

Harold Swalve, Wayne Klinge, and Verner Lau visited with Leonard Kaduce at the John Kaduce Sr. home Sunday afternoon.

Mr. and Mrs. Walter Rosendahl and Mr. and Mrs. Harvey Barz visited Sunday afternoon at the Fred Barz home.

Mrs. Rosa Mitchell of Swea City was a dinner guests Sunday at the home of her mother, Mrs. C. F. Keraus.

Mr. and Mrs. P. M. Wilson were at Belmond Sunday afternoon for a visit with Mr. Wilson's brother who is seriously ill.

Jimmie Fredin of Fort Dodge spent the latter part of the week visiting at the Mrs. C. A. Arnold farm.

Mr. and Mrs. Harm Aries of Waterloo and Dave Henry of Ventura were dinner guests Sunday at the Clarence Bachman home.

Grandma Schroeder, who is confined to her bed with illness, will be 93 years old this week, Thursday, November 9th.

Mr. and Mrs. C. E. Kluckhohn enjoyed an oyster supper at the home of Mrs. Rose Lewis and son Duard, Tuesday evening.

The Study Club of the Methodist Church will meet with Mrs. C. A. Larsen Thursday afternoon of this week. Mrs Josh Montgomery of Goodell will speak.

Pvt. Winton Etchen of Keesler Field, Miss., arrived home Friday to spend a furlough visiting with his parents, Mr. and Mrs. Albert Etchen and family.

Mr. and Mrs. Ralph Ludeke and family, and Mrs. John Dominic and children of Clear Lake, were dinner guests Sunday at the Dr. D. P Anderson home.

Mr. and Mrs. Tom Nelson of Garner, attended morning services at the Methodist church Sunday and spent the day visiting with relatives in this community.

Mr. and Mrs. C. C. Kilgore of Fort Dodge spent Sunday visiting at the home of their son-in-law and daughter, Mr. and Mrs. Joe Burgess and family of near Klemme.

Mr. and Mrs. A. L. Kingery visited at the Henry Galbreth home in Des Moines Friday and Saturday. Mr. Kingery and other Klemme teachers were attending the state teachers convention there.

Mrs. Herman Paul and Grandma Suckow returned Friday from Des Moines where they had been visiting with Mrs. Eddie Epps. They were acompanied home by Tally Epps.

Keith Albertson went to Atlantic Friday evening to spend the week end with his family. He was accompanied by Harley Barz who spent the week end visiting with Jimmie Albertson. Harley was real thrilled when his visit also included a trip to Omaha, Nebraska. He is quite "puffed up" about his trip to a big city and another state all at the same time.

Mrs. Christie, who has been visiting with her son-in-law and daughter, Mr. and Mrs. Sumner Trumbell went to Goodell Sunday for a visit with her daughter, Mrs. Chas. Conklin.

The children in Liberty School No. 9 gave their teacher, Miss Hilda Abele, a surprise birthday party on Friday afternoon. Games were enjoyed after which a lunch was served, including a birthday cake.

Mrs. Christina Olson fell on the cellar steps at her home last week and injured her knee so bad that four stitches were required to close the wound. She is making a good recovery but still limps a lot.

Mr. and Mrs. V. R. Rice and children of Clear Lake, and Mr. and Mrs. Art Hanson and baby Beverly of Ventura, enjoyed a chicken dinner at the parental Art Polsdofer home Sunday, November 5th

The Northern Lumber Co. has completed the building of a new double corn crib with overhead granery at the R. W. Elder farm. It makes a nice improvement to the farm.

Mr. and Mrs Earl Ruka spent the week end visiting with Mr. and Mrs. Joe Kissenger and family at Superior, Iowa Mr. Kissenger was a former coach and superintendent of the Goodell school.

Supt. A L. Kingery was at Garner Monday evening where he was a dinner guest of Co. Supt. Chas. Whitney. Mr. Whitney ntertained all of the school superintendents in the county at the dinner.

Graydon, son of Mr. and Mrs. Harvey Barz, had the experience of attending a rural school Friday when he went out to visit with his cousin at the Ben V. Greiman farm home. Graydon says that he likes country school.

Jimmie Thomas, Ewald Grosshusch and Patricia Kudje spnet the week end at Iowa City taking in a football game and visiting with Miss Eunice Larsen. They stopped at Cedar Falls where Miss Corrine Merkel joined them on the trip, and at Mt Vernon, where Elwood Harvey joined the party for Iowa City. The young people returned home Sunday evening

Rev. and Mrs H E. Harvey spent Friday and Saturday in Des Moines visiting with friends. Mrs. Harvey also attended the teachers convention there La Nelle Harvey visited with Elaine Neuberger while her parents were at Des Moines. Mrs. John Clements and Miss Peggy Coobs accompanied the Harveys to Des Moines and visited with Cadet Nurse Luella Lewis.

BAZAAR AND CHICKEN SUPPER, NOV. 16

Bazaar and Chicken Supper at the Klemme Methodist Church on Thursday, November 16th.

Country Style Chicken Supper will be served Committee plans for two hundred or more, so everybody is invited. Price 60 cents and 35 cents.

Bazaar Sales wil start at 2.30 p m Fish pond for the children. 1tc

---

HANCOCK COUNTY VOTED STRONG FOR KNUDSON

For State Senator from the 43rd district, Hancock County voters gave republican Herman Knudson of Cerro Gordo county a 1400 lead over democratic candidate Fred J Paullus of Franklin county. Mr. Knudson carried all three counties: by 600 in Cerro Gordo, 200 in Franklin and 1400 in Hancock.

METHODIST LADIES NOTICE!

Each Methodist lady is asked to donate one apron, one piece of fancy work, several articles for the fish pond, and food for the supper.

Mrs. P. M. Wilson is chairman of the fancy work booth and you may leave your articles at the drug store so they can be marked previous to the sale. If impossible to get sewing ready now a cash donation will be gladly acepted. If everyone cooperates the Bazaar will be a success.

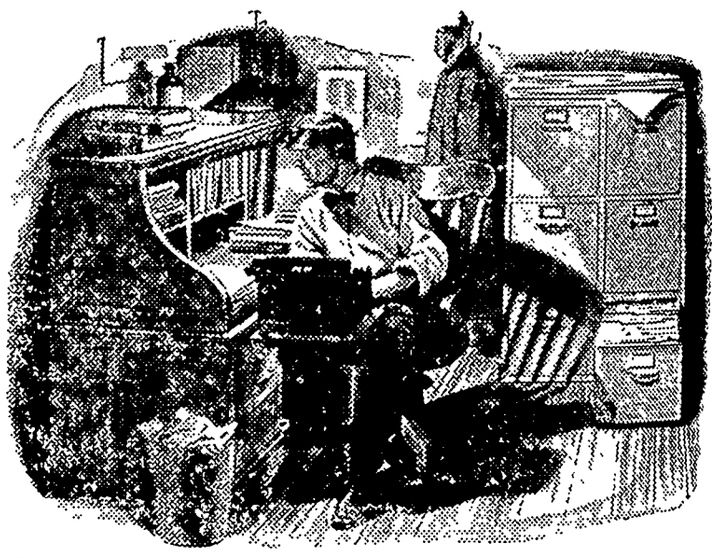
Our thanks to a Country Editor



YOU get a pretty good view of the world from a small-town newspaper office. Sometimes you see things that other folks overlook. For instance, this frank statement by the editor of *The Dierks* (Arkansas) *Banner:*

The Banner is one of the last papers in the country to raise its subscription price, many over the U. S. having done so a year or more ago. The cost of practically everything that goes into the production of a newspaper has advanced, except electricity used in running the machinery and lighting the plant. In normal times there was little if any profit in subscriptions at $1.00 a year. If the information contained in even a country newspaper pub-

We're grateful to the editor for pointing out a fact more and more people are realizing—that at a time when most things are scarce and expensive, *electricity is still plentiful and cheap.*

That just goes to show what companies like ours can do for you by hard work and experience and sound *business* management.

AMERICAN HEROES
by JULIAN OLLENDORFF

Pvt. Henry B. Lowther, Flint Stone, Md., has been awarded a bronze medal for courageous action in driving a small car loaded with ammunition through constant enemy fire in support of buddies engaged in fierce battle at the base of a hill on a South Pacific island. Snipers' shots rained on his vehicle as he drove at 5 miles an hour over a narrow, hilly extension of a perimeter road, 10 trips in black night. War Bonds buy trucks for heroes.

GUY L. BRAUND DIED FRIDAY AT A MASON CITY HOSPITAL

Funeral Services Were Held Monday Afternoon At Garner

Death came to Guy L. Braund, Klemme farmer, at a Mason City hospital Friday afternoon following an operation Funeral services were held Monday afternoon at the Bohn funeral home in Garner at 1:30 o'clock with Rev. Herschel E Harvey, pastor of the Methodist church of Klemme in charge.

Interment was in the Concord Cemetery south of Garner.

In his funeral sermon, Rev. Harvey read the following obituary of Mr. Braund:

OBITUARY

Guy Leonard Braund was born in Juneau County, Wisconsin, on December 22, 1876, ad passed away at his home near Klemme, Iowa on November 10, 1944, after reaching the age of 67 years, 11 months and 12 days.

He was the son of Solomon and Helen Braund. When a small boy, Guy came with his parents to Iowa and settled on a farm south-east of Garner. His father died when Guy was but 13 years of age. And he being the eldest son, was obliged to do most of the work at home under the advise and help of his mother.

Guy was married in December of 1898 to Miss Viola Rhodes of Garner, Iowa. They remained in the Garner community for some years farming for themselves. They later lived in the vicinities of Forest City, Buffalo Center and Lake Mills where they found their way into the hearts of the communities and gathered a host of friends.

Four years ago they returned to the local community, where two years ago Mrs. Braund passed to her reward.

While in the Forest City community, Mr. Braund became affiliated with the Congregational church of that city.

Seven children blessed the home of the Braunds, with three of them preceding their father to the great beyond.

Those left to feel the loss of a father are Elva, who is at home; Chester of Keister, Minnesota; Glenn of Joice; and Leslie at home who farmed with his father There are six grandchildren: Vernon, La Vonne Jean, Marlys, Donna Mae, and Keith Braund. Also two sisters, Mrs. Will Lau of Garner, and Mrs. Maude Nesbit of Glennville, Minnesota; and two brothers, Ernest of Garner and John of Los Angeles, California.

It is said of Mr. Braund that he was a good father, always a hard worker, and one who stood for and practiced the right in all things.

AVERY 4-H CLUB NEWS

The Avery 4-H Club met at the home of Mildred Busse November 11th at 2:00 o'clock p. m. with 15 members present.

Our work for the coming year is Nutrition I.

Roll call was on "Name a Whole Wheat Cereal."

For new business, plans were made for a Christmas party which is to be held at Miss Irene Marshall's home on December 16th with a gift exchange.

The program was as follows:

Illustrated Talk, "Here's How to Start Our Nutrition Record Bock," Miss Marshall.

Talk, "Breakfast Tune-Up," Mildred Busse.

Discussion, "What We Hope To Get From Our Study Of Nutrition," Arlene Wille.

Demonstration:

"Compromise Meal," Asst. Leader Mrs. Raymond Wille.

Musical Game:

'Jennie Crak Corn," Club.

A delicious lunch was served by the hostess.

—Ruth Lacey, Reporter.

hose red point problems won't out by themselves. They need expert guidance of the home- ker who makes a hobby of work- out her point budget to suit her particular needs.

e've discovered lots of delicious ds since food rationing began, and the least of those is fish. It's irly inexpensive food and gives a wealth of protein, vitamins minerals.

ish may be purchased whole or fillet or steaks. Scales may be left on when the fish is cooked for they usually soften in the cooking process. The methods usually employed for preparing fish are the same as used for meat — broiling, frying, baking and even ing If well cooked and sea- d, fish can be a welcome addi- to your table.

Broiling Fish.

hen using a whole fish for broil- clean thoroughly, then wipe dry sprinkle with salt and pepper. sh the broiler pan with fat and e fish on heated rack, about two es from broiling unit. Broil un- ish is well browned and flakes n tried with a fork. It will take n 6 to 12 minutes to broil the fish, ending upon its size.

you are broiling fish fillets, h them first with melted fat and nkle lightly with flour to give n a crispy surface after broiling.

aked Haddock with Dressing.
(Serves 4)

ddock steaks (about 1¼ pounds)
tablespoons chopped onion
up chopped mushrooms
blespoons butter
aspoon chopped parsley
aspoon salt
easpoon pepper
blespoon water
cups fine bread crumbs

ace steaks in shallow, buttered ng dish. Sprinkle with salt and per. Saute onion and mushrooms utter for 5 minutes. Add all aining ingredients. Spread over Bake in a moderate oven for 35 minutes. Serve plain or with y sauce. Strips of bacon may laced on top of dressing before ng.

Tartar Sauce for Fish.
easpoon minced onion
easpoons chopped sweet pickle
easpoon chopped green olives
tablespoon minced capers
ablespoon minced parsley
cup mayonnaise
ablespoon tarragon vinegar

rain first five ingredients and into mayonnaise. Add vinegar. ass, halibut, perch, pickerel, pike rout may be substituted for the dock in the above recipe.

ckerel with Bacon and Onions.
(Serves 4)

pound fillet of mackerel
alt and pepper
cup sliced onions
tablespoons butter
½ cup fine, soft bread crumbs
slices crisp, broiled bacon

LYNN SAYS

Fish Sauces: For white sauce riations, you'll enjoy the follow- : Add 1 tablespoon chopped allots to 1 cup medium white uce; or ¼ pound sliced, nched almonds toasted with tter; 2 chopped hard-cooked gs; ⅓ cup cooked shrimp with hard-cooked egg; or ½ cup ated cheese.

Fish Stuffings: To 1 recipe plain ead stuffing, may be added: y one of the following: ½ to 1 cup ced, sauteed mushrooms; 2 ta- spoons chopped green pepper, teaspoon mace; ½ cup ground ion, ¾ cup grated raw carrots; tablespoons minced parsley, ¼ aspoon savory seasoning and ¼ aspoon celery seed.

Lynn Chambers' Point-Saving Menu

Tomato Juice
*Baked Haddock with Dressing
Chopped Spinach with Egg Garnish
Baked Potatoes
Grated Carrot Salad Muffins
Stewed Dried Apricots
Cookies Beverage
*Recipe Given

Arrange fillets in shallow, greased baking dish. Sprinkle with salt and pepper. Saute onions gently in butter until tender but not browned. Turn out on fish, sprinkle with crumbs and top with bacon. Bake in a hot oven (400 degrees) until fish is done, about 15 minutes.

Salmon and Vegetables.
(Serves 6)

2 tablespoons diced onion
2 tablespoons butter
2 cups cooked peas
1 pound salmon, cooked or canned
2 cups diced, cooked potatoes
Dash of pepper
½ cup sour cream

Cook onion in butter until tender but not browned. Add liquid from cooked or canned peas and cook until reduced to ½ cup. Place potatoes in shallow baking dish, add peas and sprinkle with pepper. Break salmon into large pieces and arrange on top of vegetables. Combine reduced liquid mixture with sour cream and pour over vegetables and fish. Bake in a moderate oven (350 degrees) 40 minutes until vegetables have absorbed most of the liquid.

Fish Fritters.
(Serves 4)

1 pound small fish
3 eggs, separated
3 tablespoons flour
½ teaspoon salt
⅛ teaspoon pepper
⅛ teaspoon minced garlic
1 tablespoon minced parsley

Cook fish, remove skin and bones; mash. Beat egg yolks light and thick, then add remaining ingredients. Fold in whites of eggs which have been stiffly beaten. Drop by spoonfuls into hot fat and fry until brown. Serve with tomato catchup, tartar sauce, or egg sauce.

Scallops are another excellent fish to serve when you want something different for a meal. They lack fishy taste and smell and are boneless and easy to fix:

Fricassee of Scallops.
(Serves 6)

2 pounds scallops
2 tablespoons butter
1 onion, sliced
1 tablespoon flour
1 cup stock from scallops
1 tablespoon minced parsley
Salt and pepper
1 egg yolk
1 teaspoon lemon juice

Simmer scallops 5 to 6 minutes. Melt butter, add onion and cook about 3 minutes. Stir in flour until well blended, add stock and cook until mixture thickens. Add parsley, salt and pepper. Beat egg yolk, and add to hot sauce gradually. Cook for 2 minutes, then add scallops and lemon. Serve at once.

LOVE LETTERS OF A BUREAUCRAT

My (unless hereinafter revoked) Darling:

You are never, as stated in my letter of the 15th inst., out of my mind and now as always I find it difficult to correlate my feelings regarding you and adequately to convey them to you as of this date. I miss you very much and a careful check of the over-all picture establishes it as a corroborative fact that my loneliness without you is up 10 per cent over the figure for the corresponding period of the previous year. It is my belief, based on a careful co-ordination of my thoughts and moods, that it will go up another 2 per cent within the next 30 days.

—*—

The time has come, according to a conservative estimate, to tell you that I love you with a complete utilization of all available factors. I take it that you have evaluated your feelings toward me and have concluded to reciprocate to the maximum in the interest of unity. We must now channelize our emotions with celerity for the attainment of our ultimate goals.

—*—

My policy is one of continued devotion with a complete expression of the same so far as is possible in keeping with a full understanding of all economic factors involved. I have given your affections a careful study and I now make it a directive that you consider this a proposal (except as hereinafter qualified), and I desire that you process the matter at once that our union may be facilitated. I take it there is full accord that a collaborative effort for our common good is mandatory for the fulfillment of our welfare.

—*—

In your last letter, according to my files, you said something about the financial aspects. I consider this an unrelated factor at the moment, indicative of certain maladjustments in your thinking. A statement of my resources as of this date with data on the long-range view is herein inclosed, however.

—*—

Coordinating my conclusions, I desire to place my heart, within the meaning of sub-paragraph 5, at your feet as categorically listed, and without in any way modifying my policies as previously outlined. It is my definite conclusion from a complete summarization of all factors, that an early marriage is desirable for the attainment of the objectives to which we have set ourselves.

—*—

The 20th of June, 1944, at 2:30 Eastern war time, would be convenient for me. Kindly reply by the inclosed form if this is satisfactory and I will issue the necessary directives to the printer, clergy, etc., and arrange for the matter of church and ceremonial personnel.

—*—

I send you the usual quota of kisses and four questionnaires which I wish you would fill out and return promptly. With all my love I am your devoted slave within the ceilings as previously set.

Gerald.

P. S.—A blueprint of my plans for our future is being forwarded under separate cover, together with a prospectus as ordered.

* * *

Seasonal Lures

Autumn's here and the trees are turning,
And once again that yearly yearning,
That sure instills;
A something one can never stifle,
For feel of gun or hunting rifle,
On homeland hills.

O drowsy days with dead leaves falling,
Of barrens bleak with bull moose calling,
In haunts of game;
Of leafy trails that twist and follow
O'er wind-swept swale and sheltered hollow,
And slopes aflame.

Harvey McKenzie

Proficient Knockers

Negative criticism does not call for a special degree of intelligence. Even the mentally sterile person can be a very voluble destructive critic. Neither does it take a great deal of energy.

Many lazy men are very proficient fault-finders and "with alarm viewers." The truly active person is perhaps the most lenient judge of the activities of others, simply because he has no time to be a flaw-picker.

Bought the Wind, but He Couldn't Sell It to Others

There have been many unusual methods of making money, but perhaps the strangest idea of all was that of a Dutch merchant of Friesen, who bought from Count Cirkens the wind that blew over his extensive property. He offered about $30,000.

Immediately the contract was signed and sealed the merchant wrote to all the owners of windmills on the estate and demanded payment for the use of his wind! Perhaps needless to say, he didn't get it!

SNAPPY FACTS ABOUT RUBBER

Progress of our Pacific war program and the growing possibilities of reasonably quick recapture of some rubber areas in the Far East have made men who know the rubber industry best emphasize the need for sound policies to deal with the economic and political problems which the gradual return of natural rubber will raise.

Mexico has its own way of conserving tires. Mexican motorists are required, by government regulation, to keep their cars idle one day a week. Car owners select their "motorless day" and then must display on their windshields a sticker of a color designated for that day of the week.

In war or peace

Hancock County Board Proceedings

6TH ADJOURNED SEPTEMBER MEETING

Garner, Iowa,
October 20, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels, and John Chambers present.

The minutes of the last meeting were read and approved as read.

On motion and second the bond of Wm. Henschen, Construction Engineer on D. D. No. 9 is approved.

On motion and second the farm lease with Geo. Eskhoff on th N 1-2 of the NE 1-4 of Section 12, Twp. 93, Range 24 is approved.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be mad in D. D. No. 7, lateral 49-50, and in D. D No. 37-39, lateral 6

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D D. No. 47, Extension in D. D. No. 8.

BE IT RESOLVED that the claims in the sum of $238 70 be allowed for the Boards of Review, School of Instruction held at Garner, Iowa, on October 18, 1944, and the County Auditor be and he is hereby authorized to draw warrants on the General County Fund therefor as approved by the Attorney General of Iowa.

WHEREAS, certain drainage district in Hancock County, Iowa, have outstanding warrants issued for minor repairs on said districts and it is deemed for the best interests of the taxpayers on said districts that levies be made at this time to provide funds for payment of such warrants and to provide funds for minor repairs and

WHEREAS, such levies are less than 10 per cent of the original cost of said districts

BE AND IT IS THEREFORE RESOLVED by the Hancock County Iowa, Board of Supervisors acting for and in behalf of the drainage districts hereinafter named that there be and is hereby levied the percentage of the original assessment set opposite each named district against all lands, tracts parcels, highways and railroads in said districts, viz

D D. No. 7 . . . . 1 per cent
D. D No 74 . . . . 10 per cent
D. D No. 82 . . . 2.5 per cent
D. D. No. 116 . . . . 3 per cent

BE IT FURTHER RESOLVED that the foregoing levies be extended in accordance with the original classification of the hereinbefore named districts and when so extended to be collected with the general tax of 1944 payable in 1945 All as provided for by law

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption, was seconded by Supervisor Penn Eckels, whereupon the Chairman F. J Schoun place the motion for adoption and upon roll call the vote thereon is F J Schoun, Penn Eckels and John Chambers, aye. Nays, none.

Whereupon the chairman declared the resolution duly adopted

On motion and second the Board adjourned to November 2, A. D 1944 at 9 o'clock A M.

A. J KUDJE, Clerk.

Good Record

Other people would probably like to know how Otis Farmer, a Conrad farmer has been able to use the same tires for 25 years. Mr. Farmer bought a truck 25 years ago and has been using the tires that were on the truck when he bought it. Furthermore, he expects the tires and truck to last him for the duration.

Mrs. Otho Keraus of Minneapolis, Minn.; Mrs. Doak and Mrs R M. Minkel and daughter Susan, of Fort Dodge, visited over the week end at the W. C. Keraus home.

Miss Dorothy Ellingson spent a few days the past week at Joice where she attended the wedding of her sister, Trudy.

WE WOULD LIKE

to have some of that Bean and Corn Money. Here is what we have to get it with Maybe you would trade us one of those checks for one you would like. What do you think ? Let's try to get together. What do you say? No harm to look anyway.

—then Look to the Brighter Days

For what America has done in this war, everyone should be deeply thankful. The days are bright with the wartime deeds of all America; its fighting forces and its working forces, men and women. Still brighter days are ahead, but we must not rest.

Let's pause only for a moment, this Thanksgiving. There is much to be done. Everyone must dig deeper and deeper for War Bonds. Our fighting men are carrying on, so our war workers must keep production humming. And the railroads must continue their vital transportation job as the war moves into its final chapter in the Pacific.

ROCK ISLAND LINES, a western railroad, is of ever increasing importance as America turns its eyes and its supreme effort toward the setting sun. Our 24,000 employees know this. They will see America through to the dropping of the last bomb, to that day of complete and total thanksgiving.

As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation

Good Cheer vs. Cold Feet...

Is the fuel problem burning us up these days? Not

We try to take it cheerfully—to remember that ev we do to keep the home fires burning—and the ho smiling, will help to scorch Herr Hitler!

He hates to think of Americans comfortable and c He'd like for us all to freeze.

He found out, in the past winters in Russia, that means more than a mere headache.

We've had our headaches, too, but we've accepted minor casualties—knowing that the headaches are when we recall that we are the trustees of a certain of morale in our community. It's our job to spre as fairly as possible, and a portion of good natu with it.

Good Cheer has a lot of B.T.U.'s, too.

We do not forget that cold feet at home will retard

We like to think we've got at least a LITTLE o takes, besides FUEL, to cure cold feet.

HIGH SCHOOL NEWS

By Patricia Kudje

Mr. Hamilton, of Hamilton Business College in Mason City, gave a very interesting talk to the high school and junior high school students. Unlike most speakers, he made us want to hear more. His topic was "The Reason for Buying War Bonds and Stamps."

The Junior Red Cross Drive was held in high school this week. Each person who donated was given a button. We are glad to notice that nearly every person has one.

JUNIOR HIGH NEWS

By Marjorie Lau

The entire Eighth grade had a perfect score in Spelling on Friday.

We chose Thursday for our Stamp Day and brought our money to Donald. He bought stamps for everyone.

Both grades are working on a Health Unit in our Science books

We have 15 names on our Red Cross Honor Roll thus far.

The Eighth grade is working on a unit on "The Establishment of the Constitution," in History.

The Seventh grade is completing a study on "Latin America."

On Friday afternoon we enjoyed a talk given by Mr. Hamilton of the Mason City Business College.

FIFTH AND SIXTH GRADE NEWS

Mrs. Voetberg, Teacher

In Fifth and Sixth grade Art we are making Pilgrim men, women, boys and girls. We have had lots of fun doing this. They form a border around our room.

This has been Junior Red Cross week. Our room has been 100% We are always happy to do our share.

We are enjoying 15 new books that have been added to our library Mrs. Voetberg chose them for us while in Des Moines last week We've all promised to take very good care of them.

Many of the boys and girls in our room have had letters from Jimmy Albertson. We are so glad he is enjoying his new home.

In Sixth grade Geography we have been studying India We have been reading some very interesting material on religions of that country.

In Fifth grade Language we have been learning how to use the Table of Contents and Index of books.

THIS CAFE WILL BE CLOSED

..For Several Days While we are moving and remodeling.

ROTHS'S CAFE

THIRD AND FOURTH GRADE NEWS

Miss Holmes, Teacher

The announcement was made at school Monday morning in regard to the American Junior Red Cross raising money. The boys and girls were asked to bring money if they could. By Wednesday morning everyone of the twenty three third and fourth graders had contributed. Our total amount was $2.35. We are very proud indeed to have our room contribute 100% to the Junior Red Cross.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

Miss Bugh, Teacher

In our Weekly Reader, the First grade read about Elephant Trains. We learned that elephants have been trained to help the Allies by doing the work of machines in China, Burma, and India. They help to build bridges and haul supplies to troops where horses and mules cannot go.

The Secnd grade read about dogs in the army. The dogs learn to save the lives of soldiers, to carry news, to look for enemy mines, and to guard beaches.

Thursday we had our first Stamp Day. We brought money for War Stamps.

STATEMENT OF THE OWNERSHIP, Management, Circulation, Etc., Required By The Act Of Congress, Of August 24, 1912.

Of The Klemme Times published weekly at Klemme, Iowa, for October 1, 1944

STATE OF IOWA,
County of Hancock, ss·

Before me, a Notary Public, in and for the state and county aforesaid, personally appeared R. A. Jorgenson, who having been duly sworn according to law, deposes and says that he is the publisher of The Klemme Times, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication, for the date shown in the above caption, required by the Act of August 24, 1912, as amended by the Act of March 3, 1933, embodied in section 537, Postal Laws and Regulations, to-wit

That the names and addresses of the publisher, editor, managing editor, and business managers are R. A. Jorgenson, Klemme, Iowa.

That the owner is R. A. Jorgenson Klemme, Iowa.

That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of bonds, mortgages, or other securities are· None

R. A. JORGENSON, Owner

Sworn to and subscribed before me this 24th day of October, 1944
(SEAL) C. G. Waterman.
(My commission expires July 4, 1945)

White Pheasant!

It was up to H. E. Yarcho, of Waverly, to get the white pheasant that had been seen in the community recently. Mr. Yarcho shot it with such care that its plumage was not ruffled and can be mounted. A white pheasant is very seldom seen.

NOTICE

I want to thank the party who sent me a letter telling who killed my wild geese.—Henry Ward. 1tp

Ell Midgets 4-H Club Met At Donald And Clifford Greimans

The Ell 4-H boys held their regular monthly meeting at the home of Donald and Clifford Greiman. Donald discussed a number of regulations and problems every 4-H boy should know. Lincoln Goll, local leader suggested a campaign for new members should be launched right away. Paul Henderson, the County Extension Director, presented the new 4-H record book and discussed the various features of this book.

The next meeting will be held on Tuesday evening, December 5, at Allen Anderson's house. New boys are invited to join.

HELLO, FOLKS!

Mr. and Mrs. Melvin Buseman are the proud parents of a baby daughter born to them at the Geo. Buseman home in Klemme Sunday morning, November 12th.

Seaman First Class Elmer Meinders and wife are the proud parents of a baby daughter born to them at the Belmond hospital.

Winter Condition Your Home Now...

Start now, before winter comes to protect your home from COLD. Again this year home owners are asked to conserve fuel by properly weather-conditioning their homes. Here's our formula for winter-proofing your house:

WEATHERSTRIP
- easy to use
- inexpensive
- long lasting

INSULATE
- efficient
- economical
- durable

STORM SASH
- prevents drafts
- easy to install
- low priced

In most cases the means of weather-conditioning are easy to install— a task that you can perform yourself. See us today.

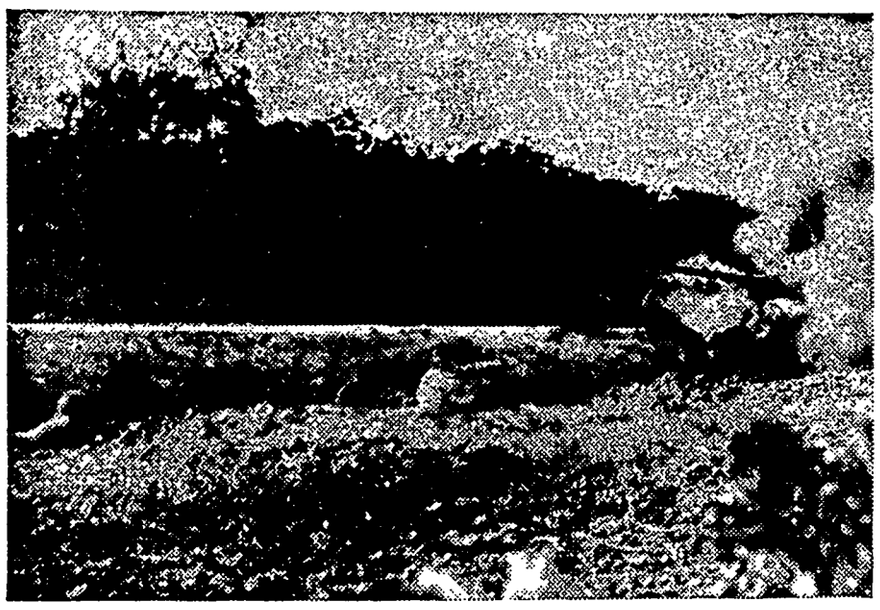
WEEKLY NEWS ANALYSIS

U. S. Fleet Secures MacArthur's Supply Lines to Philippines; Authorize More Civilian Goods

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



U. S. Doughboy is shown knocking out Nazi tank with bazooka on western front.

EUROPE:
Clearing Holland

Pushed back in France and Belgium, the Germans were being shoved out of their last holdings in Holland by Canadian and British troops applying a double squeeze on some 60,000 Nazis in the southwestern part of the country.

Only in Holland was there major action on the western front, with rain and snow bogging U. S. drives about Aachen, Metz and the Vosges mountains.

Even though the British 2nd army had overrun the entire eastern section of Holland in a drive that the Nazis only stopped at the gateway to their important Ruhr valley, the Germans held their ground in the western part of the country for the purpose of denying the Allies use of the great North sea ports for the supply of their onrushing armies.

Principal port denied the Allies was Antwerp, which the Nazis blocked off by occupying both sides of the Schelde river leading inland to the city. Dotting one side of the Schelde are the Walcheren and South Beveland islands, connected to the mainland by a causeway below Bergen Op Zoom. In attempting to knock the Germans out of their strategic positions along both sides of the Schelde, Canadian troops cut into the enemy's defenses on the south bank of the river, and fought to capture the causeway below Bergen Op Zoom and cut off island communications with the mainland.

Meanwhile, British troops smashed through Nazi defenses to the north, with the aim of racing toward the sea and thus cutting off all German troops along the Schelde to the south.

Speaking in the house of commons after his conference with Josef Stalin in Moscow, Prime Minister Churchill declared: "Unconditional surrender in the sense of no bargaining with the enemy is still the policy of the government."

Capture of Antwerp and Rotterdam would give the Allies at least two great ports for funneling in supplies for the drive on Germany and relieve the need for a reliance on smaller, crowded facilities.

Slow Going in Italy

In Italy, German Field Marshall Albert Kesselring seemed to be pulling his lines northward in a slow, withdrawing movement hinged on the big communications hub of Bologna, as Allied troops pushed further through the mud onto the broad plains of the Po valley.

Russ Reach Norway

Norway was the latest European state to be invaded by the Russians, with Gen. K. A. Meretskov's northern Red army driving into the Arctic port of Kirkenes in the wake of its abandonment by 25,000 Nazi troops.

Russian entrance into Norway coincided with the Reds' all-out offensive against East Prussia, noted wooded and lake country of the Junker military caste. Calling panzer formations into action along roadways leading to the heart of the province, the Germans sought to stall the Russians' advance westward, originally paced by an estimated 600 tanks.

Compelled to throw additional forces in Hungary to stave off the Russian drive on Budapest, the Germans fought hard to protect the broad gateway to Austria from the western end of the country. In raging tank battles, the enemy succeeded in slowing the Red advance 50 miles from Budapest.

PACIFIC:
Save Communications

Long in hiding, Japan's imperial navy came out for battle in an effort to smash the American supply line to General Douglas MacArthur's forces in the Philippines, and limped off in defeat as the U. S. 3rd and 7th fleets shattered the attack and secured the vital communications.

The Japs' attack took the shape of a three-pronged assault, with one enemy force coming in through the narrow Surigao straits south of Leyte; the second driving in through the San Bernardino straits north of Leyte, and the third heading southward from Formosan waters.

Apprised of the Japs' approach by alert U. S. carrier planes, Vice Adm. Thomas C. Kinkaid divided his outnumbered 7th fleet into two forces, which, with the aid of carrier planes, dealt the enemy a telling blow before he could fully develop his attack. Meanwhile, Adm. William F. Halsey's 3rd fleet, made up of warships, carriers and subs, caught the Japs sailing down from Formosa.

After the smoke of battle had cleared, two Jap carriers, two battleships, five cruisers and three destroyers were sunk, with three more warships probably sunk and a dozen damaged. For their part, the Japs claimed to have primarily struck transports and landing craft.

As the crippled Jap fleet limped homeward licking its wounds, General MacArthur's ground forces consolidated their hold on Leyte island despite mounting enemy resistance and also strengthened their grip on Samar island just across the San Juanico straits.

HOME FRONT:
News for Consumers

On the home-front, consumers heard this news:

There will be less meat for civilians in November but more of the better grades. There will be less cheese but the same amount of butter as in October.

Approximately 800 plants were authorized to produce 152 million dollars of civilian goods during the next year.

Infants' and children's clothes were expected to be in greater supply next January, February and March. Cotton textile controls will be maintained after Germany's defeat.

Possessing available facilities and labor, the 800 plants will be permitted to manufacture vacuum cleaners, bed springs and innerspring mattresses, automotive parts, building materials, plumbing and heating items, household aluminum ware, electric irons, lamps, lawn mowers, furniture, church goods, fountain pens and sporting goods.

Because of pent-up demand, made even more formidable by swollen purchasing power, the mount of goods authorized represents virtually a drop in the bucket.

To assure production of more infants' and children's wear for the first three months of 1945, the War Production board moved to release sufficient material for 30,000,000 garments, and also laid down specifications for the type of goods and workmanship to be employed.

The WPB hurried the program even as its chairman, J. A. Krug, announced that because of drops in output of cotton textiles due to labor difficulties, controls will be extended after Germany's downfall to prevent acute shortages.

ODT Says Women Are Different, After All

Rosie the Riveter notwithstanding, there's a basic difference between men and women workers, the Office of Defense Transportation says.

In a bulletin to employers, the ODT says: "The average woman differs from the average man in certain physical, psychological and experience factors which have a direct bearing upon her ability. . . ."

For instance, ODT points out, the elbow and the knee are constructed differently in women, partially accounting for their tendency to grasp tools differently from men and be less steady on their feet.

According to ODT, most women are handicapped in the men's world because they never play with mechanical toys, mow lawns or drive heavier vehicles. Because of their sewing and other finer tasks, however, they possess greater manual dexterity, ODT concludes.

SURPLUS HOLDINGS:
Disposal Problem

With U. S. holdings of industrial facilities amounting to about 16½ billion dollars — or 20 per cent of the total private and public facilities in the country — the government already has taken steps for disposal of its properties in the postwar period.

Difficulties are expected to rise in the sale of the bulk of such facilities as aircraft, shipbuilding, and munitions, however, since these industries have been greatly expanded to meet wartime requirements, which will drop sharply with peace.

Of the government's 3 billion dollar investment in war housing, permanent buildings must be sold when no longer needed, and fabricated structures must be dismantled, with materials made part of general surplus property.

ROAD BUILDING:
Huge Program

With urgent highway construction in the early postwar years exceeding 10 billion dollars, the vast quantities of labor, material and equipment needed for carrying on the program should act as a stabilizing factor in the future economy, the American Road Builders association's engineer-director, Charles M. Upham, declared.

By next October, the states will have drawn up plans for one billion dollars of highway construction deferred because of the war, and city, county and local road projects will amount to another billion.

"Postwar plans of business and industry call for greater production and distribution of goods," Upham said. "That means roads and streets must carry greater burdens. Obviously, inadequate roads and streets will hold back business and industrial activity."

Finds Home

Infant son of a Yank aviator killed in action, and of a mother who died in giving him birth, tiny Kenneth Maloney was taken by maternal grandparents, who were later killed by robot bomb in London. Army then flew six-month-old Kenneth to paternal grandmother in Grand Rapids, Mich., who is shown putting him to bed while 22-month-old cousin Terry looks on.

BIG DEAL:
$161,000,000 Check

Wall street gave way to LaSalle street when the Commonwealth Edison company refinanced 180 million dollars' worth of bonds in the biggest private financing operation in the nation's history.

Featuring the deal was the purchase for resale of 155 million dollars of new bonds by the big Chicago investment house of Halsey, Stuart & company, which with Otis & company of Cleveland, Ohio, has been bucking the great Wall street banking firms. In completing the transaction, Halsey, Stuart's president handed Commonwealth's representative a check for 161 million dollars, also covering interest due on the bonds and the premium paid for getting the business.

In addition to the 155 million dollars refunded with new bonds, Commonwealth retired an additional 23 million dollars of securities with its own cash.

RAIL RATES:
Wants Boosts

Supporting their petition for continuance of the 10 per cent increase in passenger fares, and immediate application of the 4½ per cent freight rate boost, railroad representatives declared the carriers faced decreasing revenues when war traffic subsides.

Previously, federal agricultural agencies opposed the freight rate increases on the strength of continued high farm traffic for at least two years after the war.

Unless rail revenue is bolstered by rate increases, said Vice President Walter S. Franklin of the Pennsylvania railroad, the financial structure of the carriers will be seriously impaired in the postwar years, with the result being " . . . a very much less effective operation, and a serious impairment of the railroads' ability . . . to be ready to do their part in meeting the employment problem after the war."

BRITISH LAND

Steering clear of any political battle between conservatives and liberals that might upset the present coalition government, Britain's house of commons passed a bill for postwar reconstruction.

Passage was aimed at avoiding an all-out battle between the two political elements over the bill's provision that landlords only be paid prewar prices for land condemned for reconstruction use, with increases up to 30 per cent for occupying owners.

The Washington Merry-Go-Round

By Drew Pearson

(WNU Service)

Washington, D. C.

EISENHOWER'S BRILLIANT PLANNING

When the inside story of General Eisenhower's European war planning is finally told, the American public will be amazed at some of the things he has put across. Here is part of the story:

Long before D day Eisenhower had timed every operation down to the last minute. The most important maneuver was to break through the Germans' Atlantic wall and wedge an opening through which other troops could pour. The German High Command considered this wall impregnable. Yet Eisenhower's driving demand for offense was such that he allotted his men exactly 45 minutes to get through.

He had each move so carefully timed and planned that, after 45 minutes, other ships, supplies, men would be piling up on the beach, would have no place to go unless the break-through was accomplished in the time allotted.

Before the invasion a full-scale replica of German fortifications was constructed in England, built from aerial photographs. And day after day, American troops rehearsed their break-through. The best time they were able to make in these rehearsals, however, was one hour and 30 minutes. But when D day finally came, thanks to General Eisenhower's dynamic planning, they made it not in 45, but in 35 minutes.

But with his advance into France timed to the hour and day, Eisenhower, after the original breakthrough, ran into difficulty.

Lieut. Gen. Omar Bradley kept right on schedule in penetrating south into Normandy. And Maj. Gen. Joe Collins was on schedule or ahead of it in penetrating Cherbourg. In fact, they had developed, in cooperation with Eisenhower, a new type of advance. Instead of advancing so many miles and then waiting for supplies to come up, as at the slow-moving Anzio beachhead, they developed the tactic of barging ahead regardless of supplies.

Thus General Collins surprised the Nazis and the world, ignoring Nazi machine-gun nests, forgetting about supplies and forging right into Cherbourg before its defenders knew what was happening.

Trouble with Monty.

Eisenhower's chief trouble, however, was with General Montgomery, whom Winston Churchill once described as "magnificent in defeat, insufferable in victory."

General Montgomery had been given Caen as his objective. But days passed and nothing happened. The offensive-minded Eisenhower kept hammering at Montgomery, urging an advance. But nothing happened. Actually, Montgomery had just as high a rank as Eisenhower, had seen many more battles, so Eisenhower was in no position to get too rough.

Finally, Air Intelligence showed that German resistance behind the Allied lines was a mere shell. He could tell from air observation that the Nazis were able to bring up only about 25 per cent of their needed supplies. Their reinforcements had to hide in the daytime, advance only at night. Most of the bridges across the Seine were down.

So Eisenhower, tired of waiting for Montgomery and already behind schedule, gave the order for General Bradley to ignore Montgomery and break through the Nazi lines to the south.

DEMOBILIZING OLDER MEN

War department officials are under heavy pressure to make one very important change in the army's plan for demobilization.

The demobilization plan did not consider servicemen's age. However, men overseas, particularly those in the European theater, have been angrily pointing out that the British demobilization program gives each man a specific number of points for age, thus assures older men a better break. The army said it had drafted older men "reluctantly," because most were heads of families. The GIs now point out that it would be equally logical to discharge these older men among the earliest, since they are needed by their families.

Veterans' administration studies reveal that the cost of keeping older men in uniform is greater than for younger men, since the army pays out large sums for dependency. Allotments have proved meager and scarcely able to keep families together. Yet, under the demobilization plan as it stands now, family heads would be among the last men to be released.

* * *

CAPITAL CHAFF

¶ The danger of a new crime wave as a result of letting returning war heroes keep captured revolvers and machine guns is worrying officials.

¶ Publisher Joe Patterson wasn't kidding when he explained that the New York News was dropping the "Presidential Battle Page" because of libel. He faces a libel suit from CIO's Beannie Baldwin. . . . The GOP accused Baldwin of drawing a salary from the government while working with the CIO and Patterson printed it.

Walter Winchell

(WNU Service)

For Wendell Willkie:

You were America at all its best
As clean and fresh as any prairie wind,
And when you took your final journey west
You left a fragrant memory behind,
Yet now the little men who cried you down
Shed unctuous tears and claim you as their own,
And fit you with a smug, unwieldy crown
Which they well know that you had long outgrown;

You were America . . . and millions weep
Who felt in you a comrade and a friend,
And yet we have your prophecy to reap,
A prophecy you left at journey's end . . .

America is big enough for all . . .
The poor, the weak, the humble and the small!—Don Wahn.

The Magazines: Pip of a SEPiece by Lieut. John Mason Brown, deftly test-tubing differences between Americans and Britishers. The importance of such an article should not be underestimated. A primary requisite for international friendship is a keen understanding of other nations.

Broadway Smalltalk: Malcolm Meacher is no longer writing for the March of Time because of its refusal to deal with the issues on Margaret Halsey's best-seller, "Some of My Best Friends Are Soldiers." . . . Customs men have detained a Met singer in Miami, who returned from Brazil the other day with undeclared gems valued at over $15,000. . . . Hoagy Carmichael's music for Ballet Russe will be called "Swing Street." . . . Don Ross, the Chicago reporter who went to Warner's for a job in the press dep't, wound up as an actor in Ida Lupino's next flicker. . . . For the first time since the war started N. Y. university is hazing freshmen. . . . F. Sinatra wishes the egg-thrower would come over to some gym with him "for a workout."

GIs are confused. General Eisenhower wears the four stars of his rank on the left side of his shirt collar, while Generals Bradley and Marshall wear them on the right. . . . The reason is that U. S. army regulations state: "All articles of uniform for wear by the General of the armies and the Chief of Staff are such as each may prescribe for himself" . . . So General Eisenhower could wear a derby and the four stars on the seat of his pants, if he liked.

Ass't President Byrnes has asked for a trained staff of 25,000 persons to start termination of war contracts. It will be Washington's biggest postwar agency. . . . F. Sinatra will sing for troops in the S. Pacific. . . . The other day Her Highness, accompanied by four bodyguards, invaded a Fifth avenue shop, upset the gaping personnel and routine of the place and then bought $14 worth of stuff.

What they don't announce is that an entertainer, overseas for two years, is in a Paris hospital with a severe case of shell shock. . . . Every time we read the insults—hurled by a few critics at showfolks who go overseas—we think of Carole Lombard and the actor victims in that Lisbon plane crash.

Love Letter:

The weary town will soon be fast asleep,
The moon is cold and pitiless as doom,
And yet we have a rendezvous to keep,
Within the shadows of a quiet room . . .
The candlelight tints beauty on your face,
The wine will steal reality away,
And vows we make can quietly efface
The terror of a new, unwanted day . . .

And so it goes for those who chase a star,
The search may end in heartbreak and defeat,
But there is always magic where you are,
A magic that is tremulous and sweet . . .

And who will have more lovely scars to show,
If you and love should ever chance to go?
—Don Wahn.

Sounds in the Night: In the Zanzibar: "She's mean enough to be the heroine of a best-selling novel." . . . In La Conga: "His radio program is where a good gag goes when it dies." . . . In Lindy's: "Excuse me, lady. I was just trying to make a dream come true." . . . At the Copacabana: "If they carry Maine they won't be doing anything different than the banks there have been doing for years!"

More dramatic than any of the Broadway shows was that moment at the Colony when the Duke and Duchess of Windsor bumped into Lady Thelma Furness, the Duke's favorite companion until Wally came along.

The Magic Lanterns: The nation can keep warm this winter merely by viewing clinches between Hedy Lamarr and Paul Henried, who start a bonfire of emotion in a swift spymeller, "The Conspirators." . . . Everything in "Sweet and Lowdown" plays second fiddle to Benny Goodman's clarinet. Too bad the scenario isn't in tune with the music. . . . Fibber McGee and Molly's "Heavenly Days" gently twits Washington. Difficult to understand why legislative namby-pambies were leery about releasing it.

CLASSIFIED DEPARTMENT

HELP WANTED

• *Persons now engaged in essential industry will not apply without statement of availability from their local United States Employment Service.*

FARM WORKERS
We need men over 16 for essential work our plant. Temporary or permanent 70c PER HOUR
By applying to your county agent draft board you may get a temporary release from agriculture
THE IOWA PACKING CO.
South East 18th and Maury
Des Moines - Iowa

LABORING MEN who desire steady permanent employment wanted. One and week vacation with pay. Bus line 1 block from plant. Good conditions. Now working 54 hour week. EAGLE IRON WORKS Des Moines, Iowa.

Business Opportunities

CABIN CAMPS $7,000, $16,000, $20,000. Filling stations $4,000 to $16,000. Grocery and clothing stores, business opportunities. Mica, tin, feldspar, spodumene, tungsten and gold mines.
WHEATON LAND COMPANY
Rapid City - - South Dakota

GARAGE AND FILLING STATION with business, house joining gar. Will invoice stock and sell for ½ of list price. $200 to $1200 will handle stock, fixtures. Close to Des Moines on 2 hi-ways. Reason for selling, other interests.
H. F. DILKS

U. S. Schools Must Prepare Young People To Cope With Difficult Problems of Future

Citizens Are Urged To Visit Their Local Learning Centers

Labor, industry, educators, churches and women's clubs uniting in a call for the observance of American Education week, November 5-11. The week is dedicated to public tribute to schools and is sponsored by the National Education association, the American Legion, United States Office of Education, and the National Congress of Parents and Teachers. The annual pilgrimage to the nation's schools is made in more than 4,000 communities by more than 10 million persons during the week's program of school activities.

Calling upon the "citizens to visit their schools," President Roosevelt urges observance of American Education Week to "become better acquainted with those faithful servants of the nation's children and youth—the teachers."

In the President's message to patrons, students, and teachers of American schools," he asks that teachers be encouraged in their task of "cultivating free men fit for a free world. For these teachers are the conservators of today's civilization and the architects of tomorrow's world of promised peace and progress. They serve within the very models of democracy, devotedly whether in war or in peace.

"When victory on the fields of battle shall have been achieved, the work yet to be done through our schools will be enormous," the president continues. "I therefore call upon the teachers of America to continue without flagging their efforts to contribute through the schools to that final consummation which alone will make possible of fulfillment all plans of education for new tasks."

"Realizing that the schools play a vital role both in the prosecution of the war and laying the foundations of the peace, "Education for New Tasks" is the theme for the 24th annual observance.

"Schools are preparing children and young people for the new tasks which confront our country," states Carl L. Schlagle, president of the National Education association, "the new tasks of making postwar readjustments, maintaining economic security at home, improving intergroup relationships, assuring justice to minority groups, adapting our life to the new technology, and improving community life. Only a people of intelligence, character, goodwill and earnestness can meet these issues with success."

Program for the Week.

Daily themes in the development of "Education for New Tasks" are:

Sunday, November 5 — Building Worldwide Brotherhood.

Monday, November 6 — Winning the War.

Tuesday, November 7 — Improving Schools for Tomorrow.

Wednesday, November 8 — Developing an Enduring Peace.

Thursday, November 9 — Preparing for the New Technology.

Friday, November 10 — Educating All the People.

Saturday, November 11 — Better Community Life.

"When the war is over, our country will be faced with a problem of readjustment which in many ways will be as difficult as the problems of mobilization for the war," warns Dr. Schlagle. "Millions of men and women must be retrained for new jobs. Boys and girls in schools must be aided in adjusting to postwar conditions. The war has emphasized the

nation's need for youth. We cannot afford in the postwar period to permit youth to become the lost generation again," he says.

"Building Worldwide Brotherhood," topic for Sunday, opening the week's program, will be observed in the churches throughout the nation. According to Everett R. Clinchy, National Conference of Christians and Jews," "Brotherhood is giving to others the dignity and rights we want to keep for ourselves. We need to make universal brotherhood part of the learning experience." He points out that this can be done by thinking scientifically on questions of race, religious cultures, and nationality differences which divide people into groups.

Monday's theme, "Winning the War," is a reminder of the wartime job being done by the schools in preinduction training, adjustment of courses to permit pupils to do wartime work, rationing and registration programs, conducting scrap and bond drives, as well as continuing their regular program of education for 25 million American children.

"Improving Schools for Tomorrow emphasizes the steps needed for improving American education. Equalization of educational opportunity through state and federal aid, payment of adequate salaries to teachers, streamlining the administrative organization of education in many areas, and the building of school programs around real life problems are among the pressing needs for better schools in the postwar era.

Hope For Enduring Peace.

"Education is a potent force which can be used for the promotion of peace," underlies Wednesday's topic, "Developing an Enduring Peace." Proposals for the international organization following the war include a council on educational policy which would become a permanent international agency for education. The purpose of such an agency would be to lift educational standards, to encourage education for international understanding, and to report for action to the general international body attempts in any nation to promote war through education.

"Preparing for the New Technology" points to the reliance technology and science have upon education. The need for intelligent management and the reduction of unskilled labor are emphasized. The ever-increasing need for specialization on the part of workers calls for cooperation and mutual helpfulness. "The promise of a new world depends upon technology. To reach that promise we must develop through education people capable of using it," Mr. Schlagle points out.

"Educating All the People," topic for Friday, emphasizes that despite the great strides in establishing a system of public education, there are 13½ per cent of our adult population having only a fourth-grade education or less. Hundreds of thousands of men fully qualified in every other respect have been found by the Selective Service to have less than a fourth-grade education.

"Bettering Community Life," topic for the last day of American Education Week, underlines the role of the school as a community center, serving adults as well as children, and acting as a force for bringing the people together so that plans for improved community life may be made and developed.

Problems of Future.

American Education Week grew out of the First World War. It was first observed in 1921. Twenty-five per cent of the men examined in that draft were illiterate; 29 per cent were physically unfit; many were foreign-born and had little understanding of American life. These were startling disclosures. Unfit as they were for war, these men were also incapable of serving their country most effectively in time of peace.

Members of the newly formed American Legion wished to correct these conditions. They saw in this situation an opportunity to serve their country after the war. When a campaign of education appeared to be the only answer they consulted the other sponsoring organizations and as a result the first American Education Week was observed.

"All the new tasks which confront our society as a whole are the ones with which our schools must deal. For the schools are of society and their task is to build society by developing good citizens," Mr. Schlagle further points out. "Let us utilize the power of education to

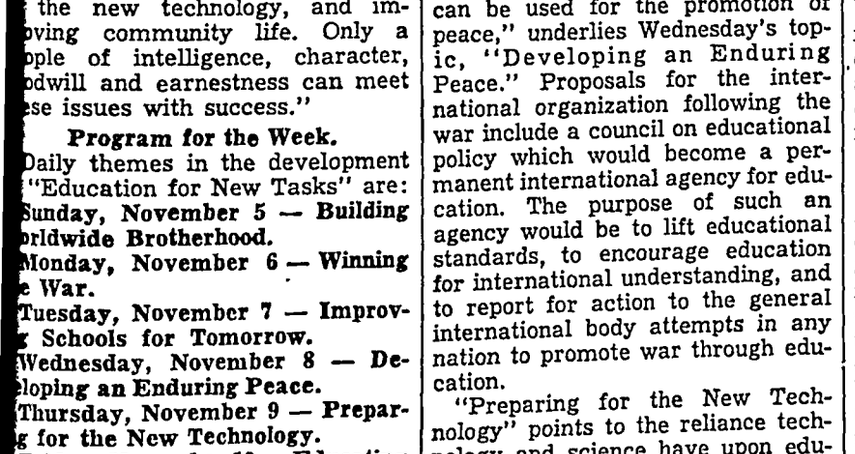
Many adults need a grade school education, either because they came from some region of the country where schools are remote, or because they are foreign born. Here a young woman from Austria waves her hard-won diploma.

further fulfill the promise of America and to enable us to do our part among the family of nations in the establishment of a just order of affairs in the world," he urges.

Six Billion Investment.

The National Planning committee, a private agency, most of whose directors are businessmen, recently stated that if we make our economic system work reasonably well after the war we shall have a national income of at least 110 billion dollars. The report goes on to relate that according to the estimated figures, we shall spend: 25 billion for foodstuffs as compared with 16 billion before the war; 16 billion for housing as compared with 9 billion; seven billion for automobiles as against four billion; three billion for recreation as against one and a half billion; 13 billion for household operations and equipment as compared with six and a half billion. "Shall we," asks Mr. Schlagle, "under such conditions refuse to increase the two and a half billion which we have been spending for schools and colleges: Shall we, with the highest per capita income of any nation in all history, use our increased wealth to feed, clothe, and house ourselves in comparative luxury, to buy entertainment, airplanes, automobiles, radios, and refrigerators, and neglect to spend any of our increased income for the educational improvement of our children? We can readily afford the five or six billion dollars which a genuinely adequate educational program for all would cost. This would be the wisest investment that American citizens could make," he contends.

Eric A. Johnston, president, United States chamber of commerce, says the organization "is glad to give its support to the observance of American Education Week, 1944. Business recognizes the relation between education and an expanding economy. There is no more important task before us than the development of the kind of educational program which will promote good citizenship and economic well-being."



Practical and scientific training is getting increasing emphasis during the war years, even in grade school. Probably this trend will continue into peace times. These boys are making radio sets.

By VIRGINIA VALE

JIMMY CAGNEY is settling down to work on his new picture, "Blood on the Sun," after too long an absence from the screen. During that absence he's made a four-month overseas tour, and his brother William has gone through several hundred manuscripts, trying to find suitable material for James. Two possible stories turned up for the picture following "Blood on the Sun"; no matter which is selected, Cagney will be seen as a soldier in the American army in the days of the Indian wars.

—*—

RKO executives swear that "Tall In the Saddle," starring John Wayne, is absolutely a non-formula western. Wayne never bids his faithful horse a fond farewell; Ella Raines is not

JOHN WAYNE

a schoolteacher; Wayne doesn't win all the fights, nor does he gallop off up canyons just for the sake of galloping. And surprise—he not only kisses Ella Raines, he kisses Audrey Long, too.

—*—

For several years now Bob Hope has not broadcast before a civilian audience. Only servicemen are admitted, whether he has been giving performances abroad or here in America.

—*—

Parks Johnson and Warren Hull have starred GI Joe and war workers since Pearl Harbor, keeping their own voices in the background. But recently Parks was riding in a New York taxi, and the driver turned around. "You're Warren Hull, aren't you?" he asked. "No, I'm Parks Johnson, but you have the right show," said Parks. "I knew it," said the driver. "Soon's you told me where to go, I knew that voice."

—*—

"Without Love," the new Katharine Hepburn-Spencer Tracy-Lucille Ball picture, went before the cameras the other day, with Keenan Wynn and Patricia Morison in supporting roles. It's based on the play by the same name in which Miss Hepburn appeared.

—*—

Just for her own convenience, Joan Bennett's an inventor. She invented and patented a lipstick brush that can be carried in a purse without smearing other articles; that's just one of her inventions. At the moment she's having fun designing wall paper.

—*—

Lois Wilson, star of the silent screen, is carving out quite a career for herself on the stage and in radio. She was practically snatched from the Saturday matinee of "Chicken Every Sunday," the day before the first broadcast of the Ethel Barrymore show, "Miss Hattie," when producers wanted to make a last minute switch in the role of "Martha Thompson." Lois got the role; you hear her Sundays.

If you gave your dog to the army, you'll want to see "My Pal, Wolf." The picture, revolving around the adventures of seven-year-old Sharyn Moffett and a dog, has a sequence showing how the army performs in transferring a pet into a perfect canine soldier.

—*—

Picture and radio people are agreed on one thing—no matter what anybody says, they're convinced that Joe E. Brown did everything in his power to cheer the boys overseas. If ever a man put his heart into doing anything, the "Stop and Go" star put his into entertaining servicemen.

—*—

ODDS AND ENDS—Dinah Shore and Jimmy Durante are among the stars who will record the Christmas "Command Performance" show for those overseas. . . . House Jameson, of "Crime Dctor," was named as a result of the close friendship between his father and Col. E. M. House, President Wilson's adviser. . . . Regis Toomey has been signed for a role in "The Big Sleep"; Humphrey Bogart and Lauren Bacall head the cast. . . . Dick Jones (Henry Aldrich) is writing all his letters to one Miss Betty Bacon of Los Angeles. . . . When the Eddie Cantor show performs for servicemen, it's red-haired Nora Martin the boys whistle at.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for November 19

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

CHRISTIANITY AND DEMOCRACY

LESSON TEXT—Mark 12:13-17; Romans 13:8-10; I Peter 2:13-17.

GOLDEN TEXT—Bear ye one another's burdens, and so fulfill the law of Christ.—Galatians 6:2.

No form of government can claim divine authority, for God's Word does not prescribe any special form of government. But (and this is most important) the principles upon which government should be established are clearly given in God's Word, and the form of rule which best fits into the teaching of the Word necessarily calls for our interest and support.

We find in the Bible the declaration that men are equal in the sight of God, that government is to be a ministry for God (see last week's lesson), receiving its authority from Him and serving Him in exercising that power. Men are to be loyal to the government because they are loyal to God.

Our lesson carries forward the teaching of last Sunday. It tells us that:

The Christian Citizen Is—

I. Subject to Both God and Country (Mark 12:13-17).

His devotion to God and the things of God is to be expected of the Christian. We almost said that it is taken for granted, and sometimes that is so true there is no reality in his life. But surely if he is a follower of Christ he must be devoted to Him and to His cause.

But what about his country? That relation appears anew in the striking story of Christ and those who came to test Him, yes, to trap Him with a skillfully worded question.

The Pharisees, who hated Rome for its domination of Palestine, and the Herodians, who supported Rome in its control of the land, were enemies, but they joined forces to tempt Christ. They knew that if He said "Yes" to their question, the Jews would be angry, and if He said "No," He could be condemned as a traitor to Rome.

The trap was set, but it caught only the crafty hunters. Taking their own pocket money He declared that if they used Caesar's money they ought to pay taxes to Caesar. The coin stood for an orderly government, benefits of which they enjoyed and which they ought to support.

No real Christian will evade his duty to his country whether it be to pay taxes, to take part intelligently in its government, to defend it, to pray for it, or otherwise to show his love. One of the blots on the Christian church is the lack of civic righteousness on the part of many of its members.

II. Devoted to Both Brother and Neighbor (Rom. 13:8-10).

The Christian loves his brethren; indeed that love is one of the tests by which we may know that a man is truly born again (I John 3:14).

But that love reaches out beyond the circle of the brethren and touches every man who has need of it. The teachers of the Jewish law had sought to circumscribe that word "neighbor," but the Lord effectively dealt with that viewpoint in the story of the Good Samaritan (Luke 10).

All the commandments concerning the vital matter of personal relationship are summed up in the one admonition, "Love thy neighbor as thyself" (v. 9). When love controls, there will be no social dishonesty, strife or ill-will. There will be no violence to the person or property of another, for "love worketh no ill to his neighbor."

This is the real "good neighbor policy." Even between nations, we need more real love and less effort to impress one another by diplomacy and good will expeditions. Let there be less political manipulation and more loving, and we shall find our neighbor, both personal and national, responding in kind. Love draws out love from another.

III. Submissive to Both the Law of God and Man (I Pet. 2:13-17).

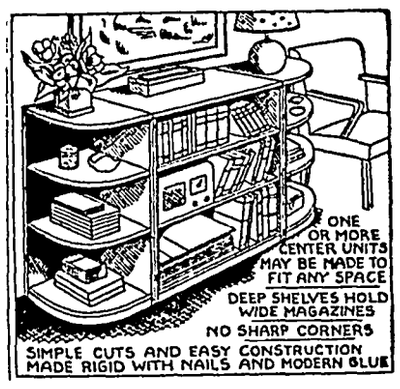
"Fear God" (v. 17); that is, be eager that there is no failure on your part to please Him by obeying His law. That we expect of the Christian. But we expect more; he is to be a law-abiding citizen, obeying the laws of his country "for the Lord's sake" (v. 13).

The believer may, by his godly faithfulness to his government, effectively witness against the ignorant criticism of foolish men who would have us think that being a Christian makes a man a weakling, or so other-worldly that he is useless in this world.

Our freedom in Christ is not an excuse for careless or wicked living. Not at all—just the opposite in fact. We "honor all men." How can that be done? Only by the grace of God; but by His blessing we can do it. That makes for the real appreciation of man, which is the very foundation of our democracy. If it means anything, it must have as its foundation principle the supreme value of human life and the dignity of the soul of man.

Unit Shelves Easy For You to Build

WHETHER you have a house of your own or whether you move often, unit book shelves are the answer to many a problem. They may be scaled to fit almost any space; you may add to them as needed and they may be shifted from one place to another according to your mood. They may start in the living room and end



ONE OR MORE CENTER UNITS MAY BE MADE TO FIT ANY SPACE
DEEP SHELVES HOLD WIDE MAGAZINES
NO SHARP CORNERS
SIMPLE CUTS AND EASY CONSTRUCTION MADE RIGID WITH NAILS AND MODERN GLUE

in the children's room or in the kitchen. The units may be divided, multiplied or used in various combinations.

You need no special skill to make the three units shown. These well proportioned shelves were designed especially for amateur homecrafters to make with the simplest tools. A compass saw from the five-and-dime will cut the curved shelves of the end units. Because the shelves were designed by a homemaker, a simple method of constructing them with no open dust space at the bottom was worked out and special thought was given to the width and depth of shelves so that they would have the maximum usefulness and still be made of stock sizes of lumber.

* * *

NOTE: Pattern 270 gives a full size pattern for the curved shelves of these book cases and large diagrams with dimensions of all the straight pieces. Also a complete list of materials required and illustrated directions for each step in the construction of the units. To get this pattern enclose 15 cents with name and address and send direct to:

MRS. RUTH WYETH SPEARS

Full Generals

The United States has five full generals in active service. They are: George C. Marshall, Douglas MacArthur, Henry H. Arnold, Dwight D. Eisenhower, Malin D. Craig and Joseph W. Stilwell.

Acid Indigestion
Relieved in 5 minutes or double money back
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

When raw winds cut like a knife...
CHAPPED LIPS
SOOTHED QUICKLY!
Cracked lips—so cruel, and painful! Caused when raw, bitter weather dries skin cells, leaves them "thirsty." Skin may crack, bleed. Mentholatum acts medicinally: (1) Stimulates local blood supply. (2) Helps revive *thirsty* cells so they can retain needed moisture. For sore, chapped hands, lips—Mentholatum. Jars, tubes, 30¢.

Last Rites Held Here Monday For Mrs. Elizabeth Smid

FORMER RESIDENT DIED AT HANOVER, ILL., THURSDAY

Services Held At The Reformed Church In Klemme

Mrs. Elizabeth Smid, wife of the late U. G. Smid, retired farmer of Klemme, died at the home of her daughter, Mrs. Edward Rall, at Hanover, Illinois, Thursday evening of last week. Mrs. Smid had lived with her daughter in Illinois for nearly a year.

Funeral services for Mrs. Smid were held at 2:00 Monday at the Klemme Evangelical and Reformed Church, with the Rev. Calvin Grosshuesch officiating. Burial was in the Klemme Cemetery.

The following is the obituary as read by Rev. Grosshuesch during the services:

OBITUARY

Elizabeth Smid, nee Johnson was born at Fairburg Illinois, January 9, 1875. She was baptized in the Lutheran Church at Danforth, Illinois, where she attended the public school during her childhood days. She was confirmed in the Lutheran Church in the year 1892. On December 22nd, 1897, she was united in marriage to U. G. Smid. During the first 11 years they lived at Danforth, where Mr. Smid worked at the carpenter trade. From there they moved to Westfield, Iowa; next to Reynolds, Indiana, then to Belmond Iowa. In 1912 the family moved to a farm one-half mile south of Klemme where they lived until 1928 when they retired and moved to the home of Klemme. Mrs. Smid left Klemme in 1943 to make her home with her daughter Geraldine at Hanover, Illinois.

Of their seven children, two preceded their parents in death. An infant son died in 1912, and their daughter, Janet, died January 7th, 1918. Mr. Smid died February 24, 1941.

Mrs. Smid was a quiet, homeloving mother, whose main concern was the comfort and welfare of those of her household.

Mrs. Smid had been in poor health for a number of years. She suffered a stroke about a week before her death, November 16th, 1944. She attained the age of 69 years, 10 months and 1 day.

Surviving her and mourning her departure are her children:

Bernhardt of Klemme, Iowa.

Caroline (Mrs. Emery Schaeffer of Klemme, Iowa.)

Geraldine (Mrs. Ed. Rall) of Hanover, Illinois.

Doctor of St. Ansgar, Iowa.

Henry, of Klemme, Iowa.

Five grand children; five brothers and two sisters:

Michael Johnson, Gilman, Ill.

John Johnson, Jackson, Minn.

John Johnson, Kankakee, Ill.

Henry Johnson, Kankakee, Ill.

Fred Johnson, Kankakee, Ill.

Mrs. A. Frerichs, Kankakee, Ill.

Mrs. Geo. Reighel, Gilman, Ill.

CARD OF THANKS

I sincerely thank all the neighbors and friends who assisted in any way for our Mother's funeral, also for the beautiful floral offerings which were so greatly appreciated.

Bernard and Henry Smid,
Mr. and Mrs. Emery Schaefer and family,
Mr. and Mrs. Edward Rall,
Mr. and Mrs. Otto Smid.

1tp

Elder Sold Dairy Business To Klemme Creamery Co.

W. Elder has sold his milk cream business to The Klemme Cooperative Creamery Company expect to take over the Elder business about the first of the month. Russell Medim, manager of the Creamery is getting equipment to pasturize milk, and other modern equipment for handling milk and cream. Details will be published later.

PROMOTED

LT. HAROLD E. WICKS

Mrs Harld E. Wicks, Klemme, has been notified that her husband, Lt. Harold E. Wicks on Sept. 28, 1944 was promoted from 2nd to First Lieutenant in the Air Corps and at the same time was presented with the Air Medal. Lt. Wicks is the son of Mrs Albert Kehl, Klemme and is a graduate of Klemme High School. He entered the Air Corps on Nov. 15, 1942 and was presented his Silver Wings and commissioned a Second Lieutenant at Williams Field, Chandler, Ariz., on Oct 1, 1943 He was then assigned to a tactical unit as a P-38 pilot and went overseas in April of this year. His work in the Southwest Pacific battle area is that of a photo reconnaissance pilot. Mrs Wicks is staying at the home of her parents, Mr. and Mrs. E. C Buntenbach of Klemme, for the duration.

WENT TO FORT SNELLING FOR SERVICE INDUCTION

The following Hancock County boys left for Fort Snelling, Minn., November 20th where they were inducted into the Armed Forces:

Joseph R Kelly, Britt.
William C Keough, Garner.
Verner E. Lau, Klemme.
William A. Millard, Garner.
Wayne F Klinge, Britt.
Arthur F. Weiscamp Britt.
Calvin W Voight, Forest City.
Merle J. Wilhite, Corwith.

Melvin L. Finch was transferred to this Local Board for induction from Local Board No. 1, Harding County, Iowa Falls, Iowa, and also left with the above group.

EIGHTEEN YEAR OLD TO GET PHYSICAL EXAMS FIRST

The Hancock County Local Selective Service Board is notifying all new registrants, boys who became 18, that they will be placed in Class 1-A and sent for a preinduction physical examination before they will be considered for deferment.

Selective Service Board Will Not Meet This Week

The Hancock County Local Selective Service Board will not have their usual Board meeting Thursday evening, due to the fact it is Thanksgiving, but will be open on Thursday, Nov. 30, 1944.

Klemme Farmer Shoots Deer

W F. Greiman, Jr. of near Klemme, returned Saturday from Minnesota where he went deer hunting. Bill brought back a nice big doe and there will be venison on the Greiman table for Thanksgiving.

CHANGE IN BASKETBALL DATE, GARNER HERE TONITE

The Garner-Klemme game which was scheduled to be played Nov. 21 will be played on the local floor tonight Nov. 22.

The date was changed to avoid conflict with the American Legion Feather Party on Tuesday eve.

Sale Of Christmas Seals Goal Set At $2,170

MEETING HELD MONDAY TO PLAN ANNUAL CAMPAIGN

Hancock County Has Gone Over Top Seven Consecutive Years

Mrs J A Chambers, Vice President of the Hancock County Tuberculosis Association; Mrs Elmer J. Schneider, Seals Sales Chairman for Ell township; Martha Bredbenner, Chairman for Klemme, and Mrs R. A Jorgenson, member of the Publicity Committee of the 1944 Annual Christmas Seals campaign for Hancock County, all attended a meeting of officers and executive board held at Britt Monday afternoon, to plan the annual campaign, which begins Monday, November 27th.

Hancock County's goal this year is the sale of seals to the amount of $2.169 16, which will be a gain of $273 over last year. Hancock County has gone over the top for the past seven years.

Members of the Executive Committee for Hancock County are:

President, Mrs. Ray Baker, Britt; Vice President, Mrs J. A. Chambers, Klemme; Secretary, Mrs. Forest Eckels, Britt; Treasurer, E. B. Sheldahl, Kanawha; Chairmn Seal Sales, Mrs. Lloyd Raber, Kanawha; Director, Mrs. H. H Stewart, Kanawha.

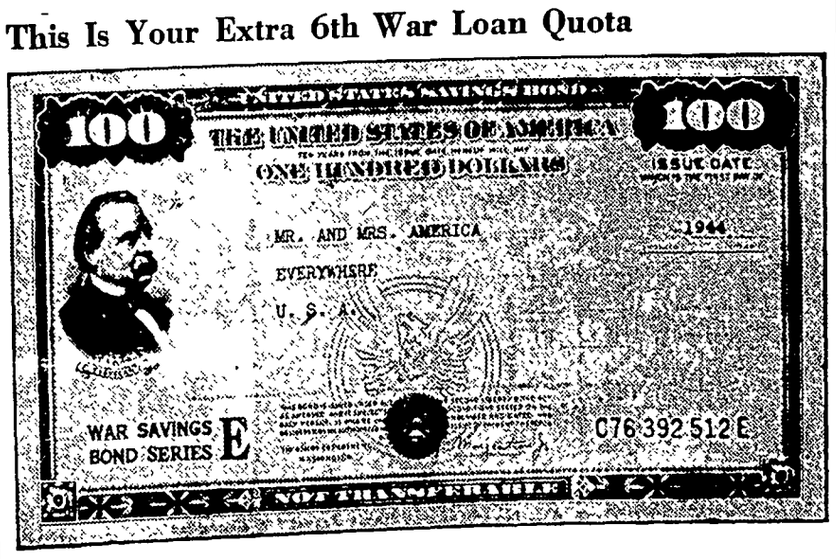
FIRST SNOW

A light snow covered the ground this morning, and as this is written a light snow is falling. This is the first snow of the season in this part of the state. The date is Nov. 22.

This Is Your Extra 6th War Loan Quota



Sixth War Loan Bond Drive To Be Held At School Gym

CHRISTMAS PARTY PLANNED FOR G. I. JOE AND G. I. JANE

Through the channels of the American Legion and the American Legion Auxiliary it is hoped that every wounded, sick and disabled service man and woman in government hospitals in the United States will this year receive gifts on Christmas Day

To make this possible, Iowa Posts and Units must secure 3,700 gift boxes to supply the Government Hospitals in Iowa alone, and they are asking that every family in the community have a part in this.

Their plan is this: Purchase an additional gift when doing your Christmas shopping These gifts to be later distributed to all of the wounded, sick or disabled men and women in the Government Hospitals in the U. S. The purchase you present will make possible great happiness for the many thousands who have given and who are continuing to give much for all of America.

The gifts when purchased may be left at Thada's Store where a box is provided; at the Thomas home or Barber Shop or with any member of the American Legion or Auxiliary.

It is the hope that this program may be a complete success, that enough gift boxes may be shipped for the 3,700 hospitalized in our own Iowa Government Hospitals.

Hancock County's gifts are allocated to the Knoxville Facility Please avoid any gift which might contain wire or anything of a sharp nature with which patient might harm himself or others.

For further information listen to the Eddie Cantor Radio Series on Wednesday evening, 8:00 to 8:30 CWT on the NBC network.

Suggested gift lists will be found at the various business places.

December 10 has been fixed as the deadline for receipt of gifts in order to allow sufficient time to properly distribute the presents An individual donor or group donors may, if they wish, place their personal cards in the gift.

Make our slogan your slogan "Give Gifts to the Yanks Who Gave."

—Klemme Auxiliary

KLEMME JUNIOR RED CROSS DRIVE ENDS SUCCESSFULLY

The Junior Red Cross Drive in the Klemme School was closed on November 15th with a total of $25 12 subscribed. This was $3.18 more than was reported last week.

The Klemme School is now 100 per cent in the Junior Red Cross Drive as each room contributed 50 cents or more. The Kindergarten and the first six grades are to be congratulated as each of these grades had every pupil's name on the membership roll.

SHAMROCKS AND HAYFIELD SPLIT FIRST BALL GAME

The Klemme Basketball team journeyed to Hayfield last Friday night and the Shamrocks were defeated 38 to 24. The score at the end of the first half was 25 to 13 in favor of Hayfield.

Jacobs and Buntenbach divided scoring honors or Klemme with 7 points each. Horecka lead Hayfield scorers with 15 points.

In the curtain riser Klemme's Little Shamrocks defeated the Hayfield seconds 18 to 13.

CIVIC CLUB MEETING NEXT THURSDAY NOVEMBER 30

The Civic Club will hold its regular monthly meeting at the Community Hall on Thursday evening, November 30th promptly at 7:30 o'clock.

Every member be there on time as important business will be taken up.

MUSIC DEPARTMENT WILL PRESENT "BOND CONCERT"

The Music Departments of the Klemme School will present a BOND CONCERT on Thursday evening, November 30th at eight o'clock. This concert will be held in conjunction with the Sixth War Loan Drive Admission will be by the purchase or pledge to buy at least one $18.75 Bond during the Sixth War Loan Drive.

Fertile, Hanlontown and Joice are presenting similar concerts.

Klemme has accepted a challenge to see which school can sell the largest grand total of War Bonds.

The music students under the direction of Mrs. D. O. Turgasen and Mr R. C. Sucher will present a one hour concert of partriotic, novelty, and semi-classical numbers. The Glee Clubs, First Band, Beginning Band and smaller groups will appear on the program, which will be somewhat lighter in nature than the other concerts to be given during the year. The students and their directors are working hard to prepare an entertaining program. It is their "All Out" effort to help the Sixth War Loan Drive, so come to the BOND CONCERT on Thursday, November 30. Buy bonds and help put Klemme over the top in the Sixth War Loan Drive and put the Klemme School at the top in the bond contest.

Tickets may be secured when buying Bonds at the bank or Post Office. Purchase will be credited to your own township if you live outside of Klemme. Purchase of Bonds since November 1st will also apply.

PROMINENT FARMER NEAR MESERVEY DIED SUNDAY

Funeral Services For William Messelheiser Held Tuesday P. M.

William Messelheiser, 80, a pioneer farmer residing northwest of Meservey, died at his farm home Sunday morning at 6:00 o'clock. He had been a resident of the community for about fifty years.

Surviving are his wife, a daughter, Elfreda, and a son, Elmer, also a granddaughter.

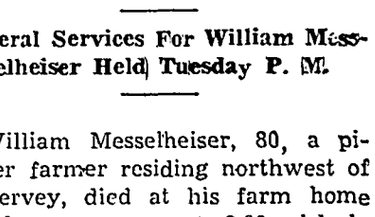
Funeral services were held Tuesday at 1:00 p. m. at the home, and at 1:45 p. m. at the Evangelical Church. Burial was at the Hampton cemetery.

HANCOCK COUNTY FARMERS STILL PLOWING NOV. 21ST!

North Iowa has experienced remarkable weather this fall and as late as Tuesday, November 21st, the editor saw several farmers in their fields plowing. This is unusally late for North Iowa.

Most fields of corn have now been picked and there has been more fall plowing done in Hancock County this fall than ever before.

HELLO, FOLKS!

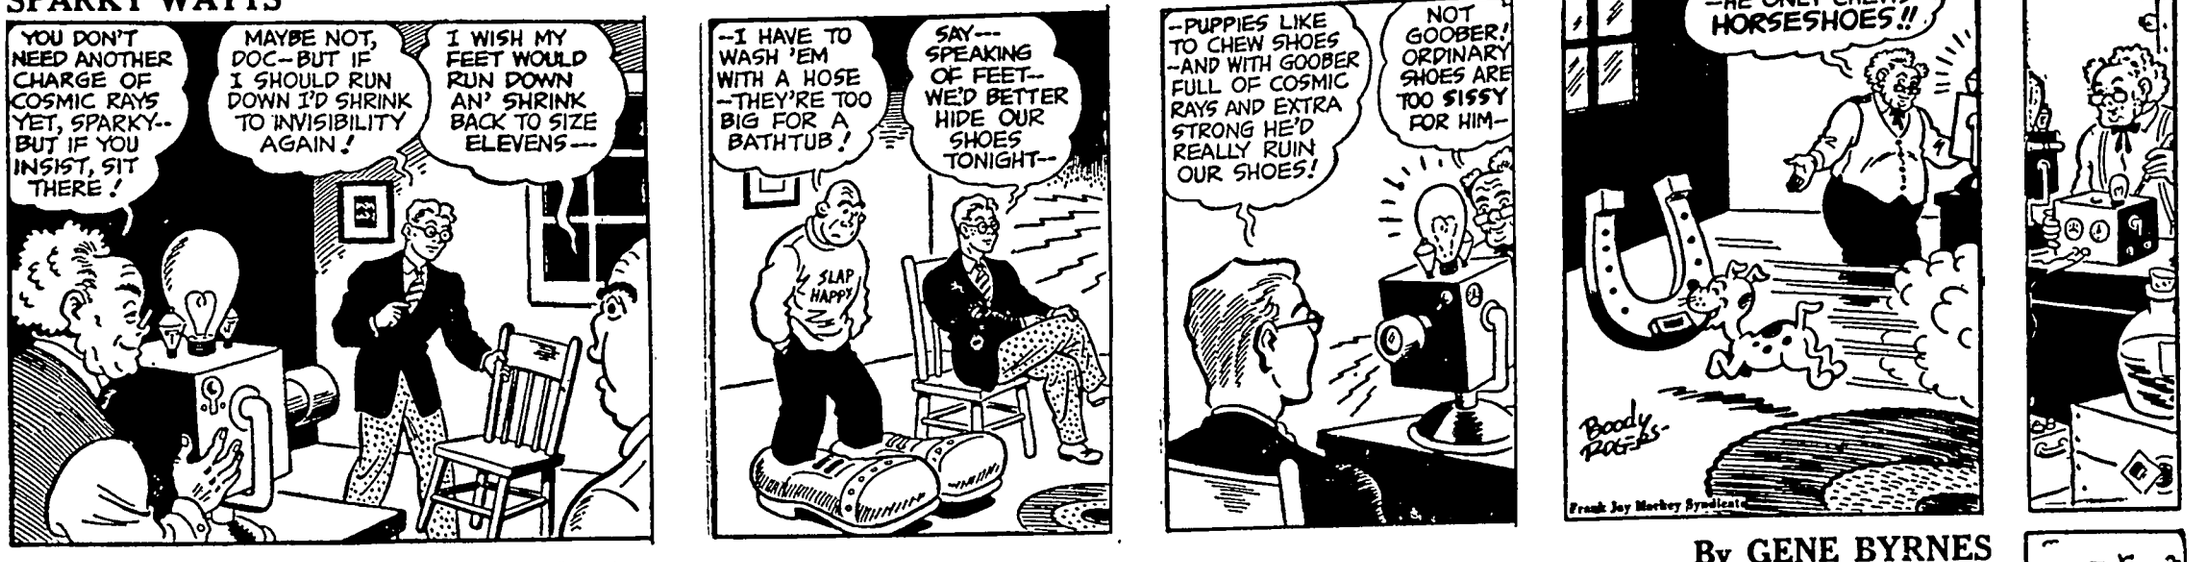


Mr. and Mrs. Lee Anderson of Charles City are the parents of a baby daughter born to them Tuesday, November 21 at a Charles City hospital. Mrs. Anderson is the former Miss Elvira Stille, of Klemme, daughter of Wm. Stille.

Pvt. and Mrs. Lester Neuberger are the parents of a baby son born to them Sunday morning, Nov. 19 at the Mercy Hospital in Mason City. The new son has been named Franklin Lewis, after his two grandfathers. Pvt. Neuberger is with the U. S. Army overseas.

Fun for the Whole Family

SPARKY WATTS



YOU DON'T NEED ANOTHER CHARGE OF COSMIC RAYS YET, SPARKY-- BUT IF YOU INSIST, SIT THERE!
MAYBE NOT, DOC--BUT IF I SHOULD RUN DOWN I'D SHRINK TO INVISIBILITY AGAIN!
I WISH MY FEET WOULD RUN DOWN AN' SHRINK BACK TO SIZE ELEVENS--
--I HAVE TO WASH 'EM WITH A HOSE --THEY'RE TOO BIG FOR A BATHTUB!
SAY--- SPEAKING OF FEET-- WE'D BETTER HIDE OUR SHOES TONIGHT--
SLAP HAPPY
--PUPPIES LIKE TO CHEW SHOES --AND WITH GOOBER FULL OF COSMIC RAYS AND EXTRA STRONG HE'D REALLY RUIN OUR SHOES!
NOT GOOBER! ORDINARY SHOES ARE TOO SISSY FOR HIM--

WOMEN IN YOUR '40s
Do You Hate HOT FLASHES?
If you suffer from hot flashes, feel weak, nervous, a bit blue at times—all due to the functional "middle age" period peculiar to women—try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms.
Taken regularly—Pinkham's Compound helps build up resistance against such annoying symptoms.
Pinkham's Compound is made especially for women—*it helps Nature* and *that's* the kind of medicine to buy! Follow label directions.
LYDIA E. PINKHAM'S VEGETABLE COMPOUND

WNU—N

Watch Your Kidneys
Help Them Cleanse the Blood of Harmful Body Wastes
Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.
Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.
Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!
DOAN'S PILLS

Household Hints

To prevent your bedsheets from catching and tearing, cover the corners of the bedsprings with adhesive tape.

—•—

Soak an old chicken in vinegar and water for a few hours to make it tender.

—•—

Do not clean the enamel top of an oven with a wet, cold cloth as the enamel is apt to crack. Let it cool first.

—•—

If lemon juice is squeezed over bananas and apples after they are sliced, they will not become dark.

—•—

The easiest way to remove thread from the brush of the carpet sweeper is to take a pair of shears and cut down through the threads between rows of bristles.

A HARDY Cure is a SURE Cure... because

HARDY Meat-Curing Products are Made of No. 1 MICHIGAN Salt and Finest NATURAL Peppers & Spices!

Here's the NEW perfected Hardy way to cure hams and bacon

FIRST: Dissolve Hardy's "Tender-Cure" in boiled water; cool, then pump this "pickle" into meat as directed on label. This immediately starts cure INSIDE, along bone!

SECOND: Rub Hardy's Sugar-Curing Meat Salt on OUTSIDE. That's double Hardy protection against souring, spoilage, bone-taint, under-cured spots! Plus superb sweet smoke flavor.

FOR ADDED SMOKE Flavor, and for safe long keeping, brush on Hardy's liquid Condensed Smoke.

LIKE SAUSAGE? Hardy's Sausage Seasoning, ready to use, for full flavor!

Better buy now... at your store!

SNAPPY FACTS ABOUT RUBBER

Many rubber items in common use are shaped at the factories in giant extruding machines, which in general appearance and action are much like the ordinary kitchen meat grinder. Rubber, mixed with chemicals, is extruded in any shape desired—round, square, rectangular or tubular.

The critical operating temperature in a tire is about 240 degrees at its hottest point, and is reached quicker in a synthetic rubber tire than in one made of natural rubber. Speed, load and inflation are chief factors in developing tire heat, which accounts for tire users being cautioned about respecting them.

Mother says:

PAZO for Simple PILES

Relieves pain and soreness

There's good reason why PAZO ointment has been used by so many millions of sufferers from simple Piles. First, PAZO ointment soothes inflamed areas—relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

Thanksgiving Favorite . . . Turkey With Cranberries!
(See Recipes Below)

Turkey Talk

This time every year we set aside a day of thanks—thanks for the bounty of the year, our good fortune, our harvest. We may have worried about ration points, about balancing the budget, but hasn't it been a good year in spite of it all? Yes, so good!

Our day of thanks is appropriately celebrated with as good a feast as can be set upon the table. The turkey is frequently the queenly bird that sets the tone for the whole dinner, so let it be proud and beautiful.

To Roast Turkey.

Rub inside cavity with salt, ⅛ teaspoon or less to each pound of bird. Place enough dressing in the neck to fill the cavity nicely. Fasten skin to the back. Stuff cavity well but do not pack too tightly. Truss, then grease skin with unsalted fat which has been melted. Lay in pan on a rack, preferably on one side, back up. Or, place in V-shaped rack breast down, and keep in this position throughout the roasting period.

Cover with fat moistened cloth, then roast at constant temperature until tender, turning bird to the opposite side, still back up. Turn bird breast up when about half done. Do not sear, cover or add water to the pan. Sprinkle melted fat on cloth as it dried out.

Cut trussing string between drumsticks after about an hour of roasting. This releases the drumsticks slightly for better cooking of the thigh, improves the appearance of the bird on the platter and facilitates carving.

Testing for Doneness.

Move the leg by grasping end bone. If the drumstick thigh joints break or move easily, the turkey is done. If a thermometer is used, it should register an internal temperature of 190° F. when placed inside in center of inside thigh muscle. If placed in the center of the stuffing, it should register 180 degrees F.

Roasting Time Table

Weight	Oven Temperature	Total Roasting Time
8-10 lbs.	325 deg. F.	3-3½ hrs.
10-14 lbs.	325 deg. F.	3½-4 hrs.
14-18 lbs.	300 deg. F.	4-5 hrs.

Speaking of Stuffing

There are several different types of stuffing which may be used for the bird. There is the basic bread stuffing which may be varied in at least five different ways:

Bread Stuffing
(For 12-16 lbs. of turkey)

1½ pounds loaf bread, stale
½ pound butter or substitute
1½ teaspoons salt
¼-½ teaspoon each, marjoram, sage or
1 teaspoon poultry seasoning
¼ cup minced onion

Cut bread into small cubes, with crust removed, if desired. Drop into a large mixing bowl. Add butter which has been cut into cubes. Measure seasonings and blend with bread and butter. Mix in onion and stuff bird.

Variations

Celery: Add 2 cups finely chopped celery which has been sauteed partially.

Egg: Add 4 well beaten eggs.

Oysters: Add 1 pint or more of drained oysters, chopped or left whole if small. Add raw or preheated in 2 tablespoons of the butter.

Sausage: Add ½-1 pound sausage meat or tiny sausages cooked until brown and thoroughly done. Break meat into small chunks before cooking. Omit or reduce butter.

You can add more holiday spirit to your meal if you bring glorious red cranberries, spiced with lemon and cloves to your turkey dinner as a relish:

Spiced Cranberries.
(Makes 1 quart)

2½ cups sugar
½ cup water
2 2-inch sticks cinnamon
1 teaspoon whole cloves
2 tablespoons lemon juice
Grated rind of 1 lemon
4 cups fresh cranberries

Combine sugar, water, spices, lemon juice and rind and boil together 5 minutes. Add cranberries and cook slowly, without stirring until all the skins pop open. Chill to serve.

In the matter of pumpkin pie, either pumpkin or cooked squash may be used. Be sure that it is seasoned according to the recipe as most people object to a too prominent flavor of spices that jumps out at them when they eat the pie:

Pumpkin Pie.

¾ cup brown or white sugar
½ teaspoon salt
1 teaspoon cinnamon
½ teaspoon ginger
2 whole eggs or 4 yolks, beaten
1½ cups sieved pumpkin
1½ cups scalded cream or milk

Mix sugar, salt and spices thoroughly. Add eggs. Blend and then beat in pumpkin pulp. Add scalded cream. Have previously prepared pastry lined pan that has been allowed to dry in a refrigerator for several hours. Pour in about ½ of the pumpkin mixture. Place on bottom of preheated oven, 400 degrees F. from which rack has been removed. Quickly pour in remaining mixture. Bake 10-12 minutes. Place pie on a rack quickly replaced in oven. Bake until custard is set. Cool on a rack.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Lynn Says:

Trussing Turkey: Insert needle through breast through rib at the base of the thighs. Draw cord through and pull string across by pulling cord through openings formed by folding wings triangular shaped onto the back. The needle does not go through the flesh here. Tie cord at the side (where needle was first inserted) making body of bird compact.

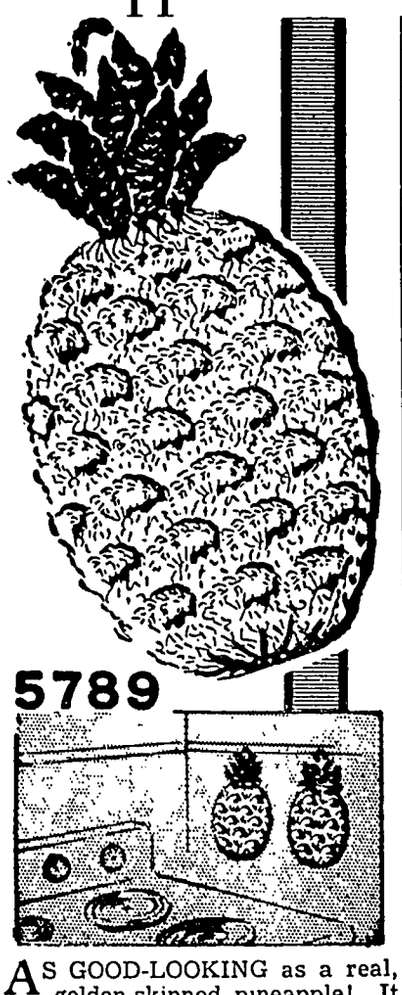
Put in part of dressing through vent opening. Then insert needle between two bones at each drumstick joint and bring cord around to the tail, through the backbone. Tie securely.

The neck opening offers a place to insert part or all of the stuffing which should be filled to make breast and neck well rounded.

Fold neck skin under wing tips and string to keep in stuffing and make a nice appearance. After roasting remove cord before serving.

SEWING CIRCLE NEEDLEWORK

Pineapple Holder for Pots, Pans



AS GOOD-LOOKING as a real, golden-skinned pineapple! It is a crocheted potholder, 7 inches high and 5 inches wide, made of yellow crochet thread. The green leaves at top are crocheted separately and then sewn on. Very easily crocheted and makes a most unusual shower or Christmas gift.

FACTORY-CONTROLLED RECAPPING

Grade A Quality Camelback Used

6 Reasons

Why You Get a Better Job With Firestone Factory-Control Methods

(1) THOROUGH INSPECTION
Before any work is done, your tire is thoroughly inspected. Any weak spots or nail holes are marked for repair.

(2) EXPERT REPAIRING
When repairs are needed, a trained specialist using latest approved methods builds up weakened or broken areas.

(3) CONTROLLED BUFFING
The worn tread is precision-buffed for perfect balance. Only a minimum of rubber is removed to provide proper surface.

(4) ACCURATE TREADING
New tread rubber of highest quality is carefully applied to the buffed tread base. Care and precision insure a well balanced tire.

(5) SCIENTIFIC CURING
Careful scientific control of time and temperatures assures proper toughness and maximum wearing quality of the recap.

(6) FINAL INSPECTION
Complete final examination carefully inspects inside and outside of tire. Note sharp, clear tread, ready for thousands of additional miles.

See Us for the Finest Truck and Tractor Tire Recapping with the Very Best Quality Materials and Workmanship

EDITORIAL COMMENT

FIFTY YEARS OLD

This week The Klemme Times is celebrating its birthday, a half century of community service, as the present publisher changes the type slugs in the mast-head to read "Volume 50, Number 1."

The Times has survived wars, depressions, periods of prosperity, sorrows and joys that come and go in a half century.

The present editor and publisher has directed the destiny of the paper for twenty-six years, or more years than all the previous publishers put together. We are rather proud of that record of service.

The aim of the present publisher has always been to help make our town one of the best towns in the state, and to make The Klemme Times one of the best small-town weeklies in the state. We think we have had some success working on both of these projects.

Klemme as a town has accomplished much in those twenty-six years we have lived here. We can look with pride on the two fine churches and a modern school that have been built in that time, as well as a community hall, many new homes, new business buildings, a paved street, modern sewer system and disposal plant, and many other improvements.

The Times plant has kept pace with the growth of our town. It was a hand-set weekly with old, delapidated mechanical equipment when we took over. Gradually we made changes, installing a linotype machine, a new newspaper press, hundreds of pounds of new type, labor-saving machinery, newspaper folder and other needed equipment to turn out better printing faster. About a year ago we installed an automatic job press to better handle our growing business of commercial printing.

Today The Times is one of the best equipped weekly newspapers in North Iowa. We do not want to take all the credit for this expansion. The business men and people of this community have been loyal to us all these years and right now is a good time to say to all, "We thank you for everything you have done to help make The Klemme Times a success."

—Mr. and Mrs. R. A Jorgenson.

KLEMME MOUSE TRAPS GO TO COLLEGE

Mrs. R. A. Jorgenson received a letter the other day from Eunice Larsen, who is a freshman at Iowa University. Eunice told of some of the happenings around the campus and among other things said that mice had taken a liking to the dormitory where she stays.

The girls set some mouse traps and baited them with choice morsels of cheese and other dainties. The mice nibbled off the cheese but n thing happened. Traps were again baited, but the mice chewed off the bait without getting caught.

Eunice went into a huddle with herself and came up with a bright idea. She wrote her mother to send her a couple of Ed Thompson's famous Run-Way mouse traps, that are manufactured in Klemme.

The traps arrived, both of them were set. In a few minutes two mice were caught! The bright colored traps that were so effective became quite a curiosity and girls from all over the dormitory swarmed in to see the mouse catchers.

Ed. should send more of his traps to college!

PVT. WAYNE CHAMBERS HOME FROM OVERSEAS

It will be a happy Thanksgiving Day at the home of Mr. and Mrs. J. A. Chambers as this Wednesday morning they received a telephone call from their son, Pvt. Wayne Chambers saying he would be home tonight and have Thanksgiving at home. Wayne has been overseas for about a year. He said he would only be home for two days.

Ninety-nine percent of Iowa's 11 million acres of corn is hybrid.

BOARD PROCEEDINGS

6TH ADJOURNED SEPTEMBER MEETING
Garner, Iowa, October 30, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read

On motion and second the bond of Wm. Henschen, Construction Engineer on D. D No. 9 is approved.

On motion and second the farm lease with Geo. Eckhoff on the N½ of the NE¼ of Section 12, Twp. 93, Range 24 is approved.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 7, lateral 49-50, and in D. D. No. 37-39, lateral 6.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D. D. No. 47, Extension and in D. D. No. 8

BE IT RESOLVED that the claims in the sum of $238 70 be allowed for the Boards of Review, School of Instruction held at Garner, Iowa, on October 18, 1944, and the County Auditor be and he is hereby authorized to draw warrants on the General County Fund therefor as approved by the Attorney General of Iowa

WHEREAS, certain drainage districts in Hancock County, Iowa, have outstanding warrants issued for minor repairs on said districts and it is deemed for the best interests of the taxpayers on said districts that levies be made at this time to provide funds for payment of such warrants and to provide funds for minor repairs and

WHEREAS, such levies are less than 10% of the original cost of said districts

BE AND IT IS THEREFORE RESOLVED by the Hancock County, Iowa, Board of Supervisors acting for and in behalf of the drainage districts hereinafter named that there be and is hereby levied the percentage of the original assessment set opposite each named district against all lands, tracts, parcels, highways and railroads in said districts Viz:

D. D. No. 7	1%
D .D. No. 74	10%
D. D. No. 82	2.5%
D. D. No. 116	3%

BE IT FURTHER RESOLVED that the foregoing levies be extended in accordance with the original classifications of the hereinbefore named districts and when so extended to be collected with the general tax of 1944 payable in 1945. All as provided for by law.

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption, was seconded by Supervisor Penn Eckels, whereupon the Chairman F J. Schoun, placed the motion for adoption and upon roll call the vote thereon is F J. Schoun, Penn Eckels, and John Chambers, aye Nays, none.

Whereupon the chairman declared the resolution duly adopted.

On motion and second the Board adjourned to November 2, A. D., 1944, at 9 o'clock A. M.

F J SCHOUN, Chairman

ATTEST: FRED C MISSAL,
County Auditor.

7TH ADJOURNED SEPT. MEETING
Garner, Iowa, Nov 2, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read

On motion and second the petition of the Abe Mezvinsky for a new drainage district in Madison Township is referred to Engineer Chas F. Merten for investigation and report

On motion and second Chairman F. J. Schoun is hereby authorized to execute a quit claim deed in behalf of Hancock County, Iowa, to Laura Duff Wood conveying the NW 60' of Lot 13, Block 3, orizinal town of Corwith to correct defect in title due to error in description

On motion and second the following are appointed to serve on a counting board in Twin Lake Township to serve at the General Election on November 7, 1944, to report for duty at 1 P M. on said date.

Clerks: Art Chelsvig, Lee Bamford

Judges Irvin Priebe, Edwin Josten, Albert Kudej

Pete Peterson and Harold Eliason are appointed judges on the regular election board in Twin Lake Township to fill vacancy and Helmer Hill is appointed judge on the regular board in Erin Township to fill vacancy.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

8TH ADJOURNED SEPT. MEETING
Garner, Iowa Nov 6 1944

The Hancock County, Iowa, Board of supervisor met in session on above date with F J Schoun, John Chambers and Penn Eckels present.

The minutes of the last meeting were read and approved as read

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in D D No 105

This being the 6th day of November, A D, 1944, a date heretofore set for a hearing on the report of the Engineer on the establishment of D D No 138, Hancock County, Iowa petitioned for by Donal Hamilton et al the hour of said hearing having arrived, the report of the Engineer recommending the establishment being on file the proof of publication being on file and the Board being fully advised the Board proceeded with said hearing as by law directed

WHEREAS claims for damages are on file and it is necessary to deal with said claims before final establishment

BE AND IT IS THEREFORE ORDERED by the Board of Supervisors of Hancock County Iowa acting for and in behalf of D D No 138 Hancock County Iowa that a hearing on said petition of Donal Hamilton, et al for the establishment of D D No 138 and the report of the Engineer, is hereby continued to the December A D 1944 at 1 30 p m

BE IT FURTHER RESOLVED that Charles F Merten Engineer Wm Bohn and Walter Kuhl are appointed an appraisal commission to appraise all damages in the proposed establishment of D D No. 138 Said commission will qualify and report to the Board not later than noon of the 8th day of November A D 1944

The foregoing resolution was offered and read by Supervisor Eckels who moved its adoption seconded by Supervisor Chambers, whereupon the Chairman F J Schoun placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, Penn Eckels and John Chambers, aye; Nays, none. Whereupon the chairman declared the resolution duly adopted

On motion and second the Board adjourned to Monday, November 13, A. D., 1944, at 9 o'clock A. M

F J SCHOUN, Chairman.

ATTEST: FRED C. MISSAL,
County Auditor.

REGULAR NOVEMBER MEETING
Garner, Iowa, Nov. 13, 1944

The Hancock county, Iowa, Board of Supervisors met in session on above date with F J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read.

On motion and second the quarterly report of R. J. Fritsch, Justice of the Peace, is approved.

This being the 13th day of November A. D 1944, the day set by law for the canvass of the votes cast at the General Election held on November 7, A. D., 1944, and the hour of 12 o'clock noon having arrived, the Board of Supervisors of Hancock county, Iowa, proceeded to organize and act as a Board of Canvassers and did proceed to canvass the vote cast at the General Election on November 7, A. D., 1944, and recorded their findings in the official canvass record and reported same to the Secretary of the State and the Speaker of the House of Representatives of the State of Iowa. All as provided by law.

On motion and second the Board adjourned to 12 o'clock noon, Monday, Nov. 20, A. D. 1944.

F. J. SCHOUN, Chairman.

ATTEST:
F. C. MISSAL, County Auditor.

Thanksgiving Is Here Aga

The going may have been rather rough since Thanksgiving, but the most of us have many things thankful for, and it is our hope that you have had share of the good things the past year.

One of the great things that we have to be thankful for is our old friends as well as the new friends we made since last Thanksgiving Day.

May you and yours enjoy a happy Thanksgiving Day this year.

SOPHOMORE NEWS

Here it is the end of the 6 weeks and we are ready for six weeks tests again.

In World History, we have finished the study of the Romans and are now studying about the period known as the Middle Ages.

Parallel lines still occupy our attention in Geometry.

We have been writing business letters in English II.

JUNIOR NEWS

The high school has been holding pep meetings in the gymnasium. Several students have tried out for cheer leaders, and cheer leaders will be chosen by vote.

We are having our own War Bond and Stamp Drive in the high school. To help the sale and to promote interest, the high school has been divided into two teams. The captains are Ronald Brinkman and Ivan Blumer. The losing team will give the winners a party at the close of the contest. Ronald's team is now ahead.

SENIOR NEWS

Six weeks tests will be held on Monday, Tuesday and Wednesday of this week as there will be no school on Thursday and Friday. Only six more weeks until we have to think about changing some of our subjects.

In American History we have ended the study of the Revolutionary War and are reading about the beginning of our present government.

The Literature class has been reading selections from Samuel Pepys, Joseph Addison, and Richard Steele. Part of the time is being devoted to vocabulary study.

SEVENTH AND EIGHTH GRADE NEWS

Mrs. Clara Smith Teacher
Reporter, Maurice Trumbell

This week we made covers for our Geograhpy Units.

Phyllis Kirkwood was absent 2 days the past week because of the death of her grandmother. Phyllis brought her cousin to visit our school.

We have 12 new books in our room this week We all enjoy reading them.

The Eighth Grade has been studying how to fill out checks and deposit slips in Arithmetic.

FIFTH AND SIXTH GRADE NEWS

Mrs. Voetberg, Teacher

In Fifth Grade History we have just completed our Unit on Greece Our next subject will be The Romans

In Art Friday afternoon we made group posters for Thanksgiving.

Each Thursday is "Stamp Day." We are keeping a record of each week's sale so that we will know the total amount at the end of the year.

This is the week of six weeks tests At the end of this week we have had twelve weeks of school.

THIRD AND FOURTH GRADE NEWS

Miss Holmes, Teacher

Our next holiday being Thanksgiving, the Third and Fourth graders have naturally been giving it a lot of thought the past week.

We have made Pilgrims, turkeys, and other Thanksgiving things in our Art classes.

The question was asked, "Why Are You Thankful?" Everyone was ready to answer that question. We decided that the War had made us more thankful than ever for the things we do have.

We were happy to read in "Our Weekly Reader" that even though we will not all be able to have turkey this year, that our fighting men will wherever they may be.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

Miss Bugh, Teacher

In First grade Reading Class we read about a new game. It is called, "Guess." We enjoyed playing this reading game very much.

We have had our Junior Red Cross Drive. We are glad to have a 100 per cent membership in our room.

We made free hand turkeys in Art Class and have them on our bulletin board.

Schools Honored

The Goodell Independent School received a check of $14 for milk weed pod collections and ranked first among the town schools. Garfield township won first among rural schools.

Thank You!

We have many things to be thankful for in North Iowa: Freedom, Fine Crops, plenty of Food, and all the privileges of a great democracy.

We just want to take this opportunity of saying "Thank You, Folks" for your patronage and good will given us the past year. We appreciate all you have done for us.

May your Thanksgiving be one of great joy.

Mr. and Mrs. Carold Larson

LARSON'S

STANDARD SERVICE STATION
Highway 69 Just west of Klemme

Rats Caught In Mouse Traps

Last week one day Ben Riemer, Liberty township farmer, caught a rat in a mouse trap. The rat was caught by its front feet and could not get away from the light trap.

A few days later Mrs. Emil Beier reported a better story. A mouse trap at their place evidently scared a rat to death. At any rate a dead rat was found along side of a mouse trap they had set.

Birthday

Carol, daughter of Mr. and Mrs. Clifford Montgomery was 7 years old Tuesday, Nov. 21. She treated the pupils in her room at school and her mother baked a nice cake and had a birthday dinner for her that evening.

Plan Member Drive

There will be a captains and leaders meeting at the Farm Bureau office in Garner Monday evening, November 27, to make final plans for the 1945 Farm Bureau membership drive which will get under way about Dec. 1.

W. O. Elliott, Peoria, Ill., and Louis Behnke, Morton Grove, Ill., were the first purchasers of non-resident hunting licenses in Jones county.

WEEKLY NEWS ANALYSIS

Reds Peril Gateway to Austria; Japs Bolster Battered Forces; Check Decline in Hog Prices

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Yugoslav Partisans carry wounded back to secret stronghold.

EUROPE:
Budapest Imperilled

Once, like Paris, a center of European gaiety with colorful sidewalk cafes enlivened by gypsy music, Budapest became a fevered and somber city as Russian armies hammered toward the Hungarian capital.

Having broken across the Tisza river, some 50 miles to the east, the Reds bore down on Budapest as German and Hungarian armies were hard pressed to hold broad lines across the country's rolling plains, gateway to Austria.

Even as the Russians rolled forward, thousands of Budapest's civilians were put to work in the erection of entrenchments and fortifications, and the Germans vowed that they would make this city, once one of Europe's prettiest, into another Warsaw, a battleground.

'Sacred Soil'

As the Germans and Hungarians dug in for a stand about Budapest, the Nazis fought fiercely on the East Prussian front to slow up the Russians' advance across the "sacred soil" of this historic home of the Junkers.

As the Germans braced in East Prussia along prepared lines some 20 miles inside the border, the Russians, following their traditional military policy, shifted the weight of their attacks northward toward a narrow belt of Baltic seacoast at Latvia, where some 100,000 Nazis were reported cut off from the remainder of the enemy line in the east.

Slicing into German positions in this sector with overwhelming numbers of troops, the Russians threatened to chew the entrapped Nazi armies to shreds before they could be successfully evacuated by sea.

Gain Port

Formerly forced to truck supplies overland 400 miles from Cherbourg, or from temporary beach harbors along the channel coast, the Allies materially improved their communication lines by gaining full control of the great Belgian port of Antwerp.

Control was gained when Canadian and British troops cleared the Germans from both sides of the Schelde river leading inland to the port. As the Allied attack developed, the Nazis pulled out the major bulk of their 40,000 troops to prevent being encircled from the rear.

As the Allies moved to improve communications, the U. S. First army resumed its offensive about Aachen, driving through the once picturesque, now splintered, fir, pine and silver birch Hurtgen forest on the road to the vital industrial Rhineland.

To prevent enemy agents from obtaining vital military information through contact with U. S. troops, the army is rigidly enforcing stiff regulations against doughboys mixing with German citizens.

Troops may not make any social calls at German homes. They may not contact German girls. Because of service by German bartenders, they may not even buy beer outside of mess bars.

Talking with German people is an "unnecessary contact," the army has ruled, bringing fines of from $25 to $65.

PACIFIC:
Enemy Girds

Still determined to hold on to the Philippines despite the concentration of U. S. strength behind the forces of Gen. Douglas MacArthur, the Japanese poured in air reinforcements for the showdown battle that will develop when the Americans move onto the larger islands.

Even as the Japs sought to bolster their defenses, first severely shaken by the U. S. navy's major triumph in the second sea battle of the Philippines, General MacArthur's ground forces on Leyte

Gen. MacArthur (left) and Lt.-Gen. Krueger confer on Leyte.

pushed the enemy back to the mountainous western portion of the island.

Because of the terrain, difficulty was encountered in the speedy erection of air fields on Leyte, but, as construction progressed, increasing numbers of fighter planes took off from the new bases to join carrier-borne aircraft in attacking shipping seeking to reinforce the entrapped enemy troops on the island.

With her back being pressed closer and closer to the wall, Japan's Premier Koiso called for greater war production, declaring that many troops had died for lack of munitions. Almost as Koiso spoke, the enemy reported B-29s reconnoitering over Tokyo.

CATTLE:
Record Marketing

With more than 40 per cent of federally inspected beef, veal, pork and lamb going to the government, supplies of better grades of meat remained in scarcity last month despite record-breaking marketing of cattle.

Shipments of cattle were 37 per cent greater than for the 10-year average for October, and receipts of calves were 71 per cent greater. Although showing substantial increases over September, marketings of hogs and sheep were lower than in October of 1943.

Due to the heavy slaughter of cattle and calves, production of beef, veal, lamb and pork amounted to about 1½ billion pounds for October, 29 per cent greater than the 10-year average for October.

Hog Prices

After an unsettled market had lopped 75 million dollars off of the value of the nation's hog crop, higher bids by packers stemmed the downward spiral of prices.

The packers' action followed War Food administration hints that the government would cut subsidy payments, amounting to $1.30 per hundredweight, if average prices for good and choice gults and barrows were allowed to drop below a $13.50 per hundredweight average. Lower grade hogs, however, would not be included.

As marketings increased during the first week of November, packers became more choosy in the purchase of hogs, declaring that during the periods of lower receipts they were compelled to pay ceiling prices for many shipments just to keep their plants busy.

Shoes Will Be Brighter Next Spring

Although civilian shoe production will not return to normal till after the war, retailers will feature brighter lines next spring, surveys of the national shoe fair in Chicago revealed.

There will be an airier style, too, with women's shoes open at the toes and heels, and "casuals," for comfort wear, coming into greater prominence in line with prewar trends.

Biggest boon, however, is in the government's lifting of restrictions on the use of colors, with women promised spring wear in green, liberty red and blue jacket blue, and men's shoes in shades from army russet to turf tan.

Two tones will be made again, it was revealed, with differently colored leather permitted for the upper part of the shoe if soles are made of some other composition.

POSTWAR AIR:
World Traffic

As representatives from Allied and neutral nations met in Chicago for the international civil aviation conference, principal question arising was in what way could countries best cooperate in the development of extensive postwar traffic.

At the opening session, three methods were proposed. The U. S. suggestion advocated a free development between friendly and progressive states, with an international body which would merely consult and advise on allocation of air routes, rate fixing and regulation of competition.

On the other hand, the British called for the regulation of postwar air traffic through a strong international authority, which, like the U. S. civil aeronautics authority, would assign routes and have a voice in rate making.

Australia and New Zealand presented the extremist view of pooling all aerial resources into an international operating company.

WAR PRODUCTION:
V-E Cutbacks

One-third of all war contracts will be terminated within three months after the defeat of Germany, a War Production board official announced, with speedy settlements with manufacturers assuring smoother reconversion.

To date, the government has let 325 billion dollars in war contracts, it was revealed, with completions totalling 240 billion dollars. After cancellations, about 65 billion dollars of contracts are now outstanding, one-third, or about 20 billion dollars worth, of which would be terminated on V-E day.

Of 37,000 contracts valued at 9 billion dollars cancelled thus far, 28,000 have been settled for 340 million dollars, WPB said.

V-E Shipping

Germany's defeat will not lessen the demand on the U. S. merchant marine, the Office of War Information reported, with military and reconstruction traffic continuing to and from the continent, and more shipping needed to transport increased forces and supplies over vast distances in the Pacific.

Three times the amount of shipping presently engaged for the European war may be required for the Pacific conflict, it was said, and eastern ports will be used to relieve some of the tremendous traffic that will be imposed on those in the west.

Presently, OWI revealed, no less than 5,000,000 tons of shipping are being used just to transport supplies from overseas bases to fighting fronts.

Unusual Quads

In the first case of its kind known in medical history, 30-year-old Mrs. Kathleen Hatcher Cirminello of Philadelphia, Pa., gave birth to quadruplets in two minutes in a caeserean operation.

Weighing from three to three and a quarter pounds, the quads—three girls and a boy—are the 10th set in the U. S., such births averaging one in 658,503 cases.

Five feet and two inches tall, and weighing 118 lbs., Mrs. Cirminello is the wife of a financial analyst for the Securities and Exchange Commission. A previous child died at birth.

Placed in an incubator, the children were tagged A, B, C and D. Said Mr. Cirminello: "My wife went through the ordeal. I'll let her choose the names."

FEED:
Outlook Good

Despite smaller supplies of concentrated feed for the 1944-'45 season, more will be available per animal unit, however, because of reduced livestock population, the department of agriculture reported.

Because of the record production of corn and sorghums for 1944, USDA said, the domestic supply of feed grains will approximate last year's at 130,500,000 tons. Stocks of by-product feeds will be slightly larger than last year. With decreased demands, moderate price declines were anticipated.

According to USDA, local feed grain supplies are smaller than last year in the east north central and the western states, but slightly larger in other sections. Except for the west north central and the western states, hay supplies are smaller.

CASUALTIES:
Total 487,692

With the army suffering the bulk of the losses, U. S. battle casualties on the far-flung fronts totaled 487,692.

Army casualties reached 417,121, of which 80,666 were killed, 229,212 wounded, 53,622 missing and 53,621 made prisoners. After more than a year of bitter fighting in Italy, where Allied forces pressed their offensive against strong Nazi fortifications, U. S. losses were estimated at 90,000.

Latest navy compilations placed casualties at 70,571, of which 28,231 were killed, 29,441 wounded, 9,421 missing and 4,478 made prisoner.

STAR STATE

Texas led all states in mineral production in 1943 and was the only state producing minerals valued in excess of a billion dollars in that year, the bureau of mines, department of the interior, revealed.

With its mineral output valued at $1,116,056,000 last year, the Lone Star State retained for the ninth consecutive year its rank of first in the United States in the value of such products. The total represents 16.97 per cent of the national mineral production value.

THAT THIRTEEN-CENT STAMP

Special delivery stamps jumped from a dime to thirteen cents November 1st. And you can't even get two for a quarter.

—*—

It is getting so that for what it costs to mail a letter a fellow can almost deliver it himself.

—*—

Why the increase in the price of special delivery stamps? Have they changed the size again? No. Are they turning it out in more colors or shapes? No. Do you get a chance on a turkey or something with it. Nope!

—*—

And why the thirteen cents? Why not fourteen? Or twelve? What is there about the economic situation that fixes the autumn rate for specials at exactly thirteen cents, no more, no less, retail and wholesale?

—*—

Elmer Twitchell has been making inquiries. He says he has been told that it is the art work on the stamp. It shows a nice brick building with a lady in a doorway taking a letter from a mailman. In the foreground stands his motorcycle. "The motorcycle has been standing there in that engraving so long it is all rusted up and they've got to get a new one," said Elmer. "And that takes time, influence and money. Also it's out of gas."

—*—

"The old gal getting the letter is dressed in the garments of the McKinley era," he continued. "When people pay ten cents for a postage stamp they want something classy. Well, Washington is going to put a glamour girl in the doorway, and glamour girls are up 80 per cent since the war.

—*—

"If you look at the old stamp closely you will notice that the guy with the letter is standing with one foot on the street and one foot on the doorstep. He's been standing that way for years, ever since away back before Coolidge. So what? So he's got a stiff leg and they've got to treat it, and all the doctors are in the war so they've got to treat it through politicians. You know what that costs.

—*—

"Then you'll observe that the lady in the doorway has the door almost wide open. And it's been that way for decades. With the fuel situation what it is, Secretary Ickes wouldn't stand for that. He ordered the door closed!

—*—

"Did you ever try to close a door on a postage stamp? It's no cinch. It means a new house, a new doorway, a new door, a new woman, a new mailman and a new motorcycle.

—*—

"You can't change the house on account of priorities. A new door has to be processed. No new women are issued without fifty forms, questionnaires, applications, etc. A lot of mailmen were washed away in the last hurricane, and then there's loss by erosion. And they ration motorcycles.

—*—

"Thirteen cents for a new stamp! Why it's dirt cheap," concluded Elmer.

* * *

THAT EXTRA PAIR OF PANTS

WPB is reported about to modify the limitations on men's suits. Since Pearl Harbor the extra pair of pants, the trouser cuffs, patch pockets and belts have been against the rules.

—*—

Pants have gone to war, it has steadfastly held.

—*—

Only if you knew a bootlegger in the pants business could you get a spare pair.

—*—

When the original pair disintegrated or got caught on a nail you could bring it in and argue the tailor into cutting another set, if he had the material, a good kindly nature and no fear of internment, as a scattler of the war effort.

—*—

Pants for victory! That was the slogan.

—*—

With such others as "Spare the trousers and help win the war!" "Your pants can ruin Hitler," "Be a one-pair-of-pants man and preserve democracy!" and "Let your pants go all-out for civilization!"

—*—

Be that as it may some modification of WPB rules are ahead. It is reported unsold on the claim that a man is a more useful citizen with an extra pair of pants—that his morale is better—that a spare pair constitutes the Fifth Freedom.

—*—

Then there was the slogan against belt-in-the-back-of-the-coat. "One less belt in the back will give Hitler one more belt in the front."

—*—

We got a laugh out of the statement: "The clothing manufacturers are against a return to an extra pair of pants." Why wouldn't they be? They sell suits more often when the consumer has no "reserves."

Belts? Let 'em go! Cuffs? Away with them until the global triumph comes! Vests with double-breasted coats? Who cares in an all-out war!

U. S. Grants Private Firm Postage Stamp Contract

For the first time in 50 years United States postage stamps are being printed by a private firm. The bureau of printing and engraving, loaded with demands for bonds and for currency (circulation of money being the highest in our history), turned over to the American Banknote company of New York the contract for 215,000,000 stamps of the commemorative issues honoring occupied countries.

The new stamps will be primarily collector's items. The nations they will honor are Poland, Norway, Denmark, Luxembourg, the Netherlands, Belgium, Greece, Yugoslavia, Albania, Austria, Czechoslovakia and France.

The American Banknote company printed U. S. government stamps from 1879 to 1893, and has continued to print foreign stamps and currency through the years since then. The government pays about 54 cents a thousand for the stamps. It sells them through the official Philatelic agency in Washington at full price thus netting a substantial profit. Ordinarily they go right into collector's books and stay there, so that they are never a charge to postal revenue.

Steel Industry Holds To Its Safety Record

In spite of difficult conditions which included a high turnover rate among employees, the steel industry held fast in 1943 to its high rank in safety, according to the statistics of the National Safety council.

As in 1941 and 1942, the steel industry in 1943 was the third in freedom from accidents among leading industries. Only the communications and electrical equipment industries among 38 major industries stood above steel in safety.

The 1943 accident frequency rate in the steel industry was 7.4 per million manhours worked, the same as in 1942. The average for all industries was 14.5 last year, compared with 14.9 in 1942.

In 1934 steel ranked 12th in safety. By 1936 it had achieved sixth place, in 1940 it ranked fourth and since 1941 it has ranked third.

Ensilage Harvester

The field ensilage harvester has come into use very rapidly during recent years. Unless there is much ensilage harvesting to be done on one particular farm, however, they cannot seem to be justified without use of several farms. That is particularly true in a time when there is such a shortage of labor and machinery, so that we find that most farmers who have field ensilage harvesters are doing a little custom work filling silos throughout the neighborhood. Unless trench silos are being filled, it is necessary that there be a blower at the silo to put the ensilage into the silo after it is cut and hauled in from the field in trucks or wagons. The use of the field ensilage harvester has very definitely reduced the labor requirements in silo-filling; perhaps, cut them almost in half. Furthermore, the use of the corn binder has eliminated the hard manual labor of handling bundles, and the corn does not dry out as rapidly after it is cut.

In getting good efficient operation of ensilage cutters, the knives must be sharp and properly set; the clearance between the fan blades and blower housing must be the minimum; the speed of the cutter should not be excessive, and the blower pipe should be vertical and straight.

Flying Bazookas

The barrels of flying bazookas, which the army air forces have installed on the Thunderbolt and other types of fighter planes, are made from a special paper plastic. Plastic was used because it is lighter than other types of material and better adapted for this job. What resins were used was not revealed other than that it is fire-resistant to withstand the fiery blast of the rocket missile when launched. Army officials have referred to fighter planes carrying flying bazookas as "flying artillery." In France these planes were credited with contributing to the destruction of the German Seventh army in its retreat from the Falaise pocket. Firing of the flying bazookas is controlled by the pilot in the same manner as he fires his .50-caliber wing machine guns, by pressing a trigger set in the stick

Versatile Airline

One of the world's most versatile airlines is SCAT, which delivers the mail addressed to APO numbers in San Francisco, evacuates American wounded and sick from jungle islands in the South Pacific, answers hurry-up calls for special arms or equipment, and even flies Japanese prisoners out of forward areas.

We'll Have to Stretch Our Fuel If We're Going to Keep Warm

Serious Shortages of Coal, Wood and Oil Make Heat-Conserving Practices Necessary for All.

Coal, coke, oil, gas or wood—whatever you burn for fuel—will be short in supply this winter, as they all have been for the last three years. They may be even scarcer. The reason is familiar enough—it's the war. There are fewer men mining coal, or making coke, or cutting wood. On the other hand, industrial uses of all fuels and particularly soft coal, have doubled and trebled. Transportation difficulties further complicate a bad situation. Overburdened railroads cannot haul the usual volume of fuel, and war plants get the first chance at what does come to market.

It is estimated that we will be short 38 million tons of coal this winter. Wood will be extremely scarce. So will coke, charcoal and gas—all by-products of these primary fuels. While the production of crude oil will be 15 per cent higher than last year, very little of it can be spared for heating. Most of it will have to go to the gasoline refineries.

Nevertheless, nobody needs to be cold. There will be enough fuel to keep everyone warm, if it is intelligently used. This means that all leaks that cause loss of heat will have to be closed. The best possible combustion methods must be used to get every possible heat unit out of the fuel.

One way to spread the available coal and wood on an equitable basis among the 45 million families of the nation would be to ration these fuels. This has already been done with oil. But the government believes it can avoid this step. As an alternative, a fuel conservation campaign is being launched by the War Production board, the Solid Fuel administrator, the Office of War Information, and other agencies. Booklets, advertisements, feature articles and radio programs will be employed to instruct householders in ways to get the most out of their coal, wood or oil.

Expert Advice.

The heating industry, which includes 35,000 dealers and jobbers and many thousands of manufacturers, is volunteering its help. Drawing on their years of experience with heating problems, many manufacturers have prepared booklets on fuel saving.

The War Production board recently anounced that raw materials are being made available for the production of automatic temperature controls—thermostats and similar devices—on the basis that the fuel saved will more than compensate for the small amounts of steel and other materials necessary to make the instruments. The automatic controls will make possible fuel savings of 15 per cent on the average, the government agency said. Enough materials to make 950,000 residential, commercial, institutional and industrial heating plants have been released for the third and fourth quarters of 1944.

One company, the Minneapolis-Honeywell Regulator Co., has made 70,628 electric thermostats in the first three quarters of this year, compared with an average production of about 25,000 over the same period in average peace-time years. The "electric janitors," for use on hand-fired coal heating plants, save up to 20 per cent on fuel consumption by accurately and automatically maintaining temperatures at the level selected by the householder.

How to Save Fuel.

Some of the ways to save fuel are the following recommendations of heating engineers:

Have your heating plant thoroughly cleaned. Remove all scale from heating surfaces in furnace or boiler. Clean the stack and chimney. Every two or three weeks be sure all soot and ash is removed from boiler flue surfaces. Soot deposit of one-sixteenth inch thickness results in 34 per cent waste.

All air leaks in heating plants should be sealed or caulked after cleaning. Seal smoke-stack connection with chimney. Repair insulation on hot water and steam pipes as well as boilers. Be sure chimney is in good repair.

Periodically throughout the heating season remove all air from radiators in hot water systems. You can do this by opening the air valves. In a steam heating system make sure the automatic bleed valves are in working order.

Use your fireplace but see that fireplace dampers are closed when not in use.

If the temperature at the bottom of the casing in the vicinity of the cold air return on gravity warm air furnaces gets above 75 degrees, a baffle should be installed in the furnace to eliminate heating of the cold air return. This will promote better air circulation through the furnace and thus make your home easier to heat.

Keep Air Filters Clean.

Air filters on forced air heating systems must be kept clean. A good rule is to change the filter every year. The dirt that accumulates on the filter even in comparatively clean neighborhoods interferes with circulation of the warm air.

In any warm air system, keep rugs and furniture away from warm air delivery ducts and cold air returns, so that free circulation of air can take place. This may seem elementary, but it is disregarded in many homes.

Insulate the heating plant if the basement of your home is warmer than the upstairs rooms. You will thus save heat which otherwise is being wasted.

Cut off heat in unused rooms. If rooms are subject to temperatures below freezing, have a plumber drain the radiators. Shutting off registers in a warm air system may disturb the distribution of heat to other rooms, particularly in a forced air system. In this case, have your dealer re-balance the system.

All glass in both regular and storm window sashes should be tight and should not rattle. Keep the storm sash closed as much as possible.

Experiments of government fuel conservation agencies prove that storm windows are an important aid to fuel saving.

Seal all chimney openings not in use. The women of the household may object, but remind them that considerable heat loss can be saved by closing the kitchen ventilator for the winter.

Sleep With Windows Closed.

Many people prefer to keep the bedroom windows closed at night and close off the heat supply. This really conserves fuel—and after all, if the windows are opened for a few minutes before retiring there will be a sufficient fresh air supply with normal infiltration to last throughout the night.

If bedroom windows are left open all night, doors should be closed and the space under the doors sealed. The cold air passing under doors will cool the rest of the house and require the use of more fuel. A felt strip which can be attached to bottom and sides of doors can be purchased in most hardware stores. Turn off all rdiators and close warm air registers.

Keep shades, venetian blinds and drapes drawn at night and as much as possible during the day. Warm room air chills quickly when it comes in contact with colder window surfaces.

Maintain as low a temperature as consistent with health. Uncle Sam figures that you will have to keep your house at 65 degrees, under average conditions, if you are going to have enough fuel to last all winter. Tests show that each degree the temperature is raised above 65 degrees results in a 3 per cent increase in fuel consumption.

If you heat your home with stoves you can still apply most of this advice with benefit. A well-insulated house will save a great deal of heat. And by keeping the house a little less warm than you are accustomed to, you can stretch out your fuel considerably. If we all follow the program of fuel conservation, we will get through the winter in comfort.

Production Rate of Coal Mines More Than Doubled Since 1918

If it weren't for the efficiency of ...e highly mechanized coal-mining ...dustry, the fuel situation this year ...ould be a lot more desperate than ... is. If we had to depend on 1918 ...oduction rates, for instance, we'd ...ust have to shiver through the win...er. In 1918, a war year, it re...uired 942,000 men, working 18,319 ...ines, to dig 579,000,000 tons. Last ...ear 400,000 miners produced 589,... ...0,000 tons, from 6,972 mines.

The total output of coal, mostly bituminous, of course, is estimated at 616 million tons for the year. Soft coal production has been running at the rate of about 12 million tons a week during 1944. The nation has been burning about 11,409,000 tons a week so far this year, so production is slightly ahead of consumption. This would look like a sound and safe situation. But it isn't.

The squeeze comes because of several reasons. Despite the splendid job the railroads and water carriers are doing, the great volume of freight they must handle forces them to sidetrack coal shipments for days and weeks. Thus many localities may be in need of coal, but unable to get it quickly.

Another factor is the uncertain but huge demand of the armed forces. Great quantities of coal must be shipped to liberated countries, both for American military establishments and for the countries' own utilities.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for November 26

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE CHRISTIAN VIEW OF INDUSTRY

LESSON TEXT—Luke 19:15-26; II Thessalonians 3:10-12.

GOLDEN TEXT—Let him that stole steal no more: but rather let him labor, working with his hands the thing that is good, that he may have to give to him that needeth.—Ephesians 4:28.

Work is a blessing, and the proper attitude toward it is an important part of the life of a Christian. Industry has found its best and most dependable workers among those who believe in Christ. It has also come to realize that the strengthening of the faith of its workers makes them better workmen; hence we see all over the land the interesting development of chaplains in industrial plants. That activity rightly planned and properly conducted can be of great value to both the individual and to industry.

Our lesson rightly deals with the individual. Christianity is a personal matter, a life rather than a theory. It deals with the man rather than the mass.

I. We Are Accountable for Opportunity (Luke 19:15).

The king in this parable is Christ, who has now gone away, to return when God is ready for Him to set up His kingdom on earth. In the meantime His servants have been given that which they should be using for Him.

Two things stand out in this story. First, the fact that Jesus is coming again. There are many scoffers who deny that blessed truth (II Pet. 3:3, 4). There are many believers to whom the promise has become but a formal truth in a confession of faith or a creed. But the failure of men to recognize truth and their unwillingness to hold it precious, do not alter the fact. Jesus is coming again!

When He comes, He will have many things to accomplish, but—and this is our second fact—one of the most important is that there shall be an accounting with His followers (who are supposed to be His servants) regarding the life they have lived. What will your answer and mine be in that day? It depends on what we are and what we are doing right now.

The basis of His judgment appears in the following verses, where we learn that:

II. We Are to Be Rewarded for Faithfulness (Luke 19:16-26).

When believers stand in the presence of Christ to answer for the deeds done in the flesh (our sins were judged at Calvary!), it will not be a question of what church you belong to, or what family name you bear, or how much money you have amassed. No, the only question asked will be, "Have you been faithful in trading with the gifts, the abilities and the opportunities which God has given you?"

Note that there are three different judgments here, but all on the one ground of faithfulness. The first man represents those who with all diligence and zeal seek to grow spiritually and to serve the Lord with glad abandon. All that they have and are they give to Him for His glory and for the winning of others to Him. They will be commended by the Lord and great will be their reward!

The second man, with equal opportunity, did accomplish something, but not too much. He represents those who do want to serve the Lord but with no special zeal, no great measure of sacrificial endeavor—just "average" (what an unfortunate standard!) Christians.

The Lord is fair. He does not deprive them of their reward. In the measure that they have been faithful, they too shall find joyous service for Him. But observe that there is no special word of commendation in this case, and there is a limited reward.

The third man represents those who profess to be in fear of God. He seems to demand so much of them and they are not ready to give it. After all, they say, we want to enjoy life. Why should the Lord expect so much of us? Not only do they lose all reward, but the Lord must take away even that which He has already given.

III. We Are Commanded to Work (II Thes. 3:10-12).

From the day that God put Adam in the garden of Eden to care for it, honest work has been the lot of all mankind—yes, and his honor. There is no place in the economy of God for the man or woman who is able to work but is not willing to do so. "If any will not work, neither let him eat" (v. 10).

Apparently there were some in the church at Thessalonica who perverted the teaching of the Lord's return, who said that if Jesus were coming any day there was no use working. They had turned the truth completely around. The point is that since Jesus may come at any time, we should all be doing our utmost to accomplish all we can so that we may stand in His presence with joy, and not with shame.

SEWING CIRCLE PATTERNS

Flattering Frock for Afternoon 'Date' Dress Is Slim, Graceful

Simple But Dressy.

YOU'LL win countless compliments when you're seen in this softly flattering afternoon frock. It's simple but dressy enough with the soft shoulder gathering with a crisp touch of ruffling and decorative buttons. Try it in the new fall colors.

* * *

Barbara Bell Pattern No. 1229 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 (three-quarter sleeves) requires 3⅝ yards of 39-inch material; short sleeves, 3⅜ yards. For neck trimming, 1 yard ruching.

A Fashion 'Must.'

WE KNOW what a "date" dress should have—and this one has everything! A close-fitting waist and peplum — a fashion "must" this year—and a softly gathered skirt to make you look slim and graceful. Pretty for fall and winter in velvets, velveteens, taffetas or rayon crepe.

Pattern No. 8711 comes in sizes 12, 14, 16, 18 and 20. Size 14, short sleeves, requires 4¼ yards of 39-inch material; three-quarter sleeves, 4⅝ yards.

Five-Pound Note Highest

In the past six months, Great Britain has produced no notes of a denomination higher than five pounds or $20, while the United States has issued about $900,000,000 worth of currency in $50, $100, $500 and $1,000 bills.

For Quick Cough Relief, Mix This Syrup, at Home

No Cooking. No Work. Real Saving.

Here's an old home mixture your mother probably used, but, for real results, it is still one of the most effective and dependable, for coughs due to colds. Once tried, you'll swear by it.

It's no trouble at all. Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments until dissolved. No cooking is needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Now put 2½ ounces of Pinex into a pint bottle, and add your syrup. This makes a full pint of truly splendid cough medicine, and gives you about four times as much for your money. It keeps perfectly and tastes fine.

And you'll say it's really amazing, for quick action. You can feel it take hold promptly. It loosens the phlegm, soothes the irritated membranes, and helps clear the air passages. Thus it eases breathing, and lets you sleep.

Pinex is a special compound of proven ingredients, in concentrated form, well-known for its prompt action on throat and bronchial membranes. Money refunded if not pleased in every way.

MRS. KIRKWOOD WAS FIRST WOMAN TO LIVE IN KLEMME

Mrs. Kirkwood Was Charter Member Of Methodist Church

Funeral services for Mrs. Amanda Kirkwood were held Friday afternoon at 2:00 o'clock at the Klemme Methodist Church with the Rev. Herschel E. Harvey officiating, asisted by the Rev. M. O. Lee, pastor of the Central Lutheran Church of Mason City, assisting.

"In The Garden," and "Beautiful Isle of Somewhere" were sung by Mrs. Gerald Koerner, Mrs. Clarence Waterman, Mr. Emil Beier and Mr. Emil Patet. Mrs. R. A. Jorgenson was the accompanist. Wm. C. Keraus was in charge of the flowers.

Burial was in the Klemme Cemetery and the casket bearers were Fred Kluckhohn, C. A. Bielefeldt, John Day, Ralph Elder and R. A. Jorgenson.

The following obituary was read by Rev. Harvey during the services at the church:

OBITUARY

Amanda Cathrine Kirkwood was born June 6, 1864, at Turin, N. Y., and departed this life on November 15, 1944 at Mason City, Iowa. She was the widow of Alexander Kirkwood who preceded her in death a number of years ago. She was also preceded by two sons, Sam and Will who died several years ago.

Mrs. Kirkwood was the first woman in Klemme and came here in 1889 and resided here until 1928 when she moved to Mason City to make her home with her daughter, Mrs. M. F. Lakin at 434 5th Street, S. W.

Besides her daughter, she is survived by 11 grandchildren: Gaileon, Roscoe and Bill Hubbard in California; Lt. Harold M. Hubbard with the U. S. Army overseas; Clara M. Rekfield at Yakima, Washington; Betty Jackson, Rochester, N. Y.; Phyllis Kirkwood, of Klemme; Avis Amundsen, Iva Hildebrand, Bob Hubbard and Helen Lakin, all of Mason City. She also leaves 14 great grandchildren.

Mrs. Kirkwood was a charter member of he Klemme Methodist Church, having joined in 1894 under the pastorate of Rev. C. E. Plumer. She was a signer of the Articles of Incorporation.

In a letter to the members and friends of the church on the occasion of the 50th Anniversary last October, she expressed her regrets at not being able to be present on account of her health.

CARD OF THANKS

I want to take this means of expressing my sincere thanks to all who sent messages of comfort and floral offerings at the death of my grandmother, Mrs. Amanda Kirkwood.

1tp —Phyllis Kirkwood

LARGE CROWD ATTENDED PAGEANT AT METHODIST

The bibical pageant staged by the Fifty-Fifty Class, assisted by members of other classes and the Choir, was attended by a large number of people. Several carloads of people from Rowan came to see the pageant.

Miss Marie Blank and Mrs. Carl Finders directed the cast and Miss Crabtree assisted with costumes and theatrical make-up. The play was well given.

After the pageant members of the cast, the choir and out-of-town visitors were treated to a nice lunch served in the dining room.

Fred Becker Had Good Sale Tuesday

Fred Becker's closing out farm sale held Tuesday was a big success. There was a large crowd present, the bidding was lively and top prices prevailed on livestock and farm machinery.

Mr. Becker had an exceptionally fine lot of livestock and much of his machinery was like new.

Mr. and Mrs. Becker expect to move into their home in Klemme soon, and Mr. and Mrs. Elmer J. Schneider will move on the Becker farm.

Remember the good old Victorian days when everyone was so modest he referred to the chicken's legs as drum-sticks?

Plans War Loan Drive

This Is Another War-Time Thanksgiving

But, Let's Be Thankful!

This is another War-Time Thanksgiving, but let's be thankful for the progress our Nation and our Allies have made in the past year. Let's re-dedicate ourselves to striving toward a complete and lasting Victory which will endow the entire world with Freedom and Democracy that we, as a Nation, have enjoyed since our Pilgrim Fathers celebrated the first Thanksgiving Day at Plymouth in the year 1621.

Let's be thankful that we can buy WAR BONDS and STAMPS voluntarily to hasten Victory and end the conflict and again bring a World-Wide Peace.

YOUR OWN CREAMERY is an essential War Industry, supplying needed Butter to our Armed Forces, our Allies and for Civilian use as well. The Farmer Patrons of this HOME-OWNED concern can feel that they, themselves, are really playing an important part in winning the war through Dairying and Food Production.

The Management, Directors and Employees take this opportunity of saying—"Thank You for your cooperation and patronage during the past year.

REASONS WHY YOU SHOULD BUY CHRISTMAS SEALS

Here are several good reasons why you should buy the Christmas Seals which were mailed to you

Because money is needed to carry on the fight against tuberuclosis in this county. Because laxity now would undo the patient work of several years

Because there are several persons in this county who are victims of the disease Because many who have tuberculosis do not know it. Meanwhile germs are spreading to the families and associates.

Because no home is safe until all homes are safe Tuberculosis could invade your home

Because Christmas Seal money is used in this county to search out tuberculosis, to help the man with tuberculosis "come back," to teach us all how to prevent tuberculosis

That is why you and all of us should buy Christmas Seals

MRS. MARTHA BREDBENNER MAILED OUT XMAS SEALS

Mrs. Martha Bredbenner, local chairman of the Annual Christmas Seals campaign, mailed out about one hundred and thirty letters containing Christmas Seals on Tuesday.

Mrs. Bredbenner said that Art Wellemeyer was the first person in Klemme to return the envelope with cash for the seals.

A box has been placed in H. Lau Sons store where letters may be deposited.

AVERY THEATRE WILL GIVE FREE SHOW TO THOSE WHO BUY BONDS

Manager G. B. Kirchner of the Avery Theatre at Garner will give a free show on Friday evening, December 1st to all who purchase 6th War Loan Bonds.

When you buy a bond from your bank or post office, ask for a free ticket to the Avery Theatre.

Admission to the Avery on Friday, December 1st, will be by a bond purchase ticket only.

Former Klemme Residents Now On Acreage In Texas

The Times just received a card which may be of interest to our readers and is from J. M. Neuberger, Route 1, Box 122, Brownsville, Texas, as follows:

"We moved to a little farm on the edge of town last July. It has eleven acres of fine grapefruit and oranges We also have a few chickens and a cow We like it here very much and are happy with the thought of it being really Spring here, with fine gardens and crops, instead of on-coming winter. We will soon have been here a year now We are feeling fine. Sincerely, J M Neuberger."

Pvt. Winton Etchen Has New Address

Pvt Winton Etchen, son of Mr. and Mrs Albert Etchen of Klemme has a new army address as follows:

Pvt. Winton Etchen 37685262,
Co R. 15th S T Regt.,
Fort Monmouth, New Jersey.

Pvt Etchen was formerly located at Robbins Field, Georgia He is in Signal Training in the army air corps.

NOTICE!

The parties mentioned in the letter I received some time ago in regard to taking my wild geese are entirely innocent and had no connection with it whatsoever.

—Henry Ward.

Methodists To Raise $1600 Here In Crusade For Christ

KLEMME-LIBERTY METHODISTS ASKED TO RAISE $1600 FOR NATION-WIDE PROGRAM

Methodists of the Klemme and Liberty Churches are being called by Rev Herschel E Harvey, the minister, to take part in the raising of $2,000,000 for world-wide relief and reconstruction, the first phase of the denomination's nation-wide Crusade of Christ program of post-war service

The local appeal for which the goal is $1059 for Klemme, and $545 for Liberty, will be made during December The Methodist congregations here are part of nearly 8 million members of 41,000 churches in the United States who are participating in the four-year, five-fold Crusade.

Expenditure of the Crusade fund by the regular, general agencies of the church will provide for "feeding the hungry, clothing the destitute, and freeing the minds and spirits of the ignorant, the underprivileged, the driven and the disposed," Mr. Harvey said.

Three-fifts of the fund has been allocated for the "rebuilding and rehabilitation of human life" in foreign countries; nine-tenths in war-devastated areas and the rest in other mission fields. The balance will be used for emergency, war-caused needs in this country.

Other phases of the Crusade for Christ program call for continued education in and expression of opinion for "cooperating among nations in the post-war world," renewed evangelism efforts with special emphasis in 1946, education for Christian stewardship of ability, time and money, and improvement of Sunday School enrollment and attendance.

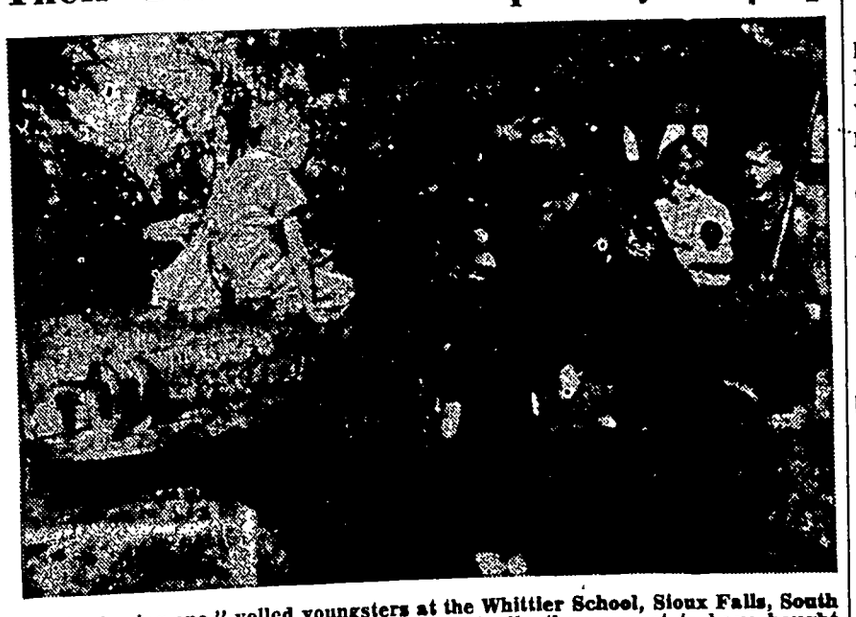
"The Crusade for Christ is Methodism's organized response for assuming its part in meeting the unsettled conditions and vast staggering needs created by the second World War," Mr. Harvey stated. "Having proved its will to live in the face of all enemies, the Church is now ready to give practical and spiritual food to the hungry both of its own household and others throughout the world without distinction of race, creed or color."

Klemme and Liberty will do their share in the Crusade.

Thirty Seven People At The John Waddingham Home Turkey Day

Mr and Mrs. John Waddingham entertained thirty-seven relatives at their home to dinner on Thanksgiving Day. Those present were: Mr. and Mrs. Wm. Waddingham; Mrs. Martin Karsjens and children; Mr. and Mrs. Roy Waddingham and family; Mr. and Mrs. Virgil Waddingham; Mr. and Mrs. Tony Tebbins and family; and Mr. and Mrs. Elmer Traeger.

Their Bonds and Stamps Buy a Jeep



"We're buying one," yelled youngsters at the Whittier School, Sioux Falls, South Dakota, when they saw the jeep above. Actually they expect to have bought enough war stamps and bonds by the middle of December to pay for two jeeps for the armed forces. The army sergeants in the picture motored over from Sioux Falls Air Field to show the boys and girls just what their savings are purchasing. (Army Photo)

TREES TO BE AVAILABLE FOR GAME COVER PLANTING

Although the war has cut down materially on the tree distribution program of the State Conservation Commission, the state nursery at Ames is planning limited distribution of trees for erosion control and game cover plantings for next spring. The trees from the state nursery are made available under the provisions of the Norris-Doxey and Clark-McNary Acts of Congress. Trees and shrubs to be distributed at nominal prices include black locust, green ash, hazel nut, wild plum, redbud, wild rose, elderberry, and red haw. The evergreens for distribution include the white pine, Australian pine, Douglas fir, Colorado spruce, and Norway spruce. Detailed information regarding trees for game cover or erosion control plantings may be obtained from the State Conservation Commission, 10th & Mulberry, Des Moines, Iowa.

OLD AGE ASSISTANCE GOES TO TWO HUNDRED SIXTY

Two hundred sixty persons in Hancock county received old age assistance for November, according to the state department of social welfare. The report shows that a total of $7,182, an average of $27.63 was paid to those persons.

Two blind cases in the county received $65.10. There were 27 cases of aid to dependent children, the number of children being 59. They received a total of $650.00, an average of $11.03 per child.

United Service Women Will Meet December 5th

The United Service Women will hold their next meeting Tuesday, Dec. 5th at their room where they will sew and have a Christmas party and exchange of gifts.

They meet the second Wednesday of each month thereafter.

Verne Greiman Enlisted In General Service Branch Of The Navy

Verne Elmer Greiman, 17-year-old son of Mr. and Mrs. Ben F. Greiman of near Klemme, was enlisted in the U. S. Navy on Nov. 6, 1944. Acording to a communication from the Mason City Recruiting Station, Verne chose the General Service Branch of the Navy where he will have the opportunity of qualifying for one of many Service Schools. Petty Officer ratings are usually given men who successfully complete the Service School courses.

POSTMASTER J. N. DAY URGES ALL TO MAIL THEIR XMAS PACKAGES EARLY

Postal Department Unable To Secure Extra Labor This Year

Public response to the Post Office Department's "Shop Now! Mail In November" campaign is good but needs to be better, according to Postmaster John N. Day.

Postmaster General Frank C. Walker says, "Extraordinary wartime conditions face us. Unless more people buy and mail in November the Postal service cannot do its job of delivering all Christmas gifts on time.

"It is not pleasing to us to have to ask the American people to mail packages so far in advance of the delivery date. We do so only because it has to be done. The job is a tremendous one, but we are confident that it will be done because we know from experience that given sound reasons Americans cooperate magnificently.

"Unprecented shortages of manpower and transportation facilities growing out of the war compel early mailing. The Postal Service has given 50,000 experienced employees to the armed forces and 300,000 railroad workers have gone to war. Equally serious is the fact that rail and other transport facilities are taxed to the limit with the great burden of war raffic which all of us know must take precedence.

"In a great number of our 43,000 post offices the man power is critical The 200,000 extra workers whom we normally recruited to handle the swollen Christmas volume of mail were able to work long hours of overtime and to do heavy work. This cannot be expected from the women and high school boys and girls to whom in large part we must look this yea to meet the situation.

"The way in which everyone responded in making it possible for us to handle a volume of 70,000,000 parcels for the armed forces overseas leaves no doubt in my mind that the November Christmas mailing will be equally successful. I ask for the help of the press, radio, business advertisers, civic groups and all Americans in making it possible for the Postal Service to do its work."

Postmaster Day said "We urge everyone to buy now, mail in November and mark gifts 'Do Not Open Until Christmas'."

Klemme - Liberty Youth Attend Rally At Garner Sunday

About twenty young people from Klemme and Liberty attended the Youth Fellowship Rally at Garner last Sunday afternoon and evening. The theme of the rally was "What Can Christian Youth Believe About Man?"

Rev. Harvey was one of the discussion leaders. The Rev. Warner M. Hubbard of Clear Lake gave the address in the evening.

The next rally will be held at Britt on January 7, 1945.

Pvt. Wesley John Suckow In Heavy Weapons Training

TO DISCUSS WHAT LIES AHEAD IN AGRICULTURE

Alfred Josten, Chairman of the Hancock county AAA, notified all producers in Hancock county that Triple A elections will be held throughout the county from Dec. 4 to 9. All meetings will be called for 8:00 p. m.

A program has been arranged for a full discussion of what lies ahead for agriculture.

WEEKLY NEWS ANALYSIS

Win Strengthens F.D.R.'s Hand; Germans Fear New Allied Drive; Storms Slow Pacific Warfare

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

With U. S. trucks waiting in mud, Chinese coolies work diligently to clear washout of section of Burma road.

DEMS GAIN:
F.D.R. Strengthened

In winning a fourth term, Pres. Franklin D. Roosevelt carried the Democratic party along with him in both the senate and house, where he now appears to be assured of a working majority on both international and domestic issues.

Their own positions materially weakened by Gov. Thomas E. Dewey's strong stand for an effective international organization to preserve world peace, staunch GOP nationalists were among the defeated, with the result that F.D.R.'s peace program should encounter easier sledding in the senate, where details will be worked out, and in the house where funds will be appropriated.

All of the so-called nationalists did not suffer defeat, but prominent among those that did were Senators Nye in North Dakota, Danaher in Connecticut and Davis in Pennsylvania, and Representatives Fish of New York and Day and Maas of Minnesota.

Although the Democrats failed to make any gains in the senate, they stand just short of a two-thirds majority necessary for ratification of foreign treaties, a margin they may make up by an alliance of such GOP internationalists as Ball of Minnesota.

In the house, however, the Democrats made big gains, increasing their membership to over 240, while the Republicans fell far below their preelection strength of 210.

Thus, although President Roosevelt's winning margin was below that of 1940, the Democratic victory built around his leadership assumed

Victors over nationalists included Governor Moses who defeated Nye; Augustus Bennett who beat Fish; Brian McMahon who trounced Danaher.

the proportion of a landslide. The successful conduct of the war, the comparative comfort of people despite rationing and the President's intimate acquaintance with Allied affairs—all tended to offset opposition.

As usual, the President drew his greatest strength from the nation's large industrial centers, where efficient political machines like Ed Kelly's of Chicago, Tammany's of New York and Frank Hague's of Jersey City piled up tremendous pluralities which traditional Republican rural districts could not counter-balance. As it was, Governor Dewey did not run as strong in the country areas as was anticipated.

Much credit for getting the vote out in the big industrial centers went to Sidney Hillman's CIO Political Action committee, which undertook to impress union membership with the exercise of their power through the polls.

Abroad, President Roosevelt's election was well hailed in Allied circles.

Said the London Evening Standard: "The result of the election . . . leaves the tasks of winning the war and the larger tasks of advancing Anglo-American-Soviet unity to win the peace in the strong, proven hands of Roosevelt. . . ."

MISCELLANY

Film actress Ann Sheridan, losing her wager on Governor Dewey, paraded down Hollywood boulevard in ragged costume and burnt cork on her face.

* * *

About 200 farm buildings burn every day in the United States and Canada, and some 3,500 people a year perish in these fires.

EUROPE:
Things to Come

All along the 460 mile western front, fighting was confined to local actions, but the Germans, for one, brooked no misgivings on the comparative calm.

While the British were clearing all of southwestern Holland, and U. S. forces were improving positions near Aachen in the north, Metz in the center and the Vosges mountains in the south, the Nazis claimed that the Allies were striving to obtain springboards for a great drive on the Reich, and only using 25 per cent of their troops.

Though action in the west was local, it was bitter, with very tough fighting below Aachen, where doughboys worked through the fir and pine Hurtgen forest in Indian fashion on the road to the Rhineland.

As the Doughboys pushed through the splintered Hurtgen forest, both sides made free use of air and artillery bombardment for maintenance of open positions outside the wooded tract.

It was there, in little hamlets, that some of the bitterest fighting occurred, with tiny villages changing hands in close-quarter action.

Fierce fighting also took place in the foothills of the Vosges mountains, where mixed U. S. and French units pounded forward toward the great passes leading into southwestern Germany. As Allied troops worked forward, the Nazis pushed in reenforcements in an effort to check the advances.

Shoving off in a surprise attack about Metz after a heavy artillery bombardment, U. S. troops improved their positions along a 55 mile front, encountering mainly small arms fire from Germans caught flat-footed. In developing their attack, Yanks braved icy streams, chest-high, to get across to the opposite banks to establish bridgeheads and cover for engineering corps throwing across bridges.

PACIFIC:
Stormy Weather

Raging hurricanes known throughout tropical waters swept across the Philippines, and U. S. troops driving down the northwestern half of Leyte island toward the Jap base of Ormoc were caught in the swirling whirlwind and their attack slowed.

Having cleared the enemy from virtually all of the eastern section of Leyte, Gen. Douglas MacArthur's forces swung around the northern tip of the mountain range blocking off the western coast, and were driving down it when the hurricane struck.

With one of Japan's top militarists, General Yamashita, put in command of the enemy's forces, the foe's determination to put up a fight for the Philippines was well reflected in their stand on Leyte, where elements of four Jap divisions entrenched themselves in the hilly and tangled terrain on the west coast to face the oncoming Yanks.

As a first-class slugging match developed on the ground, air combat also increased in tempo, with U. S. carrier-based planes attacking enemy airdromes and supply depots in an effort to weaken the enemy's air force, while Jap land-based craft conducted harassing raids on U. S. positions on Leyte.

Blow Hard

Hurricanes that strike the Philippine area blow strong winds. In addition to their circular whirl the tropical cyclones move in their entirety, slowly at first, and usually no more than 20 miles an hour. Some storms, however, have attained a speed of 40 miles or more per hour. The usual direction for those north of the equator is westward, then northwestward.

Tropical cyclones are usually at their strongest in the area stretching northward from Leyte.

CHEESE:
New Markets

With American consumers coming to appreciate the fine quality of domestic production of such cheeses as roquefort, camembert, gorgonzola and Swiss, U. S. producers are expected to obtain an increasing volume of business in these types over importers in the postwar years.

Before the war, imports of European cheese averaged over 50,000,000 pounds annually, with roquefort and camembert coming in from France, gorgonzola from Italy and Swiss, of course, from Switzerland.

With U. S. epicureans becoming accustomed to American brands of these rarities, however, they are expected to more and more satisfy their taste for roquefort from Illinois, Minnesota, Iowa and Wisconsin producers; for camembert from New York and Wisconsin; for gorgonzola from Wisconsin, and for Swiss from Wisconsin, Illinois and Ohio.

In prewar years, over-all U. S. cheese production totalled around 700,000,000 pounds, with output soaring to 916,000,000 pounds in 1941.

STEEL:
Expand Capacity

Greatest in the world, the U. S. steel industry made substantial expansion since 1940, adding 12½ million tons to capacity at a cost of over 2 billion dollars, half of which was put up by the government.

As of July 1, figures showed that the capacity of blast furnaces for refining raw ore was raised to over 68½ million tons, while capacity for further processing of iron and scrap into steel was boosted to over 94 million tons.

Most vivid indication of the size of the U. S. industry lies in its comparison with that of other countries, with Germany's prewar capacity rated at around 20 million tons, and Great Britain's at 15 million tons.

Zoot Shoes

Zoot suiters with the long coats and baggy pants with tight ankles have come up with a new one in Los Angeles, Calif.

Their latest are shoes with steel plated soles and heels, two inches thick, which they use as weapons. Chief Jailer Robert Fisher is shown inspecting some of the 100 pair of such shoes confiscated by juvenile authorities.

DISEASE:
'Hold Line'

Although there has been no appreciable increase in the rate of venereal disease in the U. S. since the war, an increase among servicemen in recent months foretells a letdown in the vigorous campaign which has been waged against these scourges, officials said.

Source of great future danger, Surgeon Gen. Thomas Parran of the U. S. public health service said, lies in the spread of these diseases by untreated people throughout the country in the postwar period of migration and possible declination of moral standards.

While the overall venereal disease rate is at an all-time low in the navy, it was said, infection among personnel in the U. S. has increased 24 per cent above 1942. The rate also has taken a jump in the army since January, 1944, it was reported.

GRAIN MARKETS:
Election Spur

With reelection of President Roosevelt presaging the farm bloc's continued control over the administration's agricultural program, prices reacted favorably on grain markets, scoring fractional gains.

Of all grains, only corn failed to respond to election happenings, with the large volume of country offerings in the middle-west tempering prices.

Revival of talk that beverage alcohol manufacturers again would be allowed a temporary holiday from war distillation for civilian production, added to election optimism, resulted in an upswing in rye.

ARMY SURPLUS

Surplus serviceable property varying from nontactical aircraft to snowshoes, is being reported by the war department to government agencies charged with disposal of such goods.

Examples of types of surplus property suitable for other war agencies and for civilian distribution, have included marine engines, wool shearlings, machines and machine tools, oil drums, automotive spare parts, pavers, graders and cranes.

So. American Republics Build Up Big Balances

The net import balance to the credit of the other Americas in 1943 totalled $524,634,000 according to the annual trade balance figures of the United States Department of Commerce. The previous record balance was $453,875,000 in 1918. The 1943 record-breaking total compares with $369,120,000 in 1942.

With the wartime rise in United States purchases of strategic materials and other basic commodities from Latin America, imports of gold and silver from Mexico, Colombia and other hemisphere producers have dropped sharply.

Net gold and silver imports in 1943, according to the Commerce department statistics, declined to $30,890,000 in 1943 from $112,882,000 in 1942. Net gold and silver imports from Mexico dropped to $7,232,000 from $66,594,000 in 1942. Excluding gold and silver, net imports from Latin America in 1943 soared to $493,746,000 from $256,238,000 in 1942, it was reported.

Since the United States began its heavy purchases of commodities from Latin America in 1940, the other American republics have accumulated a net balance of more than $1,000,000,000 in trade with the United States, representing the excess of this country's imports from Latin America over exports to these countries.

Bulgaria Historic Highway Linking Europe With East

Lying south of Rumania, and north of Greece, Bulgaria is flanked by Jugoslavia to the west and northwest, and by Turkey to the southeast. Thus it links the other Balkan nations, while at the same time facing the Black sea within 225 miles of Soviet territory. Through this country, following the course of the Maritsa and the Morava rivers to the broad valley of the Danube, runs one of the great highways of history, nature's open road between the Near East and the heart of Nazi-held Europe.

Within the Axis bloc, Bulgaria yields a number of foodstuffs, minerals, and other war-useful materials.

About four-fifths of Bulgaria's frugal, hard-working people make their living by farm and pasture, supplementing the fruits of the soil with products of forest and stream. On many small holdings (most of them range from one to six acres) they grow a big crop of tobacco, Bulgaria's leading export in war or peace, and an essential item in fighting men's supplies. Their mulberry trees support a silkworm industry whose output may now serve such direct war needs as parachutes, gunpowder bags, and surgical thread. Hides and skins from Bulgaria find military use in boots, straps, and jackets.

Companion Crop

Where oats are used as a companion crop for a seeding of grasses and legumes, C. S. Garrison, assistant extension agronomist at Rutgers university, suggests sowing them at the rate of one to one and a quarter bushels per acre. This is quite a reduction from the normal seeding of two and a half bushels per acre, but he assures growers that it will increase the chances of obtaining a good stand of legumes and grasses.

Electric Motors Long Lasting if Given Care

Electric motors will give years of uninterrupted service with very little care, but that little care is extremely important.

Motor bearings must be lubricated at definite intervals otherwise neglect may ruin bearings and cause injury to the motor winding. Light petroleum oils are generally used for motors with sleeve bearings; soft greases for ball bearings. The lubricating device usually indicates the type of lubricants used, but one's best guide is the instruction book.

Motors must be kept clean of dirt and dust around coils and windings. Excess oil must be wiped off, and the motor blown clear with an inverted vacuum cleaner. Carbon tetrachloride will remove oil and greases.

Burnt out motors are generally caused by overloading, low voltage, too tight belts, or failure of the starting mechanism. Overloading is usually caused by lack of lubrication of the motors or the driven machine, misadjustment of parts, blocking of the driven machine as in the case of a frozen water pump, or through use of lubricants which become stiff at low temperatures.

Wax Fireplace

Fireplaces, no matter how well constructed, seem bound to smoke under some conditions. The cumulative result on a fireplace framed with a white painted mantel is to darken the paint by coating it with a sooty, adhesive film which may be resistant to ordinary cleaning. Waxing of the clean white or light-colored woodwork around the fireplace can be a big aid in keeping the framing of the fireplace bright and attractive. If the paint is already discolored by the smoke, it should be cleaned thoroughly and then repainted or enameled. When the job is thoroughly dry, it should be waxed with a good grade of wax. When the waxed surface becomes so impregnated with smoke or soot that it resists cleaning and needs renewing, a self-polishing wax can be removed with warm, soapy water, or liquid wax can be removed by rubbing with more liquid wax applied with a cloth. It is important to remember that self-polishing wax and liquid wax are of different compositions and require different treatment. Care should be taken to see that the fire is out and that the air is free from ash or dust particles when fresh paint or wax is being used, and that the fire is not started again until the protected surface of the white woodwork is perfectly dry.

Amerigo Vespucci

Amerigo Vespucci (1452-1512), son of a merchant of Florence, Italy, and himself an employee of a merchant, was inspired by talks with Columbus and went to sea on a West Indian expedition commanded by Alonzo de Hojeda. Vespucci made four voyages to the northern and eastern shores of South America. An account of his experiences published in 1507 by Martin Waldseemuller at the College of Saint Die in France, carried a suggestion from the publisher that the new land be named "Amerige" (land of Americus). The story was repeatedly reprinted and was so widely read that it fixed in the popular mind the idea of calling the Western hemisphere America.

JUST JESTS

All for Nothing

"How long are you in prison for my man?"

"Two weeks."

"What is the charge?"

"No charge. Everything's free."

His Worry

Willie—Teacher, how can I know when I am naughty?

Teacher—Why, your conscience will tell you.

Willie—Will it tell you?

De-Creased

Jasper—The principal's trousers look sort of sad today.

Joan—Just what do you mean?

Jasper—I mean de-pressed.

Time may be a healer—but he's not so hot as a beauty specialist.

Curiosity

Boss—What do you want here? I fired you last week!

Office boy—Yes, I know. I just came back to see if you were still in business.

The Letdown

"Whenever I look at you," said the young man to his fiancee, "I think about those marvelous glamour girls you see on the pictures."

"Do you really?" said his sweetheart.

"Yes, but what's the good? A fellow like me has to be satisfied with what he can get."

When raw winds cut like a knife...

CHAPPED LIPS SOOTHED QUICKLY!

Cracked lips—so cruel, and painful! Caused when raw, bitter weather dries skin cells, leaves them "thirsty." Skin may crack, bleed. Mentholatum acts medicinally: (1) Stimulates local blood supply. (2) Helps revive *thirsty* cells so they can retain needed moisture. For sore, chapped hands, lips—Mentholatum. Jars, tubes, 35¢.

MENTHOLATUM

HE HAS YOUR BATTERY

Deadly flamethrowers are blazing the road to Victory! Each of these efficient weapons depends upon dry batteries to spark the flame for instant action. The batteries you do without mean more fire-power for front line fighting men. Use your available batteries sparingly...keep them cool and dry, rest them as often as possible. e Early Shopper Gets the Toys—There Aren't Enough for Everybody

ock of Playthings s Larger Than Last Year, but Still Short

Eager-eyed kiddies will have e content with about half as ny toys this year as they used et before the war, when they ne dashing in to the parlor on istmas morning. As every- y knows, all kinds of civilian ds are scarce, including toys. s a wonder, in fact, that there any toys on the market, in midst of a great war.

oth toy factories and toy mak- are busy making war materials rcussion caps for torpedoes and ls, gas masks, and a thousand r things. They make toys out craps and leftovers, and substi- s like wood and pasteboard. But best they couldn't make nearly ugh to satisfy everybody this

ith wartime prosperity putting ey into everyone's pocket, fa- s and mothers, uncles, aunts cousins have a good deal to nd on presents for the children in r families. But they can't buy they want to, because there just n't enough toys in the stores to around. Besides this, there are million more youngsters in the ntry than usual—a result of the g birth rate of the war years.

Few Metal Playthings.

etal toys will be represented by w articles, but in general steel iron playthings will be missing.

Wooden playthings like blocks are not so hard to get, but it's still a good idea to shop early. A record-breaking demand for toys of all sorts is anticipated, and many children are going to be disappointed, because of shortages.

fits, are in "fair supply," manufacturers say. Apparatus made of glass, porcelain, plastics, wood or pasteboard is being substituted for metal articles. For instance, a microscope included in some of the science sets has a plastic tube and base.

A survey of the toy supply situation conducted by the Toy Manufacturers of the U.S.A. reveals such shortages as these:

Less than 15 per cent of the normal supply of sleds with steel runners will be on sale. Sleds with wooden runners will be fairly plentiful, but all in all, the total number

Planes and tanks and siege guns naturally dominate the childish mind hese war years. These models of fighting machines are made of d and cardboard. They are simple but sturdy. The WAC uniform little girl wears is a novelty this year.

l-runnered sleds, tricycles and cles, coaster wagons, construc- sets, and a thousand other gs will be very scarce. Some ufacturers have been able to left-over stocks of metal, fabri- d before the war restrictions t into effect, and others are us- scrap material, so a small quan- of metal toys are on the mar-

Back in peace times, play- gs made of cast iron, steel, cop- aluminum and so on, consti- d nearly half of all the Christ- presents.

oys made of rubber are very . So are plastic goods. Tires doll buggies are being made of ud" which is residue from re- essed rubber, but these are ut the only such articles on the rket.

Wood is being used to make lots things formerly made of metal other scarce materials. There trucks, for instance, of polished dwood on sale. Tanks and siege s, battleships, steam shovels and ny other mechanical toys are de largely of wood, with a few tal parts. Cardboard and wood nbinations are also numerous, rticularly in the games division. cardboard and wooden circus is favorite this year.

Enough Dolls and Teddy Bears.

Girls are more fortunate than s this year, for dolls are being ned out in sufficient quantities to et the demand. There are both rd and soft bodied dolls in the ores, made of everything from cot- n to porcelain. The fancy models ve moveable eyes, curly hair, tty dresses and all the other mmings. Stuffed animals are on nd in sufficient numbers to take re of ordinary demands. Teddy ars are plentiful, it is said.

Carriages for dolls are offered to rly Christmas shoppers, at least, nce there are 100,000 buggies on le throughout the country. These e made of wood, with metal heels. Doll dishes, of china and rap plastic, and cast-iron cooking tensils are being offered, and tiny urniture can be had.

Hobby sets, such as chemistry out- of sleds available will be less than before the war.

While no electric trains are being manufactured, there will be some trackage offered for replacements, for those boys who got a train set years ago. Some metal construction sets are offered. About 10,000 of these have electric motors included. There are a good many wooden sets on the market. No electric lights for Christmas trees are being made, but a few are on hand from last year.

No Autos or Bicycles.

Wagons with wooden wheels are fairly plentiful, and there are some with metal wheels. No metal toy autos or two-wheeled cycles or any such vehicles are offered. A few scooters, made from scrap steel, can be had. In some cities a small number of second-hand bicycles and other wheeled toys are on sale. These generally have been repaired and repainted.

Blown glass balls for Christmas tree ornaments can be bought readily, but tinsel, excepting lead foil is off the market, and certain other ornaments and decorations are scarce or unobtainable.

Better Goods This Year.

The Toy Manufacturers state that a higher quality of wood and pasteboard toys is being offered this year, explaining that experience has enabled makers to do a better job now. Many companies have sprung lately that were not in the toy business before the war, and some of these have had little production experience, so there is bound to be some poorly made articles on the market. Skilled toy makers, too, are working in war plants in many cases, so the toy factories have had to get along with partly skilled labor, many of whom are over-age or disabled.

More than 200 of the largest toy manufacturing plants are turning out war materials in the main, and are making toys on the side. By maintaining some volume in their toy lines, these companies were enabled to handle their war contracts more efficiently, because they could operate their entire plant at near capacity.

Another organization busily at work on the toy situation is the Office of Price Administration. This government agency has to set fair ceiling prices on every toy item that is to be offered for sale. More than 3,000 articles have been examined and priced and many others are pending a decision. In a big warehouse in Washington OPA officials look over samples of all sorts of things many of them new to the market, such as transparent plastic ducks and giraffes, wooden telephone sets, and pasteboard dolls. It's a big job to put fair price tags on all these things, but the OPA hopes to complete its task before Christmas.

FOLKS GATHER 'ROUND FOR PARLOR GAMES

Games that all the family can enjoy together take the spotlight in Santa Claus' 1944 pack. Catering to the wartime necessity to "stay at home and like it," a variety of easy-to-learn, quick action parlor sports are ready to help the juvenile and grown-up contingents forget about limitations on the family car and relax from worries and responsibilities.

Revivals of old favorites that were crazes in the horse and buggy age head the list of escape-type games that will be relatively abundant in a season when Santa Claus' Yuletide pack is short of a great number of familiar play materials. While great numbers of games are being sent to servicemen overseas, there are some left for the home market.

Among the parlor pastimes back in favor are ROOK, PIT and FLINCH. But MONOPOLY, the real estate trading game, continues to hold craze honors. FINANCE is another of the robber baron speculation games that appeal to both families and service men as a happy escape.

SORRY, the English board game that won top favor during the Blitz, is another best seller this winter with American families.

For arm chair strategists there are game inventions inspired by the

"Monopoly," the classic real estate trading game, is still the favorite with family groups this Christmas.

exploits of America's armed forces. CAMELOT, the lively battle game, is a favorite with service men which has a large family following, too.

Some of the Christmas games will be a helpful adjunct to spelling as well as arithmetic. DIG, a streamlined word-building game that uses miniature gold miner's picks with sticky tips to grab the letters, offers opportunity for keen competition that incidentally inspires Junior to improve. CROSSWORD LEXICON, based on four-letter words built with cards, is another spelling game that provides good competition for all ages. Once the youngsters have a chance to show their mettle unself-consciously, many a parent will be surprised to find himself hard-pressed to hold his share of winner's honors.

Among the playthings available his year that were unobtainable last ear are cast-iron cooking utensils r dolls. This three-piece set will etail for about a dollar.

There is some swing away from e armament theme in toyland this ear. Construction machinery has egained some of its former posi- n. This good-sized all-wood steam ovel with moveable boom will sell about $3.95. The dump truck, ade of hardrock maple and moothly finished, is priced at $5.00.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.

WORLD-WIDE CHRISTIAN FELLOWSHIP

LESSON TEXT—John 17:18-23; I Corinthians 1 1-3, 12-4-7, 12, 13.

GOLDEN TEXT—Neither pray I for these alone, but for them also which shall believe on me through their word; that they all may be one.—John 17:20, 21.

Unity among the believers in Christ is much talked about and desired by many in the church. They seek a single Christian communion in the world, or at least a gathering of all Protestant churches in one body. Such outward unity may be impossible to attain, and in fact might be quite undesirable if it did not express a unity of spirit and of true faith.

That fact, however, should not hinder us from seeking a world-wide fellowship of all believers of every race and creed in the unity of the Holy Spirit. The true church, the invisible body of Christ, is not divided, even though its members are scattered in many denominations.

We are reminded in our lesson that whatever else may be true about us, we (that is, all believers) are united in Christ. We are:

I. In the World—but in Christ (John 17:18-23).

Even as Christ was sent of the Father into the world to be the Light of the World, so we are here in the darkness of sin and sorrow to shine as lights for Him (Matt. 5:14-16). He did not pray that His disciples (and that includes us, v. 20) should be taken out of the world (v. 15) but that they should be kept from sin in the world.

So we are in the world. But let us never for a moment forget that though we are in the world we are also in Christ. He will give us—in fact He has given us—grace and glory so that we may represent Him in the world.

There is to be a oneness about believers (v. 21), not alone because of their good (blessed as that may be!), but in order that the world may know and believe in Christ (vv. 21, 23). The obvious corollary to that truth is that every evidence of division and friction between God's children is an opportunity and an excuse for the world to deny the truth of the gospel.

"Behold how these Christians love one another" was the baffled testimony of the pagan world in the early days of the Christian church. They could argue with their philosophy, and question their theology, but they had to admit that something had happened to these people which made them really love one another.

II. In the Church—but in Christ (I Cor. 1:1-3).

The church, even in its outward form of local assemblies and denominations, has a place of great importance in the world. One could certainly not find a more wonderful body of people nor more satisfying opportunity for service than that afforded by the church.

The ones to whom Paul addressed this letter were members of "the church of God which is at Corinth," but they were what is of infinitely greater importance, "saints"—those who had been sanctified, or set apart from this wicked world, in Christ Jesus.

This glorious distinction was not theirs alone, but belonged to "all that call upon the name of the Lord Jesus in every place" (v. 2). Here again we have that fellowship and unity in the love of Christ which transcends all other relationships and which ignores the boundaries of race, color, social position — yes, even of church membership.

No matter who or where another believer may be, Jesus Christ is "their Lord and ours" (v. 2). One could shout, "Hallelujah—Praise the Lord!" for such a delightful communion of all those who love Him.

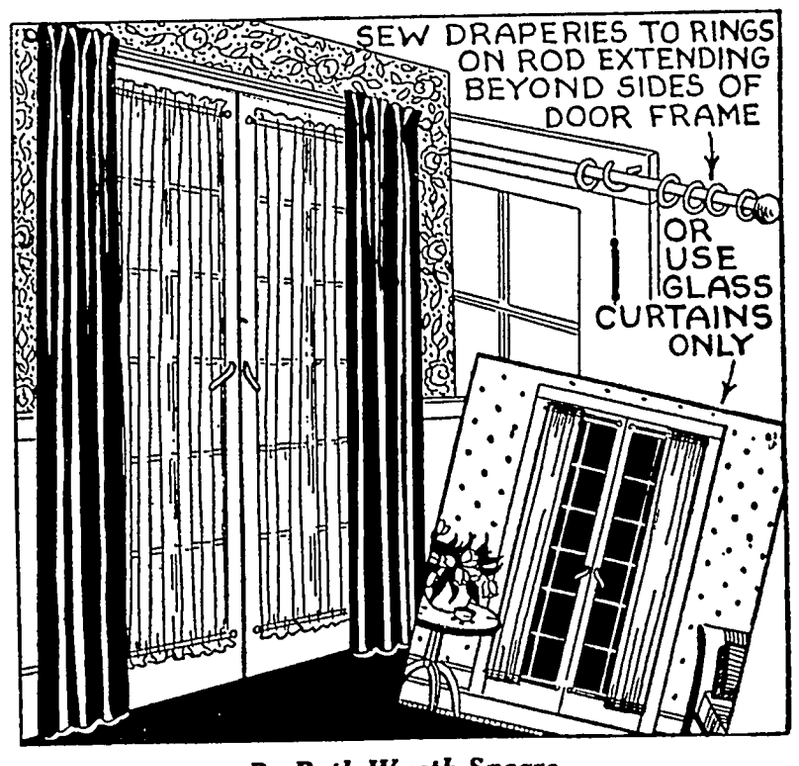
III. In Service—but in Christ (I Cor. 12:4-7, 12, 13).

God has work to be done in the world. To accomplish that work, He gives diverse gifts to men. How wonderfully He endows and calls men and blesses them in His service! We can think of nothing more satisfying than to serve Him.

But even here we must keep in mind that the important thing is that we are not individual stars to shine in our solitary glory. No indeed, we are only a part of a great plan and purpose being carved out by "the same Lord" (v. 5). We are called, commissioned and sent by the one Holy Spirit (v. 7). We are "one body" (v. 12), baptized by the Holy Spirit into that blessed relationship, and it is that body of Christ which is at work in the world to do His will.

Nor does that in any way minimize the glory or the value of what we are called to do. On the contrary, it enhances our calling and encourages us to greater endeavor. We are not alone. We are in the Lord's service, yes; but first of all we are in Christ, and that means that we move forward with a great world-wide fellowship of those who have like precious faith.

Curtaining Your French Doors to Harmonize With Window Treatments



By Ruth Wyeth Spears

HOW to make French door curtains harmonize with the window treatment in a room is a question that always arises. Frequently, over-draperies are omitted for the doors even though they are used for windows. The same glass curtain material is then used as for the windows but a heading and rod is used both top and bottom. However, over-draperies add dignity.

Either a wooden or a metal rod extending well beyond the sides of the door frame may be hooked in place as shown here in the diagram. This permits the doors to open without interfering with draperies.

It is not necessary to repeat window valances over doors though it may be done if desired by using a valance shelf or a cornice box placed high enough for the bottom of the valance to be just above doors that open in.

* * *

NOTE—This sketch is from a new booklet by Mrs. Spears called MAKE YOUR OWN CURTAINS. This 32-page book is full of smart new curtain and drapery ideas with illustrated step-by-step directions for measuring, cutting, making and hanging all types from the simplest sash curtain to the most complicated lined overdrapery or stiffened valance. Whatever your curtain problem here is the answer. Order book by name and enclose 15 cents. Address:

Household Hints

A little skim milk rubbed over leather chairs several times a year will keep the leather soft and prevent cracking.

In order not to scorch milk, rinse the pan with water for several minutes before heating the milk.

If candles are soiled, rub them with a cloth dipped in alcohol. Or they may be rubbed with lard or other fats.

To clean under the piano, place an old sock moistened with polish over a yardstick.

Add salt to the water in which eggs are to be cooked. This makes the shells more brittle and easier to remove.

When sending a book through the mails, cut the corners from several heavy envelopes and place over the four corners of the book to protect them.

Wax your book shelves. This will permit books to slide in and out easier and cause less wear on them.

If there is a suggestion of rust on your refrigerator shelves, wash them with a mild scouring powder and hot water, dry well with a soft clean cloth, and apply a thin coating of hot melted paraffin.

EDITORIAL COMMENT

HOW MUCH IS A BILLION?

Here's an interesting clipping you may want to ponder over:

Ask yourself this simple question: "Am I a billion minutes old?" Then make a quick guess for the answer. A minute is such a short interval of time; think how little it seems when you have a train to catch. Many people would and do guess that they have lived a billion minutes.

When you stop to figure it out, however, 60 minutes to an hour, 24 hours to a day, and 365 days to a year, you'll find that to be a billion minutes old you would have to live 1,903 years. And, not counting interest, to accumulate a billion dollars you would have to earn a dollar a minute since the years 41 A. D., or $525,600 a year for 1,903 years.

This simple illustration may help to give you a better idea of how big a billion is. The term is used so frequently in present-day government finance that it means but little more to most people than just another expenditure. It takes 1,000 millions of dollars to make a billion dollars. The interest charges on a billion dollars at 2% amount to 20 million dollars a year.

Now then, if 50,000,000 employed people in the nation work 8 hours a day, 6 days a week with 2 weeks vacation and only Christmas for a holiday, and each of these 50,000,000 employees paid the government one dollar an hour, or $2,400 dollars a year, it would take 2 years to pay off a government debt of 240 billion dollars. This is approximately what the federal government owes today, and the debt may reach 300 billion dollars before the end of 1945.

It is well then for every taxpayer to understand the meaning of a billion dollars. We have raised many billions for the war effort and can raise many more. But we certainly do not want expenditures of billions of dollars piled up on top of the war effort for any government activities which may be non-essential.

300 MEN NEEDED

ESSENTIAL FOOD PROCESSING INDUSTRY

Agricultural Workers needed for the winter months. Opportunity to work this winter and later years after the war.

Good paying winter work with extra pay for overtime and opportunity to learn numerous trades in the meat packing industry.

Be sure and contact your County Extension Director and nearest United States Employment Service.

JACOB E. DECKER & SONS
MASON CITY, IOWA

Around Iowa

Lost?

A blue goose, a species very rarely found in this part of the country, was shot recently by Walter Wright near National. The bird weighed nine pounds and had a wing spread of 58 inches. It was one of about 50 blue geese feeding in a cornfield.

Long Hunting Trip

Three men from Hondo, Texas, air field arrived at the Sioux City air base field one day recently on a proficiency flight. They were met by a car and taken to the C. T. Glade home, Ocheydan, where they spent the day hunting pheasants The three were Capt. Julian Massie, Jr., Lt. B. W. Glade and Lt. R. E. Batzel.

Half And Half

A hen on the Homer Jones farm near New London raised a brood half pheasant and half chicken. However, before the birds became full grown, dogs got into the pen and killed the entire flock.

Coincidence

Ballots cast several weeks and thousands of miles apart by Capt. C. A .Trueblood and his wife were counted consecutively. Mrs. Trueblood stood at the registrants table in Indianola to give her name just as the board finished recording her husband's name as a soldier voter. Mrs. Trueblood reports they voted alike.

Lights Again

Strangers coming into Ida Grove now will be able to tell where to turn to enter the business section. The lighted neon arrow and name sign had been out for several months but was repaired last week.

Back Home Again

A fruit cake sent by Mrs. Harold Collins, Fonda, to her husband in Italy arrived back in the states in good condition. The cake was sent last June but did not catch up with Sgt. Collins until recently. Sgt. Collins, now in Springfield, Mo., reports the cake arrived there in good condition.

It's Happened Again

Mrs. Eunice Clough of Storm Lake wonders where her laundry might be. She had left her laundry bundle on the porch for the laundryman and had also notified the Sioux City Salvation Army to pick up some old clothing. Evidently, the Salvation Army truck arrived first and now Mrs. Clough would like to know the whereabouts of her "family washing" She still had, at last report, the old clothing she wished to donate.

Stitches And More Stitches

Rosella Voight of Algona has put a large number of stitches into a "trip around the world" quilt The quilt consists of 7,902 pieces the size of a postage stamp. It required 900 yards of thread to do all the stitching. It took Rosella six years to complete her "trip around the world."

Kind-Hearted

Mr. and Mrs. Ed. Inman had the pleasure of a visit with their son, Cpl. Byron Inman, at Phoenixvile, Pa. The trip expenses for the Seymour couple were paid by a millionaire at Phoenixville. This year, to celebrate his birthday as in past years the wealthy man made a gift of happiness to someone else. He called at the hospital where Cpl. Inman is confined at the time and visited with the young man. The corporal was blinded while fighting on Aitape Island.

Time Lost

The loss of a wrist watch now is something that is "hard to take" but Kenneth Nuehring of Guttenberg was glad it was only his wristwatch that had been injured. Nuehring was working with a young horse and the animal kicked. One foot grazed Nuehring's wrist, taking the watch and some hair off his arm, but not a scratch was suffered by the young man.

Solo Flight

Mrs. Jennie Lind Johnson is not the first grandmother to take her solo airplane flight, she is the first great-gradmother to do so at Jefferson. Now, Mrs. Johnson hopes to get enough flying time in order to take her cross-country flight yet this fall. In the spring, Mrs. Johnson hopes to buy a plane for personal and business use.

Two Too Many

Ed Williams of Lamoni recently found a fishworm that had one too many tails. The fishworm, a very lively one, has two tails, which form a perfect "V."

Warm Fall

The recent fall weather has been a "break" for some farmers. Aaron Vanderhof of Alta reported that a second crop of barley on his farm would soon be ready for a cutting. Mr. Vanderhof also stated that a second growth of oats are about 3 feet high and look better than last spring.

Two!

Henry Moenk of Onslow recently marketed 70 head of hogs. This in itself was not unusual, but when final settlement was made the pigs averaged 222 pounds in weight and the net returns amounted to $2222.-22.

New Attraction

Bill Zimmer, manager of a LeMars store, has a window attraction that was not intentionally placed there. Originally, the display was of insulation material. However, mice were soon the main attraction. The small animals were hiding under the sacks and when a fly made its appearance they would leap out in an atempt to catch it. Mr. Zimmer reported that he would leave the mice in the show window as they seemed healthy and it also would show how they avoid getting in contact with the insulation material.

Anybody In Rumble Seat?

Storm Lake police are of the opinion that five young people in the driver's seat of a coupe are too many and a serious threat to the traffic laws. A Linn Grove man was haled into mayor's court to explain why the front seat was so popular.

Pie Auction Indicated

In another case at Storm Lake too many in one location was a positive godsend. Louis Kolb reported finding 33 normal sized pumpkins growing on a single vine in his Victory garden this fall. He was calculating the number of pies that can be made from that garden product.

Resumed Ascension

A small black balloon about the size of an ordinary wash tub paid the eJuls Dorn farm east of Waverly a brief visit. It had barely contacted the ground when a gust of wind again sent it on an unknown mission. Ida Dorn, daughter of the farmer, who got near enough of the balloon to inspect it. said it could not have been a weather balloon, for it carried no instruments to log its flight.

Broom Boom

That five acres of broom corn drying on racks in an Emmetsburg building may start a broom boom in that community. Broom corn produces a special kind of fiber talk, best adapted to the making of household brooms O. A. Campbell, owner of a mattress factory at Emmetsburg, has conceived the idea that brooms made from locally grown broom corn are good products for a post-war industry boom. New hard maple handles are now unobtainable, but Campbell proposes to recondition old broom handles and start making brooms even before the war ends.

Lost—One Bridge!

Grant township folks in Story county have reported a lost bridge that spanned a creek in that neighborhood Though a recent flood dislodged the structure and sent it downstream, they figure it couldn't have been damaged much and they want it back. The mystery of it is how could a bridge disappear so completely and leave no trace? Grant township needs that bridge and will finder please return it to Story County Engineer Sam Steigerwalt?

Braves Live Wire To Rescue Kinfolk

Prompt action on the part of Mrs. Eldon Gillett, Wintrop farm woman, in investigating the cause of a blown fuse, probably saved the lives of her husband and 3-year-old son, Roger. She found the two unconscious on the lawn, the result of having contacted a electrically charged radio wire, which had become loose and fallen across a high tension wire of a rural electric line. Father and son were severely burned and suffered shock, but recovered.

Heat from wires from which insulation is worn or sparks resulting from broken wires may cause fires in homes. Repair and care in use are safest measures to take in using all electrical devices.

Alaskan Indians erect totem poles to the animal from which they think their tribe is descended.

The Ponte Vecchio at is one of the most famous in the world.

MR. FARME

THE ALLIED ARMIES ARE FIGHTING FOR YOU
. . . BUT WHAT OTHER ORGANIZATION IS?

- If you want to move forward . . .
- If you want to enjoy greater stability . . .
- If you want to build more prosperity for yourself .

THERE IS A WAY

The Farm Bureau Organization Way

Join When Your Neighbors Call Annual Dues $10.00 **Join**

Where your $10 00 goes: $6.00 of it stays in the county to carry on the county program. $3 50 of it pays your dues to Iowa Farm Bureau, which includes subscription to "Iowa Farmer"" and is used to promote legislation, market research, equitable taxation, better rural roads, etc. Lastly, 50 cents it gives you membership in American Farm Bureau which maintains an office in Washington to look after farmers' interests such as AAA, REA, interest rates, constructive farm legislation and to watch all legislation effecting farm welfare.

JUNIOR HIGH NEWS
Reporter, Robert Baack

This week we wrote six weeks tests in all our subjects. We all have been working hard so the tests did not seem too difficult.

Several boys from both grades went out for basket ball last week. We hope to have as good a team as we had last year.

We had only three days of school this week on account of it being Thanksgiving.

In the Seventh Grade we are studying about our neighbor, Mexico.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
Miss Bugh, Teacher

In Language Class, Miss Bugh told us the story of the first Thanksgiving. Then each child told what he was thankful for. We are thankful for our mothers and fathers, our sisters and brothers, our friends, our homes, our food, our church, our school, the animals, birds and flowers.

In Art we made Pilgrim boys. We put them above the blackboards so that they can smile at us.

THIRD AND FOURTH GRADE NEWS
Miss Holmes, Teacher

The following people have been neither absent nor tardy from the Third and Fourth Grades for the second six weeks period:

Honor Roll

Lois Ann Jacobs
Ronald Karsjens
Thomas Waddingham
LuVerne Heginger
Reverdy Mace
Eric Meyer
Billy Waddingham
Billie Wilson

We are sorry that Bonnie Jean Mace has been ill so much and has not been able to be at school. We hope that next six weeks she can be with us every day.

We had three people in the Third Grade and one in the Fourth Grade who got 100% in Spelling every Friday. They are:

Garry Smith
Dennis Ridder
Janice Swanson
Daisy Schaefer.

FIFTH AND SIXTH GRADE NEWS
Mrs. Voetberg, Teacher

This week ended our second six weeks period. We've been busy taking our tests.

On Friday afternoon during the last fifteen minutes we played the corn game. Each of us "bingoed" at the same time. We were playing for a turkey. Each one of us got a turkey (not a live one, but made from an apple.)

We were all happy to get a vacation of two days this week.

The following people were neither absent or tardy from the Fifth and Sixth Grades this six weeks:

Honor Roll

5th grade:
Janice Carpenter
Maralee Ridder
Richard Tiggerman
6th grade:
Jo Ann Carpenter
LaNelle Harvey
Delores Karsjens

SHAMROCKS SPLIT HONORS WITH GARNER CARDINALS

The Klemme Shamrocks lost the first home game here last Wednesday night to the Garner Cardinals 28-15. Garner jumped into an early lead and the score at the half time was Garner 20, Klemme 7.

Buntenbach lead the Klemme scoring with 8 points, and Kirchbaum for Garner with 17 points.

The Little Shamrocks defeated the Garner seconds 20 to 18.

Three Ladies Co-Hostesses At A Luncheon And Bridge Party

Mesdames C. G. Waterman, E. F. Jacobs and Geo. Lawhorn were cohostesses at a luncheon and three tables of bridge at the Lawhorn home last Friday afternoon.

Out-of-town guests were Mrs. Leo Esbeck of Ventura and Mrs. Verle Keraus of Garner.

Mrs. A. L. Kingery won the high score in contract bridge; Mrs. A. J. Kudje, second, and Mrs. P. M. Wilson, third high.

Average butterfat production of all cows in dairy herd improvement associations was 21.2 pounds in September.

THE KLEMME COOPERATIVE CREAMERY WILL COMMENCE OPERATION OF THE PRESENT L-DAIRY MILK BUSINESS ON OR ABOUT

December 1st

OUR PLANS ARE TO FURNISH BOTH raw and pasteurized Milk. However, the pasteurized milk will not be available until pasteurizing equipment is installed.

MILK WILL BE AVAILABLE AS UNDER the present management, and also at the Creamery.

THE PRESENT PRICE WILL REMAIN ON raw milk, and on pasteurized milk it will be 11 cents per quart.

WE AIM TO GIVE THE SAME GOOD SERVICE as Mr. and Mrs. Elder have in the past.

ONLY NOW CAN IT BE SAID THAT KLEMME is not one of the 400 towns in the United States without the safe-guard of pasteurized milk.

BOX 454 - Sleepy Eye,

'I'll Take You Home Again, Kathleen'—To Germ

Although frequently played on programs of Irish songs, "I'll Take You Home Again, Kathleen" has no Gaelic connection. It was written about 70 years ago by an American composer, Thomas Westendorf, as a musical confirmation of a promise made to his wife, Kathleen, that he would bring her back to visit her old home in Germany.

MULTIPLE RELIEF EASES COLD MISERY LIKE A DOCTOR'S PRESCRIPTION

Many doctors prescribe a combination of ingredients for relief of cold symptoms. Colds don't show up as a single ailment, but as a complex series of miseries. Grove's Cold Tablets are a combination of eight active medicinal ingredients. Work internally and promptly on all these symptoms: relieve headache, reduce fever, ease body aches, lessen muscular pains, ease nasal stuffiness. Take exactly as directed. Get Grove's Cold Tablets.

GROVE'S COLD TABLETS

WNU—N

When Your Back Hurts

And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is other sign that something is wrong in the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won country-wide approval than on something less favorably known. Doan's have been tried and used many years. Are at all drug stores. Get Doan's today.

DOAN'S PILLS

Sailor Doll That's Everyone's Favorite

HERE'S fun! Get busy sewing this sailor doll. He's the favorite of young and old—everyone who sees him wants to own him.

SNAPPY FACTS ABOUT RUBBER

Nearly 2,000 rubber tires daily were required in North Africa to replace tires which had been worn out or destroyed in action.

As a result of the diversion of the petroleum by-product to aviation gasoline, about 50 per cent of the butadiene produced for synthetic rubber processing so far in 1944 came from alcohol plants.

When you wonder about the shortage of civilian tires, bear in mind that in the time it takes to build one 56-inch airplane tire at B. F. Goodrich factories, seven 8.25-20 truck tires or sixty 6.00:16 passenger tires could be made. And airplane tires are "musts" these days!

In war or peace

FIRST IN RUBBER

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION

for Coughs, Chest Colds, Bronchitis

To relieve distress of MONTHLY

Female Weakness

(Also Fine Stomachic Tonic)

Lydia E. Pinkham's Vegetable Compound is *famous* to relieve periodic pain and accompanying nervous, weak, tired-out feelings—when due to functional monthly disturbances.

Taken regularly—Pinkham's Compound helps build up resistance against such annoying symptoms.

Pinkham's Compound is made *especially for women—it helps nature* and that's the kind of medicine to buy! Follow label directions.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Keep the Battle Rolling With War Bonds and Scrap

A little nest of grated American Cheese will surprise the family in these fluffy potato croquettes. Nourishing and filling, they fit well into winter menus.

Thrift and Nutrition

There's a clamor among nutrition conscious homemakers for recipes that nourish but that are inexpensive to fix.

Expense of food has little to do with nutrition as the recipes today will show. There's good eating in them besides, and the family will welcome seconds as readily as they do the more expensive foods:

Surprise Croquettes.
(Makes 6)

- 6 Idaho potatoes
- ½ cup hot milk
- 2 tablespoons butter
- Salt and pepper
- 2 tablespoons minced parsley
- 1 teaspoon grated cheese
- 1 egg
- 1 teaspoon water
- Fine dry bread crumbs

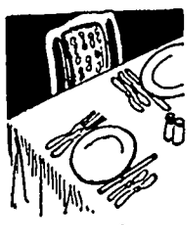
Scrub potatoes and steam until tender in a small amount of water. Spear potatoes on fork and slip off skins. Mash well, adding hot milk, butter, salt, pepper, parsley and onion. Shape large spoonfuls, sufficient for a serving into croquettes with a tablespoonful of cheese in center of each. Roll in fine crumbs, dip in beaten egg to which 1 teaspoon water has been added. Then roll again in crumbs. Fry in deep fat (380 degrees) until brown. Serve at once.

Onions are plentiful this year and make an excellent casserole with mushrooms.

Onion Casserole Supreme.
(Serves 6)

- 4-5 Sweet Spanish onions
- 1 can condensed cream of mushroom soup
- 1 teaspoon Worcestershire sauce
- ¾ cup grated American cheese

Slice onions in ⅛ inch slices. Cover with boiling, salted water, 1 teaspoon to each quart. Cook until just tender—about 20 minutes. Pour into a large strainer or colander and allow to drain thoroughly. Place half of onions in buttered casserole and pour ½ of mushroom soup which has been diluted with an equal quantity of water over them. Then add remaining onions and sauce and top with cheese. Bake in a hot oven (425 degrees) until brown on top and bubbly.



Lentils are full of protein and can be served in place of meat. They're especially good when cooked with salt pork:

Hoppin' John.
(Serves 5)

- 1 cup lentils
- ½ cup rice
- 1 quart water
- 1 teaspoon salt
- ⅛ pound salt pork
- 2 tablespoons butter or bacon drippings
- 1 small onion
- ¼ teaspoon celery salt

Rinse lentils and rice and add water, salt, diced pork and cook on low heat 45 minutes. Chop onion fine and cook until tender in butter or bacon drippings. Add to cooked lentils and rice and stir in celery salt.

Another bean which is highly nutritious is the lima. In this dish it takes on flavor from tomatoes and bacon:

Lima Beans in Tomato Sauce.
(Serves 6)

- 1½ cups dried lima beans
- 3 cups cold water
- 1½ cups canned tomatoes
- 4 whole cloves
- 6 slices of bacon
- 1 medium-sized onion
- 2 tablespoons flour
- ¾ teaspoon salt
- ¼ teaspoon pepper

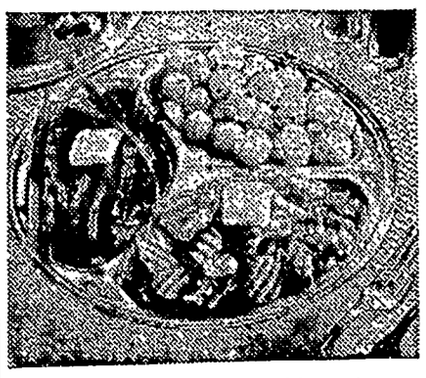
Wash beans. Soak overnight in the water. Cook slowly until tender. Simmer tomatoes with cloves 10 minutes; remove cloves. Fry bacon in skillet until crisp. Remove bacon and brown onion in drippings then add flour and seasonings and blend well. Add tomatoes and cook until thickened. Add beans and serve with warm bacon over top.

You've heard often enough the nutrition story on liver. Here's another recipe to add to your collection on this excellent meat:

Liver With Spanish Beans.
(Serves 5-6)

- 1¾ cup dried kidney beans
- 1 quart cold water
- 1 cup canned tomatoes
- 2½ teaspoons salt
- ¼ teaspoon pepper
- 1 bay leaf
- ¼ teaspoon powdered thyme
- 2 medium onions, sliced
- ¼ cup shortening
- ½ pound thinly sliced beef liver
- 1 tablespoon flour

Wash beans, soak in cold water overnight. Drain and measure the liquid and add enough water to make three cups. Add again to the beans together with the next five ingredients. Saute onion in shortening until tender but not brown, then add to the beans, reserving fat. Cover and bring beans to a boil, simmer until tender, about 2½ hours.



When serving vegetables, try a combination of several such as above and make them the main dish of the meal. Carrots, green beans and potatoes make up the platter.

Meanwhile, dredge liver in flour and brown in shortening in which onion was cooked. Cut liver into small thin strips and fold into the beans.

Liver may also be marinated in French dressing for one hour before frying whether it is prepared as above or for fried or broiled liver. The dressing seasons the meat thoroughly and gives it an attractive flavor.

A casserole that is a time as well as money saver is always a good recipe to have on hand:

Hamburger Deep Dish Pie.
(Serves 5)

- ¾ pound hamburger
- 3 teaspoons salt
- ½ cup tomato juice
- ½ cup peas
- 3 large potatoes, diced
- 6 small young carrots
- 5 small onions
- Biscuit dough

Place carrots, peas and potatoes into large kettle. Add tomatoes and cover tightly. Cook about 12 minutes.

Grease a casserole. Cover bottom with half of hamburger and sprinkle with half of salt. Add part of the cooked vegetables, then hamburger, salt and remaining vegetables. Pour vegetable juices over all. Cover with biscuit dough cut into biscuits and bake in a fairly hot oven (375 degrees) for 50 minutes. Use remaining dough, if any, for biscuits.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Chambers' Point-Saving Menu

- *Hamburger Deep-Dish Pie
- Celery Curls — Olives
- Toasted Rusk
- Currant Jelly
- Molded Cranberry Salad
- Lemon Meringue Pie

*Recipe Given

Lynn Says:

It's Good This Way, Too: Green beans with small onions in cheese or mushroom sauce.

Scallop oysters in cream of celery soup. Make the soup or use the canned if you want to save time.

Combine cranberry sherbet with mint sherbet for first course.

Add pink coloring to honey before serving on pancakes if you like a blush on the flapjacks.

Add chopped ripe olives to carrots or celery or the two vegetables when combined.

Creamed onions are a good vegetable dish to serve with ham.

Election Result:

FDR Victory As Dems Gain In Congress

Sweeping into office many senators, representatives and governors, favorable to President Roosevelt's foreign policy, the Democrat's presidential and vice presidential candidates received a total of 413 electoral votes, or 36 less than received in 1940.

While President Roosevelt's vote was less than in 1940, he will have with him a far more friendly congress than has been true for several years.

(x)—Denotes states counting service vote after election day.

GAIN GOVERNORSHIPS

Unless late servicemen votes change the picture, which is not considered likely, the Democrats will have a total of 25 governors to 23 for the Republicans, as against the previous lineup of 26 Republicans and 22 Democrats. Republican executives were defeated in Ohio, Massachusetts, Missouri, Idaho and Washington. The Republicans captured the governorship in Indiana and North Dakota from the Democrats. It is possible that the 15,000 servicemen votes in Utah may change the present line-up.

SEWING CIRCLE PATTERNS

Lovely Gift for a Special Friend Smart Ensemble for All Occasions

Patchwork Apron

IF YOU like a covered-up feeling while you work, make this gay, practical patchwork apron. Look through your scrap bag for pretty pieces to make the unusual border. A lovely gift for a special friend.

* * *

MARCH OF TIME

OBITUARY OF WILLIAM SAMUEL MESSELHEISER

William Samuel Messelheiser was was born at Madison, Wisconsin, on February 8, 1866, and passed away at his home north of Meservey on November 19, 1944. He was the son of Mike and Anna Messelheiser.

Mr. Messelheiser was one of the pioneers of this community, having come here when a young man. He broke the prairie of the farm on which he lived for over a half century. For many years he has been a member of the Farm Bureau. And since childhood he has been associated with the Evangelical Church.

On January 8, 1915, Mr. Messelheiser was united in marriage with Miss Frieda Carolyn Drewes and to this union were born a son, Elmer, of this community, and a daughter, Elfrieda, who lives with her mother. Together with a daughter-in-law, a grandchild, these all remain to mourn the passing of their husband and father.

Three sisters, Mrs. Lydia Zieman of Thornton; Mrs. Emma Dobbert of Le Mars; and Miss Harriet Messelheiser of Chicago, Illinois; and one brother, George of Los Angeles, California, also survive.

Although besieged by asthma and heart trouble during many of these later years, Mr. Messelheiser actively engaged in the farm work up until a couple of weeks before he passed away. By nature he was quiet and unassuming, wholly engaged with family and farm interests. He was highly respected by his neighbors and was an honored citizen of this community. Besides he was a loving, devoted husband as well as a kind and considerate father and gave support to everything that assured his family's welfare and community progress.

Mr. and Mrs. Ed. Ral left Sunday for their home at Hanover, Ill. after visiting for a week with relatives and friends in this community.

Mrs. Earl Schaeffer of Des Moines visited over the week end with Klemme friends. Monday she left for Forest City where she will remain for the winter.

Mr. and Mrs. Wm. C. Keraus entertained to a duck dinner Sunday Mr. and Mrs. Verle Keraus and children of Garner, and Pvt. and Mrs. Otho Keraus.

Mrs. Vivian Mace and children, Reverdy and Bonnie, went to Ft. Dodge last Wednesday evening to spend Thanksgiving at the home of Mr. and Mrs. Russel Lagerstrom.

Mr. and Mrs. Howard Baack entertained to dinner Thanksgiving Day August Baack and family, Wm. Schubert and family and Miss Juanita Wetters of Mason City. The occasion was also Howard Baack's birthday and his wife baked and decorated a cake which was lighted with 28 candles.

Mrs. John Clements and Jimmy and Mrs. W. F. Pavey were at Forest City Tuesday afternoon where they visited with Mrs. M. L. Palmer.

Mr. and Mrs. Lester Stille and daughter Lois, visited Sunday at the Lee Anderson home at Charles City. They went to see the new baby at the Anderson home.

Mr and Mrs. A. G. Koerner entertained to dinner on Thanksgiving day Lee Ridder and family; Orville Stokesbarry and family and Gerald Koerner and family.

Lt. Harold Jost left Friday via plane from Des Moines for Greensboro, North Carolina, after spending a week in Klemme visiting his father, H. F. Jost and family.

Mrs. Clarence Elder and children Martha and Charles, of Ames came Wednesday evening and visited until Sunday at the Ralph Elder home near Klemme.

Mrs. Peter Josten entertained the following to dinner at her home Sunday: Mr. and Mrs. Alfred Josten and Rosemary. and Mr and Mrs. Edmund Josten.

Mr. and Mrs. Earl Ruka entertained to a goose dinner at their home Thanksgiving Day Mrs Cena Nielsen, and Mr. and Mrs. Donald Braner and son Randall of Goodell.

Mr and Mrs. Lyle Liebendorfer of Forest City and Mr. and Mrs. R A. Jorgenson were dinner guests on Thanksgiving Day at the Joe Liebendorfer home at Hampton.

Mr. and Mrs. John Whitesell and son of Armstrong were dinner guests Thanksgiving Day at the A. L. Kingery home. Mr. Whitesell is Mrs. Kingery's brother.

Mr. and Mrs. Ed. Rall of Hanover, Illinoi, and Bernard Smid, of Britt, were dinner guests Thanksgiving Day at the John N. Day home.

Mrs. Lewis Neuberger and Mrs. Clarence Lemke were Mason City callers Monday and while there they also visited Mrs. Lester Neuberger and Mrs. Dwight Hummel at the Mercy hospital.

Mrs. Rosa Mitchell entertained to a goose dinner on Thanksgiving Day at her home at Swea City, the following: Mr and Mrs C G Waterman and daughter, Mrs Lyle Wilcox, Mrs Mary Waterman, and Mr. and Mrs. Wm Keraus, and Mrs. C F. Keraus, all of Klemme; and Mr and Mrs Verle Keraus and children of Garner.

Mr. and Mrs. Fred J. Arnold and son, Bobbie, were Thanksgiving Day dinner guests at the home of Mr. and Mrs. Wilbur Carr at Garner. Bobbie stayed at Garner for few days visiting with his grandparents.

Thanksgiving Day dinner guests at the home of Mr. and Mrs. Elmer Beier in Liberty township were Orville Bridges and family; Glenn Bridges and family; Mrs. Herman Bridges; and Mrs. Walter Drake and children. Evening visitors at the Beier home were Mr. and Mrs. Clarence Cook of Kanawha, and Mr. and Mrs. Walter Kelm of Minneapolis.

Mrs. Louis Neuberger and brother, Wert Loger, entertained the following to dinner at their home on Thanksgiving Day: Mr. and Mrs. Melvin Neuberger, Elaine and Allen; Mr. and Mrs. Donald Neuberger, Donald and Roger; Mr. and Mrs. Clarence Lemke; Mr. and Mrs. Frank Schulz and Robert, and granddaughter. Claudia Neuberger; all of near Klemme, and Mr. and Mrs. Albert Hippen and family of Renwick.

ncock County 4-H Clubs ect Officers For 1945

ON FIEDOW ELECTED SIDENT OF 4-H BOYS CLUB

o hundred fifty-eight Han- County 4-H boys, 4-H girls, A. members and their famil- njoyed the annual fun night rday in the Garner school au- ium. Games, refreshments nnouncing of awards for out- ng work done during the past were included in the program.

Milton Friedow President

e boys 4-H clubs elected off- as follows: Milton Friedow, erdam club, president; Cliff- Greiman, Ell club, vice presi- Ronald Bredlow. Liberty club tary.

nners of medals were an- ced as follows: meat animal, n & Co., Maynard Dorow; beef, Chicago Producers, Tienan; market pig, Chica- Producers, Maynard Dorow; red pig, silver, Frank Tienan; silver, Glenn Wille; sheep, Douglas Tienan; poultry, sil- Dorothy Moll; colt. Iowa Horse Mule Breeders, Jack Dethmers; record book, gold, Maynard . Judging medals were a- d as follows: Lawrence Eng- first, gold; Arnold Prochaska, d, silver; Raymond Dirksen, James Steward, silver; Al- eyer, bronze.

Other Awards Presented

e following members on 4-H were awarded pins: Madison Wire Club, Helen Formanek, des Formanek.

ne-Magor Pals. Ardys Bailey Gloria Izzard.

erty Busy Bees, Marjorie an, Lola Gast.

e clubs with the most new ers were awarded "Get To- " song books: The Avery ams and Bingham Boosters ith six new members each.

rings were awarded to Mil- Busse of the Avery Sun- Club and Ardys Bailey of the e-Magor Pals; each had at- d all of their local club meet- for five years.

pencils were awarded to the ing girls with perfect atten- for two years: Betty Ann er, Avery Sunbeams; Irma Bingham Boosters; Carol Fox, am Boosters; Eleanor Chizek, on Live Wires.

Had Perfect Attendance

e following girls had one year t attendance at their local meetings: Alice Anderson, Ell oppers; Iola Riemer, Elling- rd Chums; Marjorie Fox, of ingham Boosters; Eleanor Ja- k, Madison Live Wires; Glo- zard and Aileen Oxley, Boone- Pals.

ncils were awarded to the girls the best record books in their Irma Bird, Carol Fox, Alice Anderson. Gloria Greiman rie Greiman, Lola Gast, Ar- Bailey, Phyllis Jurgensen, Lois w, Janice Olson, Helen Form- , Mercedes Formanek, Arlene and Mildred Busse.

ncils were awarded to the 4-H keeping personal expense ac- ls through the entire past year ildred Busse, Arlene Wille, Is- le Gibbs, Marlene Roths, Er- n Betty Ann Kramer, Joan enberg, Jeanyce Nelson, Mar- Fox, Carol Fox, Eleanor Ja- ek, Betty Ann Schulz, Helen manek, Mercedes Formanek ie Jakoubek, Doris Holecek, Ar- Bailey, Gloria Izzard, Carol son, Aileen Oxley, Phyllis Jur- en, Carolyn Campbell, Alberta ning, Marjorie Greiman, Betty Griffin, Janice Thompson.

in And Sleet For North Iowa

ain and sleet fell in Iowa Sat- y night and Sunday and left at of ice that made walking driving hazardous.

Driving conditions were better day afternoon as much of the had melted from the highways.

VETERAN TO SIOUX CITY

PVT. OTHO KERAUS

Pvt Otho Keraus, who recently returned from 32 months overseas service with the 34th Division in Africa and Italy where he was a Staff Sergeant, will report for duty December 8th at Sioux City where he has been assigned to the 2nd Air Force as armorer. Pvt. Keraus is a son of Mr. and Mrs. Wm. C. Keraus of Klemme. Pvt. Keraus and his wife of Minneapolis were visiting in Klemme recently.

RUSH CULVER OF MANLY IS HAWKEYE PRESS CLUB HEAD

The publisher and wife of The Klemme Times attended the banquet and meeting of the Hawkeye Press Club held at the Eadmar Hotel in Mason City Saturday evening

Earl Hall, editor of the Mason City Globe Gazette talked to the publishers and their wives on his recent trip to the British Isles and France Mr. Hall's talk was very interesting and he told of those countries and war-time conditions as he saw them.

An election of officers was held and Rush Culver, publisher of the Manly Signal was elected president for the coming year, succeeding Warren Nelson of the Thornton Enterprise. J. C. Davenport was chosen Vice President, succeeding Earl Houdek of the Rockford Register.

Mrs. Rush Culver was named Secretary to succeed Mrs. Lester Benz of Osage.

The Hawkeye Press Club, composed of publishers and allied industries in North Central Iowa was formed four years ago with T. J. Farnan of the Clear Lake Mirror as the first President. Others acting as President of the organization since its beginning are R. A. Jorgenson of the Klemme Times; Lester Benz, of the Sheffield Press; and Warren Nelson of the Thornton Enterprise.

In the past the Club has sponsored 4 state and District Iowa Press Club meetings which were held at Clear Lake The Club meets every month except during the winter when meetings are held every other month.

HALF OF CHRISTMAS SEAL LETTERS ARE NOW IN

Mrs Martha Bredbenner, local Christmas Seal's sale chairman, reported that up until Tuesday noon 58, or nearly one-half of the letters mailed out had been returned, and all with contributions amounting to $47 55

Mrs Bredbenner asks that those who still hold letters to turn them in as soon as possible, either by mail or by dropping them in the box at the H. Lau Sons store.

DOUBLE FOUR BRIDGE CLUB AT FRIDAY AT LAU'S

Mrs. Lloyd Lau was hostess to the Double Four Bridge Club at her home Friday afternoon.

Mrs John Etchen and Mrs. Martin Barz won first and second high scores respectively.

LARGE CROWD ATTENDED ROTHS' CAFE OPENING

When Mr and Mrs. Tom Roths opened the doors of their new cafe to the public last Saturday afternoon they were from that time on literally swamped with visitors all afternoon and evening.

Mr. and Mrs. Roths recently purchased the old State Savings Bank building, the first floor of which they remodeled into a modern restaurant.

Throughout the afternoon they served free hot coffee and doughnuts to visitors and the children were treated to ice cream cones.

Fire Department Answered Call To Mrs. C. F. Keraus Home

Last Wednesday forenoon the local fire department made a run to Mrs C F Keraus' home where a blaze had been discovered in a small building used as a storage house at the rear of the garage.

Mrs. Alfred Merkel, next door neighbor saw smoke coming from the building and turned in the alarm. The prompt arrival of the fire department brought the blaze under control with but small damage.

Change pullets from a growing to laying mash 2 or 3 weeks before they start laying and are housed.

FIRST NATIONAL HAS A BIG WEEK IN SALE OF BONDS

The First National Bank, Klemme, really "went to town" last week in the sale of Sixth War Loan Bonds when from Monday morning, November 27 to Saturday afternoon, December 2nd, their total of bonds sold over the counter reached $56,156.25.

Of this amount $28.856.25 represented 203 "E" Bonds, and the balance of $27,300 was in various other series of bonds.

A check up on the amount of Sixth War Loan Bonds purchased by residents of Klemme has not as yet been completed, but it is estimated that the total is over the $30 000.00 mark.

This amount should be increased substantially before the end of the drive.

SCHOOL TIME CHANGED FOR KLEMME SCHOOLS

Beginning this week Thursday Klemme Grade and High school will start at 9:15 a. m. and will be dismissed at 4:00 p. m. This time change will be in effect thru the winter months.

The Polly is a white-fleshed peach and the Sungold is yellow-fleshed.

Predicts Increased Investment By American Farmers During Sixth War Bond Campaign

WASHINGTON, D. C.—A prediction that American farmers will invest more money in bonds during the Sixth War Loan than in any previous drive was made today by the War Finance Division of the U. S. Treasury.

Farmers bought $1,250,000,000 worth of War Bonds during 1943, according to the Bureau of Agricultural Economics. In 1944 it is believed they can and should purchase a total of $2,000,000,000, Ted R. Gamble, national Director of the War Finance Division, said.

Income at Peak

The Sixth War Loan, starting November 20, comes at an ideal time for agriculture, he pointed out

This is not only the time when farm income is at a seasonal peak, but 1944 marks three years of record breaking farm income, he said.

Based on information obtained from the BEA, the Agricultural Section of the War Finance Division estimates the 1944 cash farm income at $20,600,000,000, compared with $20,000,000,000 in 1943.

Although net farm income, due to higher operating costs, may not be greater than in 1943, most farmers now have reduced their debts and consequently will have more money to put into War Bonds, the division reports.

In the twelve months ending January 1, 1944, farmers reduced real estate mortgages alone by $650,000,000.

Bank Deposits Gain

After paying all operating costs and necessary family expenses, farmers will have left this year for investment and debt reduction over $5,000,000,000, the Agricultural Section also estimates.

Because of the fact that new machinery is not obtainable, farm deposits are piling up in rural banks. Demand deposits held by farmers in these banks are estimated at $4,500,000,000 and time deposits at $2,000,000,000. Since the new method of redeeming Series E Savings Bonds makes them as liquid as a dollar bill, it is no longer necessary for the farmer to maintain a large bank account to meet possible emergencies, Mr. Gamble stated. Therefore, he believes, farmers will convert part of these deposits into War Bonds.

Ted R. Gamble

War Bond purchasers will provide a farm financial reserve to protect against damage by drought, flood and livestock disease, will assure cash to replace and repair buildings and machinery as well as to build back soil fertility depleted by wartime food production, and will provide funds for education, vacations and old age security.

The high farm income this year is the result of the huge increase in farm production to meet wartime food needs rather than a rise in prices, which have been held down by the OPA it was explained.

Hancock County Schools 3rd In State On Floss Collection

Our Men In The Service

PFC. KERMIT SMITH SENDS SOUVENIRS FROM FRANCE

Pfc Kermit Smith, son of Matt Smith of Klemme, is back in the front lines in France, after being wounded and treated in an English hospital.

Kermit send his father several coins: English, French, a German coin and a Scandinavian coin.

Kemit has been twice wounded in action in the European theatre of war and was awarded the Purple Heart medal.

SGT. KERMIT KOERNER ILL IN HOSPITAL IN ITALY

Mr. and Mrs. A. G. Koerner received a letter the fore part of the week from their son, Sgt. Kermit Koerner, stating that he was a patient in an army hospital in Italy suffering with a case of Maleria fever.

A later letter stated he was feeling some better.

PVT. WINTON ETCHEN HAS CHANGE OF ADDDESS

The correct address of Pvt. Winton Etchen, son of Mr. and Mrs. Albert Etchen follows:

Pvt. Winton Etchen 37685262,
45 25 A. A. F. Base Unit,
Robins Field 2, Georgia.

ERNEST HELPS TO HOLD CLOSING OUT SALE DEC 19

Ernest Helps will hold a Closing Out Sale of livestock, machinery, etc. on Tuesday, December 19th at the farm 2 miles east and 1 3-4 miles north of Klemme.

Over ninety head of livestock is listed, including 27 head of cattle, 5 head of horses, 20 head of ewes, and 39 head of hogs. Mr. Helps also lists a big lot of farm machinery and tools. He will also sell a quantity of baled hay, silage, seed oats, and straw.

Mr. and Mrs. Helps have purchased an acreage in the southwest part of Garner where they will move soon after the sale.

Watch for the big sale advertisement in the next issue of The Klemme Times for the complete listing.

FLOSS FOR "MAE WESTS" LEAVES HANCOCK COUNTY

Garfield Township Lad Is "King Of Flos Gatherers" In Iowa

On Wednesday, November 29, a large freight car left Britt for Petoskey, Michigan, loaded with approximately 4100 bags of milkweed pods from Hancock and Kossuth counties. About 500 bags are left in a bin at Garner to be loaded into a "clean-up" car which will follow in a short time.

Verne Hejlik "Floss King"

Preliminary official returns show Verne Hejlik, of Garfield No. 5, is still "Floss King" in the state of Iowa His total of 119 bags is exceeded, however, by a "Floss Queen" from Clayton county with a reported 130 bags.

According to preliminary official returns Hancock and Kossuth counties rank third and fifth respectively in the number of bags of pods collected in the state.

The efforts of the pupils, teachers, and parents of the children and other interested individuals, as well as the Board of Supervisors and the War Hemp Industries at Britt have all been contributing factors in this successful project and the cooperation of all is greatly appreciated.

We have positive assurance this floss will be made into buoyant jackets in a very short time.

Chas. S. Whitney,
Co. Supt. of Schools.

PHEASANT AND DUCK SEASON CLOSES DECEMBER 8

The pheasant season closes at 5 p. m. Friday, December 8th after a spotty season. The early opening, with heavy vegetation, hot weather and widely dispersed birds, made the first half hard-going and unsatisfactory. During the latter part of the season the birds were wild and hard to get.

The 1944 duck season closes at sunset December 8th, after the longest season in recent years. The season was considered successful, although the quick flight of the bulk of late mallards caught many hunters by surprise and resulted in fewer ducks being killed than would have been taken otherwise.

MRS. ED. JACOBS HOSTESS TO U-DELT-EM BRIDGE CLUB

Mrs. Ed. Jacobs entertained the members of the U-Delt-Em bridge club at her home on Friday afternoon.

High scores in contract were won by Mrs. Art Kudje, Mrs. P. M. Wilson and Mrs. A. L. Kingery.

YANKS OPEN PACKAGE—No, it isn't a Christmas gift these boys are unwrapping at an overseas depot of the American air force service command in Italy, but a newly arrived engine. Among the 3 men who are unwrapping the cellophane wrapped engine with the same care they would give a Yule gift is Sgt. Kermit K. Koerner (above right), of Klemme, son of Mr. and Mrs. A. G. Koerner.

WEEKLY NEWS ANALYSIS

Big Allied Winter Push Aims At Heart of German Industry; WFA Sets Food Goals for 1945

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

With President Roosevelt, Prime Minister Churchill and Marshal Stalin scheduled to meet soon, there again has been a resumption of discussion as to the future disposition of Germany. On the basis of the latest information, the Reich might well be reduced to half of its 1938 size, with (1) France claiming the area west of the Rhine river; (2) a restored Austria obtaining Bavaria; (3) Holland being compensated for flooded land; (4) the Russians and Poles dividing East Prussia; (5) Poland receiving Pomerania and part of Silesia, and the Breslau area going to Czechoslovakia.

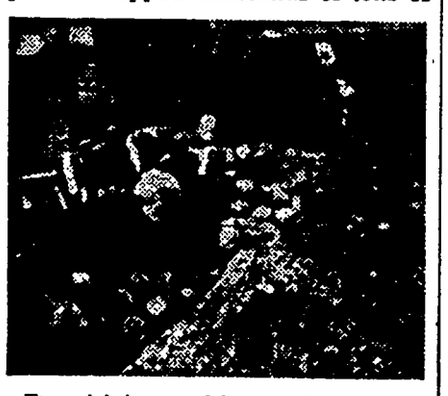
EUROPE:
Big Push

Using their superior forces to prevent the Germans from building up strength for next year, the Allies launched an all-out drive against the enemy's west wall, moving forward toward the vital industrial Ruhr and Rhineland despite wintry weather.

Although they had anticipated a general offensive, the Germans conceded the Allies' superiority, stating that until their vaunted new weapons could be delivered to the front, their troops would have to rely on their spirit to stay in the fight.

As the Allied attack got underway, the British 2nd army striking in southeastern Holland stood only 37 miles from Duisberg; the U. S. 9th hitting to the Tommies' south was 31 miles from Dusseldorf; the U. S. 1st swinging below Aachen was 28 miles from Cologne; the U. S. 3rd working past Metz was 13½ miles from the Saar, and the U. S. 7th and French 1st were 40 miles from Bavaria.

Focal points of the attack centered in the U. S. 9th and 1st army fronts, where swarms of Allied heavy bombers supported by fighter-planes dropped thousands of tons of



From debris caused by war, Dutch youngsters in s'Hertogenbosch build their toy castles.

fragmentation explosives on the enemy's forward positions to smooth-en the way for the Yanks' advancing forces.

Heavy concentrations of artillery joined in the bombardment of the German positions, then the Yanks moved forward, with members of the infantry slogging alongside of mud-caked tanks to score gains.

Prior to the general offensive, the British in Holland, the Yanks around Metz and the mixed Allied force in the foothills of the Vosges mountains had improved their positions in hard fighting.

The Yanks around Metz engaged in some of the toughest fighting as Lieut. Gen. George S. Patton edged closer to the vital Saar basin, famed for its coal and chemical industry. In slashing forward, U. S. forces ringed the formidable fortress city of Metz.

In writing off Metz, the Germans loudly broadcast that the bastion had largely served its purpose of holding up the U. S. drive to give them time to build up their fortifications farther to the rear.

The Allied attack came off in the midst of a welter of rumors that Heinrich Himmler had taken over absolute charge of the Reich from an ailing Adolf Hitler. Appointed commander of the Reich's home army by Hitler himself, Himmler busied himself trying to shove up German morale for the mighty blows that fell about that nation's unhappy head.

MISCELLANY

The untimely death of Quarterback Allen Shafer of Wisconsin in a game against Iowa was the first collegiate fatality due directly to football since 1940.

* * *

Reflecting high business activity, money in circulation jumped up nearly $600,000,000 dollars in October to a total of $24,386,247,083. Broken down into simple figures, that adds up to $176.10 per person.

PACIFIC:
Bloody Science

Bloody business, war is also a science, and as U. S. troops plodded forward on Leyte island in the Philippines, Gen. Douglas MacArthur's strategy unfolded.

With the enemy's main forces compressed on the northwest corner of Leyte, General MacArthur's tactics pointed to their annihilation by the prized military maneuver of engaging them from the front while sending other units to cut them off in the rear.

Thus did the 24th division move to press the enemy frontally, while the 1st cavalry and 96th divisions pierced the mountain ranges to the southeast in a drive to entrap the Japanese from the rear.

Meanwhile, U. S. airmen kept a close eye on the important port of Ormoc, through which the Japanese had previously sent reinforcements to help their troops holding out against the American advance.

Manila Bay also came under the bombsights of U. S. airmen, with carrier-based craft hitting at this important nerve center of enemy shipping for the entire Philippine area. In one strike alone, 11 Jap cargo vessels and oilers went to the bottom.

WAR WOUNDS:
Greater Recovery

Because of better organized and equipped medical service, sulfa drugs, penicillin, plasma and whole blood available for use in forward areas, less than 4 per cent of Americans wounded in this war die as compared with 7 per cent in the first world conflict.

The full picture of medical advance, however, is best told in the fact that from 50 to 60 per cent of the soldiers wounded in the present war are incapacitated by heavy guns, artillery or mortars, which inflict more serious injury, compared with only about 20 per cent in 1917-'18.

Comparisons between the two world wars show 80 per cent of the wounded now returning to duty as against 70 per cent, and number of infections kept down to 10 per cent as against the old figure of 60 per cent.

FOOD PODUCTION:
Bumper Harvests

Even as the U. S. department of agriculture forecast bumper grain crops for 1944, the War Food administration announced that its 1945 food production program would remain substantially the same as this year's.

Boosting its estimates of corn production 61,000,000 bushels, the USDA predicted a record 1944 crop of 3,258,000,000 bushels, while standing pat on its previous forecast of an all-time wheat harvest of 1,108,000,000 bushels. Coupled with a record sorghum crop of 160,000,000 bushels, overall grain production, including oats, barley and rye, was set at a top of 157,500,000 tons.

In addition, bumper crops were forecast for cotton, tobacco, potatoes, sweet potatoes, soybeans, apples, peaches, pears and pecans.

Alterations in the WFA's 1945 food program call for an increase in pig, cattle and milk production, but a 16 per cent decrease in egg output closer to the 1935-'39 average.

VETS

According to an interpretation of the War Labor board, veterans returning to their old positions are entitled to any automatic promotions and pay increases on the job.

In considering the selective service act of 1940, requiring employers to take back former employees returning from the armed forces, WLB ruled that the vet must be rehired "at the level to which he would have been entitled if there had been no break in his service with the company. . . ."

CHURCH LOANS:
Aid Homesteading

As a result of a homesteading program financed by the board of national missions of the Presbyterian church, farm families are settling on property purchased on extended terms of 30 years, with down payments deferred from one to three years, if practicable.

In addition to homesteading, funds may be used for the acquisition of forest lands for the benefit of the whole community, or for loans to improve home and farm equipment. Funds also have been utilized for awakening interest in farm ownership through the provision of general education in proper farming methods and advice in selecting suitable crops.

Under the homesteading program, an application is approved by the pastor and three elders of the church, with the prospective owner agreeing to cultivate the land and raise self-supporting crops. Starting modestly, the program has grown steadily.

Farm Values

Despite increases in the value of farm land since the outbreak of the war, the over-all situation remains spotty, with prices reaching inflationary proportions in some sections while rising to fair figures in others unduly depreciated during depression years.

Considered in all its aspects, farming has risen from a 49 to a 70 billion dollar industry since the war began, with value of land and buildings totalling over 45 billion dollars, crop and livestock inventories over 15 billion dollars, and liquid capital about 12 billion dollars.

Making good use of wartime prosperity, farmers have whittled mortgage debts down nearly a billion dollars since 1939, with the figure now standing at about 5½ billion dollars.

Wonder Show

With America's learned scientists behind the test tubes looking more and more into the substance of matter, wonders may never cease.

Already the list of accomplishments runs high, as evidenced at the National Chemical exposition in the turreted Coliseum in Chicago, Ill., where lightweight and weather resistant plastic magnesium furniture, lawn sprays which kill weeds but spare grass, and women's synthetic clothes, were on display.

Spectators milling about the great hall also could see a new method for producing a high mileage gasoline; artificial aromatics for use in soap, cosmetics and perfumes, and a spray for the painless treatment of severe burns.

Scientists explained the processes of electronics—the magical little electric atoms of which 30 billion, billion, billion make an ounce—in the drying of plywood to the welding of thermoplastic materials.

LAND REFORM:
Split Polish Estates

Carrying out its policy of agricultural reform, the Moscow sponsored Polish committee of national liberation divided up 5,000 acres of land owned by Count Alfred Potocki among 1,050 families.

At the same time, the liberation committee announced that it had taken over the Potocki family's Lancut castle, which would be converted into a museum. All together, Count Alfred Potocki, a prominent industrialist said to have fled to Vienna with the Germans, owns 75,000 acres.

In dividing up the Count's estates, the liberation committee was following its avowed policy of redistributing lands operated by great families, with the owners dominating the entire social structure within their districts.

POLITICAL ACTION:
CIO Success

With 110 congressional members elected with the support of the political action committee, the CIO declared that the victory demonstrated the effectiveness of labor's first big organized effort in a campaign.

Whether the PAC would be continued was considered at the CIO convention in Chicago, Ill., where union leaders called for support of their fight for higher wages and demands for industrial, labor and government planning for provision of 60,000,000 postwar jobs.

Declaring that the election of the 110 candidates backed by it assured the presence of an "improved congress" for the next session, the CIO said that its PAC "proved to be the decisive factor because it did the organized, door-to-door work that brings success in a campaign."

The 110 men and women backed by the PAC comprise 96 representatives and 14 senators, coming from 28 states in every section of the country.

Quotes . . .

"If full employment is not achieved under our free enterprise system (after the war) then the people will demand something different. . . . It is clear, I believe, that if we fail we shall pass to some form of planned and regimented economy. We shall lose our economic freedom. We shall become dependent upon government and government expenditures, with continuous deficit financing to support the economy, expand employment and thus systematically increase national income. . . ."
—Chairman Alfred P. Sloan of General Motors.

The Washington MERRY-GO-ROUND
By DREW PEARSON

Washington, D. C.

CABINET CLEAN-OUT?

WASHINGTON.—Those around the White House say that this time the President really means business when it comes to cleaning out his Cabinet. Of course, this word has been passed out so often that some intimates are keeping their fingers crossed.

However, it is a fact that Roosevelt is now faced with some situations he cannot escape, other situations which have made him sore. In the former category is Cordell Hull's health. In the latter category is Jesse Jones. As a result, various names have been put in the White House Cabinet hopper and are being examined carefully.

Here are some of the names which may feature in the new cabinet.

Secretary of Commerce—Marriner Eccles, now chairman of the Federal Reserve Board; or Leon Henderson; or Chester Bowles, now OPA administrator; or Beardsley Ruml, author of the Ruml tax plan and considered a liberal big-business man.

Secretary of Labor—Dan Tobin, head of the teamsters' union; or John Winant, now Ambassador to London and former head of the International Labor Office. Winant, however, would prefer to be Secretary of State. Tobin, if appointed, is about the only AFL leader who would be acceptable to the CIO.

Postmaster General—Robert Hannegan. Frank Walker, now Postmaster General, believes that the Democratic national chairman should also be. Postmaster and, being a retiring person anyway, Walker is ready to step out.

Secretary of Agriculture—Roosevelt is hoping to persuade Henry Wallace to take this job again. If not, Wallace will be offered the ambassadorship to Moscow, considered vitally important, or chairmanship of the international food organization. Roosevelt feels that it would be difficult politically to make Wallace Secretary of State because of opposition from Hull and Senate reactionaries.

Secretary of State — Ex-Justice Jimmy Byrnes or Ambassador Winant. Appointment of Byrnes would smooth things down for Hull, who isn't anxious to resign even though in the hospital. Hull would kick like a mule if Sumner Welles or Wallace were to succeed him. Byrnes also gets along well with Senate Foreign Relations chairman Tom Connally and other reactionaries.

Secretary of the Interior—Harold Ickes.

Attorney General—Francis Biddle.

Roosevelt will not accept either Biddle's or Ickes' resignation. They were his top campaign speakers.

NOTE—After FDR defeated Willkie in 1940, Miss Perkins submitted her resignation. Her letter has been in the White House files since January 15, 1941. The President never acted on it.

KAISER'S MERCHANT FLEET

Demon ship-builder Henry Kaiser thinks he has found an answer to the burning question of how he can use some of the great fleet of merchant ships he has built, and still keep on building more after the war.

Kaiser plans to enter competition with the West Coast shipping lines, set up his own shipping business, try to emphasize smart salesmanship, cheap freight rates, mass orders. He says his only hope is a free and open market in the Orient, thinks he can do a more efficient job of shipping both to and from the Far East than a lot of old-line companies.

NAVY DEPT. RESHUFFLE

Secretary of the Navy Forrestal finally has devised a plan to elevate his old Wall Street friend, Struve Hensel, to the job of Assistant Secretary of the Navy. He has been wanting to do it for a long time, but there were too many Wall Streeters running the Navy to add any more.

Here is the new solution. You can write it down as definite that able John Sullivan, now Assistant Secretary of the Treasury, will become Undersecretary of the Navy around January 1. A New Hampshire Democrat and no banker, Sullivan will replace Republican banker Ralph Bard, who came out publicly for Dewey. With banker Bard out of the picture as Undersecretary of the Navy, Forrestal figures he can then bring in banker Hensel as Assistant Secretary. Hensel already is chief of the Navy procurement legal division but wants a handle to his name.

* * *

DIPLOMATIC CHAFF

¶ They have worn no uniform since Benjamin Franklin appeared as Ambassador to France in ordinary clothes, refused to don court dress and was the sensation of the French court. Franklin argued that he represented a nation of rebellious farmers, merchants and frontiersmen who believed more in democracy than in kingly folderol.

¶ Since then U. S. ambassadors have stuck to plain evening clothes, with gray-striped pants and cutaway in the afternoon.

Walter Winchell

Tales of the Town:

This story has never been printed before, we are told . . . How Vice President Henry Wallace scared his staff during the Chicago convention. . . . He left word that he was not to be awakened until 8 a. m. . . . His secretary rapped on the connecting door and, getting no answer, opened it and looked in. . . . He was alarmed to see two boys asleep in the twin beds. . . . The secretary hastened to spread the alarm. . . . He finally located the Vice President in the lobby reading a book. . . . Wallace explained. . . . At 3 in the morning two soldiers had knocked on his door while looking for someone else. . . . He learned they had no accommodations. . . . He insisted they take his room. . . . Then he dressed, went downstairs, and sat up all night reading.

Lieut. Col. James Roosevelt is supposed to have told this to friends. . . . He had just returned after considerable action in the South Pacific when he was stuck on a coast highway. He started to walk back to his camp. . . . Along came an army truck. . . . Colonel Roosevelt, using the hitch-hiker's thumb sign, stopped it. . . . The Sergeant driving it welcomed him for a lift. . . . He didn't recognize the President's son and started griping about his luck. . . . "Colonel," he said, "it sure is tough that two fighting men like us can't get into the Big Show, instead of motoring along a peaceful highway like this."

"Yes, it is," said Roosevelt's boy, "but orders is orders!"

"Yeah," said the Sarge, "the trouble with men like us, Colonel, is that we don't know the right people."

Most of Wall Street has been keeping a watchful eye lately on the Fisher Brothers, who are prominent in the automobile industry. . . . One of the Fishers was motoring through Manhattan's industrial area recently, when a tire on his car blew. . . . He stopped near a small factory where he went looking for a phone. . . . He went to several places looking for a booth and was recognized by the owners of small plants in the neighborhood. . . . The eyes of these excited minor tycoons popped as they saw him. . . . "He must," they reasoned, "be inspecting one of the factories!" . . . And that is why the stock of a relatively minor company jumped 2½ points.

The epidemic of suicides (who have been "committing sidewalk") was stopped by a newspaper photographer. . . . A woman frantically telephoned a newspaper and said that her girl friend (who lived around the corner from the paper) had just phoned that she was going to jump from her window. . . . "Please," she urged, "do something to stop her!" . . . The editor assigned a photographer to the scene. . . . Instead of phoning the police, this hard-boiled photogger (thinking only of getting a good picture) talked his way into an apartment across the street and got his big camera ready. . . . The would-be suicide climbed out on the ledge. . . . Just as she was about to jump, he yelled: "Make it good, lady. I gotta make a living! Go ahead!" . . . She was so furious at this "invasion of her privacy" she climbed back inside and changed her mind about the whole thing.

And you think you have it tough, huh? . . . Along Melody Lane he is rated as a kid with a real future. . . . Before he was drafted into the Army he was the conductor of the New York City Symphony. . . . And so the Brain Trusters in khaki made him a band leader. . . . The last time he was home on leave he was guest conductor of that august group of long hairs when they held their concert at Carnegie Hall. . . . When he returned to camp he was summoned by the C.O. and handed the bawling out of his life. . . . Because he failed to make a satisfactory marching arrangement of the waltz: "Carolina Moon."

Intimates will tell you that they are beyond hope of reconciliation. They no longer speak to each other or look at each other without glaring. . . . He is well known in the theater and so is she. . . . They decided on an eventual divorce about a year ago. . . . But because of the exasperating apartment shortage both refuse to move out for each other. . . . They are keeping their estranged interlude as much to themselves as possible—just so they can have a place to sleep!

The Broadway Express: Col. Elliott Roosevelt will marry into a publishing clan which bitterly opposed his pop's re-election. . . . FDR's first public appearance (since the welcome home parade) will be in Washington within 4 weeks and not at the Gridirion Dinner. . . . The buzz persists that Steve Early, FDR's press chief, will resign after the Inaugural—to make a decent living. . . . James Wechsler, the brilliant Washington newspaper man, predicted Dewey's electoral vote closer than anyone.

...Accident prevention, however, in ... way impairs the effectiveness of ... fighting men, the war depart- ...ent said. A hard-hitting, tough- ...died army continues to be our ...jective. There are fewer sprained ...kles, wrenched knees or sprained ...cks in our field armies of today ...ecause safety training programs ...ve taught men how to jump cor- ...ctly from relatively great heights ...ith rifles and packs. Men lifting ...arious heavy objects in the field ...e so without injury because they were taught how during training courses.

Our realistic training methods are actually safety methods. Experience has shown that the average recruit is as frightened by battle noise and battle confusion as he is by bullets. Such a soldier becomes excited, perhaps fires his rifle unintentionally, perhaps kills or wounds his own comrades instead of the enemy. Such a soldier is unsure of himself, nerve - taunt, "jumpy."

On army infiltration courses battle-green soldiers are taught how to crawl across rough terrain, through barbed wire, while machine gun bullets whiz above their heads, and TNT charges explode nearby like enemy land mines. Graduates of these safety-in-battle courses are not likely to suffer needless wounds or needless death. They know that in crawling it is vital to keep the head and body down; that a smart soldier crawls under barbed wire, not over it; that a soldier whose weapon is not clean and ready to function when needed is a soldier most likely to become a casualty.

Mention the word "doughboy" to most persons, and they think of a man with a rifle and a bayonet. That may have been true in previous wars, but it is not true in this one. Safety training and practice in the army ground forces goes a long way beyond this basic rifle-and-bayonet conception of the American foot soldier. Weapon training adds to the soldier's chance of survival by making him versatile with a great many more weapons than his rifle.

Among these are hand and rifle grenades, combat knife, automatic pistol, machine pistol, carbine, automatic rifle, three types of machine guns, two types of mortars, flame thrower, bazooka, mines and booby traps, bangalore torpedo and other demolition equipment. Most probably the individual infantryman will never be called upon to use all these weapons in combat, but he may at any time be called upon suddenly in an emergency to use any one of them. The knowledge and facility gained during training increases powerfully the safety factor protecting the uniformed man in battle.

In addition the army ground forces protects its men in the field by careful instruction in battle and field sanitation, in personal hygiene, in the safe use of drinking water, and in defense against diseases caused by insects and parasites. Even so small a thing as the common foot blister is not ignored in army safety practice.

Fewer Air Corps Accidents.

Equally insistent on the highest possible safety standards in the dangerous business of waging war is the army air forces training command. During the first six months of 1943 a total of 13.4 million military flying hours were logged in continental U. S. During the same period in 1944 the total was 20.1 million. Despite this impressive increase of more than 6,500,000 hours, fatal accidents and death totals were actually reduced.

Furthermore, the improvement is continuing. In July, 1944, the accident rate for training type planes was the lowest yet recorded. During July in the continental U. S. trainees in undergraduate pilots' schools logged an amazing total of flying time in PT-13's, -17's, -18's and -27's, with only one fatal accident!

Graduate pilots operating combat type airplanes in transition schools and in the replacement training units established safety records, too. Pilots in B-17 Flying Fortresses achieved an all-time low in crack-ups. Also in July, 1944, there were only two fatal accidents in the high-speed B-25 Billy Mitchells.

This is not the safety record of a commercial airline, or even a commerical truck fleet, but the safety experience of a giant air force engaged in global war.

The motto of the army has never been "Safety First." In army parlance safety is knowledge. Army airmen achieve safety because they know.

Typical is the procedure for forced landings in water, which includes how to swim through fire, how to handle rubber boats and parachutes, defense against sharks, precautions to take against wind, weather and the hundreds of hazards that confront men adrift in open water. Airmen know how to take every conceivable precaution in case of jungle landings, or any other type of landing which may lead to danger or difficulty.

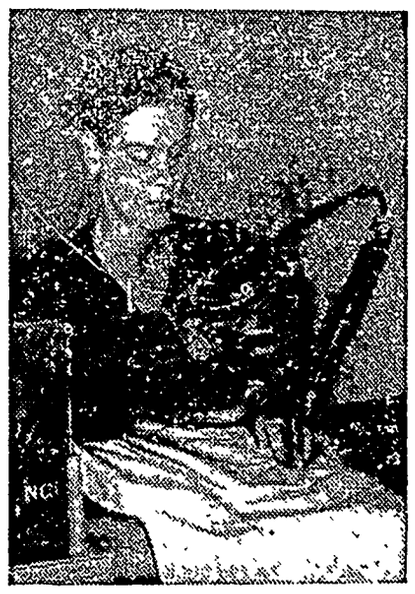
In war great hazards cannot be avoided, but trained and disciplined men with a knowledge of those hazards, and the "know-how" to avoid or to overcome some of them, have developed one of the greatest organized safety programs of all time.

Photo-Cell Enables Blind to Operate Machinery Safely

Important new mechanical devices to simplify life for returning servicemen who have lost their sight and for the upwards of 200,000 civilian blind in the United States are announced by the American Foundation for the Blind.

Chief of these devices, in view of its wide application to the employment of blind people, is a new use for the versatile photo-electric cell. The foundation has adapted the "electric eye" principle to make completely safe the operation by blind people of electric sewing machines in workshops and in their homes. In practice this device puts a safety curtain of light around the rapidly plunging needle. The moment the fingers of the blind operator reach dangerously near the needle's point and come within the light circle, the machine stops in a split second.

Another useful invention which will aid sightless people in business is called the "bill detector." This gadget also utilizes the "electric eye" principle and was first thought of by a sightless Canadian, George A.



The "magic eye," a photo-electric cell, stops the needle of the power sewing machine as soon as the operator's fingers come within the circle of light. With this attachment blind persons may safely use many kinds of machines.

Lafleur of Overbrook, Ontario. In this contrivance a beam of light scans the numerals of paper currency and the number of times the light is reflected from the bill is indicated by a buzzing noise. The number of audible sounds indicates the denomination of the bill.

Already in limited use by sightless workers is the "audio-scale." This enables them to weigh certain objects by sound rather than by touch. Here a flashing light is registered by a photo-electric cell. If the scale registers overweight, the sightless operator hears a sound of high pitch; if underweight, a sound of low pitch; and if in balance, no sound at all. This idea, too, first came to a blind person, Mrs. Evelyn Watson of Buffalo. In war plants this audio-scale has such uses as weighing out specific amounts of powder for fuses, mica for radio mechanisms, and uniform buttons.

Winter Driving Hazards Can Be Reduced by Taking A Few Simple Precautions

The following practices, based on National Safety council research, are recommended by the Safe Winter Driving committee to all who must drive this winter:

1. Fill your car to comfortable capacity and go prepared to get through, regardless of snow or ice.

2. Reduce your speed to conform to the conditions of the road—and take no chances.

3. Use tire chains on ice and snow to reduce braking distances as much as 40 or 50 per cent. Chains also provide necessary "go" traction, and uniformity in performance under severe winter road conditions.

4. Follow other vehicles at a safe distance. It takes from 3 to 11 times as long to stop without anti-skid chains when pavements are snowy or icy.

5. Apply brakes on slippery pavements lightly and with a pumping action. If you jam on the brakes, they may lock and throw your car into a dangerous skid. Try to avoid need for making a quick stop in front of another vehicle. A rear-end collison may cripple your car for the duration.

6. Keep windshield and windows clear of snow and ice outside, and fog and frost inside. Remember, you must see danger to avoid it.

7. Keep posted on winter road and weather conditions. A safe driver is always aware of his limitations and equipped to get through safely and on time. Be a good defensive driver.

Many casualties used to be caused ... premature explosions of projec- ...es. Exacting tests of both guns ... ammunition have practically ...minated this danger. Shells are ...w termed "bore safe," meaning ...at they will not explode within ... gun tube before intended.

Antiaircraft guns, like the one ...ictured, fire very high-powered ...ells of comparatively small cali- ...er. The gun crews, nevertheless, ...el confident that they will not be ...ured by their own weapon.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.

CHRIST IN THE HOME

LESSON TEXT—Matthew 19:4-6; Luke 10:38-42; II Timothy 1:3-6.

GOLDEN TEXT—These things I command you, that ye may love one another.—John 15:17.

The American home faces many enemies and powerful destructive influences in our day. At times one wonders whether this most important of all institutions has not so far departed from what God intended it to be that it has lost its place and power.

In such a time, it is important that the Christian church keep before the people, and especially our young people, the Scripture teaching about the home. We need to revive the old-fashioned home, with its piety, purity and high purpose in the plan of God. We begin right when we note:

I. The Plan of God for the Home (Matt. 19:4-6).

When Jesus was challenged by the Pharisees, who claimed that a man had a right to divorce his wife, He appealed to Scripture. That is the sure foundation for right thinking.

He referred them to the story of the creation of man and woman in Genesis 2:18-24. There it is revealed that in all the animal kingdom there was no creature suited for fellowship with man. The one who finds full satisfaction in the company of a cat, a dog, or horse, is just not up to normal.

Adam must have a "help meet" for him, that is, one suited by personality and gifts to be his companion. God made woman for that purpose and gave her to man. Thus He established the home and ordained that all through man's history there should be the coming together of one man and one woman in that indissoluble union of love (v. 6) which makes the home.

We have forgotten God's law, or have deliberately violated it, and have broken down the home in its very foundation. We had better begin to think seriously about the divorce problem if we are not to go the way of other nations.

II. The Presence of Christ in the Home (Luke 10:38-42).

Christ repeatedly honored the home by His blessed presence. He came to the wedding feast at Cana of Galilee, and there He performed His first miracle (John 2). He should be the unseen guest at every Christian marriage. Invite Him, expect Him, honor Him, and He will bless you.

One home in particular was a place of rest and refuge for our Lord when He was here on earth, that of His friends, Lazarus, Martha and Mary, in Bethany. He was a welcome guest, always at home in that household. Shall we do less in our households? We see mottoes in homes, "Christ is the unseen guest in this home." How appropriate!

But note that His presence in the home gives Him opportunity to teach and to direct the life of the home. Mary and Martha had both been busy about the work of the household, but Mary knew when it was time to stop being busy and sit at Jesus' feet to learn and to be blessed by His presence. She not only worked, but "also sat at the Lord's feet" (v. 39). Martha went right on working until she was distracted, and came to censure her sister.

The answer of Jesus is significant. He did not rebuke Martha, He only told her to get her life into balance. There must be work in a home, but those who make home only a workshop miss its greatest blessing. Home should be a place of sweet fellowship between the members of the family, and especially between them and the Lord.

III. The Power of Faith in the Home (II Tim. 1:3-6).

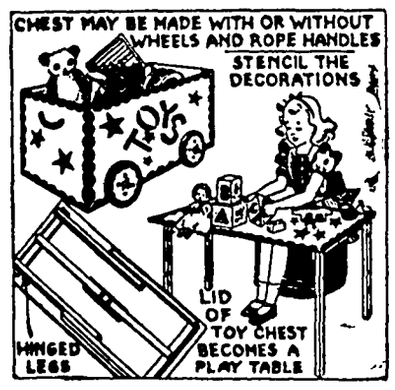
Family religion really pays. The home with the family altar, where God's Word is read as a natural and proper part of daily living, where prayer is made, and God's goodness is remembered in thanksgiving and praise, that home will send forth children who know the grace of God, and are prepared to heed His call for service.

Timothy had a grandmother and a mother (one wonders where papa and grandpa were) with unfeigned faith. What a precious heritage! That was far more valuable than silver or gold, or farms or corner lots. What heritage are you giving your children?

Note the reference to Timothy's work as a minister of God in verse 6. It was by the Holy Spirit's call, and was recognized by the church in ordination, the "laying on of hands." But it is evidently closely connected with that which is spoken of in the verse before—the faith of his home. There is power in that faith to send a boy forth to valiant service for God and to keep him faithful in the day of trial. Give your boy and girl something really worthwhile to remember when they think of home. Put the power of faith in the home back of their lives in public for God.

Gay Toy Chest Easily Made of Scrap Plywood; Has Folding Table as Top

By Ruth Wyeth Spears



CHEST MAY BE MADE WITH OR WITHOUT WHEELS AND ROPE HANDLES
STENCIL THE DECORATIONS
TOYS
LID OF TOY CHEST BECOMES A PLAY TABLE
HINGED LEGS

STENCILING the scalloped borders, bright stars and topsy-turvy letters on this gay toy chest is sure to put you in the Christmas spirit. The chest itself is easy to make from scraps of plywood and it has a number of special features that will please Mother as well as the youngsters.

The rope handles and wooden wheels make it possible to move a complete assortment of toys to any convenient spot. Then off comes the lid; folding legs are opened up; and Little Miss Muffit has a table just the right height for play. When Mother wants to move, toys and all are trundled along until it is time for pandas and dolls to be tucked away under the star-spangled top for another night.

• • •

NOTE: Pattern is available to readers showing how to make this chest and folding table top. Also illustrated directions for decoration with stencils which require no special skill for perfect results. Color guide is included. Ask for Pattern 252 and enclose 15 cents with name and address.

EDITORIAL COMMENT

A FINE RECORD OF SERVICE

After twenty-one years in the dairy business, Mr. and Mrs. Ralph Elder, owners of the El-Dairy have sold their milk and cream routes to the Klemme Cooperative Creamery Company who took over the business on December 1st

Mr and Mrs Elder established a record of service that deserves a bouquet During those 21 years, through fair weather and storm, through high drifts of snow and through mud and slush, the milk was delivered every day without a single miss.

Good show troopers in the face of disaster and hardships have a slogan, "The show must go on."

Mr. and Mrs Elder had as their slogan "The milk must be delivered," and it was, without one single miss for twenty-one years.

The El-Dairy had become a real part of the Elder family and there was a touch of sadness at the Elder household when the last delivery was made. It was like losing an old, beloved friend.

TOY MAKING FAD ALSO HITS KLEMME

Leave it to the ladies, they will always think up something new to surprise the men. Now its making stuffed animal toys out of bits of odds and ends of cloth, buttons, and what have you.

These fads seem to come in regular cycles, and how they ever get started is a mystery beyond us.

Remembering back some years we can recall that the women had a fad of collecting cigar bands that were mounted on glass and displayed like pictures. Another fad we can recall was that of burning designs on wooden dishes, plates, and boxes, using a sort of hollow needle heated by alcohol. Then there was the fad of collecting post cards, another of piecing together quilts, a fad again revived a couple of years ago.

The ladies came through with something really amazing some 20 years ago when they painted milkweed pods and other weeds which were fashioned into bouquets.

Then you will recall that not so many years ago the women clipped fancy decorations from Christmas cards and pasted them on card table tops and lamp shades, after which they were given a coat of shellac.

And of course the craze for knitting has come and gone many times.

But these stuffed animals really are quite an attraction. We have (even when sober) seen pink, green and red elephants, blue and yellow rabbits, short-necked giraffes, tailless, pop-eyed mules with red noses and green ears, dogs that looked like horses and horses that looked like monkeys!

So fast are these stuffed animals being made that pattern makers have a difficult time keeping up with the demand.

One of the latest we heard was about a Klemme lady (whose name we will not divulge as she may shoot us for even mentioning it,) was making a stuffed rabbit the other day and had cut out the pattern and then sewed the parts all together ready for stuffing it with cotton. Lo, and behold! That rabbit had six legs!

REMEMBER PEARL HARBOR

Sunday, December 7th, 1941 this writer and his wife were sitting in a cafe enjoying a Sunday dinner when a radio program was interrupted and the news was flashed that Manilla had been bombed by the Japs. Every person in that cafe was electrified at the astonding news for at that very moment high Japanese officials were presumably negotiating peaceful relations with us in Washington. We were dumfounded and forgot all about dinner. Then the further shocking news that the Japs had also made a sneek attack on Pearl Harbor! From then on the news was all about the attack and the story was gradually pieced together, but it was not until months later that the world knew of the extent of the damage in that frightful attack.

We lost many ships and many fine American boys. Many of the ships damaged and sunk that day were raised and rebuilt and have taken their avenge against the Japs and their cowardly attack. Hundreds more fighting ships were soon built and manned and sent against the Japs and they are paying every day for their attack against Pearl Harbor, and they will continue to pay over and over again until they are beaten down into the earth itself.

Remember Pearl Harbor by buying an extra bond to help our boys crush the Japs with more planes. ammunition, tanks and guns Remember Pearl Harbor with your fighting dollars in War Bonds and Stamps.

Herschel E. Harvey, Pastor

Springy Carrot

Mrs. Mary Smith of Storm Lake has a little different type carrot to show people Usually when carrots decide to grow around something it is a ring, but the one in Mrs Smith's garden grew around a small wire spring The larger portion of the spring protrudes from the side of the carrot.

Pullets which have gone into a molt can be brought back into production more quickly by using artificial lights.

CAR HITS TRAIN HERE SATURDAY NIGHT

Bobbie Roths And Companion Only Slightly Injured

A car driven by Bobbie Roths, son of Mr. and Mrs. Tom Roths of Klemme, was badly wrecked early Saturday evening when it crashed into a Rock Island freight train at the crossing on West Main Street.

With Roths was a girl companion but neither were injured beyond a few minor cuts and bruises. The front end of the car was smashed and the windshield shattered.

Bobbie and his companion failed to see the train slowly crossing the street.

Didn't Belong

An Algona woman returned to her home one day recently to find that a dog, shut in her house by accident, had caused considerable damage. While the woman was away some men came to replace the water softener and a dog slipped in as the men were at work. Thinking the dog belonged in the house, the workmen shut him inside when they left. Both the front and back door casings had been clawed and scratched, toe nails had torn holes in lace curtains and loose objects were scattered about the house.

The Hudson river was called the Mauritius by the early Dutch.

The modern bee-hive houses about 20,000 bees.

A Little Planning Goes a Long Way

at Holiday Time

Furloughs and essential business trips will tax travel facilities during the holidays. To those who find it necessary to travel during this difficult season, we offer these suggestions:

Plan ahead. Discuss your trip with our representative . . . at the City Ticket Office, or passenger station. Our employees, though busy war workers, will always try to help make your trip more pleasant.

There is a mighty good reason why all of us must plan more carefully right now. This year, the ROCK ISLAND LINES passenger traffic is *almost six times as large* as it was in 1939, yet war shortages have prevented our adding new coaches, diners and Pullmans to handle the year 'round increases, let alone the heavy holiday burden.

Allow flexibility in your plans as to dates of departure and arrival. A suggestion that you change to another day, or an earlier or later train, is just our way of trying to eliminate unnecessary discomfort for you.

We firmly believe that COOPERATION, given in the truly American manner, is the finest way to solve any problem.

As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation

HIGH SCHOOL NEWS

The students in high school who have a record of being neither absent or tardy so far this year are:

Freshmen:
Lois Stille, Esther Tiggerman, Velma Tiggerman, Helen Pringnitz, Erdene Nelson, Esther Hartbeck, Billy Lacey, Irene Menage, Alice Anderson, Beulah Goll.

Sophomores:
Dorothy Ellingson, Dean Jacobs, Elizabeth Goll, Marcille Josten.

Juniors:
Marcedia Barz, Ronald Brinkman.

Seniors:
Marjorie Hartbeck.

Those who received "B" or above in all their subjects for the second six weeks are:

Freshmen:
Helen Suckow, Erdene Nelson, Donna Heivilin, Esther Hartbeck, Esther Klinge, Donald Franklin, La Vonn Beier, Edward Grosshuesch.

Sophomores:
Marcille Josten.

Juniors:
Ivan Blumer.

Seniors:
Edward Barz, Pat Kudje, Laurice Lemke.

There was really a lot of competition in our Sixth War Loan Drive here at school. A chart on the bulletin board recorded the amount of money sold on both sides. It was a good fight until the end with Ronald's side ahead. He had $502.-75 to his credit, while Ivan had $418.75. A party is to be planned by the losing side in honor of the victors.

JUNIOR HIGH NEWS
Luella Priebe, Reporter

For our work in Art this week we started on our Christmas projects. Most of us are making them from wood.

In English. the Seventh Grade have been learning how to use different kinds of telephones and how to talk over a telephone.

Several from our room took part in the Bond Concert Thursday evening.

The History Class have started work on the War of 1812.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
Miss Bugh, Teacher

The First Grade read about how our soldiers live in the jungles where they are fighting. The Second Grade read about General MacArthur and the Philippines. We learned where the Philippines are on the globe and also other places where our daddies and uncles are fighting.

Honor Roll

THIRD AND FOURTH GRADE NEWS
Mary Jane Holmes, Teacher

The Third and Fourth Graders were sorry that Daisy Schaefer has missed the past week of school. We were all glad to see Bonnie Jean Mace back with us this week.

The Third Grade has jut finished a unit in Geography called "Fods From Plants and Trees." We were surprised to learn that the women of long ago are given the credit of starting farming as we know it today. We also found out many of the changes that have taken place in farming during the centuries.

The Fourth Graders have taken a big trip in Geography. We have just been at the "Land of the Eskimos" and now we have gone to the other extreme, being in the Congo River Valley in Africa. We had a lot of fun reading about the Pigmies, the little people living along the Congo River.

FIFTH AND SIXTH GRADE NEWS
Mrs. Voetberg, Teacher

Monday we began our third six weeks. On Wednesday report cards were given out. Many of us improved this period and have resolved to do even better the next six weeks.

Thursday was a day of excitement for some of us, especially the members of the band. At the program on Thursday evening we made our first public appearance.

Friday in Art we began making things suggestive of the holiday season. We have them on display in our room.

HOLD ALL DAY MEETINGS

Dad and mother's cast-off clothing can be converted into trim, wearable clothing for children. This wil be demonstrated by Miss Lora Hilyard, clothing specialist from the extension service at I. S. C. at two meetings in Hancock County on December 14 and 15.

On December 14 the meeting will be held from 10:00 a. m. until 4:00 p. m. at the Red Cross room in Garner and on December 15 at the Red Cross room in Britt.

All women with clothing makeover problems for children are invited to attend. Each woman should bring her own sewing box with scissors, pins, tape-measure, etc.; a garment that is to be made into a child's garment, and the pattern if possible; one ½ inch button, and 1-3 yard percale or muslin.

FIRE CAUSES DAMAGE TO HOFER'S BULK OIL STATION

Fire broke out Sunday afternoon in the Hofer bulk oil station north of the lumber yard at Goodell. Percy Brown saw the smoke and flames and turned in the alarm.

The Goodell firemen kept the blaze confined to the small warehouse until the Belmond department arrived to assist.

Three large gasoline bulk tanks and many 5 gallon cans of oil were saved. but the small warehouse was destroyed. The firemen wrecked the small building to keep the flames down.

When you have company or take a trip, that's news. Phone 12.

Spiced Fruit and Green Beans Pretty Meat Loaf
(See Recipes Below)

Lean Meats

Most homemakers have already had their introduction to lean or utility beef for which they have to use long, moist heat cookery.

There is also such a grade of lamb and veal on the market. In fact, there is news which shows that a surplus of lamb and veal will soon come to market. This is lamb or veal which has not been fattened and which requires long, slow cooking to make it tender. Instead of roasting or broiling, use braising to turn it out juicy and tender. It's as nutritious, but lower in calories as the top grades of meat that have been fattened.

Seasonings play an important role in making this meat palatable to the taste. A touch of garlic with lamb is good, but there are other spices you'll want to keep on hand to make this meat good. They are bay leaves, pepper corns, capers, onions, parsley, Worchestershire sauce and mint.

The recipe roundup begins with lamb loaf. Serve it plain with some of that home canned spiced fruit, or cover it with fluffy mashed potatoes to dress it up:

Savory Lamb Loaf.
(Serves 6)

1½ pounds ground shoulder or neck of lamb
2 teaspoons salt
¼ clove garlic minced or ¼ cup chopped onion
1 cup milk
¾ cup fine bread crumbs
1 egg
3 cups seasoned mashed potatoes, if desired.

Combine all ingredients except mashed potatoes. Pack into a loaf pan and bake in a 325-degree oven for 1 hour and 20 minutes. When baked turn out on a cookie sheet and frost with hot mashed potatoes. Loaf may also be left in pan and potatoes placed on top, then browned quickly in oven.

Porcupine Balls.
(Serves 6)

2 pounds ground shoulder of lamb
½ clove garlic, chopped fine
2 tablespoons butter or drippings
½ cup raw rice
1 teaspoon salt
2 cups boiling water
3 tablespoons flour
1½ cups milk
1 teaspoon salt
¼ teaspoon pepper

Brown garlic in butter. Mix lamb, rice and salt and shape into 12 balls. Brown in same fat. Pour water over balls. Cover and simmer for 1 hour. Remove balls. Add flour, salt and pepper to fat in pan. Mix thoroughly. Add milk and cook until it thickens. Place balls in sauce and serve.

Noodles are a good starchy food to serve with veal and celery and parsley bring out its delicate flavor:

Lynn Says:

Treats for Today: Serve cottage cheese with peaches or pineapple and sprinkle the top of the cheese with grated orange rind.

For male guests, serve frankfurters on toast with hot chili poured over all.

Place baked ham in between hot buttered biscuits and serve with a sauce of creamed chicken and mushrooms.

Acorn squash makes a supper dish when served with pork sausage links.

Add a teaspoon of onion juice to the gravy for added flavor.

Quick sandwich: Mix liver sausage with catchup and spread on bread. Toast under broiler.

Lynn Chambers' Point-Saving Menu

*Lamb Loaf with Mashed Potato Frosting
Glazed Carrots Pear Salad
Whole Wheat Biscuits
Orange Marmalade
Custard Pie Beverage
*Recipe Given

Veal Stew With Celery and Noodles
(Serves 4)

1¼ pounds cubed shoulder, breast or shank of veal, cut in cubes
2 ounces of salt pork
2 tablespoons flour
2 teaspoons salt
2 cups water
1 cup celery, cut
1½ cups uncooked noodles
parsley

Cut salt pork in tiny pieces and fry in kettle until browned. Lightly flour veal and brown slowly in salt pork fat. Add salt and water. Cover and simmer slowly for two hours. Add celery and cook until tender. Cook noodles 10-15 minutes in boiling, salted water until tender. Drain. Serve by placing noodles in center of platter and surrounding with stew.

Grilled Lamb Patties.
(Serves 6)

2 pounds shoulder flank or breast of lamb
¼ cup dry bread crumbs
¼ cup milk
6 strips of bacon
6 pear halves
¼ cup mayonnaise

Season lamb with 1½ teaspoons salt and teaspoon pepper. Add milk and bread crumbs and shape lightly into six patties. Wrap each with strip of bacon skewered in place with a toothpick. Place on broiler rack and broil six minutes, then turn. Add pears to rack with a teaspoon of mayonnaise in each one. Finish broiling—6-8 minutes. A pork sausage link may be used in place of the bacon, and should be placed on top of the patty.

Tomatoes are perfect foil for the rather delicate flavor of lamb. In this dish, they are served with plenty of potatoes to stretch out the meat and make a hearty dish for winter:

Lamb-Potato Hot Pot.
(Serves 4)

4 lamb neck slices (about 1¼ lbs)
2 tablespoons melted fat
2½ cups canned or stewed tomatoes
2 cups sliced onion
1 minced garlic clove
2 teaspoons salt
3 cups sliced, peeled potatoes
1 tablespoon flour
2 tablespoons water

Brown lamb in deep skillet or heavy kettle. Add tomatoes, onion, garlic and salt. Simmer, covered for 1 hour. Add potatoes and simmer for another 30 minutes. Arrange in slices on platter with potatoes over them. Blend flour and water and stir into gravy. Bring to a boil. Pour around and over potatoes.

Serving Suggestions.

When making stew arrange meat in center of platter and vegetables around it. Sprinkle all with chopped parsley.

It's nice to serve fresh toast or English muffins with plain one-dish dinners. It adds a bit of glamour to the meal.

Other hot breads that go well with wintry meals — popovers, toasted rusk, biscuits, cornbread, pecan rolls.

Desserts for wintry meals: baked apples, custard, rice pudding with brown sugar and raisins, floating island, lemon souffle and custard pies.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

THE MODERN CATTLE RUSTLER

(Western cattlemen say that rustlers now work by automobiles. —News item.)

I'm losing lots of cattle
To cattle thieves quite new;
I hear their motors running
And see the car trails, too;
I'm having heaps of trouble
With rustlers low and mean
Who need no horse or saddle
But come by gasoline!

My herds are growing thinner
Because of thieves who ain't
The kind you find in novels
Or those the artists paint;
I hear no sounds of hoofbeats
No sheriff gives me hints;
I only know they've been there
When I find tire prints.

I hear of no cow-pony
Who bears a stranger near,
But just the same my cattle
Quite often disappear;
There is no crooked branding
No dust clouds from afar;
This rustler is a fellow
Who comes by motor car.

He is a sneaky hombre
He carries no lasso;
A road map in his pocket
And gas enough will do;
He takes his chosen cattle
And chucks 'em in his truck;
His getaway is easy—
If he has any luck.

The automobile rustler—
A sorry type is he;
He smells too gasoliny
To have appeal for me;
He's just a no-good driver—
A dirty, low-down cuss
Who has no cowboy graces—
And only rides by bus.

Oh, shades of Owen Wister
And shades of old Bret Harte!
What has the Old West come to?
Must all its forms depart?
When this cow thief is captured
Is hanging pretty fleet?
Or should he get a ticket
For speeding with fresh meat?

Household Hints

Orange or lemon rind may be grated before squeezing the fruit for juice and dried for later use. After grating, place where it will dry thoroughly and store in a tight container.

—•—

Grease glass baking dishes before putting food in to bake and they will be easier to wash.

—•—

Leather shoes that are difficult to polish should be rubbed over with a cut lemon. They will shine beautifully afterwards.

—•—

Cover discolored ceilings with a solution of thick starch. Let it dry and then brush off—and the marks, too!

—•—

When spiced peaches are opened this winter, be sure to save the juice. It makes delicious basting for broiled or browned sausages.

This Home-Mixed Cough Syrup Is Most Effective

Easily Mixed. Needs No Cooking.

Cough medicines usually contain a large quantity of plain syrup—a good ingredient, but one which you can easily make at home. Take 2 cups of granulated sugar and 1 cup of water, and stir a few moments until dissolved. Or use corn syrup or liquid honey, instead of sugar syrup.

Then get from any druggist 2½ ounces of Pinex, pour it into a pint bottle, and add your syrup. This gives you a full pint of wonderful medicine for coughs due to colds. It makes a real saving because it gives you about four times as much for your money. It never spoils, and tastes fine.

This is actually a surprisingly effective, quick-acting cough relief. Promptly, you feel it taking hold. It loosens the phlegm, soothes the irritated membranes and makes breathing easy. You've never seen anything better for prompt and pleasing results.

Pinex is a special compound of proven ingredients, in concentrated form, a most reliable soothing agent for throat and bronchial membranes. Money refunded if it doesn't please you in every way.

KLEMME SCHOOLS WON BOND SELLING CONTEST

$24,371.25 Paid In Bond Admission To Concert Thursday Eve

The gate receipts of the BOND Concert held at the Klemme High School auditorium Thursday evening were $24,371.25 in bonds either purchased or pledged. This put the Klemme High School at the top of the contest among similar bond concerts given at Fertile, Hanlontown and Joice. The grand total for each town was:

Fertile	$ 4.700
Hanlontown	$ 2,125
Joice	$20,400
Klemme	$24,371.25

The program was presented by the high school Music Department and was under the direction of Mrs. D. O. Turgasen, vocal instructor, and Mr. R. C. Sucher, band director.

Entertainment for the evening was provided by the Mixed Chorus, Cornet Quartette, Saxophone Quartette, the Beginning Band, and the Senior Band.

AUGUST LAU FARM NEAR KLEMME SOLD THIS WEEK

Mr. and Mrs. A. G. Lau of Liberty township have sold their farm to Mr. Kielmann of Emmet county

The Laus expect to have a public sale and will move to Klemme. Mr. Lau will then put in full time with his seed corn business.

The Kielmanns are young people and have been engaged in farming They have two children of school age.

W. S. C. S. WILL HOLD AN ELECTION OF OFFICERS

The Klemme WSCS will meet at the Methodist Church Thursday of this week with Mrs. H. R. Gibbs as leader. The hostesses are Mrs. Q. Stille. Mrs. John Waddingham and Mrs. C. G. Waterman.

An election of officers will be held.

Ladies are asked to come early and help sew. Also bring gifts for the childrens' home.

Youth Fellowship Will Present A Christmas Pageant

At the Youth Fellowship meeting at the Methodist Church last Sunday evening it was decided to present a Christmas Pageant for the Christmas Eve program.

The pageant will be directed by Miss Marie Blank. The young people are also planning the New Year's Eve Watch Night Program for the church.

Three Trips

The Britt fire department knew all the corners on the way to the Lyal Fox farm after making three trips to the place when extinguishing a fire in a silo. The fire smouldered in the silage and was difficult to put out. No cause for the blaze could be determined.

Card Of Thanks

I wish to thank the Klemme Fire Department for their quick service in answering a call and saving my building and contents.—Mrs. C. F. Keraus. 1tp

Card Of Thanks

I wish to take this way of expressing my personal thanks to you for your personal visits, cards and letters, all of which I greatly appreciated while I was at the hospital. —Mrs. Dwight Hummel. 1tc

Card Of Thanks

I want to thank all who called on me while I was a patient at the hospital, and also thanking all who sent me cards, letters and flowers. —George Albers. 1tc

KLEMME LOCALS

Pfc. Carl Dye of Central Point, came Sunday evening to spend a few days visiting at the Lewis Mau home in Klemme.

Rev. and Mrs. H. E. Harvey entertained for dinner on Sunday, Mr. and Mrs. Ralph W. Elder, and Mr. and Mrs. Russell Medim and son, Howard. It was the birthday of both Mrs. Medim and Mrs. Harvey.

Chester Ward, son of Mr. and Mrs. Frank Ward of Klemme, who was in business for himself as a watch repairman in Los Angeles, has moved his equipment to Chicago where it is easier to get needed repairs and parts. Chester, however is so swamped with work that he is not accepting mail order business until he gets caught up on his work.

Local Happenings

Klemme and Vicinity

Save your kitchen fats and oils. They are vital for the war effort.

Mrs. J. C. Thomas was at Garner Tuesday afternoon.

Mrs. Glen Bridges and baby returned home Sunday from the Rust nursing home at Garner.

Mr. and Mrs. Emil Beier were dinner guests Thanksgiving day at the Will Kraus home in Garner.

Miss Avis Barz of Mason City, spent the week end visiting with her mother, Mrs. Clara Barz.

You can do your part in helping win the war ladies, if you will help with Red Cross work at the school house each Tuesday afternoon.

Mr. and Mrs. Fred Nuehring and family were dinner guests Sunday at the home of Mr. and Mrs. Herman Priebe.

Mrs Fred Ridder returned home last Wednesday from Chicago where she spent several weeks visiting.

Miss Marie Perkins is assisting with housework and caring for the new baby at the Dwight Hummel home.

George Albers returned home Monday from the Mercy hospital at Mason City where he had been a patient for several weeks.

Miss Patricia Kudje has been assisting after school evenings as operator at the local telephone exchange.

Mrs. Earl Schaeffer came Tuesday evening from Forest City for a visit of a few days at the P. M. Wilson home.

The Girl Scouts entertained the Boy Scouts at a party Monday evening. Games were played and a nice lunch was served.

Mr. and Mrs. Herman Gast entertained to dinner Sunday Mr. and Mrs. Emil Beier and Mr. and Mrs Ben Ridder and Elwyn.

Mrs. Dwight Hummel and baby daughter, Joyce Carol, returned home Sunday evening from the Mercy hospital at Mason City.

Walks and streets were in a very slippery condition Sunday due to the sleet and rain, and numerous accidents were reported.

Floyd Franklin is in the Twin Cities for over the holidays working in the post office department to help out during the Christmas rush.

Miss Jacqueline Kudje, teacher at Kanawha, spent the week end in Klemme visiting with her parents, Mr. and Mrs. Art Kudje and family.

Mrs. Delbert Hake and Mrs Fred Hake returned Sunday evening to their home at Dana, Illinois, after visiting for a week at the home of Mr. and Mrs. John Chambers.

Harry Smith fell on the ice Sunday and injured himself. Tuesday he went to the County Home where he will receive treatment and remain for the winter.

Supervisors John Chambers, F J. Schoun and Penn Eckels and Co. Engr. Chas. Merten left Tuesday for Chicago on business for the county.

Arthur Wellemeyer entered the Mercy hospital Tuesday for a minor operation and treatment. He expects to be back in his store the last of this week.

John Harms of Alden, returned to his home Monday after spending all of last week visiting at the home of his son-in-law and daughter, J. C. Thomas and wife. Mr. Harms is 84 years old.

Henry Suckow slipped and fell while crossing the icy streets Sunday afternoon and badly bruised his head and one leg. However, he was able to be at work at the Jacobs Hardware Store Monday.

Wm. Stille and daughter-in-law, Blanche Fredrick went to Charles City Saturday for a visit at the Lee Anderson home. Mrs. Fredrick remained to assist Mrs. Anderson in caring for the new baby. while Mr. Stille returned to Klemme Monday. The Andersons have named their new daughter, Linda Lee.

Christmas Shop and Mail Early!

Mr. and Mrs. Lloyd Lau entertained to dinner Sunday Mr. and Mrs. Edwin Josten and Marcille of Klemme; Wm. Hoeft and daughter Maxine, and Mr. and Mrs. Charles Hoeft of Garner.

Mrs. E. J. Arnold. Mrs. Martha Bredbenner and Mrs. J. A. Chambers were hostesses at the Auxiliary meeting Tuesday evening and served a nice lunch. The Auxiliary ladies also enjoyed a gift exchange.

Mrs. Delbert Hake and Mrs. Fred Hake of Dana, Illinois, and Mrs. J. A. Chambers of Klemme returned Friday evening by bus from a visit with Mrs. Joe Olson at Northwood and Mrs. Frank Aldridge of Fairboldt, Minnesota, both sisters of Mrs. Chambers.

William Stille was pleasantly surprised Thursday evening when relatives, friends and neighbors gathered at his home to stage a farewell party for him. Mr .Stille leaves this week to spend the winter in California. After enjoying a social evening, a nice lunch was served.

Mrs. Norman Lau, daughter-in-law of Mr. and Mrs. August Lau, has arrived from Alameta, Cal., for a visit at the Lau home. Her husband, Norman Lau, Aviation Metalsmith First Class. of the Navy, has gone to sea. Mrs. Lau expects to spend the holidays with her folks in Virginia and will later return to Klemme.

lans are under way for a Holi- Community Sing. Christmas tings have been mailed to all Service Boys and Girls from community. The Klemme Unit also send two boxes of homede candy for War I veterans in pitals; also suitable gifts and ds have been sent to the Gift p which affords the veterans an portunity to select gifts to send their own family.

Our meeting closed with the ging of Christmas Hymns and ols, and a gift exchange.

Appointed Engineer

The Hancock County Board of pervisors have appointed Wm. nschen as engineer on a drainage pair petitioned for by John P. ristians in Drainage District No. northeast of Klemme.

WOUNDED

CPL. MARVIN LEMKE

Mrs. Daisy Lemke received a cablegram Monday from the War Department stating that her son, Cpl. Marvin Lemke was slightly wounded in action in Germany, November 30th The nature of his wounds was not disclosed. Lemke entered the service in 1942 and received his training at Camp Maxey, Texas He is a graduate of the Klemme high school and was employed by the Klemme Coop. Grain Company before being called into service.

KLEMME SHAMROCKS WIN FROM ANCIENT RIVALS 29-14

Klemme high school's Shamrocks basketball team won a 29-14 victory over Goodell on the latter's court last Thursday night, as the Little Shamrocks won their curtain riser with a 28-12 triumph over Goodell's reserves.

Dean Jacobs set the pace for the Shamrocks with 12 points, while Lowenberg was high man for the Goodell five with 6 points.

The Shamrocks chalked up a 2 win and 2 lost after the Goodell game. They had lost to Garner and Hayfield, and won from Swaledale and Goodell.

The Little Shamrocks had a perfect record after the Goodell game with four straight wins.

SHAMROCKS BREAK INTO WIN BY DEFEATING SWALEDALE

The Klemme Shamrocks broke into the win column last week Tuesday night, after a two game loss, by defeating Swaledale on their own floor 26 to 24. The score at the half was tied 9-9. Robert Cooper bagged 15 points for Swaledale while "Red" Buntenbach lead the Shamrock attack with 13 counters.

The Little Shamrocks tucked away another win by defeating the Swaledale reserves 33 to 6 and setting up a season's record so far for scoring.

KANAWHA GAME MOVED AHEAD TO FRIDAY NIGHT

The date of the Kanawha-Shamrock basketball game set for Dec. 14 on the Klemme floor has been moved to Friday night, Dec. 15.

This will be a double-header and a Seven Eagles contest.

McMILLIN COLLECTED 99½ % OF HANCOCK COUNTY TAXES

No Delinquent Tax Sale List Has Been Published For 2 Years

County Treasurer Roy L. McMillin has reported that real estate taxes in Hancock County have been paid nearly 100 per cent, and that no delinquent tax list was published this year. This is the second consecutive year that no delinquent tax sale has been held in Hancock County.

Only a small portion of personal tax is delinquent and total taxes for the year were 99½ % collected as of December 1st.

T. C. NELSON CHOSEN TO HEAD MUTUAL INSURANCE CO.

Hancock County Farmers Mutual Held 57th Annual Meeting

Thomas C. Nelson, of Garner, a former resident of the Klemme community, will head the Hancock County Farmers Mutual Fire and Lightning Insurance Association the coming year, the 57th of the association in business in the county

Mr Nelson's election as president took place at a meeting of the board of directors immediately after the annual meeting at the I. O. O F hall last Thursday afternoon, December 6th.

Other officers elected were John Hippen of Kanawha, vice president; Orville K. Maben, Garner, secretary; E I Brooker of Forest City, treasurer Directors elected for a 3-year term are: Thomas C. Nelson, Garner; Penn Eckels, Britt, and Orville K. Maben of Garner.

The Association now has $16,228 031 of insurance in force. This is a net gain of $874,000 over the past year Losses paid during the past year totaled $19,140 80.

ABOUT TWO HUNDERD FIFTY ATTEND KICK-OFF MEETING

Farm Bureau Leaders Expect To Reach Goal Of 1200 Members

A crowd of at least 250 attended the Hancock County Farm Bureau Kick-Off banquet at the St. Boniface church basement in Garner on Monday evening of last week.

James Falada, of Duncan, played accordion music during the dinner County Auditor Fred Missal led in the community singing.

The main speaker was T C. Peterson, of Madison, Wis., field director of the Wisconsin Farm Bureau Federation and former Hancock county agent. Mr. Peterson's talk was entertaining as well as informative and was an excellent pep talk for membership workers. He spoke of farming conditions in Wisconsin and of the need for stronger farm organization in that state.

Clark Lackore, chairman of the Farm Bureau organization committee, was toastmaster. Brief remarks were made by V. A. Cook, Farm Bureau president; Paul Henderson, county extension director; Miss Hazel Grimes, county extension home economist; Alfred V. Josten, County AAA Chairman, and Chas. F. Jackson, Farm Bureau organization director.

From all reports the boys are really "going to town" on the 1945 membership drive. If the good work keeps up the goal of 1,200 members should be easily reached.

PETHICKS GIVEN FAREWELL PARTY AT LIBERTY CHURCH

The Liberty Birthday Social of last week Monday evening was a farewell on the Cecil Pethick family 75 people attended the supper program The co-chairmen of the program were Mrs. Bernard Pringnitz and Howard Spitler.

Musical numbers were given by a ladies quintet, a mixed trio, a duet, and an accordion solo by the following: Mrs. Ruth Pringnitz, Miss Hilda Abele, Mrs. Geo. Schoenwetter, Miss Bernice Tanner, Mrs. Wilbur Haefner, Cecil Pethick, and Miss Doris Spitler playing the accordion.

The final number was in honor of the Pethicks, and was given by a group of Carolers with Rev. Harvery as the mc. After singing "White Christmas" as an introduction, the Lively Liberty Melody Makers, interspersed with brief historical sketches, sang several numbers written especially for the occasion.

Depicting the love scene proved the most humorous when a human model of a Ford car rambled rattingly into the room lending much merriment to the melody makers madhouse. In the car were Bud Nieman as the bride and Lois Gast as the groom. After many attempts to get the bride home, the groom failed, and she walked out in disgust, leaving him to get the car back to its destination as best he could. Others in the Ford scene were Laurice Lemke, Duard Lewis, Harry Abele, Laurence Polsdofer and Elwyn Ridder.

After wishing the Pethicks well in their new location, the program adjourned to meet again in January. (Contributed.)

METHODIST W. S. C. S. HELD ELECTION OF OFFICERS

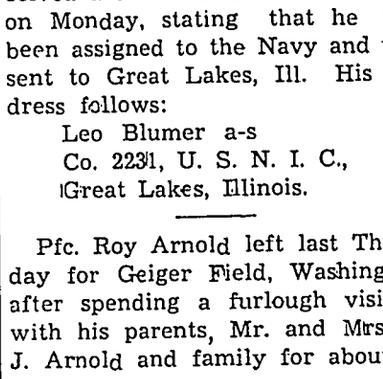
Mrs. Lester Stille Will Head Methodist Society For 1945

At the meeting of the Klemme Methodist W. S. C. S. held Thursday afternoon, the following officers were elected for 1945:

President, Mrs. Lester Stille; Vice-Pres, Mrs J. A. Chambers; Rec. Sec., Mrs. Clarence Lemke; Treasurer, Mrs. R. A. Jorgenson; Corr. Sec., Mrs. J. C. Thomas; Sec. of Missions, Mrs. E. J. Arnold; Sec. of Local Church Activities, Mrs. Herman Paul; Sec. of Student Work Mrs E H. Patet; Sec. of Childrens' Work, Mrs. C. A. Arnold; Sec. of Young Peoples' Work, Mrs. Lyle Wilcox; Assistant, Mrs. Gerald Koerner; Literature and Publications, Mrs. C. A. Larsen; Supplies, Mrs. Martha Bredbenner.

Klemme Couple Celebrated 15th Wedding Anniversary Dec. 10

Our Men In The Service



EUGENE HABERKAMP GETS PROMOTION TO FIRST CLASS

The Becker sisters here have received word that their nephew, Eugene Habercamp was recently promoted from Seaman 2nd class to Seaman First Class in the U. S. Navy.

Seaman Habercamp is stationed at a naval base in New Guinea and has a clerical position. He is the son of Verner Habercamp of near Klemme and is a graduate of the Klemme high school. Before entering the service he was a student at Waldorf College and was also employed at Thada's Store.

LEO BLUMER STATIONED AT GREAT LAKES, ILL.

Mr and Mrs Walter Blumer received a letter from their son, Leo on Monday, stating that he had been assigned to the Navy and was sent to Great Lakes, Ill. His address follows:

Leo Blumer a-s
Co. 2231, U. S. N. I. C.,
Great Lakes, Illinois.

Pfc. Roy Arnold left last Thursday for Geiger Field, Washington after spending a furlough visiting with his parents, Mr. and Mrs. E J. Arnold and family for about 25 days.

Pfc. Charles Bock came Wednesday of last week from Camp Gordon Johnston, Florida to spend a furlough visiting with his parents, Mr. and Mrs. Phillip Bock and family. Charles says his outfit expects to leave soon for duty overseas.

GAME STORAGE PERMITS ARE NEEDED AFTER DEC. 18

After December 18 hunters desiring to hold pheasants and ducks in cold storage must secure a permit to do so. Applications may be secured from any cold storage locker plant, or by writing to the State Conservation Commission, at Des Moines. Permits may not be issued by the locker plants, however, but may be secured without cost from the Conservation Commission. Under the Iowa statutes game may be held 10 days after the close of the open season without permit. Deadline for pheasants and ducks is December 18; for quail, December 25. Under permit all game except migratory waterfowl may be held until June 30, 1945. Federal statutes limit the storage period of ducks and geese to 45 days, or until January 22.

Game taken legally in other states and brought into Iowa may be lawfully held in possession for as long a period as is permitted in the state where taken. The burden of proof is upon the person in possession of such game to show it was lawfully killed and lawfully brot into the state. Such game should be properly tagged to identify it, and no permit is required for its storage.

LEGION WILL PUT ON ANOTHER FEATHER PARTY

Everybody had a lot of fun at the "feather party" put on by the Klemme Legion before Thanksgiving and will be looking forward to the party the Legionairs will stage next week Thursday evening, December 21st.

MR. AND MRS. DONALD NEUBERGER GIVEN SURPRISE PARTY ON ANNIVERSARY

Friends And Neighbors Help Them Celebrate 15th Anniversary Saturday Eve., Dec. 9th

Mr. and Mrs. Donald Neuberger of near Klemme were pleasantly surprised Saturday evening in honor of their fifteenth wedding anniversary when friends and neighbors gathered at their home for a party.

Mr. and Mrs. Neuberger's anniversary, however, was on the following day, Sunday, Dec. 10th.

Those present were: Mr. and Mrs. Wm. Jurgemeyer; Mr. and Mrs. Ernest Helps; Mr. and Mrs. Ewald Josten and family; Mr. and Mrs. Howard Baack; Mr. and Mrs. August Josten and family; Mr. and Mrs. Paul Goll and Beulah.

Mr. and Mrs. John Meindres and Mildred; Mr. and Mrs. Alfred Jurgemeyer and Elaine; Mr. and Mrs. Orris Lundy and Madelyn; Mr and Mrs. Leslie Hartbeck and Esther Mae; Mr. and Mrs. Menno Albers; Mrs. Donald Standley and family; Albert and Mary Swanson, and Miss Nova Chesnut.

The evening was spent socially, and "500" was played at 5 tables At a late hour a delicious lunch was served by the self-invited guests.

When leaving, the guests wished Mr. and Mrs. Neuberger mnay more years of happy wedded life. Mr. and Mrs. Neuberger were presented with a purse of silver in honor of the occasion.

RESULTS OF ELECTION OF COUNTY AAA COMMITTEE

On Saturday forenoon, Dec. 9th, the delegates elected at the township meetings met at the Farm Bureau Office in Garner for the purpose of electing the County AAA Committee for 1945. Following are the results of the election:

Chairman, Alfred V. Josten, Garner; Vice Chairman, Anton E Rasmussen, Garner; Regular Member, Henry J. Johnson, Kanawha; First Alternate, C. A. Bird, Woden; Second Alternate, S. A. Barber, Kanawha.

Township Elections Held

The results of the township elections held December 5th to 8th: ----

Avery Township:

Chairman and Delegate, L. W. Wesenberg, Goodell; Vice Chairman and Alt. Del., Paul Veldhouse, Goodell; Regular Member, Floyd Franklin, Klemme; First Alternate, A. E. Dutheridge, Klemme; Second Alternate, Vern Schluter Meservey.

Ell Township:

Chairman and Delegate, Cornelius J. Wille, Klemme; V Chairman and Alt. Del., Orvile A. Steward, Garner; Reg. Member, John Humphrey, Garner; First Alt., Harold L. Quintus, Garner; Second Alt., Addis Greiman, Garnor.

Liberty Township:

Chairman and Delegate, W. L. Haberkamp, Garner; Vice Chairman and Alt. Del., Chas. Houdek, Garner; Reg. Member E. W. Schaefer, Garner; First Alt., Vic Hueneman, Garner; Second Alt., Forrest Langlitz, Garner.

Twin Lake Township:

Chairman and Delegate, Sam A. Barber, Kanawha; Vice Chairman and Alt. Del., A. G. Ruka, Goodell; Reg. Member, Ole G. Eliason, Kanawha; First Alt., Erwin Priebe, Goodell; Second Alternate, Edwin Josten, Goodell.

Work Circle Will Have Exchange Of Gifts, December 21st

The Work Circle of the Klemme Methodist W. S. C. S. will meet at the church Thursday afternoon, December 21st for an exchange of 25c gifts and a pot luck lunch.

WEEKLY NEWS ANALYSIS

Nazi Defenses Crack in West; Batter Japs' Industrial Belt; OPA to Tighten Price Control

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Waving white flag, German troops surrender to doughboys on Aachen front during Allied offensive.

PACIFIC:
Hit Jap Heart

As U. S. troops punched forward on Leyte island in the Philippines, with a driving rainstorm slapping them in the face, huge B-29 superfortresses blasted the great industrial district in Tokyo feeding enemy armies all along the far-flung Pacific front.

Flying from newly established bases in the recently conquered Marianas, 1,500 miles to the southeast, the B-29s took the first crack at Tokyo since Lieutenant General Doolittle's carrier - based medium bombers raided the Japanese capital in the spring of 1942. Successful development of the B-29 attacks would imperil the major portion of enemy industry, concentrated in the Tokyo district.

Speaking of the operation, U. S. air chieftain, General H. H. Arnold, declared: "The battle for Japan has been joined . . . (it) will be carried on relentlessly . . . until the day of land-sea invasion. . . ."

Although enemy resistance on Leyte continued stiff, U. S. forces continued their encircling advances, with General MacArthur stating that our superior artillery and infantry firepower was cutting deeply into Japanese strength, which had been feverishly reinforced in an effort to hold up the Yank drive.

As a result of persistent U. S. attacks, the enemy has been unable to concentrate his forces on Leyte for counter-attacks, General MacArthur said, rather being compelled to throw in his troops here and there in an effort to check the U. S. offensive.

STABILIZATION:
To Hold Prices, Wages

With living costs already estimated at 30 per cent above January, 1941, levels, OPAdministrator Chester Bowles moved to check recent small price increases, especially in clothing and textiles.

Vigorous action to halt further advances was seen as part of the government's indicated policy of retaining the disputed "Little Steel" wage formula, under which pay boosts have been kept within 15 per cent of January, 1941, levels.

Because of the permissible 15 per cent wage raises, plus large overtime earnings, it has been felt that workers' weekly incomes have balanced price increases. But with further rises in living costs threatening that balance, the government was expected to press hard to maintain present price levels.

Although the National War Labor board's recent findings that living costs have gone up 30 per cent since January, 1941, was expected to bolster the CIO and AFL's campaign for wage increases over the 15 per cent limit of the "Little Steel" formula, the government has shown no inclination to give in to their demands.

On the other hand, it has been suggested, with the President's favor, that as long as overtime earnings are being paid, current wage rates be retained. With a trim-off to the 40-hour week, however, it has been proposed that wages be boosted to allow workers to "take home" the same average income as they now do.

Under such a plan, workers would get about a 30 per cent raise in pay, thus assuring a continued high purchasing power with a resultant stimulation of employment.

As part of its program to maintain the present cost level, OPA was expected to take a firmer stand on manufacturers' requests for higher prices.

EUROPE:
Big Crack

First German lines to crumble during the Allies' big fall offensive along a 460-mile front in the west were on the southern end, where the Nazi 19th army, under steady U. S. and French pressure, was told to abandon equipment, break into small groups and beat it back, as best it could, to the Reich border.

Indicative of the crack in the enemy's lines was the French 1st army's break through the Belfort Gap, and its swing northward up the Rhine in a maneuver designed to trap some 70,000 Germans who had been holding the Vosges mountain passes to the west.

The rapid French dash was followed by the U. S. 7th army's smash through the Saverne pass in the Vosges 50 miles to the north, which had the effect of forming a nutcracker squeeze on enemy forces caught between the two pincers.

Only enemy rearguards retarded the U. S. and French maneuver, but the Germans profited from the murky weather, which prevented the superior Allied air force from rising in full strength to smash the knots of Nazi troops beating their way eastward to the Rhine.

In an effort to extricate the bulk of his 19th army, Col. Gen. Johannes

Heinrich Himmler (foreground) inspects fanatical SS troops on western front.

Blaskowitz assembled all kinds of boats and barges to transport troops unable to move across the Rhine on stationary bridges.

Although less spectacular, news from other sectors of the winding battle-front was good, with General Patton's 3rd army probing into the coal-laden Saar basin east of Metz, and the U. S. 1st and 9th and the British 2nd armies maintaining their terrific pressure on German defenses east of Aachen. Even though the Allies were throwing masses of men and material at them all along the 460-mile front, the Germans expected still another drive, this one in northeastern Holland, where they said the British planned to drive around the anchor of the Siegfried line at Kleve down into the Ruhr valley.

Best description of the fighting about Aachen was provided by this Thanksgiving report from the battle-front:

"For Lieutenant General Hodges' 1st and Lieutenant General Simpson's 9th and the British 2nd armies, knee-deep in mud in heavy battles, this day at the approaches to the Ruhr and Rhineland was hard and bitter slugging, yard by yard."

German plan was to slow up the big Allied drive by wearing down U. S. and British strength, and toward this end, the enemy launched repeated counter-attacks with his new King Tiger tanks.

As the Allied troops advanced, they found Nazis in the forward defense positions of inferior quality, the German plan apparently being to save their best for a last desperate fight along the main line.

In the east, bad weather interfered with the Russians drive upon Budapest, and the broad Hungarian plains leading to the gateway to Austria.

GI Railroaders Follow Troops

Unsung, but nevertheless of vital importance, are the army railroad men, helping supply the advancing U. S. forces on world fronts.

"These troops are scattered all over the world," said Brig. Gen. A. F. McIntyre, chief of the army rail division. "They are in New Guinea, Alaska, New Caledonia, England, France, Italy, Iran and India. They also supported the invasion in Africa where the Moroccan railways had been barely able to support the domestic economy of the country."

Trained troops of the Military Railway service are all in service overseas, General McIntyre said. In addition to operating and shop battalions, he explained, miscellaneous units, such as mobile workshops, hospital - train maintenance crews, base depot companies, and transportation companies, total 105 Military Railway service units containing about 2,000 officers and 42,000 enlisted men.

MEAT:
1945 Prospects

More veal, about the same amount of beef, but 15 per cent less pork—that's the meat prospect for 1945, the War Food administration revealed.

The continued stringency in beef will continue because 31 per cent of the supply will go to the armed forces, it was said.

Increased supplies of better grade beef were in prospect for domestic consumers, with reports that midwestern farmers were aggressive buyers of stockers for fattening, what with feed stocks at high levels. Much of the beef on sale this year was of the utility type coming from grass-fed range cattle.

Meanwhile, cattle slaughter remained heavy during October, with an all-time record of 1,450,572 beef animals put on the block, along with 919,599 calves. The total of 4,223,255 hogs butchered was 1 per cent below the 5 year average.

Farm Income

U. S. farm income has continued its rise in 1944, with the department of agriculture now figuring that the total return for the year will run to over 20½ billion dollars for the nation's 6,000,000 operators.

The USDA's estimates were based on cash marketing and government benefit income of 14½ billion dollars for the first nine months of this year, a little less than a billion dollars more than for the corresponding period in 1943.

Combined with steady debt reduction, wise utilization of the farm plant without undue expansion and the accumulation of large liquid resources, the continued high income further strengthened the farmers' position for the uncertain postwar period.

Thieving Craze

Latest of the wartime juvenile problems to plague authorities was a shoplifting spree among 'teen-aged "bobby-sock" girls in Portland, Ore.

Carried on by girls stealing for personal use rather than resale, the spree reached alarming proportions, with losses so heavy in one big department store that auditors first thought there must have been a bookkeeping error in the amount of merchandise originally listed.

One 12-year-old was caught with $150 worth of sweaters, beads and bracelets. A 17-year-old said she had stolen $700 worth of goods in seven months for her sailor sweetheart.

Sobbed one tearful culprit: "I guess it is stealing, only I didn't think of it that way. It was an adventure sort of. The other girls were doing it."

CHINA:
Japs' Progress

Even as Generalissimo Chiang Kai-shek shook up his government to revitalize the Chinese war effort, and Donald Nelson arrived in Chungking with a group of steel and alcohol experts to build up war production, the Japanese tightened their hold on the whole eastern coastal section of the country.

Object of the Japanese drive, which covered 750 miles in six months, was to eliminate the bases of the 14th American air force, whose planes had harried enemy ground forces, shot up communications and ranged a-sea to blast coastal shipping.

The shift in Chiang's government followed the row over giving Gen. Joe Stilwell command of Chinese forces to stimulate their prosecution of the war after it was hinted that the Generalissimo was using much of the army for the preservation of his own political party against the encroachment of the Communists.

Nelson's return to Chungking followed a previous visit during which studies were undertaken as to what kind of industrial development would fit into Allied aid to help the Chinese war effort.

SAVINGS:
Well Heeled

What with total savings estimated at $100,000,000,000, Americans should find themselves able to meet a short period of adversity in the postwar world.

Of the huge amount of savings, $36,883,000,000 are in war bonds, it was revealed. About 81,000,000 people, or 60 per cent of the population, held these securities in comparison with about 25 per cent in World War I.

Next to war bonds, bank and postal savings deposits constitute the largest source of savings at over $36,000,000,000. Of this amount, over $34,000,000,000 were in bank deposits held by about 33 per cent of the people.

Life insurance forms the third largest source of savings, what with 50 per cent of the people paying in over $33,000,000,000 on their policies, it was revealed.

COTTON EXPORTS

With cotton exports down to an average of 1,235,000 bales for the four crop seasons from 1941 to 1944, the trade looked to the recently invoked War Food administration export subsidy program for possible increased shipments.

Estimates as to the amount that might be sold under the WFA's new program varied, with the volume of shipments depending upon the availability of cargo space, it was agreed. Exports have been lowest since the Civil war.

Airforce Operates Over Long Route Without Loss

Flying the longest overland link in the ATC supply route to China, the Central African division of the USAAF air transport command has completed a year of operation without a fatal accident, the war department reported.

Although, from the standpoint of personnel, the Central African division is one of the smallest of the air transport command's units, its operations extend tremendous distances over jungles, deserts and treacherous coastline. Despite such obstacles and hazards, it operates more planes than any domestic airline and on a "round-the-clock schedule."

The flying time from Accra on the African Gold Coast to Karachi, India, is about 33 hours, or twice across the United States. The jump from Accra to Maiduguri, one of the stepping stones across the jungle, is about the same distance as that from New York to Chicago. But flying conditions are far different from those of this country. Temperatures are excessively high over long periods of time. Extreme heat makes flying an actual physical hazard in many cases.

Weather information is meager and forecasts, therefore, are difficult to make. Air crews, as a result, must depend to a great extent on their own skill and experience in threading their way through the windstorms that constantly haunt this air route.

Find New Wood to Rival Strategic Balsa

Balsa, the light-as-a-feather wood that boy carvers of airplane models favored in prewar days is likely to have a rival. Quipo wood—also called "bongo"—is reported to be just as light. For many purposes the two woods are interchangeable, says the United States department of agriculture.

Before the war, balsa was of considerable commerical importance because of its light weight and insulating properties. Now its use as core material in "sandwich" construction for aircraft and other war uses has greatly increased demand. Much of the prewar balsa came from Ecuador where production was primitive. Wood specialists have been searching for substitutes.

Quipo wood's botanical name is Cavanillesia plantifolia, and it grows principally in Central America. The tree grows more slowly than balsa and does not come to useful size until about 30 years of age. Balsa grows quickly and is useful after four to six years. Quipo wood does not have the silky luster of balsa, but it is as light or lighter and the specific gravity is more uniform than is the rule with balsa. This would be an advantage where material with uniform weight and strength is required.

Nine Generals Diamond Stars at West Point

In case you didn't know it, the 1915 West Point baseball varsity had a powerful youngster as centerfielder who covered ground like a big leaguer and batted a terrific .383 for the season.

He's now playing the biggest game of his life in leading our doughboys in France since D-day. None other than Lieut. Gen. Omar N. Bradley. And eight of Bradley's teammates of that year (their team won 17 out of 21 games and copped the Eastern Collegiate title) are generals too.

Here's the line-up as of today: Lieut. Gen. Jacob L. ("Jakie") Devers, officer-in-charge of the champions, who organized and built up the smashing tank units of the U. S. army; Maj. Gen. Leland S. Hobbs, outfielder, now commanding the 30th infantry division; Maj. Gen. Hugh Mitchell, outfielder, now in charge of the army air forces in the Eastern area; Maj. Gen. Charles Gerhart, thirdsacker, who now commands the 91st division; Maj. Gen. Vernon E. Prichard, shortstop, commanding the 14th armored division; Maj. Gen. William C. McMahon, infielder; Maj. Gen. J. F. Miller, pitcher, now in the air service command, and Brig. Gen. Charles Milliken, second base, of the signal corps.

Fixing House

After a good inspection and consideration of the condition of the paint on the house as a whole, there are a lot of often unconsidered but actually highly important items which will merit your serious attention. For example, storm windows and storm doors should have a fresh coat of paint before being put in place, and care should be taken to paint their edges, especially the bottom edge, to prevent the absorption of moisture which may result in warping, cracking or rotting. However, before freshly painted storm windows are put in, the window trim of the house should be given a coat of paint. Few home owners realize that window frames — particularly the sills—need painting two or three times for every complete paint job that may be done on the house itself. Painting them once a year is sound practice.

Wood of Life

Number one in importance of tropical woods is the lignum vitae or "wood of life." The unusual strength and tenacity of this wood makes it ideal for bearings and brushing blocks which line the stern tubes of steamship propeller shafts, and its resin content makes it almost waterproof. Other Middle American timbers such as mahogany, used for making the hulls of sub-chasers, and balsa, used in aircraft construction, have contributed to United States war industry.

When War Came to the United States

By ELMO SCOTT WATSON

It WAS on a Sunday morning three years ago that war came again to the United States.

The story of that "day of infamy," when Japan made her sneak attack on Pearl Harbor, is too fresh in the minds of all Americans to need retelling here. But how many of us know about those other tragic days when we made the fateful decisions which meant that more American lives were to be sacrificed on the altar of Mars?

This article is a page from the story which tells how war came to America in other years before this.

The first war which we, as a nation, waged was an "undeclared war"—that is to say, there was never any formal declaration of war. As a matter of fact, we weren't even a nation when it started.

The American Revolution began as a rebellion—the revolt of the English colonies in America against the mother country, England. It continued as a rebellion and as a civil war — Patriots against the Tories and the regularly constituted authorities — for nearly a year before we became a nation. For the United States of America did not come into existence until July 4, 1776, when the Declaration of Independence was adopted.

In the meantime there had been fighting and bloodshed—at Lexington on April 19, 1775; at Concord, where was "fired the shot heard round the world," on the same day; at Bunker Hill on June 17 and at Quebec in December. For six years this "undeclared war" dragged on until, at last, the surrender of Cornwallis at Yorktown on October 19, 1781, meant that the independence, declared five years earlier, was an accomplished fact.

However, this didn't mean the end of the war, which was destined to last for nearly two years more. It wasn't until November 30, 1782, that the preliminary articles of peace between Great Britain and the United States were signed in Paris; two more months were to elapse before articles proclaiming the cessation of hostilities between the two nations were signed on January 20, 1783; and it wasn't until September 3, 1783, that the definitive treaty of peace was signed in Paris. Thus this "undeclared war" had lasted for eight years, four months and fifteen days, making it the longest in our history.

During the next 20 years we were involved in two more "undeclared wars," both of which brought fighting and bloodshed. The first was with our former ally, France, and was the result of the humiliation and insults which our envoys in Paris had suffered at the hands of the Directory and the attempt of Talleyrand to blackmail us into buying France's friendship. Although there was no formal declaration of war, Pres. John Adams ordered commerce with France stopped in 1798 and our treaties with her abrogated. Then our infant navy put to sea to prey upon French shipping and for the next 18 months there was considerable naval warfare, marked by the victories of the frigate "Constellation" over French men-of-war. When Napoleon Bonaparte came to power, he immediately took steps to stop the conflict and in September, 1800, a convention was signed in Paris which ended this "war."

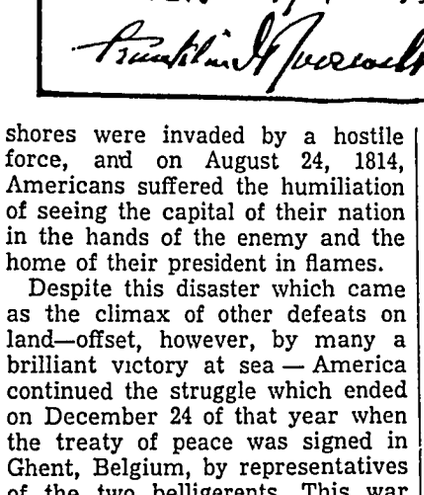
Meanwhile American shipping, like that of other nations, had been suffering from the raids of the Barbary pirates in the Mediterranean and, despite tribute paid to the rulers of Algiers, the pasha of Tripoli and the bey of Tunis, American vessels were being seized and American seamen held prisoners until ransomed. When Thomas Jefferson became president in 1801 he resolved to put an end to this early-day racket.

The first two naval expeditions against the pirates failed but in 1803 when Commodore Edward Preble sailed against the corsairs it was a different story. His expedition against Tangiers, the daring attack by Lieut. Stephen Decatur on Tripoli the next year and the combined naval and military expedition — the latter led by Gen. William Eaton—which captured Derna in 1805 broke the power of the Barbary states and resulted in treaties which guaranteed the future safety of American shipping in the Mediterranean.

The remainder of Jefferson's administration was peaceful but by the time James Madison entered the White House, the second war with England was brewing. For the first time in our history there was a formal declaration of war—on June 18, 1812. For the first time, too, our shores were invaded by a hostile force, and on August 24, 1814, Americans suffered the humiliation of seeing the capital of their nation in the hands of the enemy and the home of their president in flames.

Despite this disaster which came as the climax of other defeats on land—offset, however, by many a brilliant victory at sea — America continued the struggle which ended on December 24 of that year when the treaty of peace was signed in Ghent, Belgium, by representatives of the two belligerents. This war had lasted two years, six months and six days.

The next war with a foreign power was even shorter than the War of 1812. When the United States annexed Texas in 1845, Mexico (from whom Texas had won her independence nine years earlier) regarded this as a hostile act. There was a series of "incidents" down on the Rio Grande and Pres. James K. Polk asked congress for a declaration of war. It came on May 13, 1846, and 10 days later Mexico declared war on the United States. Hostilities began soon afterwards, our armies under General Taylor and General Scott invaded Mexico and within a little more than a year (September 14, 1847) they had captured the Mexican capital. The war ended with the signing of a treaty of peace on February 2, 1848 — one year, eight months and twenty days after it began.



APRIL 2, 1917 — Pres. Woodrow Wilson reads his war message to congress.

The next war in which we engaged was another "undeclared war" for, like its predecessor, it was a "rebellion" and a "civil" war. Just when the War Between the States began is a matter of definition.

The usual view is that it was April 12, 1861, when Confederate batteries in Charleston, S. C., fired on Fort Sumter and the Union troops in that fortification fired back. At any rate, it was this act which prompted President Lincoln three days later to call for volunteers to "suppress the insurrection" and which resulted in four years of the hardest and bloodiest fighting the world had ever known up to that time. Just as this war had no "official" beginning, so it had no "official" ending. But the surrender of Lee on April 9, 1865, sounded the death knell of the Confederacy and organized resistance by the men in gray ended. From Sumter to Appamattox it was four years — minus three days.

Shortest of all our wars with a foreign power was the "100-Days War" with Spain in 1898. It had its origin in American sympathy for the Cuban patriots who for several years had been trying to throw off Spanish rule but it is doubtful if there would have been a war had it not been for the event which took place in Havana Harbor on February 15, 1898. That event was the explosion and sinking of the U. S. S. Maine. The excitement over this resulted in diplomatic relations between Spain and the United States being broken on April 21 and the declaration of a blockade of Cuba the next day. Her "national honor" thus assailed, Spain declared war on April 24 and our declaration followed the next day.

The overwhelming victories won by our navy—at Manila and at Santiago—and by our army—in the land fighting in Cuba—soon demonstrated what the inevitable outcome of the war would be. So on August 12 a peace protocol was signed and hostilities ceased after 100 days of fighting. The war, however, did not end officially until December 10 when the peace treaty was signed in Paris.

Although the period of actual combat by our fighting men was relatively short (one year and 15 days), World War I was our second longest war with a foreign power. Here is the sequence of events to validate that statement:

On February 1, 1917, Germany began unrestricted submarine warfare and as a result we broke diplomatic relations with her two days later. On April 6 congress declared war on Germany and on June 26 the first American troops landed in France. However, it was not until October 27, 1917, that American soldiers fired their first shots at the enemy. Hostilities ended on November 11, 1918—one year and fifteen days after they had begun on October 27 of the previous year.

The cessation of hostilities on Armistice Day did not mean the official end of the war. The treaty at Versailles was signed on June 28, 1919, but when it came up for ratification by the senate on November 19 it was rejected. That meant that, officially, we were still at war with Germany. It was not until July 2, 1921, that President Harding signed a joint resolution of congress (passed by the house on June 30 and by the senate on July 1) declaring peace with Germany. On August 25 a peace treaty was signed in Berlin by representatives of the United States and Germany. This was ratified by the German national council on September 17 and by the United States senate on October 18. Then, and not until then, was the war between these two countries officially ended — four years, six months and twelve days after the American declaration of war back in 1917.

As for World War II, it began officially for the United States on December 7, 1941, when Japan declared war against the United States and Great Britain and before the declaration reached Washington by air or cable, made an attack on Hawaii, the Philippines and other American possessions in the Pacific. Our declaration of war followed the next day. Four days later Germany and Italy declared war on the United States and on the same day congress, in joint session, issued our declaration of war against those two nations.

Seventy-seventh Congress of the United States of America;
At the First Session

Begun and held at the City of Washington on Friday, the third day of January, one thousand nine hundred and forty-one

JOINT RESOLUTION

Declaring that a state of war exists between the Imperial Government of Japan and the Government and the people of the United States and making provisions to prosecute the same.

Whereas the Imperial Government of Japan has committed unprovoked acts of war against the Government and the people of the United States of America: Therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the state of war between the United States and the Imperial Government of Japan which has thus been thrust upon the United States is hereby formally declared; and the President is hereby authorized and directed to employ the entire naval and military forces of the United States and the resources of the Government to carry on war against the Imperial Government of Japan; and, to bring the conflict to a successful termination, all of the resources of the country are hereby pledged by the Congress of the United States.

Sam Rayburn
Speaker of the House of Representatives.

H A Wallace
Vice President of the United States and President of the Senate.

THE BATTLE OF LEXINGTON, APRIL 19, 1775
After an engraving by two Continental militiamen who were in the battle.

On that fateful spring morning, when the advance guard of British soldiers, sent by General Gage to destroy the stores which the Americans had collected at Concord, reached Lexington, they found nearly 200 armed provincials drawn up in battle array on the village green.

"Disperse, ye rebels!" cried Major Pitcairn, but the embattled Minute Men stood fast. Then a shot was fired—whether by British soldier or Minute Man is still undecided—and the fight which opened the Revolution began.

CHRISTIAN LIVING AT ITS BEST

LESSON TEXT—Galatians 5:22 - 6:10.
GOLDEN TEXT—If we live in the Spirit, let us also walk in the Spirit.—Galatians 5:25.

Life and profession must be in accord. To follow Christ means more than embracing a creed, or following a ritual; it calls for daily living of the highest type.

Herein Christianity differs from all other religions. It is a living faith in a living Lord—which produces a living testimony. Such a life is:

I. Spiritual (Gal. 5:22-26).

The Christian receives his new life through the ministering of the Holy Spirit. Since that is true, "let us also walk by the Spirit" (v. 25). Every child of God (not just a few, as some suppose) is to live this kind of spiritually fruitful life.

The works of the flesh, horrible in their wickedness and lust, are listed in verses 19-21, and then by striking contrast we have the fruit of the Spirit in the life of the Christian. Note the distinction: work is something we produce; fruit is something that grows.

Walking in the Spirit the Christian finds in his life the inward graces of love, joy, and peace. These then express themselves outwardly in long suffering, kindness, goodness, faithfulness, meekness, and self-control. The Spirit-filled man is not only a good man, he lives a good life.

II. Gentle (Gal. 6:1).

Christiantity is not harsh and unforgiving toward one who has sinned. Certainly there can be nothing but stern condemnation of continued, flagrant, impenitent sinning. But toward the one who has failed, the winsome attitude of loving restoration should be the first reaction.

There is good reason for this, for God is kind, and Christ would not quench the smoking flax (Matt. 12:20). Then who are we, weak and fallible human beings, to treat an erring brother with hardness?

III. Kind. (Gal. 6:2-5).

We are to help the brother in need, lift his burden and bear it for him (v. 2). At the same time do not go around expecting anyone to bear your burden (v. 5). Ask God for grace and bear it yourself. If your brother helps you—good. If not, do not be offended. Too many Christians **expect** others to help.

Then there is the need for kindness in thinking of oneself, and one's neighbor. Pride is self-deception (v. 3). It puts God against us (James 4:6). We will have no time or occasion to judge our neighbor if we honestly appraise our own life (v. 4).

IV. Honorable (v. 6).

While the Christian will not be seeking any glory or reward for himself, he will always be honorable in caring for those who serve him in the gospel. Salvation is free, and no true preacher or teacher of the gospel would set a price on it. But the necessities of life must be provided, and it is the obligation of the one who is served to "communicate" of that which he has to his teaching brother.

It need hardly be said that if the church had obeyed this and similar admonitions found in many places in Scripture, we should not have the disgrace of an underpaid ministry, of an understaffed church, and of missionaries waiting to go with no money to send them. Let us be honorable about this matter.

V. Consistent (Gal. 6:7, 8).

There is an inexorable law which brings only the harvest which is planted. Too many Christians are trying to reap the fruit of spirituality when they have sown only the seed of indifference and worldliness. It can't be done!

Self will is always struggling against God's will in the life of the Christian. Sowing to the flesh means yielding to self. And the result? Corruption. Yes, even in the life of a Christian. How much there is of that, and how it hinders God's work!

There is here the important truth that the one who sows to the Spirit reaps eternal life. That speaks of salvation itself, but it also speaks of spiritual development.

VI. Diligent (Gal. 6:9, 10).

It has been said that we have three classes in the church—workers, jerkers and shirkers. The shirker does nothing. One wonders whether he is really saved, since there is no sign of life. The worker is the one upon whom one can always depend. The jerker is the one who takes hold mightily, and then is gone when you most need him.

Christian living at its best calls for consistent, persistent, diligent application to the work of God—not only today, but tomorrow, and the next day, and the next!

Note the suggestion of special thoughtfulness toward our fellow Christians (v. 10). Some folk operate on the opposite principle. They treat their fellow believers with a little extra coldness—a special degree of suspicion and criticism. That surely is not Christian living at its best.

SEWING CIRCLE PATTERNS

New Party Frock for Little Girl

EVERY little girl loves a new party frock. Mother can easily and quickly make this dainty one with its full skirt gathered onto the yoke. Pretty for play time too.

Pattern No. 1230 comes in sizes 1, 2, 3, 4 and 5 years. Size 2, dress with panties, requires 2¼ yards of 39 inch material, 3½ yards ric rac to trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

A General Quiz

The Questions

1. When a battleship fires a broadside of nine 16-inch guns, how much does it cost?
2. What was the Bastille?
3. What poet was claimed by seven cities?
4. Are any of the bones of the human body fully grown at birth?
5. Sir Walter Raleigh's death was caused by what?
6. What name is given to the green coloring matter in leaves?
7. What is a charivari?
8. The Golden Rule is found in what book of the Bible?
9. What was linsey-woolsey in the American colonies?
10. When an enlisted man receives the medal of honor, his pay per month is increased by what?

The Answers

1. It costs $13,500 a broadside.
2. A state prison in Paris, destroyed during the revolution.
3. Homer.
4. Yes, the auditory ossicles, the three tiny bones in the middle ear.
5. Beheading.
6. Chlorophyll.
7. A medley of incongruous noises.
8. Matthew 7:12.
9. A home-spun cloth.
10. Increased by $2.

SNAPPY FACTS ABOUT RUBBER

The size of the country's synthetic rubber production may depend not only upon technical progress, but also upon policies adopted for disposal of government-owned plants, in the opinion of John L. Collyer, president of The B. F. Goodrich Company and a pioneer in synthetic development.

Authorities expect that about 32,500 tons of natural rubber will reach the U. S. from the Amazonian region this year. Our synthetic program is now geared to produce 836,000 long tons a year of this substitute for crude.

EDITORIAL COMMENT

WAR HAS GLOOMY OUTLOOK TO KLEMME SOLDIER

We received a V-Mail letter from Capt. Glenn Bowles, with the U. S. Army in Italy, giving us a front-line soldier's view of the war conditions in that theatre.

Capt. Bowles stated that the end of the war is not in sight yet and a long, hard struggle still lies ahead.

Capt. Bowles continued, "You all know what we are doing up here in Italy. As I say, Italy is Italy and war is war, we're in both. We saw our first snow sometime ago and we know what to expect since we spent the first part of last winter in mountains of North Africa and later in the Italian mountains. We had a fine Thanksgiving dinner today. A year ago we had it in Oran, North Africa; two years ago in Camp Gruber, Oklahoma; 3 years ago at Camp Claiborne, La., and four years ago at home. And I really believe that my next Thanksgiving dinner will be overseas too."

Before entering the service, Bowles was athletic coach in the Klemme high school for 2 years.

THEIR CONDUCT AND PRODUCT ARE BOTH O. K.

We unintentionally put the boys at the creamery "on the spot" last week through an error in their advertisement, in which manager Russell Medin was announcing the change in the time of milk delivery.

In one paragraph of the ad, we had inserted the word "conduct" instead of "product," and the error gave a number of readers quite a chuckle With the word "conduct" inserted the advertisement went on to read: "We hope this will meet with your approval and any complaints or criticism on this change or on our **conduct,** will be appreciated at any time."

We can assure our readers that both the product of the creamery and the conduct of deliveryman Karl Huenemann will be O. K.

Anyway, we know the adv was read!

DIPHTHERIA RISE NOTED IN STATE; TOPS 1943

Diphtheria, "a completely preventable disease," according to the state health department, has struck in Iowa this year at an average rate of at least one victim every two days, it was disclosed today.

The health department said today that 182 cases of this disease have occurred this year with a sharp increase in cases being noted during the month of November and the early part of December.

While only two deaths have been reported, cases jumped from nine reported in October to 39 in November with at least seven more occurring during the first week of the current month.

The year's total of 182 cases also represents an increase over the 152 cases reported through the first week of December a year ago.

Commenting on these figures, the department said, "Diphtheria is a disease which spreads from person to person but it would not be proper to blame a germ for causing this disease.

"With present day knowledge, diphtheria can be prevented completely by immunization, and the cause for cases is failure to obtain protection. Science, in other words, is running ahead of the people, and there will continue to be cases so long as this is true."

No Cases Reported In Hancock

Thirteen counties contributed to the increase in cases noted in November and December, the department said. These counties include the following: Woodbury, 14 cases; Page, 11; Chickasaw, 6; Black Hawk, 3; two each from Clinton, Delaware, and Van Buren; and one each from Benton, Muscatine, Polk; Sioux; Wapello; and Buena Vista.

If your children have not been immunized against diphtheria, you should consult your family doctor.

BEAUTIFUL NORTH IOWA WINTERTIME

It's really winter up here again in North Iowa, and we like it.

Winter may have a number of disadvantages and cold and snow may not be to pleasant at times, but we still prefer to live in North Iowa where we always have a variety of four seasons. We would not like to live in a place where weather is like summer all the year around; that would become very monotonous indeed.

We folks in North Iowa probably do not appreciate this wonderland of beautiful white snow in the winter; the freshness of growing things in the spring; summer with its abundance of crops getting ripe for the harvest; and then the fall, perhaps the most colorful of all the seasons in North Iowa.

But what would Christmas be without snow?

Snow provides a lot of fun for the youngsters and makes them get out in the invigorating fresh, crisp air to make snow forts, snowmen and to go sliding down steep hillsides on their toboggans.

Yes, we will still take Iowa and its snow in preference to California's damp winter rains.

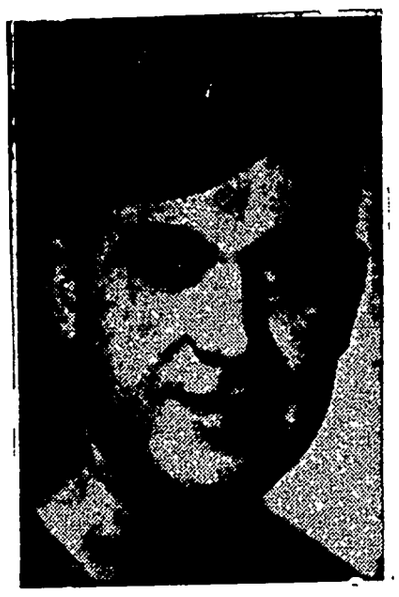
Sgt. Milo Patet's Unit Received Citation



SGT. MILO PATET

U. S. Army Troops At A South West Pacific Base.— Sgt. Milo H. Patet, son of Emil H. Patet of Klemme, Iowa, is a member of the 836th Engineer Aviation Battalion which was recently honored with the presentation of a Meritorious Service Unit Plaque by Lt. Gen. Walter Kreuger, commanding the Sixth army troops.

The 836th received the award for work accomplished during the construction of 3 airdromes, vital to the prosecution of the allied offensive in the southwest Pacific. By extensive clearing of rain forests and cocoanut groves and skillful soil stablization, they surfaced runways with coral and prepared one strip for operational use within 23 days.

During the assault phases of another island, they quickly cleared access roads and dispersal areas for supplies and equipment and expanded and improved the former enemy strip for our air support units. They frequently were forced to maintain their own perimeter defense against the remnants of harassing Japanese force.

In another instance, subjected to recurrent enemy air attacks, they wrested an airfield from virgin jungle and cocoanut groves in 15 days. Despite material shortages of personnel, equipment and supplies and unrelieved work for a 5 month period under the most adverse tropical conditions, the 836th maintained unsurpassed standards of discipline, efficiency and devotion to duty.

Sgt. Patet, whose wife is Mrs Agnes Galbreth Patet, San Fernando, Cal., is the message center chief of the outfit. Prior to his induction into the army in February. 1942, he was a postoffice clerk at Klemme, Iowa. Since arriving overseas in August, 1943, he has participated in a number of actions.

White Corn Delivered To Klemme Coop. Grain Co. Past Week

White corn is getting to be rather an oddity the past few years and very little of it is grown around here.

However, last week Ben Greiman sold some white corn to the Klemme Cooperative Grain Co., and on Friday the elevator bought some white corn from Dale Anderson It brings a higher price than yellow corn.

HANCOCK COUNTY OFFICIALS ATTENDED MEETING ON ROAD LEGISLATION TUES.

The Hancock County board of supervisors, County Engineer C. F. Merten and County Auditor Fred C. Missal attended a meeting of county officers of Highway District No. 2 at the Hanford Hotel in Mason City, Tuesday.

The meeting was called by Fred Gremmels, president of Highway District No. 2 and business of the session was devoted to discussion of proposed legislation.

COUNTY ENGINEER WILL SURVEY DRAINAGE DITCH

County Engineer Charles F. Merten was appointed engineer to survey and report a petition for a new drainage district filed by Abe Mezvinsky and D. M. Ghrist. The proposed district will be located in sections 25 and 26 in Orthel township.

This is the fifth new drainage district petitioned for in Hancock county this year.

SENIOR CLASS NEWS
(By Patricia Kudje, Marjorie Hartbeck and Iva Christie)

Last Friday in our assembly, we agreed to exchange presents for Christmas, so we drew names in the entire high school to see what person each would buy a gift for.

In English Literature we are reading articles out of the Readers Digest. This magazine contains a lot of good reading material so we are glad to get the opportunity to read and understand it.

In American History we are now studying about the War of 1812. Its causes and effects were found We also understand that if they could of had modern communication that war would not have been fought.

The Freshman Home Economics and Advanced Home Economics classes decorated their room this week for Christmas It was decorated with evergreen, candles and berries.

In Advanced Algebra we are beginning a unit on graphs. This is quite complicated.

JUNIOR HIGH NEWS
Luella Priebe, Reporter
Mrs. Clara Smith, Teacher

We have completed our study of A Christmas Carol in our Seventh Grade Literature class. We used various types of tests for the five stories and then wrote a memory test over the entire story.

In Eighth Grade Arithmetic we are working hard on the unit on "Banking." Thus far we have worked simple interest and compound interest and have compared the two types by means of graphs Next week we will learn about bank discounts, promissory notes, and how to use the 6% method..

"Corner Ball" was the new game played during Physical Training period Tuesday. We also played "Kick Goal" and various relays during the week.

We have returned to the United States in Seventh Grade Geography. Just now we are studying about our country as an agricultural nation.

FIFTH AND SIXTH GRADE NEWS
Mrs. H. G. Voetberg, Teacher

In Sixth Grade Language we have begun our work on subjects and predicates. Soon we will be having the parts of speech.

Maxine Barz had a guest in school Friday afternon. We are happy to have visitors.

Darlene Bachman, Iris Schaefer, and Delores Thieman were absent from our room the past week.

In Music we have been working on Christmas carols. We have been doing two-part singing.

THIRD AND FOURTH GRADE NEWS
Mary Jane Holmes, Teacher

The Fourth Grade is no longer smaller than the Third Grade. Monday Beverly Sobek started going to our school again. Beverly went to school with us last year, but she has gone to a rural school this fall. Our enrollment is now twelve in each grade.

The Third Grade has been studying a unit about "Food From Animals." We had been reading how butter was made, so on Wednesday afternoon we churned butter.. Richard Baack brought the cream for us. After the churning was finished we had crackers and our own butter.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
Miss Bugh, Teacher

This week we talked about what we want for Christmas. We learned where Santa lives and we can find the North Pole on the globe.

In Language we wrote our letters to Santa Claus and addressed envelopes for the letters.

We decorated our Christmas tree. We brought decorations for it from home. We made decorations and chains from colored paper to put on it. We like to look at our tree very much because it is so pretty.

Whales live through the winter by keeping blow-holes open in the ice.

hank You!

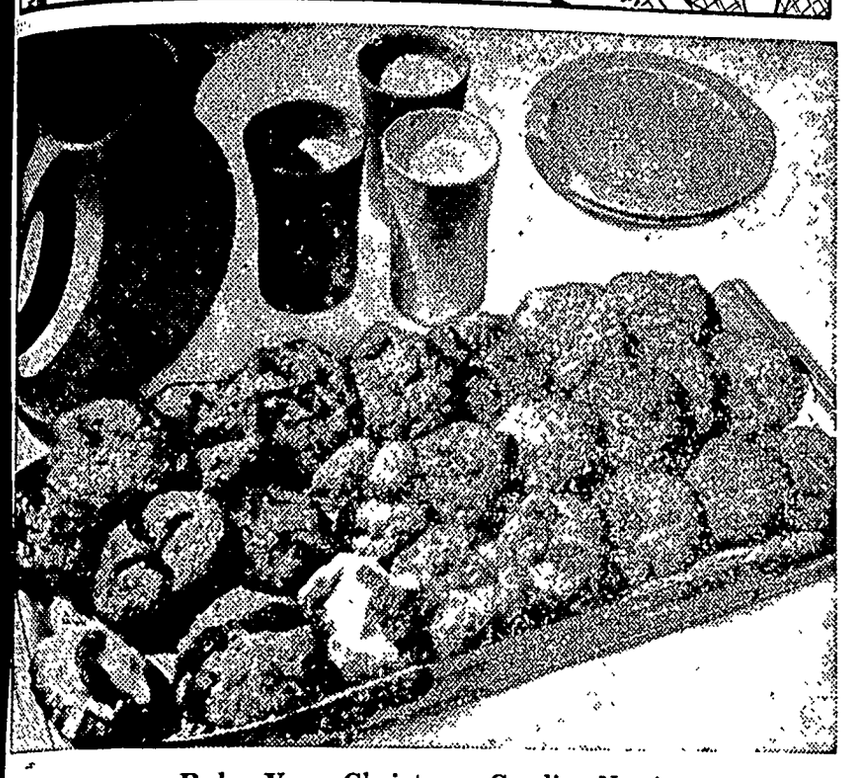
That Nagging Backach

May Warn of Disordered Kidney Action

Modern life with its hurry and wo irregular habits, improper eating drinking—its risk of exposure and in tion—throws heavy strain on the w of the kidneys. They are apt to bec over-taxed and fail to filter excess and other impurities from the life-giv blood.
You may suffer nagging backa headache, dizziness, getting up nig leg pains, swelling—feel consta tired, nervous, all worn out. Other s of kidney or bladder disorder are so times burning, scanty or too frequ urination.
Try *Doan's Pills. Doan's* help kidneys to pass off harmful excess b waste. They have had more than ha century of public approval. Are rec mended by grateful users everywh *Ask your neighbor!*

DOAN'S PILL

HOUSEHOLD MEMOS
by Lynn Chambers



Bake Your Christmas Goodies Now!
(See Recipes Below)

Homemade Gifts

Christmas can put a strain on your sugar budget especially if you are baking lots of goodies for your friends. But today I'm giving recipes that will keep the dents out of the sugar ration and still give plenty of good holiday eating.

Sugar savers or substitutes are plentiful in most localities now and answer the need for sweets without sugar. The homemaker can use light and dark corn syrups, honey, dried fruits, etc.

If you are giving cookies as gifts, wrap them prettily in small boxes well lined with waxed paper. Cover them in gay Christmas wrappings, and anyone will be happy to get a homemade present from you!

Honey, though expensive, will not bring up the price of these cookies which are crispy and well spiced:

Honey Crispies.
(Makes 3 dozen)

½ cup shortening
½ cup honey
2½ cups sifted flour
¼ teaspoon allspice
¼ teaspoon cloves
¼ teaspoon cinnamon
¼ teaspoon salt
1 teaspoon baking soda

Boil shortening and honey together 1 minute. Cool. Add sifted dry ingredients. Roll to ⅛ inch thickness and cut in desired shape with cookie cutter. Sprinkle with colored sugar and bake on a greased baking sheet in a moderate (350-degree) oven. Candied fruit or nuts may also be pressed into the center of the cookies.

Oatmeal has long been a favorite ingredient of cookies. Here the dryness of the cereal is balanced by the moistness of apricots:

***Apricot Oatmeal Cookies.**
(Makes 70 cookies)

1½ cups flour
½ teaspoon soda
1¼ teaspoons salt
¼ teaspoon nutmeg
¾ teaspoon cinnamon
¾ cup shortening
½ cup sugar
1 cup dark corn syrup
1 egg
1 cup mashed, cooked apricots
1¾ cups rolled oats (uncooked)
½ cup chopped nutmeats

Cream shortening and sugar. Add syrup, beat well. Add egg and beat until light and fluffy. Add apricots, oats and nuts; mix thoroughly. Sift flour with other dry ingredients and add, beating well. Drop by half spoonfuls on greased cookie sheet about 1½ inches apart. Bake for 15 to 18 minutes in a 375-degree oven.

If you frost these ginger cookies with a simple powdered sugar icing, you will have a very dressed up cookie:

Soft Ginger Cookies.
(Makes 3 dozen)

½ cup sugar
½ cup shortening
1 cup molasses
½ cup sour milk
3½ cups sifted flour
1 teaspoon soda
1 teaspoon salt
1 teaspoon ginger
1 teaspoon cinnamon

Cream sugar and shortening and add molasses. Beat well. Sift dry ingredients together and add alternately to creamed mixture with milk. Let stand several hours in refrigerator. Roll on floured board and cut into desired shapes with cookie cutter. Place on a greased baking sheet and bake for 15 minutes in a pre-heated oven (375 degrees).

Thinking about an appropriate pudding for the festivities? Here is an inexpensive one which will serve a large quantity. It has a lot of fruit but requires no sugar and only a little honey for sweetening. Serve with a creamy orange sauce, hot.

***Regal Pudding.**
(Serves 10 to 12)

½ cup shortening
½ cup honey
2 beaten eggs
2 cups chopped dried figs
½ cup chopped dried apricots
½ cup white raisins
1 tablespoon grated lemon rind
1 cup grated carrot
½ cup chopped walnut meats
2½ cups flour
1 teaspoon salt
2 teaspoons baking powder
½ teaspoon soda
½ teaspoon nutmeg
¾ cup milk

Cream shortening; add honey; blend; add eggs. Beat thoroughly. Add fruits, rind, carrot and nutmeats. Sift dry ingredients and add alternately with milk. Pour into a greased and floured 8-inch tube pan and bake in a moderate (350-degree) oven 1 hour and 15 minutes. Serve with the following:

Orange Sauce.

3 tablespoons flour
¾ cup sugar
½ cup orange juice
1 cup hot water
1 tablespoon grated orange rind
3 tablespoons butter

Mix flour with sugar. Add orange juice and hot water. Cook until thick, stirring constantly. Add grated orange rind and butter and serve warm over pudding.

Oven Tip.

When baking fruit puddings or fruit cakes, place a pan containing 2 cups water on the bottom of the oven. This will help give greater volume and shiny, glistening top to either pudding or cake.

Making Sauces.

Sauces for puddings are best made in double boiler to prevent them from scorching. It will also help keep them warm until time to serve.

LYNN SAYS:

A Bit of Dressing: Varying the dressing in salads helps add interest to this course. These simple tricks will help:

Use lemon juice and sugar for plain lettuce. Or, mix mayonnaise with shredded cooked beets, chopped hard-boiled egg and pickle relish.

For lettuce, cabbage or fruit salads, you'll like peanut butter blended with rich milk, honey or sugar and salt to taste.

To use French dressing for fruit salads, sweeten with honey and add a dash of lemon juice for taste.

Sour cream is an ideal dressing for mixed fresh fruit salads. Add vinegar or lemon juice to sour cream and season with salt and pepper. Chopped apples and sliced bananas may also be added to the dressing. Pour this mixture over the fruit salad, sprinkle with finely chopped nutmeats and top with maraschino cherries that have the stems left on. Very pretty, indeed!

The Once Over

WNU Service

THE MAN FROM MARS AND THE AMERICAN RADIO

Ogwopi, the Man from Mars, had spent a week-end in America and was most anxious to return without delay. Nothing could make him stay longer. It seems he had spent the time listening to the radio.

"How do you like America?" we asked.

"As the seat of stomach acidity, bleeding gums, scalp troubles, intestinal difficulties and the like it is terrific," he replied.

We didn't quite follow him.

"I had no idea the United States was a place mainly concerned with matters of gastric juices," he continued "Yours is a distinctly pharmaceutical land, isn't it?"

"Pharmaceutical?" we asked.

"Yes," said the Man from Mars. "I devoted most of my visit to learning about America from the radio, a most wonderful device, and I never heard so much talk about pills, ointments, lotions, seltzers, capsules, tablets, purges, etcetera, in my life. You people must really be in very bad way."

We began to understand now.

"One of the chief industries of your country," continued the Man from Mars, "seems to be handling the bad breath and body odor situation, which I take it from the broadcasts, are your foremost national problem."

"Now look," we began.

"And you take it all in such a jolly mood," he kept on. 'So many of the radio references were in song. The handling of B.O., as you call it, in a musical mood is quite original. But doesn't it ever get on your nerves?"

"I suppose that to a person from another planet, totally unfamiliar with our customs, the radio must give a strange impression," we said.

"What do Americans do when not taking vitamins?" he asked.

"Oh, that doesn't take up much of their time," we insisted.

"But it must," said Ogwopi, the Man from Mars. "I'm a fairly active person but I couldn't possibly consider all the vitamins, make the essential selection, take as directed and have a free moment left. And your people's scalps and teeth must be in awful condition."

"Not necessarily," we said.

"The air is jammed with urgent lectures on what to do about them," insisted the Man from Mars. "I made a two-hour check. The coast-to-coast discussions of constipation topped everything else on the air, but the advices on anti-stomach acidity, dry scalp and mouthwashes ran very close. You have my deepest sympathy."

* * *

He was reaching for his hat.

"Oh, one thing," he said in the doorway, "what was the name of that beer that wins wars? I want to tell my countrymen about it. We have our disturbances you know. It might come in very handy."

We gave him the name of six beers and three ales.

* * *

"And that cigar?" he asked.

"Which cigar?"

"The one the announcer says has been giving people poise, contentment, companionship and the feeling of brotherhood for 70 years?"

At that moment we tuned in on the radio inadvertently. A voice demanded, "Are you over 35?"

The Man from Mars zoomed away.

* * *

Global Croonery.

("I have not hesitated to travel from court to court like a wandering minstrel. But always with the same song or the same set of songs."—Winston Churchill.)

A wandering minstrel I—
A thing of shreds and patches,
Of ballads, songs and snatches,
Designed for amity!

My catalog is long;
With special tunes in Russian;
Avoiding all percussion
I sing of right and wrong!

I wander from court to court
To sing of understandings
(While making three-point landings)
To make the battle short!

I deftly tune my lyre
To keep us all as brothers,
And soothe the Poles and others—
And not stir Joseph's ire!

I'm in the minstrel "biz"—
I warble hither-thither,
So friendships may not wither—
But what a job it is!

* * *

Frightened Off

When critics say, "This play's a 'must,'"
I have no yen to get there fust.

* * *

Rhineland Version.

Herr Goebbels has announced that German school children must now work in war factories.

Schooldays, schooldays, dear old golden rule days,
Welding and drilling and sweating, oh!
All for our leader, the so-and-so.

We're glad that in spite of war shortages you can still get Smith Bros. Cough Drops. We'll be gladder still when Victory lets us make all *everybody* needs. Smith Bros.—Black or Menthol—still 5¢.

SMITH BROS. COUGH DROPS
BLACK OR MENTHOL—5¢
TRADE MARK

Household Hints

When turning the mattress, also turn it around, that is, place the end that was at the head of the bed at the foot.

—•—

Never leave pieces of cut-up chicken in water. Some of the good juices and excellent flavor leaches out and is lost.

—•—

If the leg of an old stocking is cut and stretched over the new broom down to a short distance above the end of the straws, it will prevent broom from wearing out so quickly and at the same time make it better for sweeping.

—•—

Chimney soot can be kept down by throwing dry salt on a bed of hot coals, once or twice a week. Dry fuel and good draft helps to check soot and creosote in pipes and chimneys.

—•—

Boil the wick of a kerosene lamp in vinegar before using to keep it from smoking.

—•—

If water is spilled on the page of a favorite book, place a blotter on each side of the page and press with a hot iron. This should remove all moisture without damage to the book.

WORRIED ABOUT BAKING WITHOUT DRY YEAST?

Fleischmann's Fresh Yeast Gives You the Same Good Results!

by Sally Cole
Director of Fleischmann's Testing Kitchen

EVEN though Fleischmann's Dry Yeast has gone to war, you can still bake as easily as ever with Fleischmann's *Fresh* Yeast!

This grand *fresh* yeast gives the same wonderful, dependable results you'd expect from Fleischmann's . . . and you can get as much as you want *whenever* you want.

So if you can't get Fleischmann's Dry Yeast, use Fleischmann's fast-acting *Fresh* Yeast. Use it in this new Quick Roll recipe, next baking day, and see for yourself how satisfactory it is to work with!

And by the way, Fleischmann's Yellow Label Yeast is the *only fresh* yeast that gives you EXTRA vitamins! Order some from your grocer today—a week's supply keeps perfectly in the ice-box.

QUICK ROLLS

1½ cup milk 2 tablespoons sugar
1½ teaspoons salt
1 cake Fleischmann's Yeast
½ cup lukewarm water
3 cups sifted flour
3 tablespoons melted shortening

Scald milk, add sugar and salt; cool to lukewarm. Dissolve yeast in lukewarm water and add to lukewarm milk. Add 1½ cups flour and beat until smooth. Add melted shortening and remaining flour, or enough for easily handled dough. Knead well. Shape into rolls, place in well-greased pan, cover and let rise in warm place, free from draught, until doubled in bulk, about 1 hour. Bake in moderate oven (400°F.) about 20 minutes. Makes 1 dozen.

FREE! 40-PAGE RECIPE BOOK! Send for yours today!

Standard Brands Incorporated, Grand Central Annex, Box 477, New York 17, N. Y. Please send me free copy of *The Bread Basket*, containing over 70 recipes for breads, rolls, dessert breads.

MR. AND MRS. GEO. THIEMAN OBSERVE 30TH ANNIVERSARY

Mr. and Mrs. George Thieman celebrated their thirtieth wedding anniversary Sunday with a family dinner at their home to which they had invited Rev. Calvin Gross huesch and family; Mr. and Mrs. Maurice Murray and twins, and Miss Stella Thieman of Waterloo. Others included a number of brothers and sisters and families, neices and nephews.

SCHOOL OFFICIALS HEAR TALK ON CODE REVISION

Supt. A. L. Kingery and the following members of the Klemme school board: Harvey Barz, Glen Bridges, Harry Gibbs, and C. G. Waterman, went to Britt Monday evening to attend a county meeting of school heads and boards sponsored by the Hancock County Schoolmasters Club on "The Iowa School Code Revision." The speaker was Senator G. W. Hunt, chairman of Iowa School Code Revision. He was introduced by Rep. W. S. Pritchard of Garner.

The Britt Home Economics girls served lunch after the meeting.

CLARENCE NELSON NOW THE OWNER OF MOTOR FREIGHT

Clarence Nelson of Garner, has purchased Ferd Grell's interest in the former Grell & Nelson Motor Truck Freight line and is now in possession of the business.

Mr. Nelson has been associated with Mr. Grell for the past 8 years, the last 6 of which he was part owner of the truck line.

The new business now goes under the name of Nelson Motor Freight Carrier. Mr. Nelson operates three trucks at present and makes daily round trips from Klemme and Garner to Mason City.

Card Of Thanks

Venison And Fish Served At The Wm. F. Greiman Home Sunday To A Large Number

Mr. and Mrs. Wm. F. Greiman entertained a large number of relatives and friends at a venison and fish dinner Sunday in honor of the birthdays of Mrs. Marian Rust, Mrs. John Chambers, Mrs. Frank Sandrey and Mrs. Wm. F. Greiman.

Mr. Greiman had been up in Northern Minnesota hunting and fishing a few weeks ago and the guests enjoyed the unusual treat of eating venison and northern fish.

Those present besides Mr. and Mrs. Wm. Greiman and son Robert were: Mrs. Edna Thada; Mr. and Mrs. Fred Etchen; Mrs. Marian Rust; Mrs. Frances Swalve; Mrs. Frank Sandrey; Mr. and Mrs. Henry Klinge and Nellie Rae; Mr. and Mrs. Art Schoenwetter; Mr. and Mrs. Edwin Josten and Marcille; Mr. and Mrs. J. A. Chambers; Mr. and Mrs. Albert Etchen and Elwyn; and Herbert Greiman and family.

NADINE KIMBALL IS BRIDE OF JUNIOR BLANK, TUESDAY

Miss Nadine Kimball, eldest daughter of Mr. and Mrs. Walter Kimball, Boone, Iowa, former residents of Klemme, and Junior Blank, son of John Blank, Kanawha, were united in marriage at the parsonage of the Klemme Evangelical and Reformed Church on Tuesday evening, December 12th in a double-ring ceremony performed by Rev. Calvin Grosshuesch.

The rites were witnessed by Mr. and Mrs. Clarence Nelson of Garner.

The bride is a graduate of the Klemme high school. The groom is by occupation a farmer and has assisted his father the past few years.

RATION OFFICE WILL BE CLOSED ON SATURDAYS

After January 1st Open Only Each Afternoon 1:00 to 4:00 P. M.

Due to the heavy work load in the office the District Office has asked us to shorten our office hours to the public, so beginning January 1, 1945, we will receive customers from 1:00 p. m. to 4:00 p. m. only We will be closed all day Saturday

All application forms may be picked up in your local town and mailed into the ofice. In applying for supplemental rations be sure to send in the folder and Milcag Rationing Record. (This is not the tire record. We cannot issue "B" or "C" rations without this record.

We thank you for your cooperation.

Trade in Klemme and save.

The Klemme Civic Club will meet Thursday, Dec. 28 at 7:30 p.m.

Mrs. C. F. Keraus was at Garner on business Tuesday.

Mrs. Earl Ruka and daughter, Mrs. Don Branner, were Mason City visitors last Thursday.

Mrs. C. A. Larsen is assisting at the Klemme Food Market each day during the pre-holiday rush.

Mrs. Lyle Wilcox began work at the First National Bank Monday to assist during the rush of making out income tax reports.

Mrs. Earl Schaeffer returned to Forest City Thursday morning after a short visit at the P. M. Wilson home.

Mr. and Mrs. Wallace Pavey and Mrs. John Clements and Jimmie were visiting at the Wayne Pavey home at Webster City, Sunday.

Paul Mueller, who is employed at a large creamery in Des Moines, spent the week end in Klemme visiting with his wife and son.

Mrs. Marian Rust of Garner and Mrs. Edna Thada of Klemme visited over Sunday at the home of Mr. and Mrs Fred Etchen.

Mrs. Lewis Mau and daughters, Maxine and Bonny Jean and Pvt. Carl Dye, were Mason City visitors on Saturday.

Mrs. Ernest Schuldt is reported to be much improved at this writing She is at present staying at the home of her daughter, Mrs. John Suckow.

Alfred Schlei, of Fenton, came Tuesday for a couple of days visit with relatives here and to look after his farm which is tenanted by Jim Larson.

Mr. and Mrs. C. A. Larsen and Clarence, Jr, were dinner guests at the Buford Meyer home at Mason City Sunday. The occasion was Mrs. Larsen's birthday.

Orville Stokesbary was at Britt Tuesday night to referee a high chool basketball game. Stokesbary has been refereeing a number of games this winter.

Carl Finders and family moved to the upstairs of the Levi Klotzbach home temporarily until they can move into their own house in the north part of town, formerly owned by Lloyd Smith

Mr. and Mrs. Fred Barz are building an addition to the southeast corner of their house. Last summer they improved their home with an enclosed porch on the southwest side of the house.

Harry Smith, who fell on the ice and injured himself over a week ago and then went to the County Home for medical care, returned home Saturday. He is now getting along quite well.

Mr. and Mrs. A. L. Kingery were at Mason City Saturday where Mrs. Kingery went through the clinic. She is suffering from a heart ailment and was advised to go to bed and remain there for at least six weeks.

Don Christiance and family moved their household goods over from their farm near Fertile, Sunday, and are now located in their home, the house they purchased some months ago from Mrs. Lena Schroeder. The Carl Finders family have been living in the Christiance residence.

Mr. and Mrs. E. J. Schneider last week moved from the farm 5½ miles east of Klemme to the Fred Becker farm. Their son, Frederick and wife were here to help them. Mr. and Mrs. Fred Becker and their daughter, Mrs. Cecil Katter have moved to the Becker residence in Klemme.

Mr. and Mrs. C. G. Waterman entertained several friends at a six o'clock dinner Sunday evening followed by bridge at three tables. The occasion was also the birthday of George Lawhorn and Mrs. Waterman had a cake with candles on it for him. High couple for bridge were Mr. and Mrs. Lawhorn. Out-of-town guests were Mr. and Mrs. Leo Esbeck of Ventura.

Mr. and Mrs. George Dodd who have lived in the tenant house on the Mitchell Bock farm the past year, Monday moved to the Don Christiance farm near Fertile to begin farming for themselves this coming year.

Mrs. Taalkeus "Tokey" Ahrenkeil came from Marshalltown last Friday for a visit with her grandparents, Mr. and Mrs. T. Blank and her mother-in-law, Mrs. Anton Ahrenkeil and other Klemme relatives. She came especially at this time to help Grandma Blank celebrate her 83rd birthday, which was on Friday, December 8th. Mrs. Ahrenkeil will leave soon for the West Coast to join her husband Lt. Ahrenkeil at Victorville, Cal.

(If any names have been omitted, it was unintentional and we will be glad to have corrections to date.—Editor.)

4-H CLUB GIRL OFFICERS WILL MEET SAT., DEC. 30

Arlene Wille, Klemme, County 4-H President, announces there will be a meeting of local club officers from all 4-H girls' clubs in the county. This will be held on Saturday, December 30, from 1:30 to 4:00 p. m. at the I. O. O. F. hall in Garner.

Songs and musical games used in this year's program will be studied and other club helps will be given which the officers can use at their own club meetings.

Committee members, leaders, and assistant leaders are invited.

WHAT stauncher tree than the oak, and what stauncher friends than ours? Each year at Christmastime we realize more keenly than ever that our success in this community is deeply rooted in the firm soil of friendship. We cannot tell you in so many words how much these friendly associations mean to us, and how we cherish them. But we know you will understand.

In this spirit of appreciation we send our sincere good Christmas wishes to you and to all those dear to you.

The Pubishers

Santa Claus Will Be In Klemme Saturday P. M.

With Big Sleighload Of Treats For All The Boys And Girls

The Klemme Times has just received a wireless from Santa Claus at the North Pole, which reads:

"I am leaving the North Pole today and will arrive in Klemme Saturday afternoon, December 23 at 2:00 o'clock p. m. I have treats for 1,000 boys and girls in Klemme and the surrounding community. Have them on Main Street at 2:00 p. m."

Santa Claus.

So there you are boys and girls, and be sure to be on time as Santa Claus is a busy man and has many more stops on his route.

Rural boys and girls should urge their parents to get them to Klemme in time, as Santa does not want to miss anyone.

Remember, he has a great big bag of treats for every boy and girl in this community.

Don't forget the date: this week Saturday afternoon, December 23 at 2:00 o'clock.

All boys and girls invited, and be sure to tell all of your friends, too.

COMING TO KLEMME SAT. DECEMBER 23

Santa Claus

AUG. LAU WILL HOLD SALE NEXT WEEK WEDNESDAY

Aug. Lau is this week advertising his Public Sale to be held Wednesday, Dec. 27 at the farm 3 miles west and ½ mile south of Klemme.

Mr. Lau will sell 15 head of fine registered and grade Brown Swiss cattle; 3 head of horses, 12 hogs and 250 pullets and hens, besides a lot of good farm machinery. Turn to his adv for full details.

January 5. Amsterdam Township Family Living Program. Topic: "Variety in Winter Meals," at Mrs. Melvin Severson's home.

The first victim of Fascist aggression, Ethiopia, became the first to be liberated.

HELLO, FOLKS!

Mr. and Mrs. Russel Medim are the proud parents of a baby girl born to them at the Forest City hospital on Sunday, December 17, 1944. They also have a little boy in their family. Mr. Medim is the manager of the Klemme Cooperative Creamery Co. here.

Glenn Bredlow Wounded In Action, Died Dec. 6th

SHAMROCKS CHALK UP ONE MORE CAGE VICTORY

The Klemme Shamrocks won their third basketball game of the season here Friday night, Dec. 15th by defeating the Kanawha Bulldogs 43 to 20. The Shamrocks had a slim one point lead at the half as the score stood 10 to 9.

The Litle Shamrocks, undefeated this season, won their game 28 to 22.

Following is the box score of the first string game:

Klemme—43	FG	FT	F	TP
Brinkman. F.	9	2	1	20
Buntenbach, F.	2	4	4	8
Jacobs, C.	2	3	4	7
Peck, G.	1	0	1	2
E. Grosshuesch, G.	0	0	2	0
Ed. Grosshuesch	1	1	2	3
Barz	1	0	0	2
Nuehring	0	1	0	1
Mueller	0	0	1	0
Total	16	11	15	43

Kanwha—20.	FG	FT	F	TP
Severson, F.	1	1	0	3
Larsen, F.	1	2	2	4
Toften, C.	2	0	4	4
Veldhouse, G.	2	0	4	4
Youkle, G.	2	0	3	4
Eliason	0	1	0	1
Total	8	4	12	20

SHAMROCKS DEFEAT GOODELL CAGE TEAMS HERE

The Klemme Shamrocks won a double header basketball game on the home floor Tuesday night by defeating Goodell.

The Little Shamrocks kept their winning streak clear by defeating the Goodell Reserves 16 to 3.

In the first team game lanky Brinkman paced the Shamrock attack by sinking 8 field goals and 2 free tosses for 18 points, with Red Buntenbach next in line with 9 points, Jacobs 8, Peck and Mueller with one apiece to complete the tally.

The Shamrocks' next game will be at Britt, January 8th.

Farmers Should Apply Now For Dairy Feed Adjustment Pay

Farmers who have not applied for their Dairy Feed Adjustment Payments based on their September and October butterfat sales should be sure to do so before December 31st, the closing date for filing application for those months. Application may be made by mail or in person to the Hancock County AAA Office in Garner.

Petition For Drainage Ditch

John Goll and others have petitioned the Hancock County Board of Supervisors for a new drainage district to be established in Liberty township, northwest of Klemme. The Board will appoint an engineer to make an investigation of the proposed drainage system.

KLEMME MAN HEADS MASON LODGE AT GARNER

Bethel Lodge, A. F. & A. M. of Garner elected Edward J. Thompson of Klemme as worshipful master for the coming year. Other elected officers were Walter Edelen, Garner, senior warden; Verne Pringle, Garner, junior warden; F. E. Morrow, Garner, secretary; C. G. Waterman, Klemme, treasurer, and B. L. Prouty, Garner, trustee.

Other officers will be appointed by the worshipful master.

Card Of Thanks

We wish to take this means of expressing our sincere thanks to all who gave us help during our bereavement, and thanking all who contributed flowers in memory of Grandma Dorothea Schroeder.

1tp —The Schroeder Relatives.

Nassau, capital of the Bahama islands, has 20,000 inhabitants.

SON OF MR. AND MRS. FRANK BREDLOW OF LIBERTY

Died Of Wounds Received In Battle On German Front

Monday the War Department notified Mr. and Mrs. Frank Bredlow of Liberty Township that their son, Glenn Bredlow, died December 6th from wounds received in action while engaging in battle on the German front.

Glenn is the first Klemme man to die overseas.

Besides his parents, he leaves to mourn his death, his wife, the former Miss Hazel Hefte, daughter of Mr. and Mrs. Austin A Hefte of Armarilla, Texas; Marvin in the South Pacific area, LeRoy, Roland and Lorraine at home.

Mrs. Glenn Bredlow is staying at the Bredlow home in Liberty township.

FUNERAL SERVICES HELD FOR FORMER KLEMME LADY

Mrs. George Dickinson Died At The Home Of A Daughter In Cal.

Mrs. Henry Jost of Klemme, and Mrs. Marvin Lakin of Mason City, left Friday evening for Sioux Rapids, Iowa, to attend the funeral services on Saturday of Mrs. George Dickenson.

The Dickinson family lived in Klemme a number of years ago. Mr. Dickinson was the proprietor of a restaurant and pool room in the old theatre building which has been torn down, and was just west of the present Quandt Cafe.

Funeral services were held Saturday afternoon from the Green funeral home at Sioux Rapids.

Mrs. Dickinson passed away last Monday evening at a hospital in Burbank, California. Death was due to a heart ailment.

She had been living with her daughter, Mrs. Allis Koons and family for the past two years. Mrs. Dickinson leaves one son, George, of Indianapolis, Ind.; five daughters, Mrs. Gilmore Reibsalmon and Mrs. Percy Reibsalmon of Cedar Falls, Iowa, Mrs. Glen Powers and Mrs. Allis Koons of Burbank, Cal., and Mrs. Wm. Shoemaker of Sioux Rapids, Iowa; and twelve grandchildren. Mr. Dickinson passed away June 6, 1939. He was a brother of the late Mrs. Amanda Kirkwood of Mason City, formerly of Klemme.

China had a flood starting in 2357 B.C. which lasted 152 years.

GOING OVERSEAS

LT. HAROLD R. JOST

Lt. Harold R. Jost writes his father, Henry Jost of Klemme, that he was recently promoted to first lieutenant and is soon to leave for overseas duty. He has been stationed at New Orleans, La., as priorities and traffic officer. His duties were to regulate and issue priorities for men and materials traveling by aircraft. He entered the service in May, 1942. Lt. Jost is a graduate of the Klemme High School.

OBITUARY OF GRANDMA DOROTHEA SCHROEDER

DOROTHEA SCHROEDER NEE MUELLER was born November 9, 1851 at Barnstedt, Hanover, Germany. She was baptized and later confirmed in the Lutheran Church at Barnstedt.

In the year 1873 she was united in marriage to George Schroeder. Three children were born in this home. In 1883 the family came to America and found a home at Caledonia, Minnesota, where they lived for 13 years. In 1901 they came to Klemme, Iowa, where Mr. Schroeder became proprietor of the Klemme Meat Market.

Mr. Schroeder preceded his wife in death on February 26, 1914. Then one after another the children were called from this earth. Charles died October 17, 1909; Selma (Mrs. Croner,) died June 19, 1929; and Henry died December 2, 1942.

After the death of her husband Mrs. Schroeder remained in her home at Klemme until 1930, when she moved to Chicago to make her home with Mr. and Mrs. Henry Schroeder. She returned to Klemme in April 1943, and until the time of her death lived with Mrs. Charles (Lena) Schroeder.

Grandma Schroeder, as she was known to most of us, had a pleasant personality. She always had a word of cheer for her friends, and even during the last years of her ilfe, she bore her sufferings cheerfully and with little complaint.

She fell asleep Friday noon, December 15, 1944, at the ripe old age of 93 years, 1 month and 6 days.

Surviving her and mourning her death are her three grandchildren:

Albert Schroeder of Chicago, Illinois
Mrs. Cleo Ingle of Waukesha, Wisconsin
Mrs. Wm. Johnson of Chicago, Illinois
and six great grandchildren.

Text: 24,29. Abide with us, for it is toward evening, and the day is far spent.

Roast Pork Rings in a Merry Christmas
(See Recipes Below)

Yuletide Plans

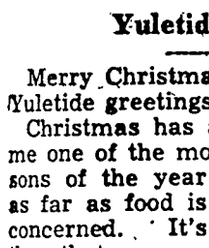
Merry Christmas and the best of Yuletide greetings to you!

Christmas has always seemed to me one of the most interesting seasons of the year as far as food is concerned. It's then that you can bring out the best recipes for your favorite foods and put on the best feast your table has seen.

Your choice of meat may be roast pork, roast beef with Yorkshire pudding, or one of a beautifully roasted fowl. Relishes add color and spice to the meal, vegetables will beautify the table, and desserts can add the rich finishing touches to a fully satisfying meal.

***Crown Roast of Pork.**

Select the ribs of a young pig and have the crown prepared at the market. Wipe with a damp cloth and sprinkle with salt and pepper. Dredge with flour and place on a rack in a dripping pan so that the rib ends are down and the meat part up. If this is not possible have meat part down and wrap each of the rib ends in salt pork or thick slices of bacon. Cook in a moderate oven, allowing 30 minutes to the pound. When ready to serve, place the roast on a large platter and garnish each rib end with a plump cranberry. Fill the cavity with buttered string beans and julienne carrots. Arrange candied sweet potatoes around the outside of the platter. Place potatoes alternately with cinnamon apples.



If rib roast of beef is your choice and points are low, get one of the utility grades of beef and cook it until tender:

Rib Roast of Beef.

Select a 2 to 3 pound rib roast, wipe with a damp cloth and season with salt and pepper. Place the roast, fat side up, in a roasting pan and bake in a moderate oven until tender and easily pierced with a fork.

Forty-five minutes before roast is done, prepare the pudding:

Yorkshire Pudding.

1 cup sifted flour
¼ teaspoon salt
1 cup milk
3 eggs, well beaten

Sift flour and salt together. Add milk and eggs and beat vigorously with a whip beater. Place a spoonful of drippings from the roast into muffin pans and pour batter into them. Or, pour around the roast in the roaster and bake about 15 minutes at 400 degrees F. This pudding puffs up just like popovers and must be served immediately. It must be beaten thoroughly as the lightness of the mixture depends upon the air which is beaten into it.

Vegetable Platters.

There are many vegetable combinations that make up the colorful platters that are so desirable at a big holiday dinner.

Suggestion I. Arrange cauliflower in center of platter and surround with French style green beans and julienne carrots.

LYNN SAYS:

Platter Suggestions: Use large platters to prevent overcrowding. Garnishes or food should never hang over the edge of the platter.

Tomato wedges, cucumber slices and radish roses are old stand-bys for garnishing. Fringed celery, stuffed celery sticks, pickled orange or onion slices, gherkins cut in fan shapes, carrot curls, stuffed olives or green pepper halves filled with cream cheese help pretty the platter.

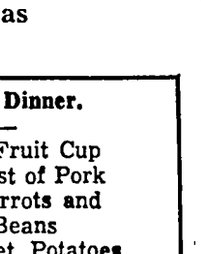
Christmas Dinner.

Cranberry Fruit Cup
*Crown Roast of Pork
Julienne Carrots and
Green Beans
Candied Sweet Potatoes
Cinnamon Apples
*Potato Rolls
Pink Grapefruit and Onion Salad
Assorted Relishes and Jam
Beverage
*Mincemeat Fruit Cake
*Recipe given.

Suggestion II. Make a spinach souffle in a ring mold and serve creamed mushrooms in center and browned mashed potato rosettes around the outside of the ring.

Suggestion III. Make a green pea ring and serve creamed onions, carrots or parsnips in center.

Suggestion IV. Serve carrots or green beans in a mound on center of platter, and alternate parsleyed potatoes and beet around the center vegetable.



If you require a sauce to serve with vegetables, here is a good tangey one:

Mock Hollandaise Sauce.

2 egg yolks
1 tablespoon water
1 tablespoon lemon juice
½ teaspoon salt
⅛ teaspoon pepper or paprika
1½ tablespoons butter
1 tablespoon flour
1 cup boiling water

Mix and stir well the first five ingredients. Set aside in top section of double boiler. Melt butter, add flour and when it bubbles, add water slowly, stirring constantly. Pour in egg mixture and cook in double boiler until smooth and thickened, stirring constantly to avoid curdling.

Serve hot rolls with your favorite jam or jelly:

***Potato Rolls**

1 cup potato water
½ cup mashed potato
½ cup water (lukewarm)
½ cup sugar
1 yeast cake
1 teaspoon salt
4½ cups sifted flour
¼ cup shortening

Crumble yeast, add salt, sugar and water. Add potato and potato water. Stir in flour to make a soft sponge. Blend in melted shortening. Add remainder of flour and knead until smooth. Place in an oiled or greased bowl. Let rise for 2 hours. Knead. Let rise until double in bulk. Shape into rolls. Placed on oiled sheet or muffin pans. Let rise again until light, about 30 minutes. Bake 20 to 30 minutes in a 400-degree oven.

If you forgot to make your fruit cake early this year, here is a simple one that does not require too much fruit since it is made with mincemeat. Good, too!

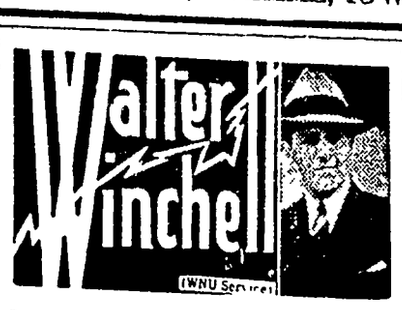
***Mincemeat Fruit Cake.**

½ cup shortening
1 cup sugar
2 eggs
3 cups prepared mincemeat
1 cup raisins
¼ cup candied lemon peel
¼ cup candied orange peel
1 cup currants
1 cup chopped nutmeats
3 cups sifted cake flour
1 teaspoon baking soda
¼ teaspoon salt

Cream shortening and sugar, then add lightly beaten eggs and beat thoroughly. Add mincemeat, fruit peel and nutmeats. Sift dry ingredients together and fold into the mixture. Pour into paper-lined angel cake pan and bake in a very slow (275 to 300-degree) oven for 2 to 2½ hours. This makes a three pound fruit cake.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.



Man About Town:

Noel Coward will apologize for his careless comment on Brooklyn overseas soldiers in hospitals. . . . Is Sec'y Morgenthau resigning from the Cabinet after this bond drive? . . . Washington insiders insist that Att'y Gen. Biddle will inherit a U. S. Supreme Court bench. His successor probably will be Tom Clark of the Dep't of Justice.

Bob Hope's new col'm is said to have already made 60 gazettes. His weekly take is about a "G." . . . Photoplay's coming out with an article on Bette Davis and her Corporal chum—quoting all items on them. When Bette was asked if she planned marrying, she replied: "I am 36 and too old for such nonsense!" . . . And just what is the "March On Washington Movement," which is listed in the N. Y. Classified (Red Book) on page 46?

Many secondhand Army cars are now being offered by dealers at $400 each. Some paid $200 for them. It costs another $60 to repaint from the Army color. . . . If you think there is no racket on the cig shortage, how come so many now show up wrapped in cellophane?

The Red Cross in Hawaii and Australia sent out urgent requests for publicity women, who are needed. Salary: $150 per month (to start) plus room and board. . . . By now, each of the Army nurses who escaped from Bataan has been promoted to at least the rank of Major. . . . Emergency surgery saved the index digit of talented Ethel Smith, the organist. Almost lost it in H'wood preparing sandwiches for servicemen. . . . Despite the recent reports, pals of the heirs insist the N. Y. Yankees team is not for sale now. Unless, of course, you have a fabulous offer. . . . 75 new mags will hit the stands within 6 months.

Insiders hear that the banks are keeping a record of all large bills for Mr. Whiskers. From "C" notes up. The reason may be to call them in eventually and ask owners how they got them. Also to check on black marketeers, many of whom are offering 2 per cent to get them changed into 10s, 20s, and 50s.

Upton Close hasn't yet offered us any documented proof that Gov't or other pressure groups got him fired off NBC. . . . When depositors of a certain bank (not in N. Y.) read that an accused Hitlerooter was in the owner's employ—they withdrew nearly six million dollars by noon day of publication here! . . . Betty Hutton, we hear, is worth nearly a million slugs, and can't find a H'wood house at any price.

Sallies in Our Alley: Buss Fawcett, publisher (or, if you prefer, the mag-nate), reports on the maid sitcheeayshun in H'wood. Alexis Smith's new maid was all dolled up the other day ready to accompany Alexis to the studio. The actress politely reminded her that she was hired as a housemaid, not as a personal attendant. To which the gal exploded: "Nutz to housework, madam. I only took the job so I could meet Errol Flynn." . . . Sunny Skylar offers cigarette-shortage gag No. 66543, to wit: "The cig famine has slowed the tobacco auctioneers down to a drawl."

Memos of a Midnighter: That deafening explosion was Carole Landis screaming back at the Shuberts, who scolded her for missing rehearsals, etc. . . . Judy Garland has her heart set on a Broadway musical and may not resume in H'wood for a while. . . . Garbo is no longer a vegetarian. Has to build up resistance by eating food. . . . Smartest looking pair at Gilmore's were the Ronald Colmans (Benita Hume). . . . That German ace (who is credited by the Nazis with bringing down 102 Allied planes) was shot down by an American, now back here. But I mustn't reveal his name. Why's that?

The Late Watch: A 60-year-old female resort owner is having nightly rendezwoos with a caballero, age 25. . . . When Billy Rose's "7 Lively Arts" premieres it'll cost him one mill-and-a-¼, including the fee for the Ziegfeld Theater. . . . Broadway's toughest detectives are looking for that louse who beat up a beribboned Army officer in a hotel. Cut his face to shreds with a broken glass. . . . Beaverbrook, they say, will invest 20 million to make Canada the world's movie center. . . . Maria Montez's earrings have her husband's pix on them. He's Pierre Aumont, overseas.

Newspapermen in New York hear rumors about the OWI pictorial service. That it may be taken over by a news syndicate. The A.P.? . . . Socony will be the new sponsor of Info Please starting Feb. 12th. Same time, same station. . . . Returned Marines boost Ty Power this way: "We heard he was a regular guy, but his rating went away up when the rumor spread that he had even done some brig-time!" . . . The Paris edition of the H-Trib goes to press next week. Everett Walker of the staff here has gone to edit.

THE TAX TREE

("In his speech Mr. Roosevelt, quoting from the poem 'Trees,' told of a town in Germany which had a great forest which for 200 years had been so profitable to the community that nobody had ever had to pay any taxes."—News item.)

I think that I shall never see
My taxes paid by any tree;
A tree that knows the net and gross,
And on the fifteenth comes across;
A tree that shields me in the storm
And understands that tax-blank form;
Each branch a leafy helpmate gay—
And every leaf a CPA.

But how I wish I had a tree
That I could count on quarterly:
A tree that always could be found
Each time the fifteenth came around,
Botanically quite a wow
With Einsteins swinging from each bough,
And all cash worries dark and grim
All nestled in some upper limb!

How swell indeed to have a tree—
No forest (one smart tree for me);
A tree that I could point to when
They sent around those tax-force men
And say "I'm busy! Get it, pest,
From underneath that robin's nest!"
And if for further facts you grope
The woodpecker will have the dope.

But, ah, I feel I'll never see
A tree that lifts the job from me.
A tree that looks at Frank all day
And lifts her leafy head to pray
That it can understand what he
Will ask in schedules B and C
A tree that may in summer wear
An addograph within its hair. . . .

Tax forms make fools of men like me—
I wish that God would make that tree!

* * *

Huh!

General Franco says Spain has never been a Fascist state, nor has he ever been a Fascist or Nazi sympathizer. How in the world did an idea to the contrary ever get around.

* * *

The racing season in many parts of the country will soon be over and we wonder about the millions of people who jam the tracks day after day. Where do they go? What becomes of them? Do they crawl under a pile of old mutuel tickets and hibernate through the winter months?

* * *

It surely seems good to have an election over and get back to civilized habits and Christian behavior.

* * *

"Donald Nelson Ordered Back to China to Form WPB There"—headline.

—*—

How wonderful it must seem to Donald to think back on those comparatively easy days with Sears-Roebuck!

* * *

New York hotels are considering limiting the stay of any guest to five days. That's silly. It takes that long to get into an elevator.

* * *

No Time to Rest

"For Sale—Bees and hives; also rattan furniture. 651 Main. East Haven."—New Haven Register.

For Joyful Cough Relief, Try This Home Mixture

Saves Big Dollars. No Cooking.

This splendid recipe is used by millions every year, because it makes such a dependable, effective medicine for coughs due to colds. It is so easy to mix—a child could do it.

From any druggist, get 2½ ounces of Pinex, a special compound of proven ingredients, in concentrated form, well-known for its soothing effect on throat and bronchial membranes.

Then make a syrup by stirring two cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Put the Pinex into a pint bottle and add your syrup. This gives you a full pint of cough medicine, very effective and quick-acting, and you get about four times as much for your money. It never spoils, and is very pleasant—children love it.

You'll be amazed by the way it takes hold of coughs, giving quick relief. It loosens the phlegm, soothes the irritated membranes, and helps clear the air passages. Money refunded if it doesn't please in every way.

Down River

A bottle containing the name and address of Jeanette Bennett of Elkader traveled some distance before it was picked up. It was thrown into the Turkey river at Clermont, July, 1940, by Jeanette. Four years later it was discovered by Dorothy Thul, of Graf. The bottle had floated down the Turkey river and entered the Mississippi river, traveling a distance of approximately 50 miles. The girls, now corresponding, have learned that both are freshmen in high school and are approximately the same age.

Too Close For Comfort

Mr. and Mrs. Wallace Blair of Lamoni, after returning home one evening recently were in darkness when the electric current failed. Telephone service also was disconnected. Mr. Blair walked to the light plant to inform the management of the difficulty, thinking there might be a "hot" wire somewhere. The next morning, Bill Houck questioning Wally as to his path of the night before, found he had walked within six inches of a 2,400 volt wire.

Going Strong

The headlines of a recent copy of the Sioux City Air Base newspaper, "The Flying Sioux, read "Janitor William Lee, Oldest Civilian Keeps Fighting at 88." Mr. Lee, the oldest employee at the air base, drives 45-mile round-trip to Moville daily, to keep up his work as janitor at the parts equipment warehouse. Doctors examining Mr. Lee during the time he was applying for the job, advised him they could not believe he was 88 years old if he had not had documentary proof. Mr. Lee says, "If the day ever comes when they draft men my age, I am ready."

SCHOOL NEWS

JUNIOR CLASS NEWS
—By Jeanne Trumbell.

The Senior girls decorated the tree and bulletin board of the study hall with strings of pop corn and cranberries. Everything looks very much like Christmas. All that is missing is the tinkle of sleigh bells, Santa Claus and his reindeer.

We have finished the chapter in Business Law on Partnerships, and are now starting the chapter on Corporations.

In English Literature we are reading the Readers Digest. We find the articles very interesting.

In Typing Class, Ruth Bell, Ivan Blumer and Jeanne Trumbell have written over thirty words a minute.

In Economics, we have finished the chapters on Exchange and we are starting the chapters on Distribution.

SOPHOMORE CLASS NEWS
—By Lois Ann Lau.

We are glad to get another girl in our class this week. Phyllis Christiance, who attended school in Hanlontown the first part of the year, started here Monday. We now have eight girls in the class.

Today in Biology we had special reports on "The Gift of Tongues, "The Tagged Muskrat," and "The Passing of the Saber Toothed Tiger."

We have been studying about the Middle Ages in World History.

Some new work-books have been purchased for the English Classes.

Geometry, to most of the Sophomores, is hard as ever. Probably it is because we have found that once you get behind in note-book work it is very hard to catch up again.

FRESHMAN CLASS NEWS

We have been studying Shakespeare's play, 'Julius Caesar," in English. We have been acting out some of the parts.

We are working on Multiplication and Division of Polynominals in Algebra I. We are beginning to enjoy working the written problems.

Our work in Science fits in very appropriately with the season of the year We are working on the Unit in Light.

A bridge recently built in Iraq is lowered 20 feet under water to permit ships to pass over it.

JUNIOR HIGH NEWS
—Dorance Baack, Reporter.
Mrs. Clara Smith, Teacher

In the Seventh Grade Geography we are studying about fisheries of the United States.

This week in school Merlin Brinkman got hurt when he fell against the bleachers. He was taken home, and Friday he came back to school. We were all glad to see him back.

This week we are finishing our Christmas projects and are decorating our Christmas tree and our room.

In the Eighth Grade Arithmetic they are working on Equations.

In Science in the Seventh Grade we finished our textbook and are now working on "Life Through the Ages."

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
Miss Bugh, Teacher

For Art, we made Santa Clauses and Christmas wreaths. They are very pretty above the blackboard.

In Music Class, we have been singing Christmas songs which we enjoy very much. During rest periods, we listen to Christmas music played on the phonograph.

Miss Bugh has been reading Christmas stories and poems to us. We like to hear them.

FIFTH AND SIXTH GRADE NEWS
Mrs. H. G. Voetberg, Teacher

We now have a Christmas tree in the front part of our room. Each morning before school we have the lights on.

This week we began making Christmas gifts during our Art classes.

Iris Schaefer has been absent for two days this past week.

In Fifth Grade Geography we have completed our Unit on the West South Central States. Our next group of states will be the East South Central States.

In Sixth Grade Language we have begun work on the parts of speech. We are now having nouns.

This week our Weekly Reader had a short play in it, "The Christmas Fire." This was a Christmas play adapted from a Mexican legend. We chose characters and each person took their part very well.

BASKETBALL SCHEDULE

Jan. 8. Britt, there.
Jan. 11. Thornton, there.
Jan. 15. Ventura, here.
Feb. 2. Kanawha, there.
Feb. 8. Hayfield, here.
Feb. 16. Garner, there.
Feb. 19. Britt, here.
Feb. 23. Swaledale, here.

INSPECT ENGINE FOR R. E. A. PLANT NEAR KLEMME

M. C. James, president, and I. V. Rasmus, secretary of the Hancock County Rural Electric Cooperative, recently were in Springfield, Ohio to see the test run of a diesel engine which is soon to be installed in the REA booster plant south of Klemme. The diesel engine is to furnish Hancock County electric energy during peak loads.

Noel! Noel!

While ageless Christmas carols fill the air this thought comes to mind. We would like to share with you our Yuletide happiness, and to feel that in this year of grace, 1944, Christmas will mean more to you than it has meant for many years past.

GOOD CHEER! There's nothing quite like it. And good cheer is an affair of the heart. It cannot be withheld and hoarded to gain added value with the days or years. Good cheer must be *spent!*

Let us all radiate good cheer this Christmas of 1944, for there are reasons enough for good cheer if we but pause to reflect.

Merry Christmas greetings from all of us to all of you.

WEEKLY NEWS ANALYSIS

Losses Pinch German Economy; Civil Strife Upsets Greece; 4-H Selects National Champs

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Displaying awards captured in national competition at the 4-H club's 23rd annual congress in Chicago, Ill., champs include (left to right) Mildred Reed, girls' leadership winner; Donald Mowery, boys' achievement winner; Mary Jo Morgan, girls' achievement winner, and Donald Sullivan, boys' leadership winner. (See: 4-H.)

4-H:
Champs

Left fatherless at 15, with the family deserted by the hired hand, young Donald F. Mowery of Terre Haute, Ind., took upon himself the man-sized job of running a 158-acre farm. At 18, he had earned nearly $14,000, and with it, the 4-H club's boys' national achievement championship at the 23rd annual 4-H congress in Chicago, Ill.

Adjudged the girls' national achievement winner was 19-year-old Mary Jo Morgan of Laurel, Miss., with an income of $6,808.25 drawn from nine years of club work in gardening, canning, clothing, foods, poultry and home improvements. Both boy and girl winner will receive a trophy from the president and a $200 college scholarship.

To 19-year-old Donald F. Sullivan of Potsdam, N. Y., and 20-year-old Mildred Reed of Bristol, Conn., went the national boys' and girls' 4-H titles for leadership in their clubs and communities. Awards for these honors are the same as in the achievement fields.

PEARL HARBOR:
Trials Off

Because separate army and navy investigating boards found that Maj. Gen. Walter C. Short and Rear Adm. Husband E. Kimmel were guilty only of errors in judgment in defensive preparations at Pearl Harbor at the time of the Japs' attack, the war and navy departments decided to drop courts-martial proceedings against them.

Adm. Kimmel

At the same time, the departments declared that the boards' findings would remain secret for the duration so as not to impair national safety.

Although not providing the grounds for courts-martial, the two commanders' errors in judgment were serious enough to warrant their retirement from service, it was said.

LIBERATION:
Political Scuffles

Diplomatic as well as military problems pressed the Allies in Europe, with British troops coming to the assistance of the rightist government in Greece in the latter's fight against leftist elements, and the U. S. condemning Britain's interference in Italian politics.

Of the two, the situation in Greece was the most serious, with many killed and injured in rioting following the leftists' refusal to give up their arms on the grounds that the rightists' were being allowed to keep theirs. With Greece on the threshold of the vital Suez canal passage from the far east, Britain maintained a deep interest in the situation. Said Britain's commander in Greece, Major General Scobie: ". . . I stand firmly behind the (rightist) government, and shall aid them to the limit of my resources. . . ."

Although directly slapping at Britain for its resistance to the naming of Count Carlo Sforza as foreign minister in a new Italian regime, the stiffening U. S. State Department also declared that all other united nations should be given full opportunity to develop their own democratic forms of government.

WAR PRODUCTION

To prevent the possibility of incurring shortages in the Japanese war, U. S. arms production will be maintained at substantial levels after Hitler's fall, with only about 20 per cent reduction in output.

As a result of the government's new plans, only about 2,000,000 rather than 4,000,000 people are expected to be released from war industries on V-E (victory in Europe) day, and manpower and materials controls probably will be retained for the most part.

GERMANY:
Army Commands

With the great battle for Germany raging along the western front, the country's top army commanders took over complete control of military operations from intuitive Adolf Hitler.

Under supreme command of foxy Field Marshal Von Rundstedt, close to Hitler since his rise to power in 1933, German generals were using every trick in the book in an effort to slow up the Allies' powerhouse drive to the Rhine. Masses of field artillery were concentrated against vital Allied points; tanks were thrown in in counterattacks to blunt Allied spearheads, and green troops were seasoned on less active fronts and then hurled into the main fighting.

Despite tremendous German losses, the Nazis were reported to have no less than 6,000,000 men afield on all fronts, including supply and maintenance units. Although only about 1,250,000 between 19 and 46 were said to be of crack quality, the high command has shown a disposition to sacrifice the inferior troops in forward and rear-guard actions, where they would eventually be written off.

Economic Pinch

Pinched on the military front, Germany will be equally pinched at home this winter, economists predict, what with the reduction in Nazi occupied territory resulting in decreased food and steel supplies.

Prior to this summer, both the German army and home front were well fed as a result of food imports from conquered nations; but with the Allies advancing both in the east and west since midyear, the Nazis have been compelled to fall back before being able to stock up with 1944 harvests. In addition, 1944 agricultural production in Germany has suffered because of labor and fertilizer shortages.

At the height of their European conquest, the Nazis controlled a continental steel industry with a capacity of 60,000,000 tons; but here again, German retreats resulted in the loss of about 24,000,000 tons in Italy, France, Belgium, Luxembourg, the Balkans and Hungary, and Allied bombings were estimated to have chopped off an additional 6,000,000 tons in the Reich itself.

Hard Fighting

Their backs to the wall, the Nazis still fought viciously in an attempt to stave off the steady Allied surge to their homeland. Latest threat developed in southwestern Hungary, where a great Russian breakthrough beyond the Danube carried within 40 miles of the Austrian frontier.

As the Reds rushed onward, the Nazis were expected to reform their lines around 50-mile-wide Lake Balaton, which would appreciably decrease the length of their front at a period of the war when the economy of manpower, rather than of maintenance of territory, was the overriding consideration.

On the western front, most spectacular advance was in Lieut. Gen. Patton's drive on the vital coal-laden Saar basin, but hardest fighting centered east of Aachen, where the U. S. 9th and 1st armies continued to grind forward toward the edge of the sprawling Cologne plain, with the Reich's industrial heart about 20 miles away.

MISCELLANY

Even prisoners are doing their part for Uncle Sam in the war. Inmates have turned out $25,000,000 of industrial products since July, 1942, including steel pontoons, submarine and cargo nets, work garments, blankets, rope, parachute cords, stretchers, camouflage netting and ammunition boxes. In addition, prison farm production has increased to $43,556,343 annually.

PACIFIC:
Real Sailor

Interesting sidelight on the war in the Pacific, which saw continued bad weather hampering the U. S. drive on Leyte, was crusty little Admiral Halsey's postponement of a bombardment of Manila to rescue 38 American pilots forced down a-sea.

As Admiral Halsey's Third fleet sailed toward the great Philippine port, it encountered a gusty storm, and 40 of its pilots were caught in the air. When a tabulation showed them to be missing, Admiral Halsey called off the raid, ordering the fleet to search for the fliers.

After an extensive combing of the sea, 38 of the airmen were rescued. Then, the salty little admiral ordered full steam ahead for Manila.

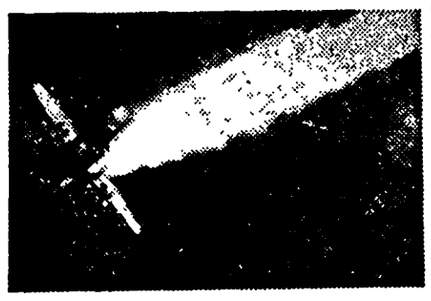
PENSIONS:
For Vets' Widows

Getting together to settle their differences on the subject, the house and senate shaped a common measure on providing pensions for widows and orphans of World War I vets and sent it to the White House for approval.

Under a bill passed by congress, widows of World War I vets, having an income of less than $1,000 a year, would be eligible for a $35 monthly pension, while widows with children, with income of less than $2,500 annually, would get $45 for the first child and $5 for each additional. The bill also provided payment of $18 for one orphan and $36 for three, plus $4 for each additional.

Although passed four times before by the house, such pension bills previously were pigeon-holed before they could reach the senate floor.

Death Run



Hit by anti-aircraft fire after attack on German switchyards at Munich, this B-24 burst into flames, slipped over on its side, and plummeted to earth.

Army Air Force photo records the sensational, but chilling, picture.

STATE DEPARTMENT:
More Changes

With Big Businessman Edward Stettinius taking over as secretary of state, other big business names were added shortly after to the state department's roster, with the appointment of William Clayton and Nelson Rockefeller as the new chieftain's assistants..

Formerly surplus property disposal head, Clayton, prominent southern cotton broker and business associate of Secretary of Commerce Jesse Jones, will be in charge of foreign economic affairs. Son of John D. Rockefeller Jr. and presently coordinator of inter-American affairs, Rockefeller will handle U. S. relations with the Latin republics.

In other big shifts in the department, career-diplomat Joseph C. Grew was named undersecretary of state, and Archibald MacLeish was put in charge of public and cultural relations. U. S. ambassador to Japan from 1932 to Pearl Harbor, Grew, who repeatedly warned of the aggressivve designs of the Nipponese, served as undersecretary for a time under Calvin Coolidge.

WORLD AVIATION:
End Confab

Amid much reciprocal compliment and bowing, the international aviation conference came to an end in Chicago, Ill., after 37 days of continuous sessions in which framework for a world civil air organization was constructed and certain flight principles established.

Permanent acceptance of the program, however, will be dependent upon ratification by the 54 allied and neutral nations after the war, with an interim organization to be situated in Canada maintaining the basic structure during the length of the conflict. Powers of the organization will merely be advisory, except for authority within its own body.

As a whole, delegates favored the principles of allowing flight over their territories and landings for other than commercial purposes. Great Britain, for one, however, balked over the proposal to permit planes from different countries to operate commercially in any particular nation unless quotas were established for each one.

COTTON

With U. S. cotton hard pressed by cheaper foreign production, Secretary of Agriculture Claude Wickard proposed a plan under which the government would subsidize the small planter with the view toward financing his entrance into new agricultural fields. As another approach to the problem, Wickard suggested a two-price system under which parity would be paid for domestic consumption, with exports disposed of at prices prevalent in the world markets.

Ernie Pyle's Slant on the War:

Air Crew Invited Jerrys To Make Daily Mail Stop

Fighter Pilots Are Forgotten Men Despite Their Brilliant Work

By Ernie Pyle

(Editor's Note): This dispatch was written and first published when Pyle was with the GIs during the air battles in French North Africa. He is currently taking a much needed rest in New Mexico.

A FORWARD AIRDROME IN FRENCH NORTH AFRICA.—While bad weather stymies the ground fighting in Tunisia, the air war on both sides has been daily increasing in intensity until it has reached a really violent tempo.

Not a day passes without heavy bombing of Axis ports, vicious strafing of cities and airdromes, losses on both sides and constant watchful patrolling.

Ernie Pyle

Here, at one of our airdromes, all of us can assure you that being bombed is no fun. Yet these tired, hard-working Americans jokingly decided to send a telegram to Allied headquarters asking them to arrange for the Jerrys to stop there each evening and pick up our mail.

I am living at this airdrome for a while. It can't be named, although the Germans obviously know where it is, since they call on us frequently. Furthermore, they announced quite a while ago by radio that they would destroy the place within three days.

I hadn't been here three hours till the Germans came. They arrived just at dusk. And they came arrogantly, flying low. Some of them must have regretted their audacity, for they never got home. The fireworks that met them were beautiful from the ground, but must have been hideous up where they were.

They dropped bombs on several parts of the field, but their aim was marred at the last minute. There were no direct hits on anything. Not a man was scratched, though the stories of near misses multiplied into the hundreds by the next day.

One soldier who had found a bottle of wine was lying in a pup tent drinking. He never got up during the raid—just lay there cussing at the Germans.

When the raid was over he was untouched, but the tent a foot above him was riddled with shrapnel.

• •

Another soldier made a practice of keeping a canteen hanging just above his head. That night when he went to take a drink the canteen was empty. Investigation revealed a shrapnel hole, through which the water had run out.

Another soldier had the front sight of his rifle shot off by a German machine-gun bullet.

Some of the soldiers were actually picking tiny bits of shrapnel out of their coats all the next day. Yet, as I said, not a drop of American blood was shed.

When this airdrome was first set up the soldiers dug slit trenches just deep enough to lie down in during a raid, but after each new bombing the trenches get deeper.

GIs Outdig WPA.

Everybody makes fun of himself—but keeps on digging. Today some of these trenches are more than eight feet deep. I'll bet there has been more whole-hearted digging here in two weeks than WPA did in two years.

The officers don't have to hound their men. They dig with a will of their own, and with a vengeance. If we stay here long enough we'll probably have to install elevators to get to the bottom of the trenches.

After supper you see officers as well as men out digging. Each little group has its own trench design. Some are just square holes. Some form an L. Some are regulation zigzag.

The ground here is dry, and the trenches don't fill up with water as they do in the coastal and mountain camps. The earth is as hard as concrete. You have to use an ax as well as a pick and shovel.

• • •

You'd love our air-raid alarm system. It consists of a dinner bell hanging from a date palm tree outside headquarters. When the radio watchers give the order the dinner bell is rung. Then the warning is carried to the far ends of the vast airdrome by sentries shooting revolvers and rifles into the air. At night it sounds like a small battle. When the alarm goes the soldiers get excited and mad, too. When the Germans come over the anti-aircraft guns throw up a fantastic Fourth of July torrent of red tracer bullets.

But to the soldiers on the ground that isn't enough, so they let loose with everything from Colt .45s up to Tommy guns.

It happens that my best flying friends in this war have been bomber men, but I wish somebody would sing a song, and a glorious one, for our fighter pilots. They are the forgotten men of our aerial war.

Not until I came up close to the African front did I realize what our fighter pilots have been through and what they are doing. Somehow or other you don't hear much about them, but they are the sponge that is absorbing the fury of the Luftwaffe over here. They are taking it and taking it and taking it. An everlasting credit should be theirs.

In England, the fighters of the RAF got the glory because of the great Battle of Britain in 1940. But in America our attention has been centered on the bombers. The spectacular success of the Flying Fortresses when they went into action made the public more bomber-conscious.

• • •

There is still rivalry between the fighters and the bombers, as there always has been. That in itself is probably a good thing. But of late it has sort of slipped out of the category of rivalry—it has developed into a feeling on the part of the fighter pilots that they are neglected and unappreciated and taking a little more than their share on the nose. Their ratio of losses is higher than that of the bombers, and their ratio of credit is lower.

Bombers Need Fighters.

There have been exaggerations in the claims that the Fortresses can take care of themselves without fighter escort. Almost any bomber pilot will tell you that he is deeply grateful for the fighter cover he has in Africa, and that if he had to go without it he would feel like a very naked man on his way to work.

Our heavy bombers now are always escorted by Lockheed Lightnings (P-38s). It is their job to keep off German fighters and to absorb whatever deadliness the Nazis deal out.

It means longer trips than fighters ever made before. Sometimes they have to carry extra gas tanks, which they drop when the fight starts. They mix it with the enemy when they are already tired from long flying at high altitudes. And then if they get crippled they have to navigate alone all the way home.

The P-38 is a marvelous airplane, and every pilot who flies it loves it.

But the very thing that makes the Lightning capable of these long trips—its size—unfits it for the type of combat it faces when it gets there.

If two Lightnings and two Messerschmitt 109s get in a fight the Americans are almost bound to come out the little end of the horn, because the Lightnings are heavier and less maneuverable.

The ideal work of the P-38 is as an interceptor, ground strafer, or light hit-and-run bomber. It would be a perfect weapon in the hands of the Germans to knock down our daylight bombers. Thank goodness they haven't got it.

• •

Convoying bombers is monotonous work for the fighter pilot who lives on dash and vim. These boys sometimes have to sit cramped in their little seat for six hours. In a bomber you can move around, but not in a fighter.

The bomber has a big crew to do different things, but the fighter pilot is everything in one. He is his own navigator, his own radio operator, his own gunner. When you hear the pilots tell all the things they have to do during a flight it is amazing that they ever have time to keep a danger eye out for Germans.

Although our fighters in North Africa have accounted for many more German planes than we have lost, still our fighter losses are high. I have been chumming with a roomful of five fighter pilots for the past week. Tonight two of those five are gone.

Aerial Combat Tactics Change

It is hard for a layman to understand the fine points of aerial combat as practiced at the moment in North Africa. It is hard even for the pilots themselves to keep up, for there are changes in tactics from week to week.

We will have some new idea and surprise Germans with it. Then they'll come across with a surprise maneuver, and we will have to change everything to counteract it.

But basically, at the moment, you can say that everything depends on teamwork. The lone dashing hero in this war is certain to be a dead hero within a week. Sticking with the team and playing it all together is the only guarantee of safety for everybody.

American sports has instilled teamwork into the fliers collectively.

ghter Competition After War Demands Soil Fertility Be Maintained at High Level

ments Drawn From il by Bumper Crops Should Be Replaced

t will the coming transi- from war to peacetime omy mean to American ulture?

t question has been raised increasing frequency not by dirt farmers but by so- agricultural economists, s Uncle Sam's armies and have won smashing victo- overseas and as prayed-for becomes a closer possibil-

thing is clear. When the war the farmer's situation will be

od deal different from that of manufacturer or industrialist. farmer's peak production job be completed. Vast stocks of and fiber will be in storage; etition for markets will be Industry, on the other hand, be reconverting from war pro- on to the greatest peacetime ut in history. The backlog of de- for virtually every commodity in civilian life — automobiles, inery, building materials, re- rators, radios, heating equip- , household furnishings — will ig enough to require years of geared industrial activity.

me economists believe that if etime industrial output and em- ment remain high—say at about billion dollar income level an- ly—the demand for farm prod- would be sufficient to absorb a production at about 1943 ls.

t even if the nation's efforts to ntain postwar production and loyment succeed, farm economy t be prepared to withstand some ks. The switch from peace to will inevitably bring changes in methods to cope with new tech- s in marketing and production. such a setup, the individual er who uses antiquated meth- r who fails to maintain the fer- level of his soil is doomed to re.

Three Big Problems.

st farm authorities are of the on that postwar agriculture will three major problems:

. Farm acreage, vastly ex- ded to meet wartime food ands will have to be re- ced. That means more effi- nt farming on fewer acres.

2. Farm surpluses may be- me a peacetime headache.

3. War-spurred farm income ill inevitably decline when the esent abnormal demand for d slackens.

1944 farm crop acreage goals led 371 million acres, compared 325 million acre plantings in war years. That is an increase 6 million acres. Commenting re- tly on the adjustments that will necessary to fit postwar require- nts, Chester Davis, former AAA inistrator and now president of Federal Reserve bank of St. s said:

he farm plant has been ex- ded beyond the capacity needed supply abundantly the peace- domestic market and any nor- export market that may be ilable. Farmers will face real for acreage adjustments and me areas shifts may be drastic."

he second problem — farm sur- s — will not be troublesome so long as the war lasts. Food needs of our Allies and liberated regions may keep it quiescent for a while even after Germany cracks up. But in some future day it will become a worrisome reality.

Reports from liberated countries indicate that the food supply situation there is less acute than had been anticipated. France, the Balkans, Poland and even eventually Germany may require less food from our supply than we had been counting on. Stocks of goods in Great Britain are reported to be 5,500,000 tons, against a normal 1,500,000 tons. These reserves have been built up substantially from lend-lease shipments out of this country. If these were reduced to say, 2,000,000 tons when the war ends, there would be left about 3,500,000 for relief. Surveys by the Stanford Food Research institute support the belief that Europe won't be much of a market for our food surpluses.

When Germany Surrenders.

Some decline in food prices can be expected after Germany's defeat, for then both military and lend-lease buying of farm commodities is likely to taper off. This need be only a gradual movement until some downward adjustment can be effected in production volume. By the end of the Japanese war, the reconversion from war to peacetime production of civilian goods should be well under way. Prices, however, could go to 90 per cent of parity for the basic crops. The government is pledged to step in at that level with support for at least two years after the war, so no further severe drop than that may be necessary.

All of the foregoing factors spell competition in the farmer's postwar operations. Farmers can arm themselves now to meet that competition and to withstand the economic shocks that will accompany the transition period. If they do some straight thinking they can be stronger at the war's end than they were at its beginning. First of all, they can safeguard their future by keeping their finances in a liquid condition, by buying war bonds, by shunning debt and by avoiding the pitfalls of overexpansion through the purchase of additional farm land. Secondly, they can take out an "insurance policy" for long-range farm productivity by undertaking a soil fertility rebuilding program.

Present high food prices have already lured some farmers into land speculation and overexpansion. Such recklessness brought ruin to millions in the wake of World War I. It can bring disaster again this time.

"During and immediately after the last war when food prices were even higher proportionately than they are now, many farmers were foolish enough to mortgage their own farms in order to buy more land," a recent statement of the Middle West Soil Improvement committee points out. "The sellers were canny operators who preferred to take their own cold profit on real estate rather than gamble on the chances of food prices remaining eternally high.

"The memory of the crash and deflation that followed is still painfully fresh.

"After the present war, American farmers will have to compete in world markets. Because of current income levels the temptation to acquire additional acreage is strong. Some farmers believe it is a smart move because with more and better machinery available after the war and their sons coming home from the army, they will be able to work more land than hitherto.

Homesteads for Soldiers.

"The government is already planning to give homesteads to servicemen. When this is done, the owner of an expensive farm will be in a tough spot to produce crops in competition with the man who has no capital investment in the soil portion of his food factory.

"The only way the American farmer can successfully compete either in domestic or world markets in postwar years, is by producing crops at a lower cost per unit. In such a program, the steady use of mixed fertilizer containing nitrogen, phosphorus and potash will be an enormously important factor. More bushels per acre can, and will mean more food from less land. It will also mean more good food per acre to help build healthier human beings and farm animals in the future."

The need for building up the soil's productivity is widely recognized as a postwar "must." No less an authority than Secretary of agriculture Claude Wickard recently declared: "Now is the time for farmers to worry about soil fertility."

In answer to any farmer's statement that "My yields are better than ever," Secretary Wickard counters with this question:

"Ask yourself how much better machinery and better plant varieties have had to do with those increases. Over much of our best farm land, better yields are the most pronounced cause of accelerated soil depletion — a steady decline that most farmers can't see yet, but which could bring a nationwide crisis in soil fertility.

"No great nation can afford to neglect the productivity of its soil. The problems of abundance, baffling as they seem, are a challenge. They can be solved; and their solution will be the gateway to a better way of living. But to the problems of steadily declining production there is no answer. That pathway eventually leads to decline and ruin. It not only is impossible to produce abundantly on depleted soils; it is almost impossible to produce efficiently.

Huge Crops Robbed Soil.

"After four years of record-breaking production for war, farmers have special need for checking up on their soil resources and for repairing the effects of depletion."

Such a checking up would in most cases reveal that the soil's fertility level is lower than it was in prewar years. Fertility has been one of the necessary casualties in the battle to meet wartime food production goals. Peak-load croppings have taken a heavy toll of the soil's resources of nitrogen, phosphorus and potash.

Rehabilitation of the soil is thus a necessity, if the fertility level is to be built up and the productive capacity of the land maintained in the competitive postwar period.

All things considered, the cost of plowing, seeding and cultivating a field is the same whether the crop yield be large or small. Therefore, the farmer who is able to get big yields at a relatively low production cost is the one who will make money when competition is keen.

Attention to essentials is, of course, important in any soil improvement plan for postwar years. In addition to good rotation, the growing of deep-rooted legumes, contour plowing where necessary, and the return of manure and crop refuse to the soil, the use of mixed fertilizer is a No. 1 necessity. Quality as well as high yield will be important factors in the postwar farm market. Experience has demonstrated that fertilized crops are of higher quality and yield than unfertilized ones.

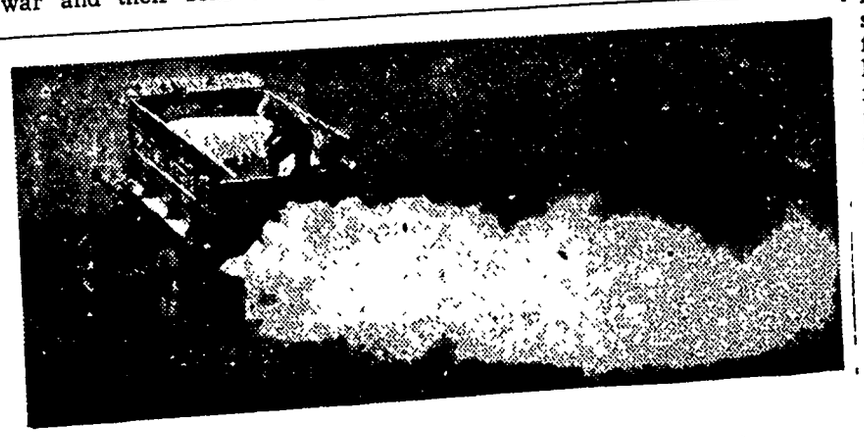
Get It Early!

"The War Food administration again calls on farmers to accept delivery of their fertilizers during the winter and early spring, when the manufacturing plants can make delivery most easily, and to store it in their barns and sheds for use when needed," P. H. Groggins, chief of the chemicals and fertilizers branch, advises.

"The individual farmer can assure himself of sufficient fertilizer by placing his orders as far as possible ahead of the season of use. If all farmers will do this, plants can be kept working at the capacity permitted by available labor. Continued maximum production and use of fertilizers is necessary in support of the war food program."

these days when farm ma- ery of all kinds is scarce, out- to spread fertilizer may be hard obtain. Frequently, however, panies selling crushed stone and soil treating chemicals have pment which may be rented at onable rates. When a large is to be covered, it is generally st to call on one of these com- es to help with the job.

large dump truck, hauling a der, can cover a big pasture in rkably short time.



IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for December 24

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE GROUND OF UNIVERSAL JOY

LESSON TEXT—Luke 2:8-12; Hebrews 1:1-4; I John 1:1-4.

GOLDEN TEXT—Behold, I bring you good tidings of great joy, which shall be to all the people.—Luke 2:10.

What would you like for Christmas? Could anything be better than to find for your heart and mind that spiritual safety, certainty, and joy which transforms life? Well, that is exactly what Jesus came to bring mankind. It was the first Christmas gift, and it is the best gift this year too.

I. Safety (Luke 2:8-12).

Men need deliverance from their sin. They needed it when Christ came. They need it today. They must have a safe refuge, one in which they may rest secure.

All the efforts of this world to meet man's need are vain. As Joseph Parker put it: "The world did not want an adviser. The world had advised itself almost into hell. The world did not ask for a speculator. Everything that man could do had been done, and men sat in the darkness of their own wisdom. The world did not want a reformer, a man who could change his outward and transient relations, an engineer that would continually devote his time to the readjustment of the wheels and the pulleys and the various mechanical forces of society. The world wanted a saviour."

Jesus came as Saviour. The good tidings revealed to the faithful shepherds were to be "of great joy to all people" because they presented the One who could bring them redemption from sin.

That revelation is ready to be made again this Christmas, and as it came to the shepherds at their work in the field, so it may come to you on the battlefield, in camp, in the air, under the sea, in the kitchen, the factory—yes, anywhere. We rightly go to our churches to worship on Christmas Day, but let us remember that Christ is everywhere, seeking each one — yes, knocking at your door. Will you let Him in? Then you will have Christmas indeed!

II. Certainty (Heb. 1:1-4).

God has spoken through the centuries in the messages of many faithful servants. We do well to give heed to God's Word through them. But after all they were only servants. This message of redemption is so vital and fundamental that God sent His Son, Himself the Redeemer, to declare it.

How final, and definite, and blessed is that truth. The heir of all the eternal glories of God the Father, and Himself the effulgence (or the flashing forth) of the glory of God, has spoken God's last word—His certain word — about redemption from sin.

We all know how full of uncertainty the world is, how our own minds are distressed by the very uncertainty of countless things about us. What a precious gift from God to realize anew the absolute certainty we have in Christ. He came to save, to satisfy, and to keep us.

Note that He has all the needed authority and power to carry out His loving purpose (vv. 3, 4). He who "made purification of sins" for us to believe, is divine. He has all power. He is glorious beyond our ability to describe. He is God. We can rest in perfect assurance in His redemption.

III. Enjoyment (I John 1:1-4).

God knew the need of man for real joy if life was to be pleasant and profitable. Being a Christian was never intended to be a somber, doleful business. No, indeed. "These things we write," says John, "that our joy may be made full."

What did he write? By inspiration of the Holy Spirit he wrote of Christ, "the Word of life." He had seen and known Him, the Redeemer. He had fine and uplifting fellowship with Him, and declares that we too (as believers) share in that fellowship.

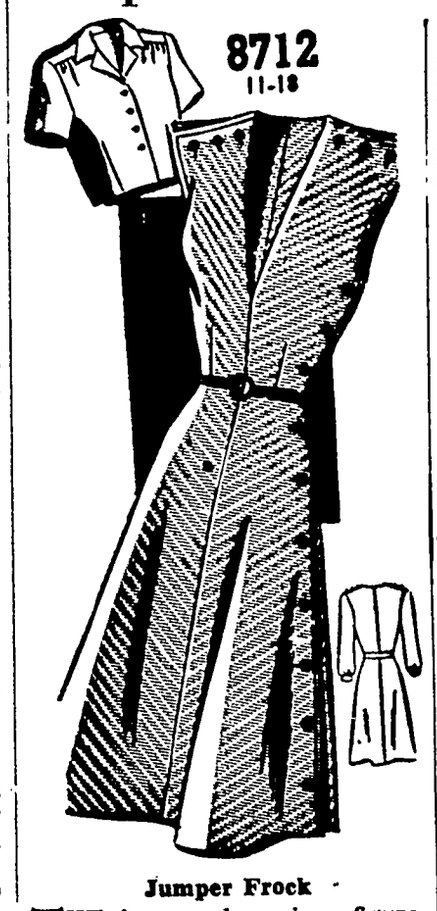
One of the bright and gladsome things about the Christmas season is our fellowship with our family and friends. It brightens the whole holiday season. How much more delightful is the fact that we have "fellowship with the Father and with his Son, Jesus Christ."

That fact really "makes" Christmas! Many will be separated from family and friends this year, but Christ is there, and they may have this most precious of all friends with them. The empty place around the family table will be filled (if we wish) by the Lord Himself. Let's keep Christmas with Him as the unseen but nonetheless real Guest. In fact, let us do even more than that, let us count Him into the intimate fellowship of our family circle (and two can make such a circle). That is what He wants to be—to you and to me—this Christmas Day, 1944.

May his joy be yours in full measure. That is the wish of the writer of these lines, and it goes from his heart to the very last reader who may be in the uttermost part of the earth. A blessed Christmas to you!

SEWING CIRCLE PATTERNS

Jumper Frock a Figure-Flatterer



Jumper Frock

THE jumper dress is a figure-flatterer for every age. This attractive model has broad shoulders and trim waist to give you that popular new T-square look. Use novelty buttons for the clever shoulder treatment and side-button closing. A smartly tailored blouse is included in the pattern.

Pattern No. 8712 comes in sizes 11, 12, 13, 14, 16 and 18. Size 12, jumper, requires 1⅞ yards of 54 inch material; blouse, short sleeves, 1¾ yards of 35 or 39 inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Sousa Wrote First Theme Song, a Popular March

The Washington Post March by John Philip Sousa was not only the first theme song but has become one of the most popular marches in musical history, says Collier's.

Sousa was commissioned to write it in 1889 by the Washington Post, a newspaper of the capital, and his band introduced it shortly afterward at a large public gathering sponsored by the publication.

Fleischmann's Fresh Yeast Makes Baking Just as Easy

by Sally Cole
Director of Fleischmann's Testing Kitchen

Your favorite Fleischmann's Dry Yeast has gone to war, and you may not find it at your grocer's. But be of good cheer! You can still get yeast *with the dependable Fleischmann label!*

Fleischmann's FRESH Yeast is available to all, and home-bakers everywhere are discovering how easy it is to use and what sure, delicious results it gives.

If you have been using dry yeast, try your hand with Fleischmann's fine, fast-acting *Fresh* Yeast. Clip this easy recipe for Snow Biscuits and use it with Fleischmann's *Yellow Label* Yeast next baking day. You'll be delighted with the results!

Incidentally, Fleischmann's Yellow Label Yeast is the *only fresh* yeast containing EXTRA vitamins! Buy a week's supply today—it keeps perfectly in the ice-box.

SNOW BISCUITS
2 cups sifted flour
1½ teaspoons sugar
½ teaspoon salt
1 cake Fleischmann's Yeast
¾ cup lukewarm water
1 tablespoon melted shortening

Sift together flour, sugar and salt. Dissolve yeast in lukewarm water. Add to dry ingredients. Add melted shortening. Dough will be soft. Turn out on floured board and knead quickly and lightly until smooth and elastic. Roll out ½ inch thick. Cut with floured biscuit cutter. Place on greased pan. Let rise until doubled in bulk, about ½ hour. Prick tops with fork. Bake in hot oven (425° F.) about 20 minutes. Makes 16 two-inch biscuits.

FREE! 40-PAGE RECIPE BOOK! Clip coupon and send today!

CIVIC CLUB MEETING

The Klemme Civic Club will hold a regular meeting on Thursday evening, December 28 at 7:30 o'clock sharp, at the Community Hall. This means 7:30 o'clock, not eight or nine o'clock! If you have some bellyaching to do, do it at the meeting and not afterwards.

— The President.

Mrs. Clarence Lemke Hostess At Bridge Party Wednesday

Mrs. Clarence Lemke entertained the Double Four Bridge Club at her home west of town last Wednesday afternoon.

High score for the afternoon of playing was won by Mrs. E. C. Buntenbach, while Mrs. Martin Barz was second high.

Card Of Thanks

I wish to express my sincere thanks to all who visited with me, and who sent me cards and letters while I was a patient in the Belmond hospital. All were greatly appreciated.

—Mrs. Chas. Halfpop,
Goodell, Ia.

(1tp)

Mrs. R. A. Jorgenson Hostess To The U-Delt-Em Bridge Club

Mrs. R. A. Jorgenson entertained the ladies of the U-Delt-Em bridge club at her home Thursday afternoon.

Mrs. P. M. Wilson won the high score; Mrs. Fred J. Arnold, second high, and Mrs. H. D. Ramsay, third high score for the afternoon.

Beaver, opossum and coons are making themselves right at home in Odeboldt. Beaver have been damning the Odeboldt creek and preventing proper drainage to such an extent that Game Warden C. C. Lille has granted permission to catch four of the animals at the city dump. Several oppossums have been caught at the dump and several coons have been reported seen there.

Elwyn Jacobs came home from Simpson College at Indianola the latter part of the week to spend the Christmas vacation visiting with his parents, Mr. and Mrs. Ed. Jacobs and family. Elwyn is a sophomore at Simpson this year, and is a member of the college basketball team. Simpson has won four and lost two games, and has averaged over 60 points per game so far.

MERRY CHRISTMAS

"Now all our neighbors' chimneys smoke,
And Christmas blocks are burning;
Their ovens they with baked-meat choke,
And all their spits are turning.
Without the door let sorrow lye,
And if for cold it hap to die
We'll bury it in Christmas pie,
And evermore be merry."

Local Happenings

Klemme and Vicinity

Mr. and Mrs. W. F. Pavey drove to Auburn, Iowa, Sunday for a visit with his mother.

Mrs. Sumner Trumbell spent Thursday of last week in Belmond visiting at the Theo. Wright home.

Mr. and Mrs. Kermit Schlei were Mason City visitors Saturday evening.

Mrs. Donald Turgeson was a Mason City visitor Saturday evening.

The Goodell Independent school recently began serving a hot noon lunch to the pupils.

Dr. and Mrs. W. F. Missman were entertained to dinner Sunday at the P. M. Wilson home.

Mrs. C. A. Larsen and son Clarence, Jr., were at Eagle Grove on business Saturday afternoon.

La Rayne Stille, son of Mrs. Blanche Frederick, expects to arrive home from the army camp to spend the holidays in Klemme.

Mr. and Mrs. Orville Bridges and daughters and Mr. and Mrs. Sumner Trumbell were Mason City visitors Saturday evening.

Alfred Schlei, of Fenton, spent a couple of days the past week visiting with relatives in this community.

Lt. David Williams of Lincoln, Nebraska army air field, spent last week Wednesday in Klemme visiting at the Lewis Mau home.

Mr. and Mrs. C. G. Waterman, Mrs. Lyle Wilcox and Mrs. R. A. Jorgenson were Mason City callers Saturday evening.

Mr. and Mrs. Herman Ahlstrom of near Goodell are enjoying a visit from their daughter, Mrs. Wilbur White of Rochester, New York.

Art Wellemeyer returned home last week Tuesday from the Mason City hospital and is feeling fine and able to be at the store every day since he came home.

Mrs. Henry Schroeder and Mr. and Mrs. Albert Schroeder of Chicago came Sunday morning to attend the funeral services of Grandma Schroeder on Monday.

Miss Avis Barz, who is attending business college at Mason City, spent the week end in Klemme visiting with her mother, Mrs. Clara Barz and family.

Mrs. Earl Schaeffer, of Forest City is teaching in the Klemme high school this week substituting for Miss Crabtree, who has gone away for over the holidays.

Mr. and Mrs. Ira Overholt are remodeling the interior of their home this winter, and when completed it will be very attractive, convenient and comfortable.

Blanche Frederick returned last Friday from Charles City where she helped Mrs. Lee Anderson care for the new baby in the Anderson home.

Miss Mildred Busse, who is a student at Hamilton's University of Commerce at Mason City, spent the week end visiting with her parents, Mr. and Mrs. Henry Busse of near Klemme.

Bert Rygmyr of Minot, North Dakota, came last week for a visit with his cousin Kenneth Johnson and family at Goodell. This is the first visit with each other in 19 years.

LeRoy Meyer of Mason City came Friday and visited until Sunday with Clarence Larsen, Jr. when his parents, Mr. and Mrs. Buford Meyer came for dinner at the C. A. Larsen home and he returned home with them.

Mrs. Alvin Lass and baby, and Mrs. John Lass left last week for Utah where they will visit Alvin Lass at an army camp and also will visit with Mr. and Mrs. Francis Pearson at another army camp near Brigham City, Utah.

Fernon Griggs and Wm. Riemer were up from north of Garner Tuesday afternoon doing some trading and visiting old friends. Mr. Riemer is a brother of Mrs. Emil Beier, and Fernon is a former resident of Avery township. Both were callers at the Times office.

Clifford Adair drove to Rochester, Minnesota, Sunday to bring his wife home. Mrs. Adair had been at Rochester with her mother who was going through the clinic. A sister of Mrs. Adair is now staying with her mother at Rochester.

Mr. and Mrs. Cleo Ingle and children of Waukesha, Wisconsin, arrived in Klemme Sunday, being called here by the death of Grandma Schroeder. Mrs. Ingle and the children will remain in Klemme for a couple of weeks visiting Mrs. Ingle's mother, Mrs. Lena Schroeder and other relatives.

Solved one Murder Mystery—Created another. The Sydney police used all their scientific skill and a mother's dream to clear up the enigma of the slain pajama girl—but now they wonder what happened to the dead girl's double. This interesting story will appear in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Rev. H. E. Harvey and daughter, LaNelle, and Carl Finders, drove to Cedar Rapids and Mt. Vernon early Tuesday morning. Mr. Finders transacted business at Cedar Rapids while Rev. Harvey and La Nelle went on the Mt. Vernon to bring Elwood Harvey home from Cornell College for the Christmas vacation. Elwood is a freshman in Cornell this year.

Mr. and Mrs. Wm. Meyer from north of Garner were doing their Christmas shopping and visiting old friends in Klemme Tuesday. The Meyers have a nice farm and have done a lot of improving since they purchased it. Most recent improvement is a pressure water system. "Bill" is getting ready now to go into the turkey raising business next year and is getting the equipment ready.

Building Maetrials Farm Implements

YOU CAN HELP THE FIRE DEPARTMENT Put Out YOUR FIRE And . . .

Reduce Fire Losses

Many farms now have automatic electric water systems. A good many of these are wired from the dwelling or barn or through some other building. Should that building catch fire, the wiring must be cut and the WATER SUPPLY IS SHUT OUT.

WE SUGGEST THAT YOUR ELECTRIC PUMPING SYSTEMS BE WIRED AND FUSED DIRECT FROM THE YARD POLE.

The added wiring cost is not much and may save hundreds, yes, thousands of dollars from Fire Loss.

The fire department in many cases is owned and maintained by the city or town and should the fire department be at your farm when a fire breaks out in town they must leave your fire and return to the town fire.

Former Klemme Pastor Died At His Home At Burt, Iowa

RETIRED METHODIST PASTOR DIED LAST THURSDAY

Funeral Services Held Saturday At Burt Methodist Church

The Rev. George H. Wessels, retired Methodist minister, died at his home at Burt, Iowa, last Thursday evening following a long illness with heart trouble. Funeral services were held Saturday afternoon at 1:30 o'clock at the Burt Methodist Church, the Rev. F. E. Forgess, district superintendent, conducting the service, assisted by the Rev Paul Figge of Burt. The body was taken to Monona, Iowa, where a service was held on Sunday afternoon and burial was at Burt, Iowa.

George H. Wessel was born on August 15th, 1863, at Colesburg, Iowa, where he lived until he was twenty years old. He attended college at Galena, Illinois and then taught in the schools of Delaware County, Iowa, for several years before entering the ministry.

He preached his first sermon at Manchester, Iowa, on July 12, 1885.

Was Pastor At Klemme

He served pastorates at La Crosse, Wisconsin; Faulkton, Dakota Territory; Burt, Iowa and Weiss settlement; LeMars circuit; Dubuque, Fenton, Gladbrook two years; Klemme, Reinbeck and the Logan church near Dows. He also served as the district superintendent for six years in the west-division of the Northwest German Methodist Conference.

On October 1, 1891, he was married to Miss Clara Hartwick at her home near McGregor. To this union two children were born, Lurena and Earl Herschel, who died in youth.

Mr. Wessels retired from the ministry in 1935 and he and his family moved to Burt, which had been his home.

He is survived by his wife and daughter, Lurena, and by six sisters: Mrs. W. H. Schuretert, Ontario, Mrs. W. H. Miller, Eau Claire, Mrs. Emil Irmscher and Emma Wessel, Colesburg, Iowa; Mrs. H. Klamp, Algona, Iowa; Mrs. Mayor Irmscher, Greeley, and one brother, Roy Wessel, also at Greeley.

Mr. Wessel served the Klemme and Liberty congregations from 1907 to 1910.

Strange Pheasant

Clifton Larson of Alta went out pheasant hunting but returned with what he shot. Farmers in the area have previously reported one or two foxes in the neighborhood as well as had been making inroads on chicken houses.

SCHOOL NEWS

SEVENTH AND EIGHTH GRADE NEWS NOTES

Mrs. Smith, Teacher
—Jerry Finders, Reporter

Everyone is excited over the approaching holidays and vacation.

In Art, the Seventh and Eighth Grades have been making Christmas presents for their parents. Some students made room decorations.

In Music we are doing two-part singing on Christmas Carols.

The Seventh Grade will end their Science study and begin their study of Health next semester, and the Eighth Grade will study Civics.

Friday we had our Christmas party and Exchange of Gifts.

To date we have purchased over $310 worth of War Bonds and War Stamps in our room. We hope to do even better after Christmas.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
Miss Bugh, Teacher

This week we made Christmas presents for our mothers and fathers. We made calendars on which we mounted a picture of the boys and girls in our room. We wrapped them and made Christmas seals and tags from colored construction paper.

On Friday afternoon we had our Christmas Party. Santa came to our party. We were very glad to have him visit. We told him what good children we have tried to be. Then he gave each of us a box of Christmas candy. We had our Christmas exchange of gifts. Berleen, Douglas, and Alan drew to be Santa's helpers. Douglas brought Santa Claus cookies which we enjoyed very much.

SENIOR CLASS NEWS
—By Patricia Kudje.

For the Christmas program Friday afternoon, the Seniors gave a little skit with the poem, "The Night Before Christmas." As we had charge of the afternoon we also arranged to have Santa Claus hand out the presents. We hope everyone had an enjoyable time.

We talked over the date for our class pictures with Mr. Kingery. We decided that the best time would be the first part of February. We will go either on an afternoon or Saturday.

The first part of this week we decorated our Christmas tree for the study hall. For lack of better decorations we strung cranberries and popcorn. Later tinsel and Christmas tree ornaments were added.

Miss Crabtree was gone this week and Mrs. E. G. Schaeffer taught in her place.

CANDLE LIGHT CEREMONY AT METHODIST MANSE

Young Couple Will Live On Farm East Of Belmond

At a beautiful candle light ceremony at the Klemme Methodist Manse on Saturday evening, December 23rd, at 8:00 o'clock, Miss Phyllis June Swanson became the bride of Karl Loeffler of Belmond. Rev Herschel E. Harvey officiated and the couple exchanged vows in the double-ring ceremony.

They were attended by Miss Betty Etchen of Des Moines, Wm. Sheriff, Jr. of Belmond, and Miss Marjorie Lien of Kanawha.

The bride wore a light blue dress trimmed with silver sequins and her corsage was of white-pink roses. Miss Etchen, bridesmaid, wore a blue wool dress with a corsage. Both men wore dark suits with white carnation boutonniers.

Mrs. Loeffler, who is a daughter of Mr. and Mrs. Oscar Swanson of Klemme, graduated from the Klemme high school in 1942 and attended Waldorf College at Forest City where she took a business course, and since has been employed at the First National Bank in Klemme, which position she will retain until about the first of March.

Mr. Loeffler has been assisting his father farming, and the young couple will move to their own farm about five miles east of Belmond about March 1st. The groom is a son of Mr. and Mrs. Fred Loeffler of near Belmond.

A reception and invitation dance in honor of Mr. and Mrs. Loeffler will be held at the Klemme Community Hall on Friday evening, January 5th.

Seaman Barz On Klemme High School Service Honor Roll

Martin Barz' name should have appeared on the Klemme High School's Honor Roll published in The Times last week, but do to an error his name had not been recorded.

If there are any other errors in the list please notify Supt. Kingery or the Times office, as the school wants every graduate in Service represented on their Service Flag and Honor Roll.

Sapphires and rubies are used in meters and delicate instruments in airplanes, tanks and other war equipment.

SANTA CLAUS REALLY "CAME TO TOWN" HERE SATURDAY

As advertised, Santa Claus was right on the dot here Saturday as he boarded into town on a bob sled drawn by prancing reindeer, but from the highway made the trip into Klemme by a nice team which he borrowed from Clarence Lemke for the occasion. Santa had his sleigh piled high with bags of good treats for all the boys and girls and arrived on the scene with bells jingling a merry tune.

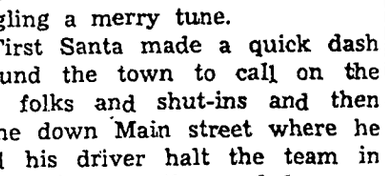
First Santa made a quick dash around the town to call on the old folks and shut-ins and then came down Main street where he had his driver halt the team in the business section and he gave out bags of treats to hundreds of boys and girls.

It was a grand party and Santa was so well pleased with the big crowd of boys and girls that he expects to repeat the performance again next year.

Entertained At A Christmas Eve Party Sunday Evening

Mr. and Mrs. Edgar Buss entertained at a Christmas Eve party the following: Mr. and Mrs. Wm. Reuben and family of Kanawha; Mr. and Mrs. Fred Pringnitz; Mr. and Mrs. Walter Lauster and Ruth Ann; and Miss Helen Albers. A social time was enjoyed and gifts were exchanged after which Mr. and Mrs. Buss served a nice lunch.

HELLO, FOLKS!



Mr. and Mrs. Sumner Fuller, who live southeast of Klemme, are the proud parents of a baby boy born to them on Tuesday, December 19th, 1944 at the Belmond hospital. The new arrival weighed in at 8 lbs. 1 oz.

Mr. and Mrs. Duane Katter, of Garner, are the proud parents of a 10 pound baby son, Ivan Duane, born to them at the Care-Others home in Garner December 21, 1944.

Mrs. Katter is a daughter of Mr. and Mrs. John Kaduce, Sr., and Mr. Katter is a son of Mr. and Mrs. Ben Katter of near Klemme.

Klemme Girl Bride On Her Grandparent's Anniversary

FORMER KLEMME MINISTER DIED NOVEMBER 12

The Rev. H. W. Schneider, a retired minister and member of the Rock River Conference, died November 12th. His last pastorate of 15 years was at Basswood and Richland, Illinois.

Rev. Schneider was pastor of the Klemme-Germantown (now Liberty) charges from 1910 to 1913. During that time the Lacour's Evangelitic campaign was conducted and will be remembered by the older folks of the community.

DISTRICT 4-H BOYS SHORT COURSE JANUARY 2 AND 3

One Boy From Each Local Club Will Go To Mason City

One 4-H boy from each local club will represent Hancock county at the District boys 4-H Short Course at Mason City on January 2 and 3. The meetings will be held at Hotel Hanford. The boys will also stay at the Hanford Hotel.

Donald Greiman will give a short toast at the banquet Tuesday evening. Each county has a part on the short course program.

The program is set up to train the boys attending so they can be of assistance in their local club when they return to their local club meetings.

The expenses of the boys attending the short course are to be paid out of the county 4-H fund.

Specialist assisting with the program include Jerry Lineweaver, state boys club leader; P. C. Taff, state club leader; Ray Cunningham, Iowa State College Y. M. C. A.; M. D. Helser, Dean of Iowa State College J. College; Lester Clapp, extension conservationist; Winnifred Martin and Pearl Converse, music and dramatic specialists.

At least one local leader will be in charge of the boys.

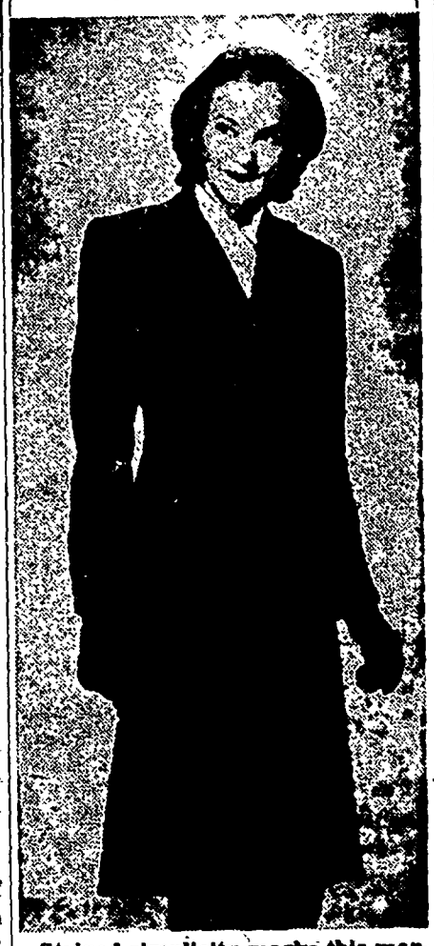
CIVIC CLUB MEETING THIS THURSDAY NIGHT, DEC. 28

The Civic Club meets this week Thursday night at the Community Hall at 7:30 o'clock sharp.

A full report of the "Santa Claus Day" will be presented and other important matters brought up. This meeting concerns every business man in town, so be there.

—President.

Man-Tailored Suit Saves for Bonds



Striped simplicity marks this man-tailored suit. The slim skirt has an inverted pleat which begins at the hipline for freedom of movement. Save dollars for War Bonds by making it. Patterns available at local stores. *U. S. Treasury Department*

MISS VELDA SCHAEFER BRIDE OF IRVIN BLANK AT BRITT CEREMONY DEC. 20

Is Granddaughter Of Mr. And Mrs. Ed. Schaefer Who Celebrated 56th Wedding Anniversary

On Wednesday evening, December 20, 1944, Miss Velda Schaefer of Liberty township, and Mr. Irvin Blank of Kanawha, were married by Rev. Rust at Britt, Iowa.

Mrs. Blank is the daughter of Mr. and Mrs. Elmer Schaefer of Garner route four. She had been teaching in the rural schools of Hancock County for several years. For the past four years she has been teaching at Amsterdam No. 1 school. Mr. Blank is the son of Mr. and Mrs. John Blank of Kanawha. He has been assisting his father with farm work. The young couple will make their home on the bride's grandparents' farm west of Klemme in Liberty township, after March 1st.

The bride wore a Royal Blue dress with fuschia trim and wore a corsage of red roses. The groom was dressed in a blue suit and wore a rose boutonniere. The attendants were Mr. and Mrs. John Nieman of Kanawha, brother-in-law and sister of the groom. Mrs. Nieman wore a blue dress and a corsage of roses, and Mr. Nieman wore a dark suit and a rose boutonniere.

The bride chose this special day for her wedding as it was the 56th wedding anniversary of her grandparents, Mr. and Mrs. Edward J. Schaefer of Klemme, Iowa.

A dinner was held Sunday, December 24th in honor of the newlyweds and in celebration of the anniversary of their grandparents. A beautifully decorated angel food cake, made by the Bride's mother, was cut and served by the bride to the guests. Gifts were exchanged and best wishes extended.

YOUTH FELLOWSHIPS WILL SPONSOR WATCH NIGHT

Will Be Held At Klemme Methodist Church Sunday Night

The Youth Fellowships of Liberty and Klemme Methodist churches will sponsor a special Watch-Night program next Sunday at the Klemme Methodist Church starting at 9:00 p. m. The first part of the program will be given over to recreation and fun. A lunch will be served consisting of a variety as folks will please bring sandwiches and covered dish.

The last part of the evening will be a Covenant Worship Service prepared in cooperation with the "Crusade for Christ."

The evening program promises to be most helpful in closing the old year and in starting the new. The Committee on preparations is Marie Blank, Helen Pringnitz, Peggy Coobs, Junior Larsen, Dick Finders, Roger Ridder, Novella Bredbenner, Thelma Chambers, Doris Pringnitz, Lola Gast and Gene Beiers.

Double Four Bridge Club Had Pre-Christmas Party

Mrs. H. D. Ramsay was hostess of the Double Four Bridge Club at her home and after playing contract bridge the ladies enjoyed a Christmas party and exchange of gifts. High score in bridge was won by Mrs. Martin Barz, while Mrs. Sumner Trumbell was second high.

NEW FARM MACHINERY WILL BE SHORT OF DEMAND

Don't plan on being able to buy new farm machinery. Fix up the old one you have. Don't now, order repairs early. All manufacturers will tell you their production is far short of expectations. So do not take chances. Check your old machine now. Fix it yourself if you can. If you have to have a mechanic make arrangements with him at once.

WEEKLY NEWS ANALYSIS

Civil Strife Rages in Greece; Set Vise for Japs on Leyte; Quake Shakes Tokyo District

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

As train lies at bottom of Moselle river after plunging through wrecked bridge, French youth scramble over debris to salvage food from cars.

EUROPE:
Civil Strife

Added to the Allied military burden in Europe was the political problem posed by Leftist rebellion in Greece.

Started when Leftist liberation guerrilla forces refused to surrender their arms on the ground that Premier Papandreou's Rightist elements were allowed to retain theirs, the uprising brought British troops into action to restore order.

Situated just north of the Suez canal, Greece commands this vital waterway route linking Britian's eastern empire with its homeland; and for this reason, London has taken the greatest interest in conditions there.

To assure its position about Suez, the British have backed Papandreou's Rightist elements as against the Leftists, including Communists. In calling British troops into action to suppress the rampaging Leftist elements, British Maj. Gen. R. M. Scobie declared: ". . . I stand firmly behind the constitutional government and shall aid them to the limit of my resources until the Greek state can be reestablished with lawful armed forces behind it. . . . "

Nazi Strategy

In heavy fighting on both European fronts, the Allies continued to punch forward, with the U. S. 3rd army taking the spotlight away from the 1st and 9th in the west in its drive into the vital coal-laden Saar basin.

As a result of General Patton's smash into the Saar, the great industrial city of Saarbrucken was brought under the muzzle of heavy U. S. artillery fire, with many parts aflame.

The 3rd army claimed the limelight as the 1st and 9th U. S. armies slackened their heavy pressure east of Aachen, where the German high command, under Field Marshall von Rundstedt, had concentrated its major strength to combat General Eisenhower's great drive, which carried within 22 miles of the Rhine.

Big question in the mind of Allied strategists was how long could the Nazi high command continue to

General Eisenhower (left) confers with Field Marshal Montgomery in Holland.

manipulate its forces to ward off a decisive break-through at any one spot. Although the enemy was said to have about 6,000,000 men afield in both the east and west, only about 1,250,000 were said to be crack troops.

That the enemy has few troops to spare is evidenced by his tactics in the Balkans, where the retreat toward the Austrian border promises to draw up all of his troops presently strung out along the Hungarian and Yugoslav border. In addition, reports from Italy indicated a German retirement in that country.

As the Nazis reformed their lines in Hungary, flying Red columns advanced to within 13 miles south of Budapest, where civilians were put to work digging entrenchments for a last ditch stand.

MEAT INCOME

The income from meat animals will reach an all-time record this year, approximating one-third of the total farm income, or more than 6½ billion dollars, George M. Lewis, director of marketing of the American Meat institute, predicted.

Tracing the trends of livestock production for 1945, Lewis said the United States department of agriculture estimates the marketings of cattle and calves will be about 35 million head, or a million more than this year, the highest on record.

PACIFIC:
Fasten Vise

Striking again with characteristic suddenness, Gen. Douglas MacArthur moved the 77th division ashore below Ormoc under the heavy protective cover of U. S. naval guns, cutting the Japanese defenders on the northwestern shore of Leyte in half.

The general's move came after bad weather, coupled with stiff enemy resistance from strong hill entrenchments, bogged the American drive on Ormoc from the north and south. As the 77th secured its beachhead below Ormoc, the huge LSTs dumped supplies ashore, the general was able to apply both frontal and rearward pressure on Japanese troops operating in the sector.

Prior to the American landing below Ormoc, U. S. artillery opened a heavy bombardment on enemy positions to the north and south, drawing strong Jap reinforcements to both areas to counter infantry movement. Then, as their withdrawals weakened their positions about Ormoc, MacArthur struck.

Even as the 77th was hitting the beaches below Ormoc, U. S. fliers wiped out a Japanese convoy, bearing 4,000 troops, which was headed for Leyte.

EARTHQUAKE:
Rocks Japan

Centering in the Sea of Enshu, 100 miles southeast of Tokyo, an earthquake, so powerful that its tremors threw a recording machine in London out of gear, struck Japan, causing serious loss.

Without immediately revealing the exact extent of damage, the Japanese reported that the tremors caused landslides, caving-in houses and streets along a 150-mile belt across the main island of Honshu. Huge tidal waves rolling in from the Sea of Enshu flooded coastal districts below Tokyo, deluging homes.

Although the Japanese claimed that the quake did not damage their war industry centered around the Tokyo district, they remained silent about the effect that the mounting tidal wave had upon their all-important shipping, a-sea and at port.

HELP WANTED:
Seek Arms Speed-Up

Once deeply concerned with reconversion, government officials have once again swung their principal attention back to war production, what with munitions shortages on the battlefronts threatening development of mounting Allied attacks.

With 300,000 workers needed in munitions plants, labor became the No. 1 consideration of officials, with War Manpower Commissioner Paul V. McNutt calling for intensive recruiting of women; transfer of employees within a plant to more essential jobs; channelling of workers to more important industries; discouragement of labor turnover, and suspension of manpower authorizations for civilian production.

Of the 300,000 people needed, McNutt said, 130,000 were for heavy and small arms munitions. Industries requiring the remainder include air-borne radar; assault, transport and cargo ships; tank materials; cotton duck for tenting; heavy artillery, trucks and tires, and B-29 Superfortresses.

Better Bossies

A study of artificial breeding just completed by New Jersey State college of agriculture gives conclusive evidence that the science has progressed to the point where it can be adopted on a nation-wide scale, Dr. J. W. Bartlett said.

The study just completed in New Jersey shows that 120 "artificial" cows, bred from outstanding bulls, produced 9.3 more milk and 14 per cent more butterfat.

SENATE:
Hit Appointments

Plans to hurry through the appointments of Joseph C. Grew as Undersecretary of State and William L. Clayton, Nelson Rockefeller and Archibald MacLeish as assistant secretaries in the department struck a snag in the senate, where a rebellious contingent forced hearings to be held on the principals' fitness for the offices.

Leading the attack was Kentucky's "Happy" Chandler, who, in referring to the appointments of Businessmen Clayton and Rockefeller, declared: " . . . I was told that the poor folks would be given opportunities as a result of the election. . . . Instead of the poor people obtaining the jobs, the Wall Street boys are getting them. . . . "

In pressing for confirmation of the appointments, Texas' Tom Connally decried the allegation that business interests would use their position to influence policy, declaring: ". . . Every senator who knows the President knows that he is going to dominate the foreign policy of this government. . . ."

Stiffen Policy

First official act of Secretary of State Edward Stettinius was to blast at Britain's and Russia's maneuvering in liberated European countries to establish governments favorable to their interests.

Declaring ". . We expect the Italians to work out their problems of government along democratic lines without influence from outside . . ." Stettinius aimed his blast at Britain's objections to the naming of Count Carlo Sforza as foreign minister in a new Italian administration. Britain's attitude, it was said, was the result of Sforza's anti-monarchical tendencies.

Although not specifically mentioned, Russia could get no comfort from Stettinius' statement, which indirectly hit at Moscow's political activities in reoccupied countries by declaring: ". . . This policy would apply to an even more pronounced degree with regard to governments of the United Nations in their liberated territories . . ."

FARM YOUTH:
Win Honors

In events at Chicago, Ill., attention was focused on the nation's outstanding young farmers: 18-year-old Donald Mowery, Terre Haute, Ind., 4-H achievement winner, and 17-year-old Ben Greve, Bryant, Iowa, raiser of the Chicago Market Fat Stock grand champion.

Don Mowery and Ben Greve

Left fatherless at 16, Mowery took over operation of the family's 58 acres, and through purchase of modern equipment, rented and shared an additional 112 acres, besides doing custom work. When bad weather set him back a week last summer, he toiled 130 hours the next, making it up. In nine years of farming, Mowery has earned nearly $14,000.

Equally enterprising, Greve paid $91 for a 650 pound Hereford calf in New Mexico, and fattened it up to 1,170 pounds at 20 cents a pound before toting it to the Chicago show. There, the steer won the junior and grand championships, brining Greve $585 in prize money, before being bought at auction by the Firetone Tire and Rubber company for $5265.

SEAWAY:
Back Again

Rejected as a treaty requiring a two-third vote by the senate in 1934, the $421,000,000 St. Lawrence Seaway project, providing a complete waterway link from the Great Lakes to the Atlantic ocean, bobbed up again in the upper house, this time in the form of an agreement requiring a simple majority.

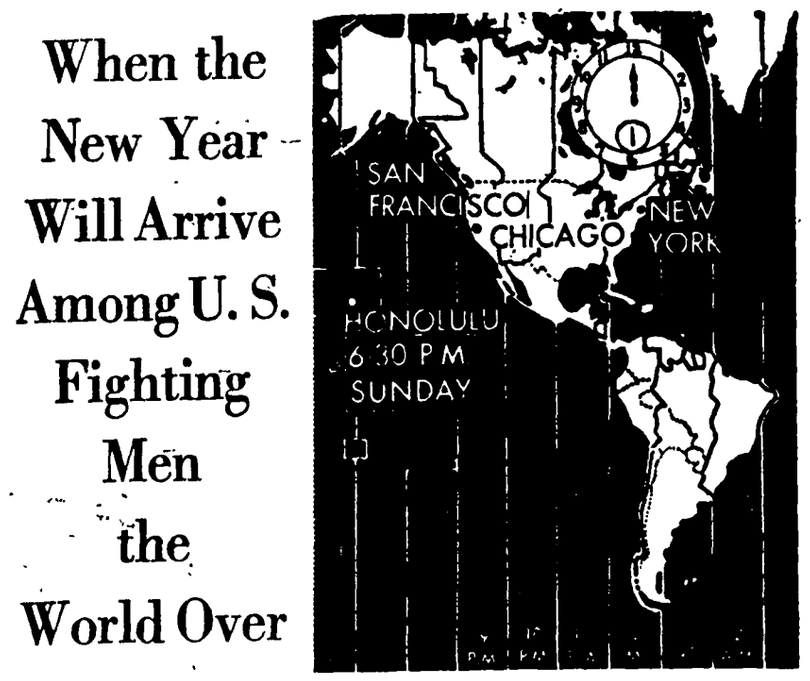
Calling for construction of dams, canals and water-works at an expense of $277,000,000 to the U. S. and $144,000,000 to Canada, the project was to be introduced as an amendment to the rivers and harbor bill by Sen. George Aiken (Vt.).

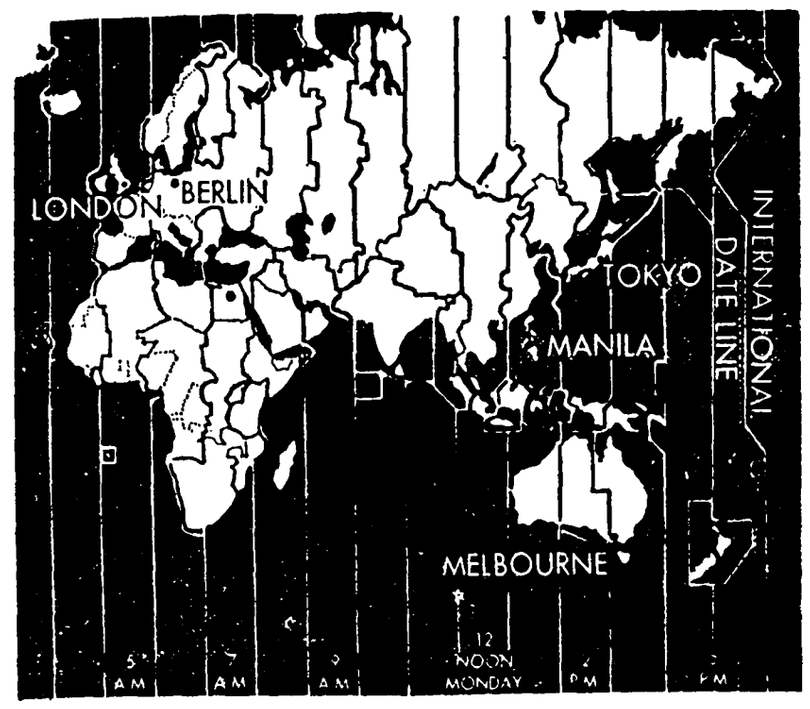
One of President Roosevelt's pet projects, the St. Lawrence Seaway has been the subject of lively discussion, with advocates charging private power interests with blocking its passage, and opponents claiming that only Canada stood to benefit from it. Aiken's attempt to pass the project as an agreement rather than a treaty further fanned the flames, with opponents stressing that anything as vital to our international relations properly deserved the extended support of the country as a whole, as exemplified in a two-third senate vote.

Down Under . . .

As part of its plan to improve general living conditions for New Guinea natives, Australian authorities have established medical schools in the territory at which natives are taught to diagnose common maladies and to use treatments for them. Lessons are given by Australian doctors in Motuan and pidgin. Here is a sample of a lesson in pidgin. The doctor asks: "Suppose head he pain, skin he hot, backside he pain, he no like kaikai (food)—what name belong this fellow something?" And with reasonable regularity the doctor will get back the reply "malaria."

When the New Year Will Arrive Among U. S. Fighting Men the World Over





Many churches of America, of all denominations, will keep their doors open Sunday and Monday in order that relatives and friends of American fighting men and women throughout the world may offer their New Year's prayers at the time their loved ones are welcoming in the New Year, no matter where they will be. These services are in addition to regular watch night services.

When 1945 reaches New York city in a blare of noise or a silence of prayer, it will already be early Monday evening just east of Australia in the Chatham Islands. Meanwhile, at Honolulu the clock will register 5:30 p. m. Sunday The New Year is born on the lonely Chatham islands, 414 miles southeast of New Zealand, and races westward at 1,000 miles an hour. About 200 shepherds and fishermen, augmented with troops in the Chatham group, will celebrate the New Year by ringing the church bell on Hanson island. The international date line, near these isles, was set by the British admiralty and runs near the 180th meridian of longitude.

Bells Throughout World Will Herald In a New Year Full of Promised Peace

For Centuries the Old Year Has Died to Tolling Of Bells—With Hope for Better Times.

"Never forget the cheerful and cordial observance of New Year's Day."
—George Washington.

Since early ages, the sound of stone, of hollow resonant wood, and of all the metals that came out of the earth, fashioned as a means by which man could make his gods hear him, have also been used to announce peace and the turning point toward better things of life.

The first bells were fashioned by primitive man of wood. Prior to this time the "click stone," sometimes called the first bell, was a resonant stone suspended by a thong

and struck with a stick or another stone to give the ringing effect.

The first church bell was erected by Paulimus, bishop of Nola, in the city of Campania, Italy, in about 400 A. D. Early bells were baptized. In Switzerland a curious tradition is that all baptized bells take a trip to Rome every year during Passion weeks and get back in time to be rung on Easter morning.

"All they thunder here are harmless!
For these bells have been annointed
And baptised with holy water.
They defy our utmost power."

The science of music of bells has been recognized in some of the leading music institutions of the world. M. Kamiel Lefevre, carillonneur of the Riverside church in New York city where the chief of carillons, by size and scope were installed. He has started a movement for the wide development of carillon music, believing they could be made an element in promoting human accord and genuine sympathy among the many racial groups in America.

Just when bells were first used to announce the end of the old year and the start of the new is not known. Long before the clock had found its way to the tower, they had been used to announce time, often united with the observance of the canonical hours. By this usage a monastery became timemarket to the neighborhood.

RING OUT, WILD BELLS

Ring out, wild bells, to the wild sky,
The flying cloud, the frosty light;
The year is dying in the night;
Ring out, wild bells, and let him die.

Ring out the old, ring in the new,
Ring, happy bells, across the snow;
The year is going, let him go;
Ring out the false, ring in the true.

Ring out the grief that saps the mind
For those that here we see no more;
Ring out the feud of rich and poor,
Ring in redress to all mankind.

Ring out a slowly dying cause,
And ancient forms of party strife;
Ring in the nobler modes of life,
With sweeter manners, purer laws.

Ring out false pride in place and blood,
The civic slander and the spite;
Ring in the love of truth and right,
Ring in the common love of good.

Ring out old shapes of foul disease,
Ring out the narrowing lust of gold;
Ring out the thousand wars of old,
Ring in the thousand years of peace.

Ring in the valiant man and free
The larger heart, the kindlier hand;
Ring out the darkness of the land,
Ring in the Christ that is to be.

—LORD TENNYSON.

Variety of Uses for Old Greeting Cards

Don't throw away the Christmas and New Year's cards you have received. Almost every church and philanthropic society has a committee which collects greeting cards and sends them to institutions, hospitals and organizations that put your greeting card to good use. If you take the trouble to distribute in some such fashion the greeting cards you have saved, you'll earn the satisfaction of sharing with others the joy the cards brought you.

The next time you wrap a gift for someone, glance through the greeting cards you have saved and pick out one with a colorful or appropriate picture on it. Cut the picture out neatly, glue or paste it on your gift wrapping. That's all there is to it and you'll be amazed to find you've transformed a plain package into something original and charming. Fancy gift wrappings are now scarce and seldom found on the market.

ome Front Isn't So Safe Either: Here Are Oddest Of 1944's Freak Accidents and Narrow Escapes

rices of Fate Injure ne, Leave Others olly Unscathed

By PAUL JONES

you may have begun to sus- K-artime days are wacky Ga.

Peop[illegible] stand patiently in line two hours to get a pack of arettes, and then blow their if they miss one section of a olving door on the way back work. Guys who never could nd bananas now howl their ds off because they can't get m. The laundry eventually ds back the right buttons, but shirts are missing. Maids o used to have one night out w allow the lady of the house ave one night in. A customer ublicly commended for slug- g a waitress who said, "Don- a know there's a war on?" ou would think, then, that the ual crop of wacky accidents ld have been even wackier in wartime year of 1944. And you uld be right. They were. A round- by the National Safety council oves that an amazing number of ople still patronize the Whack rket in accidents. To wit:

As two-year-old Margaret Morton Groton, Conn., lay sleeping in home one October night, a navy ne plowed through her bedroom d whisked the blanket off her bed thout touching her. The plane

omed through the other wall of house and eventually crashed o a schoolhouse. Lieut. W. J. cCarthy of Toledo, Ohio, pilot of fighter plane, was injured only ightly. The blanket, undamaged, as found in the wreckage of the lane.

—•—

As an enthusiastic jitterbugger, fc. Ernest Olivier of McCook, eb., often had been "sent" by a t tune. But never as literally as e evening he spun in a super aneuver, grabbed for his pretty ing partner's hand, missed — and unged through the second-story indow of the dance hall.

Nine persons riding cozily in an tomobile driven by Mrs. Adaline lasby of Winslow, Ariz., were in- ured slightly when the car crashed nto the rear of a bus that had topped to discharge a passenger. Irs. Clasby readily explained the ccident. "I failed to see the bus in ime to stop," she said, "because I as nursing my baby."

'Shot' by Lawnmower.

When Pfc. Charles Smith came ome to Claudell, Kan., to re- uperate from wounds received in ree south Pacific invasions, he fig- red he would get some rest from odging shrapnel. But as he atched a power lawnmower at ork in his front yard, the darn ning picked up an old spoon and urled it with such power and ac- uracy that it penetrated the calf of rivate Smith's leg and had to be emoved by an operation. "It's the ame wherever you go," Private mith remarked glumly at the hos- ital.

Pvt. Harley Paul Collins of Kan- as City, Kan., knows exactly how rivate Smith felt. For Private Col- ins, home on furlough, was show- ng his wife how the boys make ooby traps over there. He hooked p a shell, a board, a nail and a iece of wire. Then he tripped, and he homemade contraption went off nd shot him in the leg.

—•—

Paul Lewchick of Coaldale, Pa., nows that prudent people lay in a upply of coal every year. But he elieves few of them do it as liter- lly as he did. He lay in—and under -13 tons of it when he and his car were buried beneath the contents of a coal truck that upset in a near collision with Lewchick's car. Dug out after hard work, Lewchick nursed only minor cuts and bruises, and refrained manfully from ex- plaining that it was soft coal.

At least three persons in the United States now take seriously the expression, "I'd break my neck to do that." One is Gregory Stingel, 13, of Chicago, who put his football jer-

sey on backwards in his haste to dress for a game, tugged fiercely to get it off—and broke his neck. Anne Haldeman, 10, of Doylestown, Pa., snapped a vertebra in her neck while skipping rope. And Mrs. Pauline Strother of Indianapolis, topped them both by dislocating a vertebra in her neck while vigorously brushing her teeth! All recovered.

Closely akin to the neck-breakers was Mrs. James Gallagher of West Hazelton, Pa., who arose so hurriedly to shut off an insistent alarm clock that she dislocated her spine.

—•—

By Remote Control.

The Woodrow Andersons of the St. Louis Andersons are careful folk. So when Mr. Anderson got back from a hunting trip, he placed his rifle on a kitchen shelf, out of reach of the Anderson children. Equally cautious, Mrs. Anderson took all the arrows away from eight-year-old Donald before leaving the house to visit a neighbor. But Don still had the bow. So he merely substituted a yardstick for an arrow and let it fly from the back porch toward the kitchen. The yardstick went through a hole in the screen door and struck the trigger of the rifle. The rifle went off, and the bullet struck Don's little sister, Darlene.

—•—

A good time was had by all but the driver when a grocery truck upset in Bloomington, Calif., setting up an informal but popular self-service grocery in the middle of the street. Eager customers hurried from all sides to fill their needs, their pockets and, in some cases, the trunks of their cars. It was a boon for budgets and ration books.

—•—

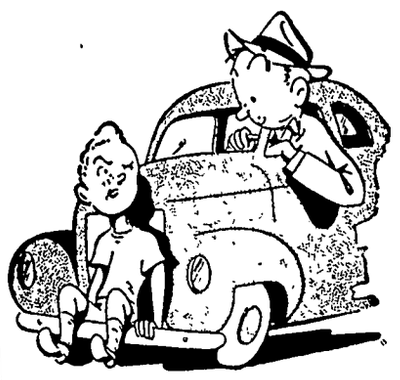
Then there was the strange case of the disappearing woman. It happened in Los Angeles as Mrs. Janiel Reesse gossiped of this and of that with three neighbors. In the middle of a sentence—whoosh! Mrs. Reesse disappeared. Firemen came on the run, extricated her from a forgotten excavation 12 feet deep. Mrs. Reesse's fence-side weight is 325 pounds.

—•—

If men bite dogs to make news, why shouldn't a horse smack an auto? That's what two Norwich, Kan., horses figured one afternoon when they were scared silly by a girl on roller skates. They ran and ran until they encountered a parked car. Then they got their signals mixed. Horse No. 1 went on one side of the car, horse No. 2 on the other. That left only one place for the wagon tongue to go—right through the car. Nobody was hurt.

Auto 'Picks Up' Boy.

The driver of an auto in Chicago wondered why people were pointing and yelling at him one day last August. He stopped the car and



found, of all things, a bewildered four-year-old boy—Timothy Ochall by name—on the front bumper. The car had struck Timmy and carried him two full blocks. Tim got a bump on the head, a few bruises and a flattering amount of attention.

Ed Cloud and Earl Thomas of Knoxville, Tenn., didn't know for a minute whether they were coming or going the day that a train hit their truck. The engine tossed the truck onto the pilot of another locomotive going the other way. A scratch on Cloud's head was the only casualty.

In Chicago, Mrs. Rita Hatfield ran to answer the phone, stumbled over the dog, fell through a glass-topped coffee table, suffered bad cuts on her arms and legs. Doggedly answering the phone, Mrs. Hatfield found the call was from an accident insurance company making a survey. Was she, they wanted to know, covered against accidents in her home? She wasn't.

—•—

C. C. Hardy stepped out of his truck in Sidney, Texas, was struck by a passing car and tossed high into the air. Just before his head struck the concrete pavement, his pocket caught on the high truck door handle and held him suspended in the air.

—•—

On the way home from the Bronx zoo in New York, Henry Carrumit, 13, sought to imitate the monkeys he had seen. He leaped up and down on the subway seat, scratching and grimacing. On an especially high jump an electric fan nipped his scalp. No more monkey business for Henry.

—•—

In Washington Court House, Ohio, hot words must have been exchanged over the phone one day. In any event, Superintendent Fred Rost of the phone company reported that too much talking had overloaded eight switches and set the phone exchange on fire.

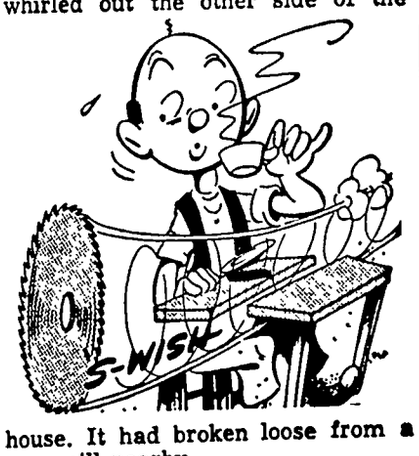
—•—

Louis Boardman halted his automobile in Cleveland to watch the huge gas plant fire there last October. He stepped out for a better view—and fell through an open manhole, the cover of which had been blown off by the gas blast.

Clarence Brown Jr. of St. Louis knows just how a baseball fan feels when he is really burned up. Watching a sandlot game this summer, Clarence was struck by a line drive and promptly burst into flames. The batter had scored a bull's-eye on a pocketful of stick matches. Both the blaze and the batter were soon put out.

Travelling Buzz Saws.

As Henry Butler ate breakfast in Jacksonville, Fla., a buzz saw ripped through the kitchen wall, sliced the breakfast table neatly in two and whirled out the other side of the



house. It had broken loose from a saw mill nearby.

Not so spectacular but just as surprising was the feat of another buzz saw that went A. W. O. L. This one broke loose in Florence, S. C., sailed through the air for a mile and ripped through the roof of a parked car whose owner had just alighted.

—•—

Six-year-old Robert Jullan of Chicago was shooting a dart gun at a target on the wall. The dart had a rubber suction cup on the end to hold when it struck a flat surface. Often it hit glancingly, and didn't cling, so Robert fastened a needle in the suction cup so that the point would stick into the wall.

An elder brother, Frank, 19, entered the room just as Robert shot. The dart struck Frank in the chest. He felt a slight pain but thought nothing of it at the time. Later he collapsed, and was rushed to the hospital.

Surgeons discovered, after considerable hunting around, that there was a needle imbedded near Frank's heart. Little Robert had forgotten about that sharp point on the end of his dart, but it was there all the same, and it came near killing his brother. As it was, a skillful operation removed the needle, and Frank was as well as ever after a few days.

—•—

Top honors in the freak fall department for 1944 go to four-year-old Raymond Davis Jr. of Chicago, who fell three stories from a back porch and suffered only a bruise on the head. A neighbor's clothes line caught him as he fell, bounced him gently a couple of times and then let him fall the few remaining feet to the ground.

—•—

And in Hollywood, Strip Teaser Betty Rowland put so much heart into her work that she bumped one of her swivel-hips against a wall and took off for the hospital, suffering from partial paralysis.

Childish Pranks Bring Tragedy to Thousands of Homes Annually

Thousands of children are killed or injured every year while playing. Ignorance of dangerous things and places, heedlessness and foolhardiness bring tragic consequences. It seems unlikely that the time will ever come when little boys and girls have sense enough not to jump off barns, or leap from one floating ice cake to another, or play in railroad yards, or any of a hundred other perilous stunts.

Here are a few of 1944's cases:

A nine-year-old boy in Long Beach, Calif., crawled into the tool compartment of an abandoned trailer. A companion with a grudge thought it would be a neat trick to slam the door. The lock snapped and the boy remained inside the box for 36 hours before being rescued by a passerby.

Another boy who lived in Chicago was not so fortunate. He hid in the icebox while playing with his dog. The little animal leaned against the door, shutting it and clicking the latch. The boy suffocated before his mother and sister returned.

William was trying to amuse himself on the back porch, because he could not play in the yard. He tossed a rope over the clothesline. Somehow, he got tangled up. A loop coiled about his neck. When he tripped, the loop tightened, and he was choked to death.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for December 31

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE BASIS OF COURAGE FOR THE FUTURE

LESSON TEXT—Matthew 16:13-20; II Peter 3:14-18; I John 3:1-3.

GOLDEN TEXT—Wherefore, my beloved brethren, be ye steadfast, unmovable, always abounding in the work of the Lord, forasmuch as ye know that your labor is not vain in the Lord.—I Corinthians 15:58.

A significant year—1944. But now it is gone. We look into the future and ask ourselves, what next? Shall we enter the new year with fear and trembling, or may we face it with courage?

If man's knowledge and dependability are all we have to stand on, we had better be afraid, but there is a real basis for courage and assurance if we look to God, and to His Word. We have:

I. An Unfailing Christ (Matt. 16:13-20).

It is not enough that men recognize Christ as a teacher, a moral leader, or a man willing to die for His convictions. He must be more if He is to deliver mankind, and, thank God, He is more.

Peter, speaking by the guidance of God, declared Jesus to be "the Christ, the Son of the living God." "Is this what Christ is to you? There are so many shabby, inadequate, inaccurate, limiting views of Christ today. Men will give Him praise, but refuse to give Him the honor due to Him alone. The only Christ that ever really lived is the Christ of the New Testament, and that Christ is the omnipotent and eternal Son of God. Any Christ less than that is a false Christ, a Christ of man's imagination. The Christ of the New Testament can save, but no other Christ is the saviour of men" (**Peloubet's Notes**).

This Christ, the unfailing One, established a victorious Church, built on the acceptance of Him as God. That Church marches on into 1945, as it has entered every other year, assured that as it follows Christ, and preaches God's Word, there is reason for encouragement and joy even in this awful day.

II. An Uplifting Faith (II Pet. 3:14-18).

Christianity is not just a set of rules and regulations. It is a life. It must grow, and it does grow. The really born-again believer cannot stand still in his spiritual experience. He has a faith which must move him forward and upward for the glory of God.

This experience is called growing in grace, which means that each day of this new year we as believers are to become more like our Lord. We are to have stronger convictions, and at the same time we are to be kinder and more loving. We are to be more forgiving, tenderer, more eager to serve Christ.

Christian, have you made any spiritual progress in the year 1944? If not it is because you have failed to take God's provision for your life. You have let the enemies of your soul mislead you (v. 17). You have not been diligent in your Christian life (v. 14).

God does not want any believer to live a defeated life, not growing in grace and in knowledge. And there is the secret—study God's Word in 1945. Learn more about God, and you will grow. That's something to look forward to.

Then note that this is to be in the light of the promised return of Christ (v. 14). He may come in 1945.

III. An Inspiring Hope (I John 3:1-3).

We have already touched on the great hope of the Church—the coming again of our Lord Jesus, and here it is presented as the inspiration to holy living.

Sometimes the world points a finger of scorn at Christians, exposing their weaknesses and failures. It makes us ashamed and we resolve to do better, but we are not discouraged. The world doesn't understand spiritual truth or Christian experience. We believers are "the children of God," born again through faith in Jesus Christ.

All that is involved in this new life does not yet appear. It is hidden under the imperfections and the failures of our lives. But it is there, and one day when Jesus comes again it shall be made known. "We shall be like him." Ah, that makes one square his shoulders and lift up his head to meet 1945 with assurance.

Observe that this hope of Christ's return is not just a theological doctrine to discuss, or a religious slogan to proclaim. It has a tremendously practical application. The one who expects Christ to come back seeks that holiness of life which is spoken of in verse 3.

He is coming. I must be ready to meet Him with joy. So my life—yes, the details of my daily life—must be right. What an incentive to real holy living!

Well, here is real courage with which to meet the new year. May it be a blessed one in your life, no matter what the experiences and circumstances may be. God is in the new year. Let us move forward with Him.

SEWING CIRCLE PATTERNS

To Brighten Winter Wardrobe Make This Smart Accessory Set

Princess Frock

FLATTERING to the youthful and lovely figure, this enchanting princess frock is wonderfully simple to sew. Make it in checked taffeta with ric rac to trim, or in a dark crepe as a basic dress and add your favorite jewelry.

* * *

WORRIED ABOUT BAKING WITHOUT DRY YEAST?

Fleischmann's Fresh Yeast Gives You the Same Good Results!

by Sally Cole
Director of Fleischmann's Testing Kitchen

EVEN though Fleischmann's Dry Yeast has gone to war, you can still bake as easily as ever with Fleischmann's *Fresh* Yeast!

This grand *fresh* yeast gives the same wonderful, dependable results you'd expect from Fleischmann's . . . and you can get as much as you want *whenever* you want.

So if you can't get Fleischmann's Dry Yeast, use Fleischmann's fast-acting *Fresh* Yeast. Use it in this new Quick Roll recipe, next baking day, and see for yourself how satisfactory it is to work with!

And by the way, Fleischmann's Yellow Label Yeast is the *only fresh* yeast that gives you EXTRA vitamins! Order some from your grocer today — a week's supply keeps perfectly in the ice-box.

QUICK ROLLS
½ cup milk 2 tablespoons sugar
1½ teaspoons salt
1 cake Fleischmann's Yeast
½ cup lukewarm water
3 cups sifted flour
3 tablespoons melted shortening

Scald milk, add sugar and salt; cool to lukewarm. Dissolve yeast in lukewarm water and add to lukewarm milk. Add 1½ cups flour and beat until smooth. Add melted shortening and remaining flour, or enough for easily handled dough. Knead well. Shape into rolls, place in well-greased pan, cover and let rise in warm place, free from draught, until doubled in bulk, about 1 hour. Bake in moderate oven (400°F.) about 20 minutes. Makes 1 dozen.

FREE! 40-PAGE RECIPE BOOK! Send for yours today!
Standard Brands Incorporated, Grand Central Annex, Box 477, New York 17, N. Y. Please send me free copy of *The Bread Basket*, containing over 70 recipes for breads, rolls, dessert breads.

As the clock strikes twelve let our hearts reciprocate the sentiment of Tennyson's New Year bells:

Ring out the old,
ring in the new,
Ring out the false,
ring in the true.

☆

May Yours Be a Most Happy and Prosperous New Year

Hancock County Cooperative Oil Association

HERMAN PAUL, Station Manager DWIGHT HUMMEL, Truck Service

JANUARY is the open gate of the year. All around the landscape is dreary and the winds whistle bleakly.

But there's plenty of cheer indoors. A jolly young guest is due to arrive on New Year's Eve, and we're going to give him a royal welcome.

HAPPY NEW YEAR, EVERYBODY!

And loads of good luck to you in 1945.

FRED J. ARNOLD
Repair Shop

IT'S an old, old custom, this ringing of bells and dancing out the Old Year, but the spirit that rides in at the stroke of 12 is as new as tomorrow.

With so many old friends and so many new friends, this New Year of 1945 means more to us than ever before . . . and we hope it means more to you.

W. F. PAVEY

Intricate, Costly Watches Are Made for Collectors

Several modern watches made for collectors have required as long as eight years to design and manufacture, and have cost as much as $15,000, says Collier's.

Besides a dozen time and calendar dials, they contain such meteorological instruments as a thermometer, hygrometer, barometer and altimeter, and such celestial charts as the one that shows the positions of the visible constellations at every hour.

SNAPPY FACTS ABOUT RUBBER

Former Rubber Director Dewey expressed the opinion that the inevitable industrialization of South American and Asiatic countries following the war will mean a world demand for rubber far beyond the capacity of the plantations that existed before the war—an opinion that should encourage the protection of our synthetic plants.

The super-bomber B-29 carries about 5,000 pounds of rubber. Close to two tons are required to make its 30 bullet-sealing fuel tanks alone. There are more than 200 rubber items in this giant fortress of the air.

In war or peace
B.F.Goodrich
FIRST IN RUBBER

Jap pill-boxes and gun emplacements are "knocked out" fast when deadly bazookas go into action! It takes a trained two-man team and battery-power to keep these portable weapons firing. Batteries that once were made for homes and farms are now sent to serve our fighting men. Use your available Burgess Battery sparingly . . . keep them cool and dry. For Free Battery Hints—Write Dept. U-5, Burgess Battery Company, Freeport, Illinois.

WNU—N 51—44

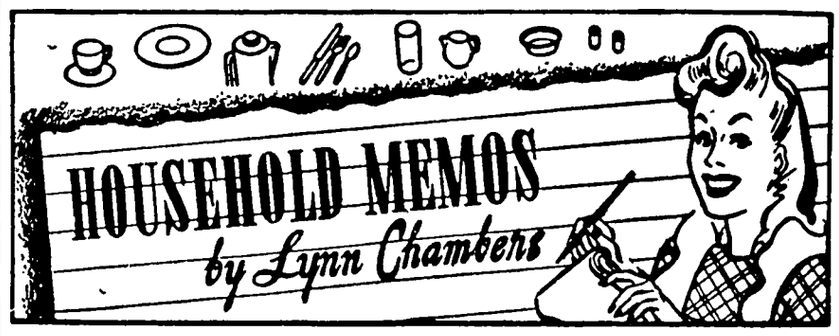
When Your Back Hurts -
And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. It is better to rely on a medicine that has won country-wide approval than on something less favorably known. *Doan's* have been tried and tested many years. Are at all drug stores. Get *Doan's* today.

DOAN'S PILLS



Buffet Style Is Ideal for New Year's Entertaining

Waffles and sausage, an old-fashioned favorite, will help you ring the old year out and New Year in with proper style.

This hasn't been such a bad year, has it? And as we look forward to the next one, we hope for many better things. It's fitting then to usher the new one in with good cheer and hope, and simple but good food to celebrate the occasion.

Whether you're just having your own family in or friends over to welcome the New Year, it should be done in style. Refreshments need not be elaborate but they should be decorated to be in tune with the season.

Here are some sample menus to help you in deciding what to have. They are designed to fit your food budget:

New Years Eve Snack I.
Buckwheat Cakes
Cranberry Conserve Coffee
Assorted Fruit Plate

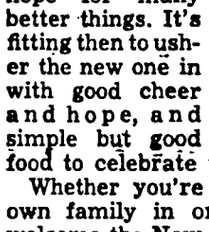
Snack Suggestion II.
Waffles and Pork Sausages
Syrup
Coffee Chilled Pears

Snack Suggestion III.
Spaghetti With Chicken Livers
Garlic Bread Tossed Salad
Lemon Snow With Custard Sauce
Coffee

Snack Suggestion IV.
Welsh Rarebit on Toast
Molded Fruit Salad
Assorted Relishes
Fruit Cake Coffee

Snack Suggestion V.
Cold Sliced Turkey and Ham
Rye Bread Butter Relish
Avocado-Grapefruit Salad
Assorted Cookies Beverage

Guests for a New Year's eve supper will be happy to help themselves from a buffet as informality prevails at the occasion. Set up the waffle iron with a pitcher of batter; or, if you are having a hot dish like Welsh Rarebit or Spaghetti, it can be kept warm in a hot dish or at least on a hot platter. Guests won't mind going into the kitchen for precious seconds.



The recipe round-up for this event has a star-studded collection of dishes you'll want.

Waffles.
2 cups sifted flour
3 teaspoons baking powder
1 cup milk
4 tablespoons melted butter
½ teaspoon salt
3 eggs

Sift together the dry ingredients. Add egg yolks, beaten and mixed with milk, then the melted butter. Fold in egg whites, beaten stiff. Bake in waffle maker and serve with butter and hot syrup.

Cooking Sausages.

To cook pork sausage so that it will be plump, juicy and tender, lay the sausages in a heavy skillet with a small amount of water. Bring them gently to a boil and let them boil for several minutes, until all the water is cooked away. Then let the sausages brown, turning on all sides so they will have an even color. Sausages cooked like this will be done thoroughly with their flavor fully developed. They will not have lost the plumpness that is so attractive when they are served.

Spaghetti With Chicken Livers.
(Serves 6 to 8)
½ pound spaghetti
2 tablespoons shortening
1 onion
2 cups canned tomatoes or 1 can tomato soup
¼ teaspoon pepper
¼ pound grated American cheese
½ pound fresh mushrooms
1 pound chicken livers
1 teaspoon salt

Cook spaghetti in boiling, salted water until tender. Drain and rinse in cold water. Heat fat in skillet and brown finely cut onion in it. Add spaghetti, tomatoes, salt and cheese. Cook slowly until well blended. Serve in a casserole or on a platter, well garnished with fried mushrooms and sauteed chicken livers.

Molded Fruit Salad.
(Serves 8)
1 package lemon-flavored gelatin
1 cup hot water
1 cup maraschino cherry juice and water
1 cup sliced, seeded grapes
2 pears, peeled and sliced
¼ cup maraschino cherries, sliced
¼ cup finely minced celery
1 pink grapefruit, peeled and sectioned

Dissolve gelatin in hot water. Add cold cherry juice and water. Let cool. When slightly thickened fold in fruit and pour into a mold. Let chill until firm. Unmold on lettuce and garnish with clusters of grapes in pear halves. Serve with sour cream dressing.

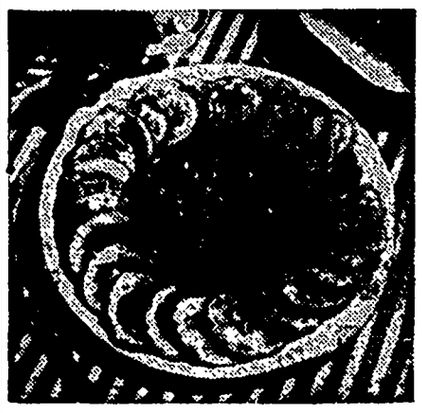
Welsh Rarebit.
(Serves 6)
2 tablespoons butter
½ teaspoon salt
½ pound cheese, cubed
¼ teaspoon soda
Dash of cayenne
1 egg
½ teaspoon mustard
½ cup thin cream

Melt butter in top of double boiler and then add cheese. Stir and cook until cheese is melted. Add beaten egg, seasonings, soda and cream. Stir constantly until smooth and thick, then serve over toast points, garnished with parsley.

There's nothing better than a chewy cookie for nibbling after the main dish has been heavy. In fact, many people would rather have a good cookie than anything else to top off the snack. You'll like these cookies that are taste - tempters above anything else you ever had:

Dream Bars.
First mixture:
½ cup butter or substitute
½ cup brown sugar
1 cup sifted flour

Mix above ingredients and pat into a shallow pan. Bake in a moderate oven 15 minutes.



Cranberry Jelly and Pancakes offer simple but delicious fare for the New Year eve celebration. It saves fuss and dishes.

Second mixture:
2 eggs
1 cup brown sugar
1 teaspoon vanilla
2 tablespoons flour
½ teaspoon baking powder
¼ teaspoon salt
1½ cups coconut
1 cup nutmeats

Beat the eggs, add sugar and vanilla. Blend in dry ingredients, coconut and nuts. Pour mixture on top of first baked mixture and bake in a moderate oven for 20 minutes. When cooled slightly, add:

Third mixture:
¾ cup powdered sugar
2 tablespoons butter or substitute
Grated rind of 1 orange
Orange juice

Cream sugar and butter. Add orange rind and enough juice to moisten to spreading consistency. Spread on top of cookie mixture and then cut cookies into bars.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

LYNN SAYS:

Here's How To Do: If you're serving bacon, remember it requires slow cooking, careful watching and removal from the heat when it's crisp but not brittle.

To pan-fry bacon: Lay strips in a cold frying pan and cook over low flame, turning them occasionally and pouring off fat as it accumulates.

To broil: Place strips on broiler rack or pan about 3 to 3½ inches below moderate heat. Turn when top is lightly crisped, broiling about 2½ minutes to each side.

To bake: Lay strips in shallow pan, allowing fat edges to overlap the lean edges. Place on top shelf of oven set at 400 degrees. Bake without turning for 12 or 15 minutes until crisp.

Explaining the 7½ Cent 5 Cent Cigar

("Under an OPA order, the cigar industry is permitted to charge 7½ cents for the old-time 5-cent cigar that has been selling for 6. This will mean a saving of 50 million a year to cigar smokers who have been forced to pay 10, 15 and 20 cents for a cigar about the quality of the former 5-cent smoke."—News item.)

"I don't quite get it."

"It's simple, if you stand still and don't twitch."

"Look, how will it save smokers 50 million if they pay 7½ cents for the new cigar?"

"The seven-and-a-half-center will be the same as the old nickel cigar."

"But there ain't been a nickel cigar in years."

"Yes there has, but it has cost six cents."

"Okay. I just took another aspirin. Go ahead."

"So OPA authorizes you to pay seven and a half cents for the five-cent cigar for which you have been paying six cents."

"How does that save me 50 million smackers?"

"Because for a cigar as good as the old-time nickel cigar you have had to pay 10 cents."

—•—

"Go on, I'm still on my feet."

From now on you only pay 7½ cents for what you would have to pay 10 cents."

"But I never bought 10-cent cigars."

"Okay. You'll be saving lots of money."

"How?"

"It's easy. By smoking the cigar you may soon get through OPA for 7½ cents you will be saving money on the cigar you never buy for 10 cents."

—•—

"But I asked for a seven and a half cent nickel cigar today and they ain't out yet."

"Did you ask for the 7½ cent nickel cigar that cost 6 cents up to the time they thought up the 7½ cent cigar that will cost 10 cents?"

"Yeah."

"That leaves you even."

"How?"

"If you can't get the seven and a half cent cigar you ain't out anything, provided you don't buy something else that costs more."

"Is that ad valorem or ne plus ultra?"

"It's without matches, due to the fact OPA has not acted on the free matches now selling for one cent that may be raised to three cents to keep you from burning your fingers at the pre-war level."

"Where are we now?"

"Fourth down, in the shadow of the cigar store Indian, 20 yards to go."

"Got a cigarette?"

"A saboteur, eh!"

• • •

Hitler Explains His Silence

I cannot talk about the war—
There's nothing I can say;
I have so many things to do
I cannot get away;
To speak is quite impossible—
No message can I bring,
For I've discovered suddenly
The war's a pressing thing.

The mike and I were lovers once
But we are parted now;
Affairs that keep me silent, ach!
Are pressing on my brow;
My viewpoint's undergone a change
And now at words I balk;
At last I think it nice to let
The other fellow talk.

I never thought the day would come
When far off I would stew
And let another make my speech. . .
(And neither, friends, did you!)
I never dreamed there'd come a time—
(So mark this day with chalk!)—
When Germany would hear these words:
"Der Fuehrer cannot talk!"

I realize you're mystified
When Himmler reads my stuff;
It must seem strange to hear my speech
Read from another's cuff;
But still I greet you from afar
Where I must work and sweat
Too busy to leap to the mike
In wartime . . . WANNA BET?

• • •

"As long as only I myself was the object of some persecutions among certain Germans I could be magnanimous and overlook their actions. But whoever use a dagger or bomb today against the State will be destroyed without mercy."—Hitler.

—•—

You remember, of course, how magnanimous Adolf used to hand things over to Himmler in the interest of magnanimity, and they were popularly called the "Magnanimity Boys."

• • •

"The OPA announced that on Christmas restaurants would not be allowed to charge more than 15 cents extra over what they charged for turkey dinners a year ago."—News item.

—•—

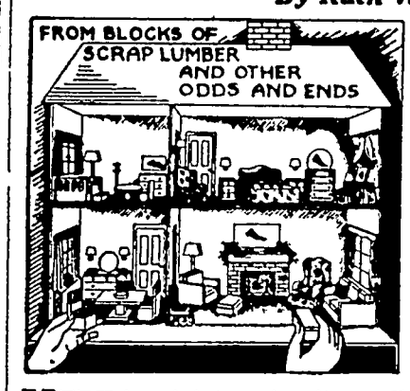
Wanna bet?

• • •

The Lotus Club of New York which has been for men only for 74 years has capitulated and gone over to the ladies. It was about the last place in New York where a man could hide from his wife.

Oh What Fun It Is to Make Furniture For That Charming Little Doll House

By Ruth Wyeth Spears



HERE is miniature furniture all carefully scaled to reproduce actual size pieces. Any little girl will love the sturdy five-inch-long upholstered sofa and the lounge chair with matching ottoman. They are easy to make, too, and so is the chair. It is covered with a flower print.

The dining room furniture is all made of straight blocks but the chairs are smartly upholstered in bright oilcloth to simulate leather. The bed with upholstered head piece is especially glamorous and the dainty dressing table has a matching stool made of half of a spool with padded top and full skirt. The nursery is also well furnished with attractive pieces made from things you have on hand.

• • •

NOTE—Pattern 274 gives actual-size patterns or dimensions for all the pieces of this furniture with illustrated directions for making. Patterns and directions are also given for the lamps and other accessories. Pattern 273 gives all directions for making the doll house. Patterns are 15 cents each. Send direct to:

MRS. RUTH WYETH SPEARS

Man Could Be Quite Sure Of Getting His Dog Back

A man dashed into the police station at midnight.

"My wife," he gasped. "I want to find my wife! Been missing since eight this morning!"

"Particulars?" asked the sergeant. "Height?"

"I—I don't know."

"Do you know how she was dressed?"

"No, but she took the dog with her."

"What kind of dog?"

"Brindle bull terrier, weight 53 pounds, four dark blotches on his body, shading from grey to white, three white legs, and right front leg brindled all but the toes. A small nick in his left ear. And—"

"That'll do!" gasped the sergeant. "We'll find the dog!"

January 3 4
MUSIC IN MANHATTAN
Anne Shirley, Denis Day

Mrs. Lena Schroeder entertained at her home Wednesday evening at a party the cousins of her daughter, Mrs. Cleo Ingle and family of Waukesha, Wis., who were here on a visit.

Sgt. Asa Gibbs was home on furlough from the northwest and enjoyed spending Christmas at the home of his parents, Mr. and Mrs. Harry Gibbs and family. He returned to his base Tuesday.

Miss La Vohn Schawin, who attends a beauty college at Des Moines, spent the week end and Christmas visiting with her parents, Mr. and Mrs. Werner Schlawin. She returned to Des Moines Tuesday.

Mr. and Mrs. Lester Stille and daughters, Ruth and Lois, and Mrs. Blanche Frederick and LaRayne enjoyed Christmas dinner at the Lee Anderson home at Charles City.

Mr. and Mrs. Art Wellemeyer had as their Christmas day dinner guests their children and families: Donald Bacon and family of Leland; Mr. and Mrs. Burton Hanson of Wesley, and Mr. and Mrs. Dick Moehler of Dayton, Ohio.

Mr. and Mrs. Julius Priebe had as their guests on Christmas day to dinner Ervin Priebe and family; Mr. and Mrs. Herman Schmidt and family; Mr. and Mrs. Fred Schmidt and family; and Mr. and Mrs. Paul Goll and family.

Mrs. Louise Rosendahl entertained the following at her home on Christmas day to dinner: Walter Rosendahl and family; Verner Priebe and family; Verner Schlawin and family; and Irwin Rosendahl and family.

Mr. and Mrs. Raymond Barz and son, Leland Ray, and Mr. and Mrs. Curtis Waddingham were dinner guests Christmas day at the Herman Thieman home.

Mrs. Fred Schlichting is on the sick list this week.

Cadet Nurse Gertrude Grosshuesch came Tuesday evening from Marshalltown to spend a few days visiting with her parents, Rev. and Mrs. Grosshuesch. Reuben Grosshuesch arrived home the latter part of the week from the Seminary at Plymouth, Wisconsin.

Mr. and Mrs. Edwin Josten and daughter Marcille entertained to dinner on Christmas Day Mr. and Mrs. Fred Becker and daughter, Mrs. Cecil Katter, and Mrs. Peter Josten.

NEW YEAR IS HERE!

It is easy to tell. All the bustle and merriment; the good fellowship. We are wishing you and You, and YOU all of the good things that 1945 can possibly bring.

QUANDT'S CAFE
Mr. and Mrs. Conrad Quandt

Friends and Customers:

It has been a pleasure to have served you in the past year, and your loyalty is fully appreciated.

We are faced with a larger task and transportation is the greater factor. We hope, through our efforts, to merit a continuance of confidence and good will, and we expect to serve you in our usual way — service efficiency.

EXTENDING YOU THE SEASONS GREETINGS.

Motor Freight Company

Local Happenings

Klemme and Vicinity

Happy New Year, everybody!

The Klemme Red Cross ladies need YOUR help every Tuesday.

Mrs. Rose Lewis entertained to dinner Sunday Mr. and Mrs. C. E. Kluckhohn.

Mr. and Mrs. R. W. Elder were Christmas day dinner guests at the John Waddingham home.

Martin Karsjens is enjoying a 10 day vacation from his duties on the Rock Island railroad.

Art Kudje and family and Joe Johnson were dinner guests Christmas day at the Stewart Hevilin home north of Klemme.

Mr. and Mrs. Wes Schuldt entertained to dinner on Christmas day Mrs. Francis Ridder, Miss Minnie Lau and Ben Lau.

Mr. and Mrs. Herman Paul spent Christmas in Des Moines with their daughter, Mrs. Emily Epps and children.

Miss Irene Harms, who teaches at Newton, is spending her holiday vacation in Klemme at the J. C. Thomas home.

Dr. and Mrs. W. F. Missman were entertained to dinner on Christmas Day at the home of the latter's sister at Mason City.

Leslie Hartbeck and family were dinner guests on Christmas day at the home of Mr. and Mrs. Hollis Bokelmann at Ventura.

Mr. Herbert Bailey and daughter Mrs. Merril Wilcutt, of Keokuk, spent Sunday visiting at the C. A. Larsen home.

Miss Betty Etchen of Des Moines spent the week end and Christmas with her parents, Mr. and Mrs. John Etchen.

Pvt. LaRayne Stille arrived in Klemme last week from a camp in Texas to spend Christmas with his mother, Mrs. Blanche Frederick and other relatives here.

Mr. and Mrs. Kermit Scheli and baby went to Clarion Saturday evening for the week end and to spend Christmas with Mrs. Schlei's mother.

Mr. and Mrs. Will Waddingham entertained to dinner at their home on Christmas day Roy Waddingham and family and Martin Karsiens and family.

Mr. and Mrs. Fred Kluckhohn, Mrs. G. W. Kluckhohn and Sadie Turgasen were entertained to dinner on Christmas day at the Carold Larson home.

Mr. and Mrs. Herman Back entertained to dinner Christmas day Frank Kluckhohn and son Franklin, and Mr. and Mrs. Lynford Back and Roxanna.

Mr. and Mrs. Wayne Pavey and daughter, Carol Ann of Webster City spent Christmas day at the parental Mrs. Woodhouse home at Plymouth.

Mr. and Mrs. Cecil Bridges and family of Sheboygan, Wisconsin, came to spend the week end and Christmas visiting with Klemme relatives and friends.

Mrs. Clara Barz and daughter, Avis, entertained to dinner on Christmas day Aldon Hagen of Hanlontown and Mrs. Lena Schroeder.

Pvt. Otho Keraus came from the Army Air Base at Sioux City Thursday and his wife came from Minneapolis to spend the week end and Christmas in Klemme at the parental W. C. Keraus home.

Mr. and Mrs. C. G. Waterman entertained to a goose dinner on Christmas Day Mrs. Rosa Mitchell of Swea City; Mrs. Lyle Wilcox; Mrs. Mary Waterman, and Mrs. Antonio Keraus.

Miss Eunice Larsen came home the latter part of the week from the University of Iowa to spend the Christmas vacation visiting at the home of her parents, Mr. and Mrs. C. A. Larsen.

Mr. and Mrs. Summer Trumbell went to Des Moines Saturday evening and spent Sunday and Christmas day at the Clair West home. Rosemary West acompanied them to Klemme Monday afternoon.

Mr. and Mrs. Ben Ridder entertained to dinner on Christmas day Mr. and Mrs. Frank Ward; Mrs. Aug. Ridder and Walter of Leland; and Mr. and Mrs. Harold Ridder of Nora Springs.

Mrs. Swanetta Haefner and son, Dennis, went to Applington to spend the week end and Christmas at the home of Mr. and Mrs. Henry Walters, parents of Mrs. Haefner.

Mr. and Mrs. Ed. Jacobs entertained to dinner on Christmas day Mrs. Louise Wistey of Clear Lake; Bob Gisel and family and Leo Esbeck and family of Ventura, and Mr. and Mrs. George Lawhorn.

Mr. and Mrs. Cleo Ingle. who were called here by the death of Grandma Schroeder, returned to their home at Waukesha, Wisconsin last Thursday.

Christmas day dinner guests at the Art Kluckhohn home at Garner were Mr. and Mrs. Lew Abele and daughter, Hilda; Harold Abele and family; Mrs. Bernard Pringnitz and children, and Dale Greiman.

Hope for Tomorrow

Whatever the past year may have brought, we all look forward hopefully to 1945 as a harbinger of better days to come.

It is our hope, too, that in the New Year we will be more than neighbors . . . that we will become *better* neighbors.

Season's greetings to one and all.

Klemme Girl Scouts Distributed Twenty-five Christmas Boxes

The Klemme Girl Scouts, under the leadership of Mrs. J. A. Chambers and Mrs. Sumner Trumbell went around town Wednesday eve singing Christmas carols to the old folks and shut-ins and also distributed twenty-five Christmas boxes. Friday eve they went to the home of Mrs. Trumbell and enjoyed a Christmas party and exchange of gifts and played games, after which they enjoyed a nice lunch.

It is reported that Will Ridder is ill at his home in Waterloo.

THE SEASON'S GREETINGS

19 ★ 44

WISHING YOU A HAPPY NEW YEAR
In so many joyful ways,
One taht fills our heart with gladness
Through a year of happy days.

DON CHRISTIANCE
Barber Shop

THERE are many paths in life but the path that leads to home is the one we all love best. May 1945 bring to your home a joyous strengthening of home ties and old associations, and a happy gain in the number of those you count as friends. May it bring you more health, more prosperity, more joy of living.

This is the sincere New Year wish of

ED MELVIN LEE

More Power to You!

YOU KNOW how a snowball gets bigger and bigger as you roll it along. That's the way we want it to be with you. As 1945 rolls along we hope that with each day your opportunities will become bigger and better —and that each day will add measurably to your store of blessings.
